Electricity Needs You

I Will Train You At Home

Stop right here. This is YOUR opportunity! Electricity is calling you, and the Electrical Business is in for a tremendous increase. But it needs more trained men—at big pay. By my **Home Study Course** in **Practical** Electricity I can train you for these positions.

FREE!

BIG ELECTRICAL OUTFIT

A fine outfit of Electrical Tools, Instruments, Materials, etc., absolutely FREE to every student. I will also send you FREE and fully prepaid—Proof Lessons to show you how easily you can learn Electricity and enter this splendid profession by my new, revised and original system of Training by Mail.

Radio Course FREE!

Special newly-written wireless course, worth $45.00, given away **free. Full particulars when you mail coupon at right.**

Earn Money While Learning

Early in my **Home Study Course** I show you how to begin making money in Electricity, and help you get started. No need to wait until the whole course is completed.

EARN $70 TO $200 A WEEK

You've always had a liking for Electricity and a hankering to do electrical jobs. Now is the time to develop that talent; there's big money in it. Even if you don't know anything at all about electricity you can quickly grasp it by my up-to-date, practical method of teaching. You will find it intensely interesting and highly profitable. I've trained and started hundreds of men in the Electrical Business, men who have made big successes. YOU CAN ALSO

Be a Big-Paid ELECTRICAL EXPERT

What are you doing to prepare yourself for a real success? At the rate you are going, where will you be in ten years from now? Have you the specialized training that will put you on the road to success? Have you ambition enough to **prepare** for success, and get it?

You have the ambition and I will give you the training, so **get busy.** I am offering you success and all that goes with it. Will you take it? I'll make you an ELECTRICAL EXPERT. I will train you as you should be trained. I will give you the benefit of my advice and 20 years of engineering experience and help you in every way to the biggest possible success.

VALUABLE BOOK FREE

My book, "How to Become an Electrical Expert," has started many a man on the way to fortune. I will send a copy, free and prepaid, to every person answering this advertisement.

ACT NOW!

Good intentions never get you anywhere. It is action alone that counts. NOW IS THE TIME TO ACT.

Buried in Mud and Water

Years Later, Gun Is Fished Out and Used

A gun may be down, but it's never out. At least that's what John R. F. Workman, of Montana, thinks of the Iver Johnson. Read what he says:

"I have one of your shot guns which I recovered from a deep hole in the bed of a lake, after being buried in mud and water for a number of years. This gun was in perfect shape with the exception of the mainspring, which broke while I was cleaning it. Inside, the barrel is as perfect as if made last week."

Iver Johnson Champion Single Barrel Shot Gun

Barrel and lug of high carbon steel, forged in one piece. Barrel, full choke, which assures close, hard shooting. Adjustable mainspring tension bar; compensating locking bolt which automatically takes up wear; safety rebounding hammer; piano-wire coil springs, heat treated, where necessary; real black walnut stock and trap style forend beautifully finished; genuine hard rubber butt plate. Various gauges and styles—including the Matted Top Rib and the .410.

Send for Free Booklet

Catalog "A" illustrates and describes Iver Johnson Champion Single Barrel Shot Guns, Hammerless Double Barrel Shot Guns and the famous Iver Johnson Safety "Hammer the Hammer" Revolvers.

IVER JOHNSON SHOT GUNS

17 Years Without Repairs

How Is That for a Record?

It looks as if H. L. Westbrook, of New York, holds the long-distance record. He has been riding an Iver Johnson Bicycle 17 years without spending a penny on repairs.

And yet that is the sort of service every Iver Johnson is built to give.

The Iver Johnson Truss-Bridge construction assures absolute rigidity, preventing give and sway of the frame during fast pedaling, pushing up hills or through sand. Also made in Drop-Bar models.

Built to Last

The high carbon, seamless steel tubing used in Iver Johnson frames and forks has a tensile strength of 90,000 pounds to the square inch! Fork crowns, cranks, fork-ends, handle-bar stems, seat posts, and other parts are of genuine drop-forgings made in our own plant.

The two-piece crank set and two-point ball bearings will outlast any other type, and make pedaling easy as walking. The crank set is perfectly balanced, accurately aligned, and holds true to adjustment.

Iver Johnson Bicycles are made to fit all sizes of men and women, boys and girls. Colors: Ivory Black, Copper Bronze, Poilu Blue, Iver Johnson Blue, and Maroon. Every model is finished like a high-priced automobile, with five coats of enamel hand-rubbed, and all nickel plating over copper. Best guaranteed equipment.

Write for Free Booklet

Catalog "B" illustrates and describes the complete line of Iver Johnson Bicycles, as well as Iver Johnson Velocipedes.

HAMMER THE HAMMER

IVER JOHNSON BICYCLES

I Tell You

This Free Book Will Show You The Way to Amazing Salary Increases

I only ask that you risk two cents on the strength of my word that the contents of this amazing book will show you the way to a prosperity that you never dreamed possible, in a fascinating field that you never thought of entering. This book is now free. Read my offer.

By J. E. GREENSLADE

First let me ask you two questions. One: Do you consider that you are as intelligent as the average mail-clerk, farmhand, office clerk, mechanic or bookkeeper?

Second: If you suddenly found yourself with all the money you needed to spend, wearing the best clothes, living in a fine neighborhood, driving a good car and belonging to the best clubs—but having to make good in a job that paid $10,000 a year, would it scare you? There are men to whom $10,000 a year is so much that the idea of earning it themselves never occurs to them. They will always be in routine jobs at low pay. Their dreams will never come true. But yours will if you will absorb what I am going to tell you.

Now, in one quick step you can enter the field where opportunities in your favor are ten to one—the selling field. You know that Salesmen top the list of money-makers—that the salesman is his own boss—that his work is fascinating, interesting and highly profitable! But the thing you doubt is your own ability. All right, but you

EMPLOYERS

are invited to write to the Employment Dept. of the N. S. T. A. We can put you in touch with just the men you need. No charge for this service to you or our members. Employers are also cordially invited to request details about the N. S. T. A. Group Plan of instruction for entire sales forces. Synopsis and charts sent without obligation.

can become a first-class, money-making salesman in an amazingly easy way.

Proof That Salesmen Are Made —Not "Born"

The story of six men who once thought salesmen were "born," who did not believe they were "cut out for selling," is on this page.

Thousands of men like these six men who formerly thought salesmen were "born" are now enjoying magnificent earnings in the selling field. They were bookkeepers, mechanics, farmers, clerks —even doctors, lawyers and ministers— but in a few months after writing to the National Salesmen's Training Association they were out in the field selling—and making more money than they had ever hoped to make.

Sounds remarkable, doesn't it? Yet there is nothing remarkable about it. Salesmanship is governed by rules and laws. There is a certain way of saying and doing things, a certain way of approaching a prospect to get his undivided attention, a certain way to overcome objections, batter down prejudice, and overcome competition.

Just as you learned the alphabet, so you can learn salesmanship. And through the NATIONAL DEMONSTRATION METHOD — an exclusive feature of the N. S. T. A. System of Salesmanship Training—you gain actual experience while studying.

Years of Selling Experience in a Few Weeks

The N. S. T. A. System of Salesmanship Training and Employment Service will enable you to quickly step into the ranks of successful salesmen—will give you a big advantage over those who lack this training. It will enable you to jump from small pay to a real man's income.

READ!

$1,350 a Month
A. H. Ward, Chicago, earned $1,350 last month. Has averaged $1,000 a month the last year.

$100 a Month to $100 a Week in Only 3 Months
H. D. Miller, another Chicago boy, was making $100 a month as stenographer in July, 1922. In September, 3 months later, he was making $100 a week as a salesman.

$150 to $500 a Month
W. P. Clenny, of Kansas City, Mo., stepped from a $150 a month clerkship into a selling job at $500 a month. He is making $850 a month now.

$6,500 a Year
M. V. Stephens, of Albany, Ky., was making $25 a week. He took up this training and now makes five times that much.

Small Pay to Big Earnings
J. H. Cash, of Atlanta, Ga., exchanged his $75 a month job for one which pays him $500 a month.

Now Sales Manager at $10,000 a Year
O. H. Malfroot, of Boston, Mass., stepped into a $10,000 position as a SALES MANAGER—so thorough is this training. All these successes are due to this easy, fascinating and rapid way to master certain invincible secrets of selling.

Remarkable Book, "Modern Salesmanship," Sent Free

With my compliments I want to send you a most remarkable book, "Modern Salesmanship."

It will show you how you can easily become a Master Salesman — a big money-maker —how the N. S. T. A. System of Salesmanship Training will give you years of selling experience in a few weeks; how our FREE Employment Service will help select and secure a good selling position when you are qualified and ready. And it will give you success stories of former routine workers who are now earning amazing salaries as salesmen. Mail the coupon to-day. It may be the turning point in your life.

YOU are Wanted For a *Better Job*

THAT was the good news they brought him just a few short months ago. Then he held an ordinary job, working long and hard on small pay. *Today* he is a high salaried Draftsman earning nearly $100 a week. How did it happen? It isn't a long story, because it's all so simple—so easy. You can do just what he had done if you'll start by reading every word—clear down to the coupon that marks your way to better pay.

It all started one evening while he was sitting at home—reading. He saw the advertisement of the COLUMBIA SCHOOL OF DRAFTING and he knew it was his opportunity to earn from $50 to $100 a week, in an uncrowded field with a big, sure future. He sent in the coupon. Later he enrolled for the COLUMBIA course. Today he's making *real* money. His brain is working as well as his hands. He's standing on the threshold of a brilliant future with all that it means—independence—money—success—happiness.

MADE $275 EXTRA IN 3 DAYS

He recently received $275 for one drawing that he made in spare time in three days.

HOW ABOUT YOU? Are you working up hill or down? Count the money in your pay envelope next pay day. You'll find the answer there.

MAKE $50 to $100 A WEEK. COLUMBIA will train you to be an expert Draftsman in your spare time at home by mail. There's lots of room for you if you will act now.

FREE BOOK COUPON
COLUMBIA SCHOOL OF DRAFTING
Dept. A, 14th and T Sts. N. W.
Washington, D. C.

Please send me without charge your free illustrated book on Drafting, telling me how I can secure your complete Home Study Course and your help in securing a position as Draftsman.

Name.....

Address .....

City.....

State.....Age.....

PROMOTION IS QUICK. WE'LL QUALIFY YOU for a high-salaried position in the Drafting field and keep you in touch with openings for Draftsmen in the big machine shops, industrial plants and United States Government departments. Men who start as Draftsmen are often advanced to Chief Draftsmen, Chief Engineers, Production Managers and so on.

GET THE *RIGHT* TRAINING. No books are used. You start on actual drawing work the day you receive your first lesson.

YOU NEED NO PREVIOUS TRAINING. The course is easy to understand and easy to follow. Many students are qualified even before they complete the coures.

U. S. CIVIL SERVICE COMMISSION NEEDS DRAFTSMEN

The following are a few of the many positions open in Government departments from time to time. The salaries are starting salaries, subject to increase. Practically all of them carry a bonus of $240 a year additional.

Architectural Designer, $4,000.
Chief Draftsman Naval Aircraft Factory, $15.04 per day.

Aeronautical Draftsman—Field Service of Navy Dept., $5.20 to $12.00 per day.

FREE BOOK Send in this coupon today. Immediately on receipt of it we will send you our book, which tells about Drafting and its opportunities for you as well as the special easy method of learning Mechanical Drafting through COLUMBIA methods.

THE COLUMBIA SCHOOL OF DRAFTING

FREE Drafting Outfit

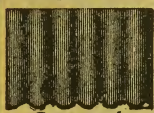
We give you Free with our Course, this professional Drafting outfit. It is yours to keep when you complete the Course.

Lowest Prices Ever Made on World's Best ROOFING Freight Paid

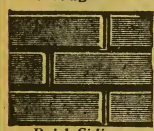
"Reo" Metal Cluster Shingles

"Spanish" Metal Tile

Edwards Patent "Grip Lock"



Corrugated



Brick Siding

We sell direct to you and save you all middlemen's profits. We ship everything—roofing, siding, ceiling, wallboards, etc.—freight prepaid. We cannot quote you our low factory prices here, but send for our Big Roofing Book and see for yourself that our prices are lowest ever quoted.

"Reo" Metal Shingles

Have great durability. Many customers report 15 and 20 years' service. Guaranteed fire and lightning proof. They save you money, give you better quality and lasting satisfaction.

Edwards Exclusive Tightcote Process

makes Edwards Metal Shingles, Metal Spanish Tile, Reo Cluster Shingles, Grip-Lock Roofing and other Roofings, Ceiling, Siding, etc., absolutely rust-proof. Not a pin point of space exposed to weather

Our Patent Interlocking Device

prevents warping, buckling or breaking. Protects nail holes—nails are driven through under layer; not exposed to weather. No special tools required. Easy to lay.

The Galvanizing Test

Take any other galvanized steel—bend it back and forth, hammer it down. Great scales of galvanizing will flake off. Apply this test to Edwards Metal Roofing—you'll find no flaking. Edwards products are superior—yet sell for less than other materials.

Samples FREE Send coupon for World's Greatest Roofing Book and Free Samples. Book will convince you that we can save you a lot of money on any kind of roof you need, also on ceiling, siding, wallboard, etc. Fill out coupon and mail to-day. Ask for Book No. 95.

THE EDWARDS MANUFACTURING COMPANY

Pick Your Own Job!

I'll Help You to Get It

NO special experience required to get one of these attractive Civil Service positions. All you need is to pass an examination with high enough rating—and it is easy if you prepare yourself. And that's my business. For eight years I was member and later Secretary on the Board of Examiners for the Second Civil Service District. I have trained thousands of men and women now getting the fine pay of splendid Government Jobs. That's the best proof that I know just how to train YOU too, so you will SURELY PASS with a high mark; so you will SURELY QUALIFY for one of the first positions open.

Good Pay—Short Hours—Steady Work

Get rid of the bugaboos of hard times, strikes, layoffs, job-hunting that you must always worry about in ordinary jobs. Don't stick in the low-pay jobs that start you off in a rut and keep you there. Work for Uncle Sam in a fine position you can't lose for any religious, political or personal reasons. Here's a wonderful position you can easily get that pays you from $1,600 to $2,300 to start; where there are no strikes or lockouts, where you get vacations with pay, retirement pensions, 8-hour day, automatic yearly salary raises, unlimited opportunities for quick advancement and many other advantages you can't get anywhere else!

RAILWAY MAIL CLERK
$1600 to $2300 a year
Work 6 days, then 6 days off. Paid all the time. Opportunity for travel. 15 days' vacation and 10 days' sick leave with full pay.

POST OFFICE CLERK
$1400 to $1800 a year
Special Clerks at $2000
15 days' vacation and 10 days' sick leave every year with full pay. Promotion to positions paying up to $5,400 a year. Increase in pay expected soon.

CITY MAIL CARRIER
$1400 to $1800 a year
15 days' vacation and 10 days' sick leave every year with full pay. Good chance for rapid promotion to bigger pay. Increase in pay expected soon.

R. F. D. MAIL CARRIER
$1800 to $2600 a year
15 days' vacation and 10 days' sick leave every year with full pay. A fine position for men in rural districts. Increase in pay expected soon.

CUSTOMS INSPECTOR
$1000 to $3300 a year
Yearly bonus of $240. 30 days' vacation and 30 days' sick leave with full pay. 7-hour day. *Extra pay for overtime.*

POSTMASTER
$1000 to $2500 and up
This is a position of great importance. In small towns a position that can be made very profitable.

INTERNAL REVENUE MEN
$1400 to $3000 a year
Yearly bonus of $240. 30 days' vacation and 30 days' sick leave with full pay. 7½-hour day. Positions open everywhere.

DEPARTMENTAL CLERK
$1100 to $2000 and up
Yearly bonus of $240. 30 days' vacation and 30 days' sick leave with full pay. 7½-hour day. Work in Washington, or near home.

FREE My New Book "How to Secure a Gov't Position"

If you are a citizen, eighteen or over, you can get the Civil Service Position you want. Write to-day for my new free book that tells all about the Civil Service—the jobs open, what you must do to get the job, the pay, the vacation, and all the big advantages of Government Positions. Find out just how I help you pass your examination with such high marks that you will be one of first on your list to be offered a steady, good-paying position in the Civil Service in Washington, or near your home. Mail the coupon or a postal today.

The World's Biggest Business Needs You!

You needn't slave away at small wages another minute — I'll train you **at home** in your spare time for a $75 to $200 a week position. **Unlimited opportunities** for Cooke trained experts.

EARN $75 TO $200 A WEEK!

Don't sell your time for a penny less! **You don't need to** when you have my JOB-WAY training! As Directing Engineer of the great Chicago Auto Shops I know exactly what training you need and I GIVE YOU THAT TRAINING, right in **your own home,** with actual JOBS, not books. I'll train you successfully regardless of your age, education or experience, and I'll refund every cent of your money if you are not entirely satisfied.

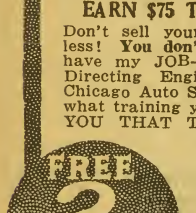
Start to Make Money QUICK—Like Morriston and Hundreds of Others!

M. J. Morriston, Parkersburg, W. Va., had **no experience** when starting my training. When less than half way through his JOB-WAY course, he says: "What I have already learned is worth over $500 to me. I have gone into business and I'm making over $50 a week clear, with wonderful prospects." And what this man and **hundreds of others** have done, **I'll help you to do!**

M. J. Morriston, Parkersburg, W. Va.

No Other Training Like Mine

My instruction is not only PRACTICAL—it's also COMPLETE. Ignition, Welding, Vulcanizing, Brazing, etc., etc. And on top of all this, I include, **absolutely free,** Garage Management, Automobile Salesmanship, how to go into business and how to make a big success of it.



Costly testing and repair outfit free to every student.

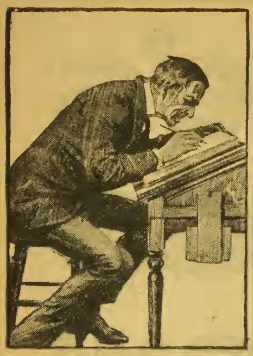
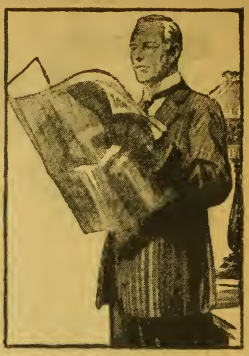
POSTOFFICE _____ STATE _____





The story of two men

who started side by side

THEY CAME UP thru school together and started work in the same office at a few dollars a week. Those were joyous, carefree days. They lunched at cheap restaurants; they saved enough for a ball game Saturday afternoon or the theatre Saturday night. The years stretched out far ahead. Without thinking very definitely about the future, they knew that some time "things would break" if only they did their work and kept their health.

So for three years they moved along evenly, receiving petty salary increases and enjoying the thrill of the new game. They met two young women and became engaged.

Then, along in their fourth business year, there came a change. One said: "After all, this business game is pretty tough. It's a fight. I wonder what I can do about it."

He insured himself against failure

He found in the Alexander Hamilton Institute a definite plan of business reading

Alexander Hamilton Institute

which gave him a new impulse and new self-confidence. As an extra locomotive, hitched to a train, makes its power felt from the first moment, he was conscious *immediately* that a new, fresh force was at work for his business and financial progress.

He talked to his friend about it, and the friend was interested. "Probably a good thing," he said, in his easy-going way. But the matter never went further, and gradually the two found that their interests were diverging. Both were working harder than ever. But one was thinking; and in the office the executives watched them both and saw that one of them *did* think.

So one man began to forge ahead

Ten years passed, and somewhat to their surprise they found themselves at the threshold of middle age. One of them has arrived. He has experienced the big satisfaction of succeeding while he is still young. The other still works and wonders, and does not quite understand. Ten years look long, but they pass with almost unbelievable rapidity. Will you, in justice to yourself, spend fifteen minutes with the question: "Where will I be in business ten years from now?" May we send you a little book called "A Definite Plan for Your Business Progress"—an interesting book of facts and letters?

This book is yours for the asking

When you have read it quietly, without pressure or haste, you may decide that the Institute has something of value to offer you. This may be true if you are President of a corporation (more than 27,000 Presidents and business heads have followed the Course and are enthusiastic about it). It may be equally true if you are at the very beginning of your career, for among the 250,000 men enrolled are some whose business position and salary were precisely like yours.

But whether you decide to go further or not depends entirely on yourself. The facts will come without obligation or cost. Simply fill in the coupon—but do it *today!*

Alexander Hamilton Institute
168 Astor Place **New York City**

Send me the book, "A Definite Plan for Your Business Progress," which I may keep without obligation.

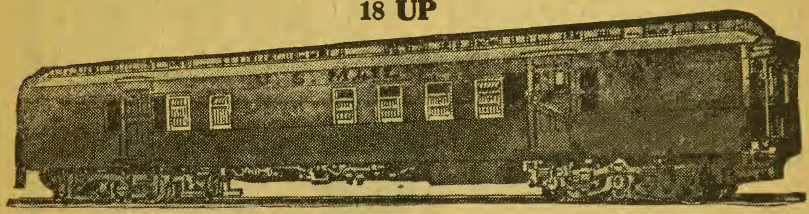
HELP WANTED

$117 to $300 Month

The United States Government continually wants Railway Postal Clerks, Clerks at Washington, D. C., City Mail Carriers, City Post Office Clerks, Customs, Internal Revenue Clerks and Clerks at Panama Canal.

MEN—WOMEN—GIRLS

18 UP



Railway Postal Clerks Have Pleasant Work—Traveling Continually

U. S. Government positions are all Life Positions. Summer vacations with full pay are allowed. Promotion to Big Paid positions is very rapid. The position is not affected by poor times, strikes, wars, panics or the whims of some petty boss.

Country residents and city residents stand the same chance for appointment—common education is sufficient. Pull is not required.

Write us to-day for schedules showing places of the coming examinations in your locality. Don't delay. Every day you delay lessens your chances of immediate appointment.

USE THE COUPON TO-DAY

CUT HERE

FRANKLIN INSTITUTE
Dept. W 305
Rochester, N. Y.

Kindly send me without any obligation whatever on my part, and entirely free of charge, (1) A full description of the position checked below; (2) Specimen examination questions; (3) Free copy of copyrighted book, "Government Positions and How to Get Them;" (4) A list of U. S. Government jobs; (5) Schedules showing places of coming examinations in my locality.

——Railway Postal Clerk	($1,600 to 2,300)
——Post Office Clerk	($1,400 to 1,800)

10 MONTHS TO PAY

FREE TRIAL

$2 DOWN **$5.50 A Month**

Order No. WA2

21 JEWELLED BUNN SPECIAL

Everyone connected with a railroad is well acquainted with the famous Bunn Special. It has acquired throughout the country a reputation for dependability and accuracy that can't be beat. The sturdily constructed, 16 size Illinois, 21-Jewel Movement is cased in a plain polished, dust proof, heavy gold filled case that is guaranteed to wear like solid gold, at least 20 years.

ADJUSTED TO SIX POSITIONS

Railroad inspectors require that a watch be adjusted to five positions. The famous Bunn Special is adjusted to six positions. Why not get a watch that has six adjustments for the price of one that has only five? The Bunn Special is guaranteed to pass inspection on any railroad in the country. Inspectors are well acquainted with its sturdiness and dependability.

ONLY $5.50 A MONTH

Just send $2.00 (or pay postman on delivery) to show your good faith. Then pay the balance in ten equal monthly installments of $5.50 each, until total price of $57.50 is paid. Same price, cash or credit. Order at once.

SALE

We Teach COMMERCIAL ART

Consider this vital point *before* enrolling in any school

—the Meyer Both Company has 1114 students who previously had been enrolled in other art schools. Find one Meyer Both student who has ever changed from our Instruction Department to any other art school.

Our Instruction Department is the only art school operated directly in contact with and as a part of a great advertising art organization—its students are in continuous FIRST HAND touch with the pulse of the art field.

Make sure the school you select is actually engaged in today's commercial art field—for commercial art methods progress constantly. Make sure your contact will not be of the "proxy" or "canned" variety. Make sure of the experience and abilities of your actual instructors—and exactly how *practical* your instructions and criticisms will be. Make sure that you will be in direct touch with the faculty and personnel the school claims. Good instruction is necessary—but experienced criticism and good teaching are vital. In short make sure you will not only get what you pay for—but that you will get a foundation and cooperation that will fit you with earning power when you graduate.

The Meyer-Both Company (the largest Commercial Art organization in the world —who annually sell over ten thousand drawings to Advertisers in the U. S. and Canada), offers a training based upon their 22 years of success—and today's active leadership. We can refer you to merchants or newspapers in your own or nearby towns, who are *now using* our art work. Commercial Art is a highly paid, intensely, interesting vocation—equally open to men and women. The *right school* is highly important if you would succeed. Our Instruction Department has a definite sincerity of purpose. Our book, "Your Opportunity," will be sent you for half the cost of the postage—4c in stamps. *You should read it carefully before you enroll in any school.*

MEYER BOTH COMPANY, Dept. of Art Instruction

Address Dept. 42 - - Chicago, Ill.

30 Days Ago They *Laughed at Me*

I never would have believed that anyone could become popular overnight. And yet—here's what happened.

ONE evening, about a month ago, I went to a jolly, informal sort of dance where everyone knew almost everyone else. I wouldn't have gone to a really big dance, because I—well, I wasn't sure of myself.

There was a young woman at this dance I had long wanted to meet. Someone introduced us, and before I knew it I was dancing with her. That is, I was *trying* to dance with her. She was an exquisite dancer, graceful, poised, at ease.

But I, clumsy boor that I was, found myself following her instead of leading. And I couldn't follow! I stumbled through the steps. You cannot imagine how conspicuous I felt.

Suddenly I realized that we were practically the only couple on the floor. The boys had gathered in a little group and were laughing. I glanced at my partner, and saw that she, too, was smiling. I knew in an instant that they were laughing at me. I felt myself blushing furiously, and I hated myself for it.

All the way home I told myself that I would become a perfect dancer and astonish them. But how? I couldn't go to a dancing school because of the time and expense. I certainly couldn't afford a dancing instructor. What could I do? Suddenly a plan flashed through my mind.

Popular Overnight!

When I arrived home I found the magazine I had been reading the night before. One clip of the shears, a few words quickly written, a trip to the corner mail-box—and I had sent for Arthur Murray's free dancing lessons.

Somehow I didn't believe that dancing could be learned by mail. But there was nothing to risk—and think of the joy of being able to astound them all at the dance.

The free lessons arrived and I was amazed at the ease with which I mastered a fascinating new fox-trot step. I learned how to lead, how to have ease and confidence while dancing, how to follow if my partner leads, how to dance in harmony with the music. It was fun to follow the simple diagrams and instructions. I gained a wonderful new ease and poise. Now I have the time of my life at parties and never hesitate to dance with the best dancers of my set.

You, too, can quickly learn dancing at home, without music and without a partner. More than 200,000 men and women have become accomplished dancers through Arthur Murray's remarkable new method.

Send today for the five free lessons. They will tell you the secret of leading, how to follow successfully, how to gain confidence, how to fox-trot and how to waltz—these complete five lessons are yours to keep, without obligation.

Clip and mail this coupon NOW. Please include 25c to cover the cost of handling, mailing, and printing. Arthur Murray, Studio 298, 290 Broadway, New York.

Arthur Murray, Studio 298, 290 B'way, N. Y.

To prove that I can learn to dance at home in one evening, you may send me the FIVE FREE lessons by Arthur Murray. I enclose 25c to pay for the postage, printing, etc. This does not obligate me in any way.

The Free Booklet Is for Adults Only—It Will Not Be Sent to Children.

He Will Give You a Real Command of English

Your use of English proclaims you to the world. What you say tells what you are. Your language largely determines your place among successful men. The greater your vocabulary the greater your power of expression and influence upon your fellow men.

Commence now—let Grenville Kleiser teach you through his Mail Course in Practical English, how to

Enlarge Your Stock of Words—
Use the Right Word in the Right Place—
Write Tactful, Forceful Letters, Advertisements, Stories, Sermons, etc.—
Earn Promotion and More Pay—
Become an Engaging Conversationalist—
Be a Man of Culture, Power and Influence in Your Community.

It will take only some of your spare moments at home; no repellent grammar study; each lesson as clear as daylight, and inspiring to the highest degree. The average man of to-day can add largely to his efficiency, influence, and income if he will give a few minutes each day to Grenville Kleiser's fascinating Mail Course in Practical English. Many thousands have done so.

BOOTH TARKINGTON

Distinguished Novelist and Short-Story Writer, Author of "Monsieur Beaucaire," "Seventeen," "Penrod," etc.

"Your course is almost painfully needed by many professional writers and speakers. A student who intelligently follows your course will know what he is talking about when he talks or when he writes. His audience will certainly know, because he will talk well, no matter what his subject."

JOHN BURROUGHS

Famous Naturalist and Writer, Said:

"I see valuable and helpful hints in these lessons. Any young man or woman who has an undeveloped literary talent ought to profit greatly by this course."

FREE—"How to Become a Master of English."

This booklet is absolutely free. It teems with information on English, and Mr. Kleiser's new, common-sense method of teaching it. You will find it of great interest and value. Send the coupon and get it free. No agent will call upon you.

10 Days' Free Trial

Guaranteed For 5 Years!

$3 DOWN *Will Put An Underwood*

YES only $3 brings you this genuine Shipman-Ward Rebuilt Underwood direct from our factory. Then, only small monthly payments make it yours, or, if convenient, pay cash. Either way you get the world's standard typewriter, and at a big saving to you.

Why Pay Rental?

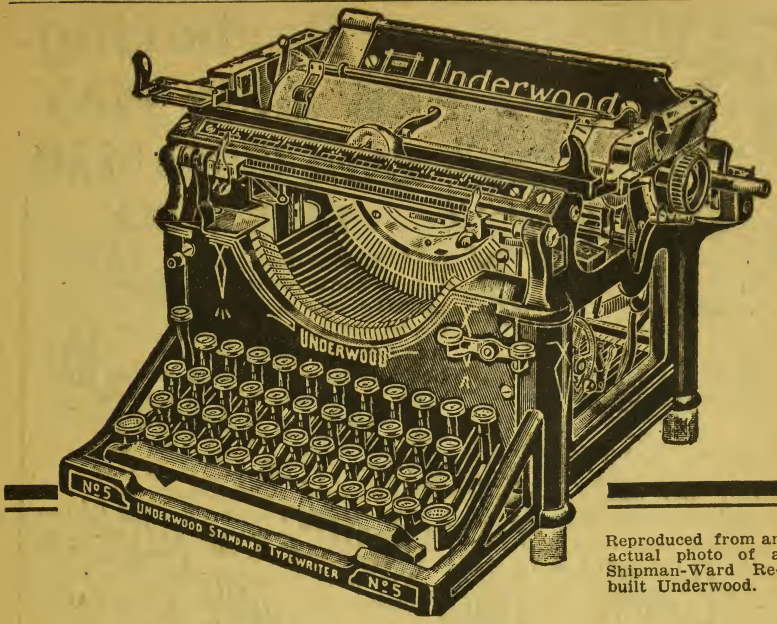
Think of it! You pay only a little more each month than rental—and the machine is yours! We offer you the same three models of the Underwood Typewriter that are being made and sold by the Underwood Company today. The only difference is that Shipman-Ward machines are rebuilt like new by experts. You can't tell Shipman-Ward Rebuilts from brand new machines, either in appearance, durability, or quality of work.

SHIPMAN-WARD MFG. CO.

TYPEWRITER EMPORIUM

"The Rebuilders of the Underwood"

Estab. 1892. 2991 Shipman Bldg., Ravenswood and Montrose Aves., Chicago

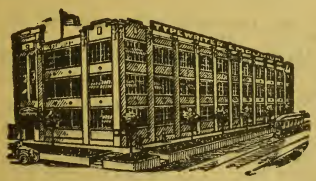


Reproduced from an actual photo of a Shipman-Ward Rebuilt Underwood.

in Your Home!

Easy Payments

You pay only a little each month. The amounts are so conveniently small that the machine will be yours before you know it. All the time you are paying you will be profiting by the use of the machine. And the Underwood is rebuilt like new. Every typewriter is factory rebuilt by typewriter experts. An up-to-date machine with two-color ribbon, back spacer, stencil device, automatic ribbon reverse, tabulator, etc. In addition, we furnish FREE, waterproof cover and a special Touch Typewriter Instruction Book.



All shipments made direct to you from our big modern factory shown above—the largest typewriter rebuilding plant in the world.

Mail the Coupon!

Remember, you don't even have to buy the machine until you have used it on 10 days' free trial, so that you can see for yourself how new it is and how well it writes. You must be satisfied or else the entire transaction will not cost you a single penny. So, mail the coupon to-day. Get all the facts—full details of this big offer. Act Now!

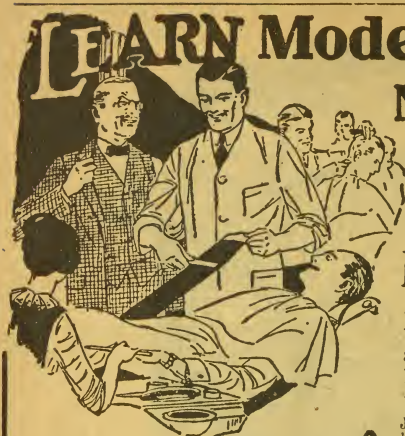
LEARN Modern Barbering
NEW EASY WAY
Earn $50 to $150
EACH WEEK



NO matter what you are now doing, no matter how much you earn, our amazing new system of training for the barbering profession enables you to step into this clean, pleasant, profitable business in a few short weeks. Start right in earning $50 to $150 a week.

J. F. Mayor, of New York, writes: "I have never been out of a job since you sent me mine a year ago. I have saved up a nice bank account. I am glad I learned Modern Barbering with you." **F. Erbst, of Chicago,** writes: "I own my own home! I have my own automobile! I am independent! Have made it all since graduating from your school five years ago."

What Moler System Means to You

Our national advertising educates the public to the safety, comfort and economy of Moler-trained graduate work. It makes you the sought-after barber in your locality. It keeps your chairs filled and the profits into your pocket. You as a graduate are part of a strong institution which assures steady, profitable business. Through no other method can you get this.

We Equip Your Shop on Easy Terms

If you own your own shop, your success is assured. If you are a worker for others, you are assured of steady employment.

Let Us Show You to Be An Expert In A FEW WEEKS

You want to get ahead—you want to make more money—big money. Our short, practical course gives you a complete training in modern barbering, including the electric hair cutter, the medical massage and scientific treatments. It also affords a study, if one desires, on hair and skin—it makes you an expert and expert barbers are always in demand.

Easy Work
Always Busy
BIG PAY

A trade that enables you to travel and see the world—one that pays in tips and commissions in addition to salaries. Moler System graduates are in great demand and have no trouble in securing good jobs.

WRITE FOR FREE BOOK

Our catalog that we mail free tells how we enable you to earn while learning, how we put you into the best city jobs, how we equip your shop on easy payments. In fact, how we take you just as you are, make your life's work easier, better paying and more independent. We have 33 branch schools in leading cities. We have one near you

HIGH SCHOOL COURSE IN TWO YEARS

YOU ARE BADLY HANDICAPPED if you lack High School training. You cannot attain social or business prominence. You are barred from a successful business career, from the leading professions, from well-paid civil service jobs, from teaching and college entrance. In fact, employers in practically all worthwhile positions demand High School training. That's the way you are handicapped if you lack this vital training. But you can remove this obstacle to your success. The American School Course *meets every requirement.*

FIT YOURSELF FOR A BIG FUTURE

This Course will broaden your mind, and make you keen, alert and capable. It is complete, simplified, and gives you the same training as a resident school will. Lessons are written specially for home study and competent instructors guide and coach you from start to finish. It absolutely gives you the knowledge that now stands as a barrier between you and desirable positions.

USE IDLE HOURS ONLY Most people *idle* away *fifty* hours a week. Probably you do, too. Use only one-fifth of that time for studying and you can easily remove your present handicap *within two years.* The question of your success hinges on whether or not you will devote a part of your spare time to this home study course of High School training.

TRAINING DECIDES PAY There is only *one known way to increase your earning power*—only one way to get the position you want and the pay you want. *You must train.* The difference between $35.00 and $100.00 a week is measured only by training—knowing HOW. Let us assist you to acquire the knowledge you need. Our training does not interfere with your present work. Check and mail the coupon for full particulars and Free Bulletin.

SATISFACTION GUARANTEED — YOUR MONEY BACK IF YOU ARE NOT SATISFIED AFTER COMPLETING THE COURSE

Stop Forgetting!

The average mind resembles a scrap pile.

Makes Your Mind a File— NOT A Pile

The Dickson Trained mind is as well ordered as a cross-indexed file.

IS your mind a scrap pile—filled with a lot of unindexed facts? When you want to remember a name, place or date, must you grope in vain to locate the information? Summoned to give facts and figures—does your mind become a blank? When called upon to speak—do you seek wildly to collect your thoughts—utter a few commonplace remarks — and sit down—humiliated? *Without Memory, all the knowledge in the world becomes worthless. "Stop Forgetting" makes your mind a file—not a pile.*

Perfect Your Memory and Command What Salary You Will

PROF. HENRY DICKSON, foremost authority on Memory Training and Principal Dickson Memory School.

I Can Make Your Mind as Systematic and Forget-Proof as a Card Index File—master of its ramifications—instead of a victim of its disordered details. My course of Memory Training perfected by 20 years' experience, is recognized as the most thorough, practical, simplest system of its kind. Thoroughly trains the memory. Develops concentration—overcomes self-consciousness, bashfulness—enables you to address an audience intelligently without notes.

Dickson Memory Training Has Helped Thousands

Fill out and mail coupon or postal for statements from students who had poor memories and developed them to perfection—and men with good memories, who made them better. Give me 10 minutes daily, and I will make your mind a classified index from which you can instantly select facts, figures, names, faces.

Special Offer on "How to Speak in Public"

This de luxe, handsomely illustrated, $3 book free to everyone who enrolls. Will train you to think on your feet—express yourself clearly, convincingly, whether talking to one person or a thousand.

Get My Book on "How to Remember"

Send your name and address on coupon or postal. I will also send you free copy of my unique copyrighted Memory Test.

PROF. HENRY DICKSON, Principal,
Dickson School of Memory,
Dept. 620, EVANSTON, ILL.

Send me your Free Book, "How to Remember," also particulars how to obtain a free copy of Dickson's "How to Speak in Public," also Copyrighted Memory and Concentration Test free.

American School

The American School is not a money-making corporation, but like resident schools and colleges, is chartered strictly as an "Educational Institution, not for profit."

More than 200 famous engineers and educators prepared the special instruction papers for our students.

For over a quarter of a century, Big Engineers, Educators and Business Men have recommended the American School. They know that our long experience as an educational institution guarantees the best training at the lowest possible cost.

1884 **41st Year** 1925

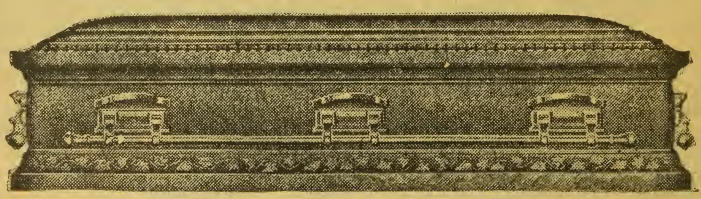
The Springfield Metallic Casket Co.

Springfield, Ohio, U. S. A.

Burial Caskets of Quality Unsurpassed Construction

The Springfield Metallic Caskets are made of the best grades of Bronze, Copper and Armco Lead-Coated Purity Metals. More than one hundred styles and combinations, which meet the demands of those wishing the very best as well as those of the average well-to-do.

They protect the bodies of your dead from the hideous violations of the earth. They keep the remains sacred forever. In points of design, construction and beauty we positively give the best value for the money, being far superior to a mere wooden casket.



Copyright—C. Deuble, Canton, O.
The McKinley Monument at Canton, Ohio. In this tomb lie the remains of the late President McKinley and his wife in Springfield Metallic Caskets of bronze.

The Springfield Cast Bronze

The Casket for the Ages

Constructed from pure phosphorous bronze —cast in two parts—top and body—special sealing device which guarantees casket to be air and water tight—inside measurements, length 83¼ in., width 26½ in.

Do You Make These Mistakes in English?

Does your English reveal your lack of education or does it prove that you are a person of culture and refinement? Are you handicapped in your speech and writing or does your command of English rise to meet every occasion and every situation? English is the one weapon you must use every day. Here is how you can improve it almost at once.

MANY persons say, "Did you hear from him to-day?" They should say, "Have you heard from him to-day?" Some spell calendar "calender" or "calander." Still others say "between you and I" instead of "between you and me." It is astonishing how many persons use "who" for "whom," and mispronounce the simplest words. Few know whether to spell certain words with one or two "c's" or "m's" or "r's" or with "ie" or "ei," and when to use commas in order to make their meaning absolutely clear. Most persons use only common words—colorless, flat, ordinary. Their speech and their letters are lifeless, monotonous, humdrum. Every time they talk or write they show themselves lacking in the essential points of English.

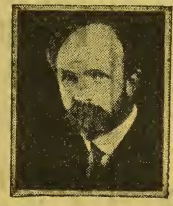
Every time you talk, every time you write, you show what you are. When you use the wrong word, when you mispronounce a word, when you punctuate incorrectly, when you use flat, ordinary words, you handicap yourself enormously. An unusual command of English enables you to present your ideas clearly, forcefully, convincingly. If your English is incorrect it hurts you more than you will ever know, for people are too polite to tell you about your mistakes.

Wonderful New Invention

For many years Mr. Cody studied the problem of creating instinctive habits of using good English. After countless experiments he finally invented a simple method by which you can acquire a better command of the English language in only 15 minutes a day. Now you can stop making the mistakes in English which have been hurting you. Mr. Cody's students have secured more improvement in five weeks than had previously been obtained by other pupils in two years!

Learn by Habit—Not by Rules

Under old methods rules are memorized, but correct habits are not formed. Finally the rules themselves are forgotten. The new Sherwin Cody method provides for the formation of correct habits by constantly calling attention only to the mistakes you make.



Sherwin Cody

One of the wonderful things about Mr. Cody's course is the speed with which these habit-forming practice drills can be carried out. You can write the answers to fifty questions in 15 minutes and correct your work in 5 minutes more. The drudgery and work of copying have been ended by Mr. Cody. You concentrate always on your mistakes until it becomes "second nature" to speak and write correctly.

FREE Book on English and 15-Minute Test

A booklet explaining Mr. Cody's remarkable course and a 15-Minute Test which you can take in your own home are ready. If you are ever embarrassed by mistakes in grammar, spelling, pronunciation, or punctuation, if you cannot instantly command the exact words with which to express your ideas, this book will prove a revelation to you.

Write for this new free book, "How to Speak and Write Masterly English," and the 15-Minute Test. Merely mail the coupon or a letter, or even a postal card. You can never reach your greatest possibilities until you use correct English. Write to-day.

IT takes but a moment to mark the career of your choice, sign your name, clip out and mail this coupon. Yet that simple act has started more than two million men and women toward success.

In city, town and country all over the world, men are living contented lives in happy, prosperous homes—because they clipped this coupon.

In every line of business and industry, in shops, stores, offices, factories, in mines and on railroads, men are holding important positions and receiving splendid salaries—because they clipped this coupon.

Clerks have become sales, advertising and business managers, mechanics have become foremen, superintendents and engineers, carpenters have become architects and contractors, men and boys have risen from nothing to places of responsibility —because they clipped this coupon.

You have seen it in almost every magazine you have looked at for years. And while you have been passing it by, more than ten thousand men and women each month have been making it the first stepping stone to real success in life.

Will you still turn away from Opportunity? Can you still go on, putting in your days at the same grind, getting the same pay envelope with the same insufficient sum, when such a little thing can be the means of changing your whole life?

You *can* have the position you want in the work you like best, a salary that will give you and your family the home, the comforts, the little luxuries you would like them to have. No matter what your age, your occupation, your education, or your means —you can do it!

All we ask is the chance to prove it. That's fair, isn't it? Then mark and mail this coupon. There's no obligation and not a penny of cost. It's a little thing that takes but a moment, but it's the most important thing you can do today. Do it now!

The Book That Has Shown Thousands the Way to Amazing Salary Increases

TAKE this situation. A man who had worked all his life in a routine job at low pay suddenly surprises his friends by moving into a better neighborhood, taking a big house, buying a car and blossoming out as a well-to-do and influential citizen in his new community. How did he do it? What is the secret that he used? Simple enough. He knew that the biggest money in business is in selling, and though he felt that he couldn't sell a thing, he learned the secrets that make Master Salesmen, and then began to make big money.

If only one man had found inspiration enough in this remarkable book to make a brilliant success in the Selling field—in a job paying him many times his former salary—then you might call it luck. But thousands have done it.

READ!

Charles Berry, of Winterset, Ia., stepped from $18 a week as a clerk to a position making him $1,000 the very first month. J. P. Overstreet, of Denison, Tex., read this book, left a job on the Capitol Police Force, and in six weeks earned $1,800. F. Wynn, Portland, Ore., an ex-service man, earned $554.37 in one week. George W. Kearns, of Oklahoma City, found in this book a way to jump his earnings from $60 a month to $524.00 in two weeks, and C. W. Campbell learned from it how he could quit a clerking job on the railroad to earn $1,632 in thirty days.

Your One Chance to Make the Biggest Money of Your Life

Not one of the men whose names appear above had ever sold a thing before—not a dime's worth. If you had told one of them that he could sell he would have laughed at you.

They were frankly skeptical. Yet every one of these men, through reading this book, discovered the fallacy of this vicious old idea that Salesmen are "born." They learned that Master Salesmen are made! And in this book they found a comparatively easy way to go from low pay to better earnings.

Simple as A B C

Sounds remarkable, doesn't it? Yet there is nothing remarkable about it. There are certain ways to approach different types of prospects to get their undivided attention—certain ways to stimulate keen interest—certain ways to overcome objections, batter down prejudices, outwit competition and make the prospect act. If you will learn these principles, there is awaiting you a brilliant success and more money than you ever thought of earning. This book, "Modern Salesmanship," tells exactly how the National Salesmen's Training Association will make you a Master Salesman.

As soon as you are qualified and ready, the Employment Service of the National Salesmen's Training Association will help you to select and secure a selling position as city or traveling salesman.

Now Free to Every Man Who Will Act at Once

We are not making any extravagant claims about what we will do for you. We don't have to. The records of the real successes for which we are responsible are so overwhelming a testimonial of the fact that any man of average intelligence can become a Master Salesman that we are willing to leave the decision entirely up to you. All of this proof and many important features about Salesmanship are contained in "Modern Salesmanship." It is yours—FREE. Send the coupon for it to-day. It will show you how you can quickly become a Master Salesman—a big money maker. It will tell you about the National Salesmen's Training Association system of Salesmanship Training that has meant prosperity to so many thousands of men—about the National Demonstration Method that gives you actual experience while studying—and all about the fine opportunities that await you in the selling field. Failure to act may mean that you lose the one big chance of your life to leave forever behind you the low pay of a routine job.

National Salesmen's Training Association, Dept. 50-B, 53 W. Jackson Boulevard, Chicago, Illinois.

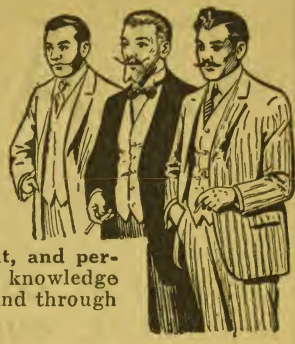
Could YOU Talk to These Men? Or Any One of Them?



Could you read one of their letters? They speak only their mother tongue—French, Italian, and Spanish. Yet in social circles and in business, when travelling and at home, **here and abroad,** there are countless opportunities for **you** to gain the strong friendship of these nationalities **for your pleasure, profit, and personal advancement.** What you most need is a knowledge of at least one of these foreign languages. And through our remarkable system of instruction—

You can learn a new language as easily as a new tune

Only a trained musician can learn a tune without hearing it—by merely studying the printed notes. But almost any one can learn a tune by listening to it several times. It is the same with languages. The Rosenthal Language Phone Method enables you to learn a foreign tongue as easily as a new tune. You merely put a Language Phone record on your phonograph and listen; then repeat the sentences aloud. In a surprisingly short time you are yourself actually speaking a foreign tongue and understanding what is said to you.

LANGUAGE PHONE METHOD

(Title Reg. U. S. Patent Office)

With Rosenthal's Practical Linguistry

The feature that makes this wonderful method so speedy, interesting, and correct is the set of Language Phone discs. These are records of the speech of a cultured native professor, speaking his mother-tongue. He talks of everyday matters, giving you hundreds of phrases, questions, and answers that you will have immediate and constant use for. You learn conversationally. No rules or decisions to be memorized, but perfect accent, pronunciation, and grammar assured.

SPANISH—FRENCH—ITALIAN

You need give only a few minutes of spare time a day to study—in the privacy and comfort of your own home. Select your own time—when you are in the mood. No arbitrary lesson-hour or waiting teacher to consider.

Whether you are an employer or employee, man or woman, boy or girl, clerk, executive, salesman, manufacturer, wholesaler, retailer, lawyer, doctor, minister, teacher, author, artist, actor, musician—familiarity with another language will add to your success—as it has done in thousands of cases. Hundreds and hundreds of owners of Rosenthal Language Phone outfits, in all these professions, have written us enthusiastic letters about their interest and pleasure in this fascinating study; and of the great benefit it has been to them—enlarging their business or winning promotion and bigger salaries.

FREE The New Booklet "Listening In on the Language Phone."

How to Increase Your Income; How to Acquire Quickly Conversational Fluency in a Foreign Tongue; How to Increase Your Influence—in the office, the club, the drawing-room.

BUY DIAMONDS DIRECT

From JASON WEILER & SONS, Diamond Importers, Boston, Mass.,

and save 20 to 40 per cent. on retail or jewelers' prices

FOR over forty-nine years the house of **Jason Weiler & Sons of Boston** has been one of America's leading diamond importers selling to jewelers. However, a large business is done **direct by mail** with customers at **importing prices! We refer you as to our reliability to any bank or newspaper in Boston. Here are several diamond offers—direct to you by mail**—which clearly demonstrate our position to name prices on diamonds that should surely interest any present or prospective diamond purchaser.

1 Carat, $145

This genuine one carat diamond is of rare brilliancy and perfectly cut. Mounted in Ladies' style, 14k solid gold setting. Money refunded if your dealer can duplicate it for less than $200. Our price direct to you **$145**

Blue White Diamond, $50
18k Solid Gold Ring,

Ladies' All Platinum Diamond Ring ☞ Perfectly cut, blue-white diamond of fine brilliancy. Set in all Platinum Ring, richly carved and pierced..... **$200**

A few weights and prices of other diamond rings

¼ carat.....	$31.00	1½ carats.....	$217.00
⅜ carat.....	50.00	2 carats.....	290.00
½ carat.....	73.00	3 carats.....	435.00

Money refunded if these diamonds can be purchased elsewhere for less than one-third more.

THIS BOOK will be mailed to you immediately on receipt of your request. Be sure to give us your full address, and we will be pleased to send you this beautiful diamond catalog at once, FREE.

Diamonds Sent for Inspection Before Payment—If Desired

Rings will be sent on approval to any BANK or any EXPRESS COMPANY with privilege of examination. Our diamond guarantee for full value for all time goes with every purchase.

Corner of Washington and Franklin Streets
Diamond Importers Since 1876

Foreign Agencies: Antwerp, Amsterdam and London

He Starts at $5,200 a Year

One hundred dollars a week! And only a few years ago his weekly wage was less than $30. Didn't dream he could do it when he first took up the study of Higher Accounting under the LaSalle Problem Method; but he just couldn't *help* getting ahead—so he wrote—because he found it the most interesting thing he ever tackled.

Knew nothing about bookkeeping, but LaSalle quickly gave him the necessary foundation. Then, step by step, he was trained in the practical work of Cost Accounting, Auditing, Business Law, Organization, Management, Finance, Income Tax Procedure—*not* theoretically, mind you, but by the solving of actual problems lifted bodily from business life. As a result, he sits as Auditor at a big mahogany desk and commands a salary of $5,200 a year.

Unusual Opportunities in Accounting

Typical, this man's experience, of that of thousands of ambitious men who have found their path to success in the LaSalle Problem Method. Never in the history of business has the need for trained accountants been so great or the rewards so attractive The files of LaSalle Extension University contain literally thousands of letters reporting rapid advancement—incomes doubled, tripled and quadrupled as the result of home-study training. During three months' time, 1,193 LaSalle members wrote to the University telling of the "raises" they had got as a result of their training. *The average increase per man was 89 per cent.*

These men were not unusual; they had no "pull" or "luck"; they got their start by signing just such a little coupon as appears directly below this text. Mark the coupon, sign and mail today—*and get the facts.* We will promptly send you complete information regarding the training you are interested in, also a copy of that inspiring book, "Ten Years' Promotion in One." "Get this book," said a prominent Chicago executive, "even if you have to pay five dollars for it." We will send it *free.*

Remember, the cost of LaSalle training is small and can be covered in easy monthly payments, if you so desire. The *decision* that you make this moment is *important.* Mail the Coupon *now.*

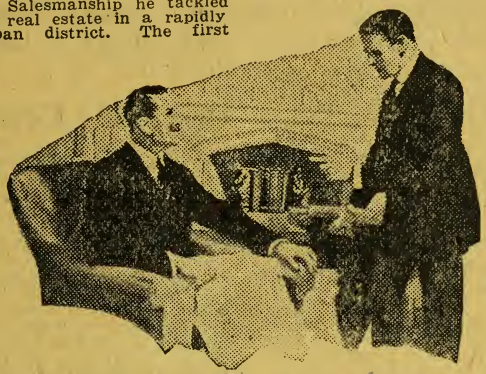
Don't Envy Successful Salesmen —*Be One!*

J. J. Graney had never sold goods in his life. He was a letter carrier earning the top pay of $1,800 a year. He determined to quit—and he turned to LaSalle Extension University for help. Before he had completed the sixth assignment of the LaSalle course in Modern Salesmanship he tackled the job of selling real estate in a rapidly developing suburban district. The first month he made $225, the second month $500, the third month $700, and in a letter to the University he writes that the present month he expects to earn more than $1,000.

C. A. Thomas, a California man, had been a conductor on a railroad for fourteen years. One day he came in on his passenger run and "never went out again." Instead he took a whirl at SELLING, and the second month earned $700. The following month—as he tells in his letter to LaSalle—he averaged better than $67 a day for the entire month!



HOW EXPERIENCED SALESMEN ARE MAKING BIGGER PROFITS

And not only are green men finding big rewards thru the mastery of LaSalle training in Modern Salesmanship, salesmen with years of experience are using it to greatly multiply their volume and their profits.

"My salary was practically doubled a short time ago," writes S. N. Williams, a Kentucky man, but my greatest satisfaction comes from knowing that the amount of business I have written this year is easily five times greater than before. I have nothing but the highest praise for the Modern Salesmanship course, and feel that its form and method would be hard to improve."

What's the **reason** for the extraordinary lift men get thru LaSalle training in Modern Salesmanship?

Two words tell the story—**sound** and **practical.**

Sound, because it is based on the sure-fire methods which more than a thousand outstanding salesmen found in their years of experience to be most productive. In Modern Salesmanship these methods have been reduced to principles so simple to grasp, so easy to apply, that any man of average intelligence can start at once to turn them into money.

Practical, because the **application** of these principles is illustrated in hundreds of specific sales situations which the student is required to analyze and work out for himself —this by the famous LaSalle Problem Method. Some of the most brilliantly successful sales organizations in America have voluntarily co-operated with LaSalle to place before the present generation of salesmen the truly scientific ways whereby they have developed greatest volume with least waste effort.

SEND FOR "MODERN SALESMANSHIP"

To explain within the brief limits of a page how LaSalle training in Modern Salesmanship is conducted, or to give more than the barest hint of its value to the man ambitious to develop as a salesman, is impossible. We have therefore prepared a 66-page book entitled "Modern Salesmanship"—an interesting and compelling presentation of the present-day opportunities in salesmanship and a clear outline of the way they may be most quickly realized.

No man now engaged in selling—or looking forward to salesmanship as a career—should be without a copy of "Modern Salesmanship." The University will be glad to mail a copy to any man who marks and signs and mails the coupon just below this text. There is, of course, no obligation.

LaSALLE EXTENSION UNIVERSITY

It Pays to Read

LAW

THE READING OF LAW has brought swift, sure success to thousands of men who without the benefit of this specialized knowledge would probably never have progressed beyond ordinary achievement. A practical working knowledge of LAW is a short cut to personal power in every walk of life.

LAW is a factor of prime importance in every business. To-day's conditions, involving a mass of statutes, decisions, rulings—changes from old precedents—new interpretations of commercial law—all make the legal expert of vital importance, a positive necessity in every large business house. Never before were prospects so bright for men who can answer the puzzling legal questions which come up daily in business. Important positions carrying executive responsibilities with large salaries are always seeking legal experts.

LAW training often leads to a big executive position, because it enables a man to dictate policies that are legally sound—to make quick, correct decisions on intricate points, puzzling to the untrained man. Every large corporation has a well equipped legal department, and smaller concerns have their retained legal advisers. The presidents of many corporations (for example: Pullman Co., American Sugar Refining Co., National Biscuit Co., etc.) are law-trained men.

LAW is a stepping-stone to personal prestige and social standing. The successful practising lawyer, or law-equipped business man, has open to him a prosperous career in a dignified, influential profession. No other profession opens up greater opportunities for rapid and profitable advancement. And never before has it been so easy to acquire a thoro law training of university grade as now.

University Course by Mail

LaSalle Extension University's faculty of legal experts will train you thoroly in every phase of law. You will get instruction in the same subjects taught at leading resident universities. You will have text books, lectures, quizzes, illustrative cases, examinations, etc., prepared by leading law professors. You will be directed at every step, with every point clearly explained. Graduate with a degree of LL. B. All this training can be had at home—in spare time only. No need to leave your present position. Membership also includes general consulting privileges with all departments of the university—a service not offered by any other institution.

Convenient Tuition Terms

The LaSalle course and this direct personal instruction and business consulting service is offered at a cost within reach of even the man of small income. Decide now to be a law-trained man. Get above the ranks where the pay is small and competition intense—increase your income by increasing your mental capacity.

WRITE—Just mail the coupon and we will send full information about the LaSalle Home Study Course in Law and about our Free Consulting Service. We will also send you a copy of our famous book, "Ten Years' Promotion in One"—which tells how men with the aid of LaSalle training have gained in one year promotion which men without this training have not realized in ten. Send for your copy now.

Don't tell me you never had a chance!

"Four years ago you and I worked at the same bench. We were *both* discontented. Remember the noon we saw the I. C. S. advertisement? That woke me up. I realized that to get ahead I needed special training, and I decided to let the I. C. S. help me. When I marked the coupon I asked you to sign with me. You said, 'Aw, forget it!'

"I made the most of my opportunity and have been climbing ever since. You had the same chance I had, but you turned it down. No, Jim, you can't expect more money until you've trained yourself to handle bigger work."

There are lots of "Jims" in the world—in stores, factories, offices, everywhere. Are *you* one of them? Wake up! Every time you see an I. C. S. coupon your chance is staring you in the face. Don't turn it down.

Right now, thousands of men are preparing themselves for bigger jobs and better pay through I. C. S. courses.

You can join them and get in line for promotion. Mark and mail the coupon, and find out how.

A Business Opportunity

exists for the man who wishes to be his own boss and the owner of a permanent, ever-expanding, profitable merchandising service. It may start with $100 capital, or $10,000, but it cannot start without capital. The degree of success has no reasonable limit. It has attracted to it and has to-day engaged in it, men who are conspicuous successes and of long and wide experience in merchandising, with capital abundant for all their requirements; and the other extreme of men and women with limited business experience and qualifications, and very small capital.

No man is too big for the business.

Men of strong professional standing with splendid incomes have given up these incomes and their professional work to engage in this service, with success.

The business is merchandising, but it entails a service that is unique, intensely interesting—productive of great enthusiasm, and broadly constructive. It makes you the greatest benefactor in your community, town, city or district, and pays you a real profit for such benefaction.

Service is the foundation of all real success, and this service literally enables you to take time from eternity and put it into the life of man, and make legitimate profits in doing so.

Address, Manufacturer, care Motive Publishing House

YOU HAVE A BEAUTIFUL FACE

BUT YOUR NOSE?

BEFORE AFTER

IN THIS DAY and AGE attention to your appearance is an absolute necessity if you expect to make the most out of life. Not only should you wish to appear as attractive as possible, for your own self satisfaction, which is alone well worth your efforts, but you will find the world in general judging you greatly, if not wholly, by your *"looks,"* therefore, it pays to look your best at all times.

Permit no one to see you looking otherwise: it will injure your welfare! Upon the impression you constantly make rests the failure or success of your life. Which is to be your ultimate destiny?

My newest, greatly improved, superior *Nose-Shaper,* "TRADOS MODEL 25," U. S. Patent, corrects now all ill-shaped noses, without operation, quickly, safely, comfortably and permanently. Diseased cases excepted. Model 25 is the latest in Nose Shapers and surpasses all my previous Models and other Nose Shaper Patents by a large margin. It has six adjustable pressure regulators, is made of light polished metal, is firm and fits every nose comfortably. The inside is upholstered with a fine chamois and no metal parts come in contact with the skin. Being worn at night it does not interfere with your daily work. Thousands of unsolicited testimonials on hand, and my sixteen years of studying and manufacturing Nose Shapers is at your disposal, which guarantees you entire satisfaction and a perfectly shaped nose. (Above illustration represents my "Trade-Mark" and shows my first and oldest Nose Shaper. It is not a replica of my latest superior Model No. 25.)

Write today for free booklet, which tells you how to correct Ill-Shaped Noses without cost if not satisfactory.

M. TRILETY, Face Specialist, 2112 Ackerman Bldg., Binghamton, N. Y.

BROMO-SELTZER

FOR HEADACHES

3 IN

Just a Drop or Two

The smallest quantity of 3-in-One Oil works wonders in a squeaking hinge, a lock or bolt that sticks, a clock that runs only when shaken.

3-in-One Oil is a perfect lubricant for talking machines, sewing machines, washing machines, vacuum cleaners, tools, bicycles, auto springs, horns, starters, magnetos and Ford Timers, cream separators, lawn mowers, typewriters, duplicating and adding machines, revolving chairs—every light mechanism in home, office, factory and on the farm.

3-in-One

The Universal High Quality Oil

cleans and polishes fine furniture, woodwork and floors, prevents rust and tarnish on all metal surfaces.

Contains no grit or grease. Will not gum, dry out or become rancid. A pure oil compound of unlimited usefulness; wonderfully effective; economical. You'll like it.

Sold at all good stores in 1-oz., 3-oz. and 8-oz. bottles and 3-oz. Handy Oil Cans.

FREE

Generous sample and Dictionary of Uses. To save postage request these on a postal.

EARLE E. LIEDERMAN
The Muscle Builder

If You Were Dying To-Night

and I offered something that would give you ten years more to live, would you take it? You'd grab it. Well, fellows, I've got it, but don't wait till you're dying or it won't do you a bit of good. It will then be too late. Right now is the time. To-morrow or any day, some disease will get you and if you have not equipped yourself to fight it off, you're gone. I don't claim to cure disease. I am not a medical doctor, but I'll put you in such condition that the doctor will starve to death waiting for you to take sick. Can you imagine a mosquito trying to bite a brick wall? A fine chance.

A Re-built Man

I like to get the weak ones. I delight in getting hold of a man who has been turned down as hopeless by others. It's easy enough to finish a task that's more than half done. But give me the weak, sickly chap and watch him grow stronger. That's what I like. It's fun to me because I know I can do it and I like to give the other fellow the laugh. I don't just give you a veneer of muscle that looks good to others. I work on you both inside and out. I not only put big, massive arms and legs on you, but I build up those inner muscles that surround your vital organs. The kind that give you real pep and energy, the kind that fire you with ambition and the courage to tackle anything set before you.

All I Ask Is Ninety Days

Who says it takes years to get in shape? Show me the man who makes any such claims and I'll make him eat his words. I'll put one full inch on your arm in just 30 days. Yes, and two full inches on your chest in the same length of time. Meanwhile, I'm putting life and pep into your old back-bone. And from then on, just watch 'em grow. At the end of thirty days you won't know yourself. Your whole body will take on an entirely different appearance. But you've only started. Now comes the real works. I've only built my foundation. I want just 60 days more (90 in all) and you'll make those friends of yours who think they're strong look like something the cat dragged in.

A Real Man

When I'm through with you, you're a real man. The kind that can prove it. You will be able to do things you had thought impossible. And the beauty of it is you keep on going. Your deep full chest breathes in rich, pure air, stimulating your blood and making you just bubble over with vim and vitality. Your huge square shoulders and your massive muscular arms have that craving for the exercise of a regular he man. You have the flash to your eye and the pep to your step that will make you admired and sought after in both the business and social world.

This is no idle prattle, fellows. If you doubt me, make me prove it. Go ahead, I like it. I have already done this for thousands of others and my records are unchallenged. What I have done for them, I will do for you. Come then, for time flies and every day counts. Let this very day be the beginning of new life to you.

Send for My New 64-Page Book

"MUSCULAR DEVELOPMENT"

IT IS FREE

It contains forty-three full-page photographs of myself and some of the many prize-winning pupils I have trained. Some of these came to me as pitiful weaklings, imploring me to help them. Look them over now and you will marvel at their present physiques. This book will prove an impetus and a real inspiration to you. It will thrill you through and through. All I ask is 10 cents to cover the cost of wrapping and mailing and it is yours to keep. This will not obligate you at all, but for the sake of your future health and happiness, do not put it off. Send to-day—right now before you turn this page.

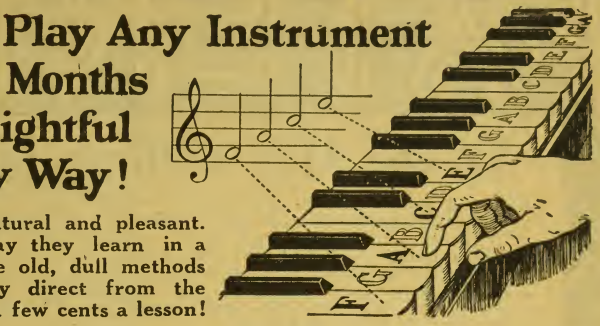
Easy as A–B–C !

You Can Play Any Instrument In a Few Months This Delightful New Easy Way!



Quickest because natural and pleasant. Grateful students say they learn in a fraction of the time old, dull methods required. You play direct from the notes. Cost is only a few cents a lesson!

Learning music is no longer a difficult task. If you can read the alphabet, you can now quickly learn to play your favorite instrument! A delightful new-method has made it positively easy to become a capable performer within just a few months. And the cost is only a *fraction* of what people used to spend on the old, slow methods!

You don't need a private teacher this new way. You study entirely at home, in the privacy of your own room, with no one to interrupt or embarass you. And, strange as it may seem, you'll enjoy every minute of it because the new method is *agreeable* as well as *rapid!*

No Tricks or Stunts—You Learn from "Regular" Music

You don't have to know the first thing about music in order to begin. You learn to play from actual notes, just like the best musicians do. And almost before you realize your progress, you begin playing real tunes and melodies instead of just scales. There are no trick "numbers," no "memory stunts." When you finish the U. S. School of Music course, you can pick up any piece of regular printed music and understand it! You'll be able to read music, popular and classic, and play it from the notes. You'll acquire a life-long ability to please your friends, amuse yourself, and, if you like, make money. (Musicians are highly paid for their pleasant work.)

Whether you like the piano, violin, 'cello, organ, saxophone, or any other instrument, you can now learn to play it in an amazingly short time. By means of the newly perfected print-and-picture method, reading and playing music is made almost as simple as reading aloud from a book. You simply can't go wrong. First, you are told how a thing is done, then a picture shows you how, then you do it yourself and hear it. No private teacher could make it any clearer. The lessons come to you by mail at regular intervals. They consist of complete printed instructions, diagrams, all the music you need, and music paper for writing out test exercises. And if anything comes up which is not *entirely plain,* you can write to your instructor and get a full, prompt, personal reply!

The Surest Way to Be Popular and Have a Good Time

Do you sit "on the sidelines" at a party? Are you out of it because you can't play? Many, many people are! It's the musician who claims attention. If you play, you are always in demand. Many invitations come to you. Amateur orchestras offer you wonderful afternoons and evenings. And you meet the kind of people you have always wanted to know. So don't miss this exceptional opportunity.

In Two Large Handsome Volumes

A magnificent work containing **actual color reproductions** of the world-famous "Old Masters" which Americans travel all over Europe to see.

Think of possessing in actual colors a beautiful reproduction of the Mona Lisa, the most famous picture in the world; "The Angelus," by Francois Millet; "The Judgment of Paris," by Rubens; "Venus and Adonis," by the great Titian; Turner's wonderful marine pictures, and nearly 100 others—the choice of the entire art-loving world!

Looking through these books is just as though you visited the Louvre and Luxembourg Galleries, in Paris; the National Tate and Guildhall, in London; the Wallace collection, and many others. Yet you don't even have to stir from your chair at home. And instead of seeing the picture once, and then hurriedly, as you do in visiting the galleries, you can have them year in and year out.

Over $5,000,000 Worth of Paintings

"Famous Paintings" is more than a mere collection of pictures. It is published in co-operation with Cassell & Company, the famous London publishers. The paintings are reproduced on a specially prepared canvas paper which perfectly conveys the color values of the original. Each picture is mounted by hand on heavy white art board, which can easily be detached for framing, and the whole is handsomely bound in half leather in two large volumes—11x15 inches. The introduction is by G. K. Chesterton. Each picture is accompanied by a lucid explanation of the painting and a brief sketch of the artist. Thus you not only become acquainted with the man's work but you learn the chief points about the artist's life and habits.

Examine at Home

The two splendid volumes of "Famous Paintings" will be shipped to you on approval. Merely enclose $2 with the coupon. Your set will be forwarded, all charges prepaid, at once. Examine it at your leisure in your own home. Then if you feel you don't want to own this great work, send it back within five days and your money will be instantly refunded without question. Otherwise pay $2 monthly until $25—the price of the set—is paid.

EXAMINATION COUPON
Sign and Mail To-Day!

Funk & Wagnalls Company,

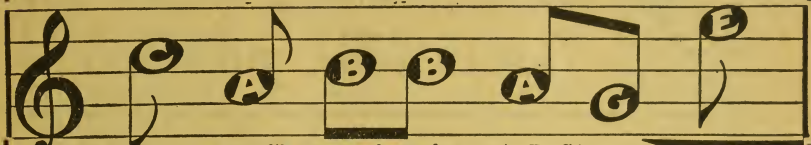
Easy to Read Notes-

If you can spell C-A-B-B-A-G-E you can quickly learn to play Tenor Banjo and become popular.



Just as speedily as you learned your A, B, C.'s, you can learn to read notes and quickly learn to play tenor banjo. Any one can master this instrument. There is no necessity for you to be a wall flower. You can quickly become popular, happy and successful. Tenor banjoists are in great demand, both as professionals and for home entertainment. Shortly after you enroll you will be able to play the tenor banjo like a professional. Our method is so easy you will play real music the first day.

Answer this advertisement at once and secure a genuine, full professional size **Tenor Banjo Free** with course when you enroll. Even if you have had no previous musical knowledge whatsoever, you can positively quickly learn to play from our easy home instructions.

Free $18.00 Tenor Banjo

-Quickly Learn to Play JAZZ Hits and Classics

Prof. Harry S. Six was 22 years head of Glee and Instrumental Clubs of N. Y. University.

The day you receive your first lesson and your free tenor banjo, you will play a simple piece. Most students write they play after one-half to one hour's practice. Then the following week you will play more difficult pieces. Broadway hits such as "Mamma Loves Papa, Papa Loves Mamma," "Linger Awhile," "I Love You," "Wonderful One," "Arcady," "When Lights Are Low," and any others will be played by you long before you have finished course.

New Picture Short Cut Method

Arthur Brisbane, the highest paid journalist in the world, once said that "a single picture is worth a thousand words." He was right, for it stands to reason when you take your instrument in hand along with the actual photographs of our professors in action as your guide it is easy to imitate and do the right thing.

Our Professors' Phonograph Records Free

We also furnish as an additional guide, phongraph records of our professors playing the pieces you are learning along with our thorough, printed and illustrated easy-to-read course. The plan, in reality and almost in actuality, brings our professors to you in your own home.

No Forming Class to Wait For

Send in coupon at once and receive full particulars. You can enroll immediately and get full benefit of the complete New York Academy of Music course, without waiting for a forming class. There are no delays whatsoever. You start your lessons at once.

Learn to Play for Few Cents a Day

There is no reason for you to hesitate to send for particulars and enroll. Because the payments are so small that they really amount to a few cents per day. Every student who enrolls at once will also secure a handsome, full tone, professional size, tenor banjo free.

Don't Send a Single Cent

Rush Coupon For Free Booklet

Rush coupon, or post card will do. You will receive full particulars about our course and we will reserve one of our regular $18, full tone professional size tenor banjos for you, which will be given free when you enroll. Act quickly.

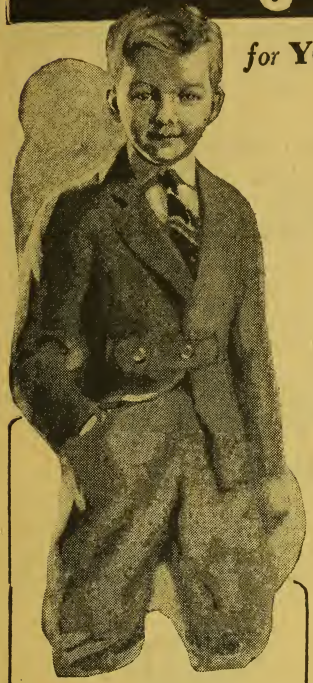
What Is The Right Job?

for Your Boy—*for* You



Science has shown that in every human there are the *sure outward signs* which reveal hidden talents and fundamental traits of character. Learn how to find those hidden talents which clamor for development. Learn how to tell the difference between fundamental traits and passing childhood characteristics. Learn how to guide yourself (or your boy) into a vocation where the true, inborn talents can be used to greatest advantage. In his introduction to the book mentioned below

The Man of 30 to 40
Still Has Time to Change!
If you are between 30 and 40 years of age and are fully satisfied with the progress you have made—don't give up to the idea that you have reached the highest possible development of which *you* are capable.

Chas. M. Schwab *says:* "This live capital, which is inside a man, *varies so greatly* in different individuals that it *must be* used *in special* ways *to get* the *best* results."

THE RIGHT JOB—The Right Job will *show you* how to find out what your strongest traits are. It will show you where and how to use them to get the greatest possible results. It means not merely larger earning power, but that greater happiness which comes from being in congenial work.

WORK OF NOTED AUTHOR—"The Right Job" is a new and truly epoch-making work by Dr. K. M. H. Blackford, originator of character analysis and its application to business. Charles M. Schwab, a man who has helped more men to success than probably any one in the country today—has written a valuable introduction to this work. It is published in two volumes of 250 pages each. Written in clear, simple language, illustrated with 200 charts, diagrams and photographs. Tells how to read the signs of the head, face and hands to discover those inner traits and characteristics that bring you success.

SPECIAL OFFER REVIEW OF REVIEWS—Recognizing the great value of this work, the Review of Reviews has arranged to offer it at the mere cost of binding in connection with a subscription to the Review of Reviews as explained in the coupon. The up-to-date news and views on every phase of the world's activities in the Review of Reviews will keep you abreast of the times.

This boy should be in:

Civil Engineering **Forestry**
Transportation **Construction**
Salesmanship **Agriculture**

and similar lines, depending upon other traits by which the vocational counsellor decides by the process of elimination:

Fair hair, blue eyes, fair skin;
Forehead prominent at brow, wide at lower section:
Head high, wide ears and round;
Large, prominent nose, high in bridge;
Broad square shoulders, narrow hips;
Large hands with square finger tips.

This lad is *eye-minded.* Doesn't like study. Hates detail and confinement. Demands physical activity. Belongs in the open.
To require him to become a lawyer, or a desk man in any line, condemns him not only to failure but to impaired health and lifelong regret and unhappiness.

Get these books on trial—Analyze YOUR Child

SEND NO MONEY—JUST MAIL COUPON

N. Y. W. A.

The Review of Reviews Corp., 55 Fifth Ave., New York, N. Y.

Send me *for free examination,* all charges prepaid, "THE RIGHT JOB"—in two volumes. Also enter my subscription to the *Review of Reviews* for 18 months at its regular price.

After a week, if I decide to keep the volumes I will send you 50c to cover the mere cost of binding the books. And I will send you $1.00 a month for six months to pay for the subscription to *Review of Reviews.* Otherwise, after a week, I will return the volumes to you and owe you nothing.

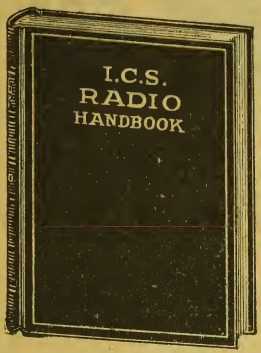
The Greatest Book on

RADIO

ever written



only **$1**

Compiled by HARRY F. DART, E.E.
Formerly with the Western Electric Co., and U. S. Army Instructor of Radio
Technically edited by F. H. DOANE
514 pages—Pocket Size

JUST off the press! The greatest book on radio ever written. Price only $1. Filled with sound, practical, *tested* information for every radio fan, from beginner to hard-boiled owl. Written, compiled and edited by radio experts of national reputation.

Every page tells you something useful. And there are 514 pages! More than 150 illustrations and diagrams!

You may dip into this I. C. S. Radio Handbook at random, or hunt up special information you want, or read it right through. Different types of receiving and sending hook-ups are explained; interesting experiments; definitions; codes and symbols; technical data and thousands of suggestions for getting more pleasure out of radio. Will save you from wasting money on things that won't work. More than 100,000 sold.

Send $1 to-day and get this 514-page I. C. S. Radio Handbook before you spend another cent on parts. Money back if not satisfied.

TEAR OUT HERE

BRANCHES IN ALL PRINCIPAL CITIES

Josef Hofmann at his Steinway
CARNEGIE HALL, NEW YORK

STEINWAY

THE INSTRUMENT OF THE IMMORTALS

LISZT and Wagner, once they heard the Steinway, would have no other piano. It became the voice of Paderewski, of Hofmann and Rachmaninoff. It is the one piano used by Friedman and Cortot. Mischa Levitzki said of the Steinway, "It is the only piano that satisfies my every wish." The qualities that endear the Steinway to the immortals of music contribute equally to the happiness of those who are lovers of music. For the pianist of the home there is no inspiration greater than the Steinway tone. Its perfection aids the musical development of children. All music achieves a higher plane when played upon the Steinway.

Any new Steinway piano may be purchased with a cash deposit of 10%, with the balance extended over a period of two years. Used pianos accepted in partial exchange.

Prices: Uprights, $875 and up; Grands, $1425 and up

In Greater New York, Steinway pianos are sold only at Steinway Hall

STEINWAY & SONS, Steinway Hall, 109 E. 14th St., N. Y.

New Address Early in 1925,

FRECKLES

Now Is the Time to Get Rid of These Ugly Spots

THERE'S no longer the slightest need of feeling ashamed of your freckles, as Othine—double strength—is guaranteed to remove these homely spots.

For fifteen years Othine—double strength—has been successfully used by thousands for the removal of freckles.

Simply get an ounce of Othine from any drug or department store and apply a little of it night and morning and you should soon see that even the worst freckles have begun to disappear, while the lighter ones have vanished entirely. It is seldom that more than an ounce is needed to completely clear the skin and gain a beautiful, clear complexion.

Be sure to ask for the double-strength Othine, as this is sold under guarantee of money back if it fails to remove freckles.

We recommend the use of Othine Complexion Soap with Othine.

$50 to $200 a week

$50 to $200 a week, net, with no risk, no investment, beats owning a store. It's a sure, clean, honest and permanent business and you can start without one cent of capital. You can do what hundreds of others have done. You can start without experience, without investment, without risk, make a good living right from the start and build a permanent, sure, repeat business that you can depend on year in and year out.

Simpson Suits and Overcoats the World's Greatest Values

Every year Simpson values grow bigger, Simpson clothes get better. They are constantly being improved in fit, style, quality, and value. You and your customers can depend on a square deal from Simpson.

NEW LINE—The Greatest Ever

It contains the biggest value all wool fabrics we have ever offered. It is complete and comprehensive, and contains the most attractive colors, patterns and weaves ever assembled, even at much higher prices. Simpson salesmen say there is no other line like Simpson. We have received hundreds of enthusiastic comments on the new line and reproduce a few of them here.
Every garment is tailored to order, union made, and guaranteed to fit, please, wear, and satisfy the customer.

BIGGER PROFITS—LIBERAL BONUS

Our liberal commissions and monthly bonus make it possible to earn more money than ever before. Some bonus checks mailed this month are W. P. Hough, $126.00; R. M. Hale, $89.00; C. Hart, $157.00; R. H. Harding, $135.00; E. Ayr, $31.50; E. Geary, $112.00, and over 300 others.

Just think of a line that contains 30 overcoatings in 22 distinct shades and weaves, 10 topcoatings and about 100 suitings in the best colors and fabrics, all to sell at $31.50, tailored to order, union made, and no extra style charges. It's the greatest tailoring value line ever attempted, and, backed by our dependable style, fit, good workmanship and square dealing, it becomes the outstanding money-making line for salesmen who want to satisfy their customers.

We have room for 150 more men, and if you think our clean-cut proposition might interest you, mail the coupon or a letter or card for free information. It may be the turning point of your life and bring you the same prosperity and contentment that has come to hundreds of Simpson men.

Branch Stores in Boston, New York, Detroit, Milwaukee and Minneapolis

A Few of Hundreds of Letters We've Received From Our Men

Frank Douglas, Michigan, writes:—"I think your line is fine and will compare with any 50 to 60 dollars in town. Every one I have showed it to thinks it is a dandy."

Wm. H. Troy, Massachusetts, writes:—"The fall line is great and I mean it, as I am a textile man and I have spent most of my life in woolen and worsted mills, and have been in nearly every department of some of the largest mills in the country, also have done designing in my time. So again I can say, we have a great line for the fall."

B. H. Eller, Virginia, writes:—"I am very much pleased with the line. It is the handsomest lot of cloth I've ever seen put out for fall and winter sales. I have had unusual satisfaction in selling the spring line, every customer satisfied and alterations average best but about one suit in twenty. You folks sure do your part in careful tailoring and making the hidden parts in high class way."

J. J. O'Sullivan, Connecticut, writes:—"I am enthusiastic about the new fall line. I was so delighted with them I looked them over three times before I could get away from them. I know that I have an assortment that will please anybody; they are the finest I ever saw; and I am very much pleased with the different improvements you are making from year to year."

W. S. Lawrence, Indiana, writes:—"Finest bunch of fabrics ever assembled even at twice the price."

C. O. Faerber, Colorado, writes:—"I feel that it is impossible to improve on the new fall line. I have never had an alteration with the Simpson line."

W. E. Rayburn, Missouri, writes:—"I think you have put out a line of super values for fall and winter, 1924. Fabrics are very beautiful with an exceptionally fine finish."

Big Money Paid For Old COINS

Have you an odd or old coin or bill? It may be worth several dollars. Many coins of great value are picked up in circulation. It is second nature for most people to **count** their change—but not one in a thousand **examines** the coins they receive. Numerous coins that change hands daily command 100 per cent premium—**and more.**

$2,500.00 for One Coin

We recently paid $2,500.00 for just one silver dollar to Mr. Manning of Albany. We paid Mr. Bloemer of New Orleans $500.00 for just one $10.00 gold piece. Another $2,500.00 coin was discovered by Andrew Henry of Lewistown, Idaho. He received it in change but recognized its value. You can easily learn to recognize them too. There is a ready market for all rare coins, bills and stamps. We ourselves pay cash premiums for all rare money. Right now we offer $50.00 for the 1913 Liberty head nickels (not Buffalo); $50.00 for 1894 S. Mint Dime; $2.00 to $8.00 for 1853 Quarters without arrows, etc. We offer up to $1,000.00 premium for certain coins and lesser amounts for many others. It will pay you to get posted. Send 4c for large Illustrated Coin Circular. It may mean much profit to you. Write now. You have nothing to lose and everything to gain.

The Numismatic Company of Texas
(Formerly The Numismatic Bank)
Dept. W. Fort Worth Texas
Largest Rare Coin Firm in U. S.
Established over 20 years.

CONCENTRATION spells SUCCESS

You are always able to think of and concentrate on whatever irritates or annoys you, but you frequently lack the ability to concentrate upon and materialize that which you want.

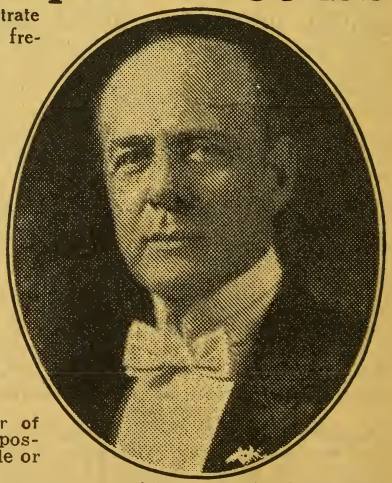
When you have lost money it is easy to think of, concentrate on, and live in the consciousness of your loss, but very difficult to think of your ever having an abundance of money.

When you are sick your trouble is so real that the thought of your being strong, healthy and well again seems almost impossible.

The same is true when business is poor, or you are out of employment, or you have lost some very dear one, or are unhappy, dissatisfied, or have any kind of lack in your life.

Just try concentrating on any one thing you want for five minutes, shutting out **entirely** every random, stray, tramp thought.

When you can concentrate on what you want you will always be the **master of yourself** and your environment, and will possess a power which most persons know little or nothing about.



You can develop this power when you learn and persistently apply the lessons taught in two wonderful books by F. W. Sears, M. P., entitled **"Concentration—Its Mentology and Psychology,"** and **"How to Conquer Fear."**

No matter how many lessons or books you have had, these books are different.

Both books mailed postpaid anywhere in the world for $1, or sent to any U. S. Post Office—you pay postman $1 and postage on delivery.

Many say they are "worth a thousand dollars." **Money back if you want it.**

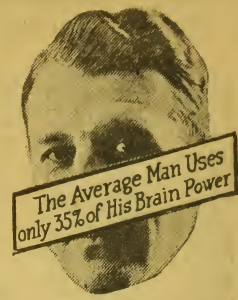
For Removing Paint and Varnish use Taxite—quick—easy—thorough—economical—can be used by anyone—on any surface.

SHERWIN-WILLIAMS
PAINTS AND VARNISHES

For Cleaning Painted and Varnished Surfaces use Flaxoap. Made from linseed oil—contains no free alkali—restores original lustre.

Write the **SHERWIN-WILLIAMS CO.**, 700 Canal Road, N. W., Cleveland, Ohio, for free copy of the booklet, **"A B C of Home Painting."**

New Minds for Old In 12 Weeks!



THOUSANDS of people who only a short while ago were struggling along in low-salaried routine positions are to-day earning double and treble their former salaries and are enjoying all the luxuries that make life worth while.

They owe their sudden success to the evolution of a new science; a science through which they actually acquired *new minds*—minds which were entirely remade in 12 *to* 15 *weeks!*

How are these apparent miracles accomplished? The explanation is quite simple. Psychologists have definitely established the fact that the average man goes through life using only about *one-third* of his possible brain power.

If you are now working for low pay, if you have gotten yourself into a rut, if you are a subordinate instead of an executive—it is a certain indication that you have let your mind "go slack." The thing to do, therefore, is to acquire a new mind. You can do it, just as thousands of others have done it. The way is easy—it is through **Pelmanism.**

Pelmanism is the science of intensive mental development. Since its first appearance, 27 years ago, it has spread. with the sweep of a great religion, to every corner of the globe, until to-day its students number over 650,000 men and women in every walk of life.

The results that Pelmanism is bringing are nothing short of amazing. Instances of quick promotion through it are countless. Cases of doubled salary in less than six months and trebled salary in less than a year are not at all unusual. In exceptional cases there have been salary increases of 700, 800, and even 1,000 per cent. And all because **Pelmanism shows the way to new minds for old!**

Pelmanism will give you the vital spark—it will give you the type of mind you have always admired and longed for. Under its powerful influence such handicaps as timidity, lack of initiative, faulty judgment, dull perception and lack of directive ability disappear as if by magic. Pelmanism will swing the wasted two-thirds of your brain into action. You will actually be given a new mind—a mind which will sweep you forward, which will lead you on from success to success—until you have attained the goal you have set for yourself.

FREE "Scientific Mind Training"

The coupon below will bring you, without cost or obligation, a copy of a splendid 64-page book on scientific mind training. This vitally interesting book describes Pelmanism in detail: reveals the unique method whereby thousands of people everywhere are acquiring new minds for old in 12 to 15 weeks. It also contains the actual experiences of students. showing how this great new science led them to unexpected heights of intellectual, social and financial success.

Your copy is ready for you. Simply fill out and mail the coupon. "Scientific Mind Training" is absolutely free. Send for it to-day.

THE PELMAN INSTITUTE OF AMERICA
Suite 1145
2575 Broadway, N. Y. City
Approved as a Correspondence School under the laws of the State of New York.

Success

A few of the thousands of letters from successful students:

"From a salary of $975 I rose in one step to $2,000 a year, and in January this year to $4,000 a year."

"I am glad to inform you that I have just received an increase in salary amounting to $1,000 a year extra."

"I had the pleasure of taking the course during 1917-1918. Previous to my joining the army my salary was $20 a week. My present salary is $10,000 a year."

The Pelman Institute of America
Suite 1145, 2575 Broadway, New York City.

Please send me without cost or obligation on my part a copy of the 64-page booklet, "Scientific Mind Training."

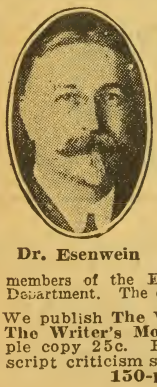
Training for Authorship

How to write, what to write, and where to sell.



Dr. Esenwein

Cultivate your mind. Develop your literary gifts. Master the art of self-expression. Make your spare time profitable. Turn your ideas into dollars.

Courses in Short-Story Writing, Versification, Journalism, Play Writing, Photoplay Writing, etc., taught personally by Dr. J. Berg Esenwein, for many years editor of Lippincott's Magazine, and a staff of literary experts. Constructive criticism. Frank, honest, helpful advice. *Real Teaching.*

One pupil has received over $5,000 for stories and articles written mostly in spare time—"play work," he calls it. Another pupil received over $1,000 before completing her first course. Another, a busy wife and mother, is averaging over $75 a week from photoplay writing alone.

There is no other institution or agency doing so much for writers, young or old. The universities recognize this, for over one hundred members of the English faculties of higher institutions are studying in our Literary Department. The editors recognize it, for they are constantly recommending our courses.

We publish **The Writer's Library,** descriptive booklet free. We also publish **The Writer's Monthly,** an indispensable magazine for literary workers, sample copy 25c. Besides our teaching service, we offer a manuscript criticism service.

150-page illustrated catalogue free.

Dept. 99, Springfield, Mass.

Established 1897 Incorporated 1904

"There's One Man We're Going to Keep"

"Ed Wilson, there, is one of the most ambitious men in the plant. I notice that he never fools away his spare time. He studies his International Correspondence Schools course every chance he gets.

"It's been the making of him too. He hasn't been here nearly so long as Tom Downey, who was laid off yesterday, but he knows ten times as much about this business.

"I'm going to give him Tom's job at a raise in salary. He's the kind of man we want around here."

HOW do you stand in your shop or office? Are you an Ed Wilson or a Tom Downey? Are you going up? *Or down?*

No matter where you live, the International Correspondence Schools will come to you. No matter what your handicaps or how small your means, we have a plan to meet your circumstances. No matter how limited your previous education, the simply written, wonderfully illustrated I. C. S. textbooks make it easy to learn.

This is all we ask: Without cost, without obligating yourself in any way, put it up to us to prove how we can help you. Just mark and mail this coupon.

Crooked Spines Straightened!

NO matter how old you are: no matter what caused your affliction; no matter how many years you have suffered or how hopeless you believe your case to be, there is hope for you in the Philo Burt Method.

Eminent specialists who have studied and treated spinal diseases and deformities for years are first astonished, then convinced and quickly become enthusiastic upon finding one success follow another when the Philo Burt Method is used. Ask us for the names of happy patrons right in your vicinity.

A young woman who was bed-ridden at 26 with spinal tuberculosis after suffering for 20 years, is married, happy and perfectly strong and vigorous at 29.

A boy of 8 was unable to walk or hold his head erect. After a few months every symptom disappeared and he walks daily three miles to school.

A man of 45, in cruel agony for six years, spent over $3,000 in a vain search for relief. Now works every day without the aid of any artificial support.

FREE—30 Days' Trial

The Philo Burt Method is new and different, not like anything you have tried. It has benefited or cured over 30,000 sufferers from spinal trouble caused by tuberculosis, Pott's disease, infantile paralysis, spinal meningitis, pleurisy, rheumatism, injuries, wrong sitting and standing postures, etc. Treat yourself at home. A 30-days' trial costs you nothing; no obligations of any kind if it fails.

The Philo Burt Appliance will positively cure any case that is curable and straighten any crooked spine that can be straightened. It gives firmer and more natural support to the spine than any torturing, unsanitary, old style brace made of steel, iron, leather, plaster of paris, etc. It is as yielding, soft and comfortable as a corset. Goes on and off like a coat and cannot be detected under the clothing. It relieves and strengthens and has accomplished many amazing cures. Let us send you sworn proof. Send no money. Simply describe your case fully. Get our liberal offer and helpful book on spinal troubles absolutely free.

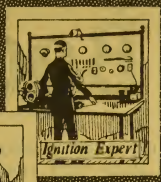
Pick Your Job—I'll Train You!



Eight Weeks in Either of my Schools and You step into the Big Pay class

Get out of the rut of underpaid, no-advancement jobs—get into the auto game—the field of unlimited opportunities—of big pay—of independence. Thousands of jobs are open paying from $150 to $500 a month in salaries—and the sky is the limit if you go into business for yourself.

This Will Start You on the Road to Independence

You Learn by Doing

I teach you the auto, tractor and electrical business with tools on real jobs, not out of books. You know the **why** and the **how**—that's why you can walk out of my schools into big-paying jobs.

I'll Get You What You Want in This World

Money? Dignified work? Independence? Your own Business? I'll get you what you want in the automobile, tractor and electrical fields.

Read What I've Done for These Men

Geo. W. Smith, West Alexandria, O., has made over $800 a month ever since he finished his training.

Albert Boyer, Alexandria, Ky., is now only 19 years old, yet he owns his own business which has paid him handsomely for **two** years.

Thousands of McSweeny trained men are making from $40 to $150 a week.

Aren't YOU as good as they are?

Are you willing to admit that they are any better than you? They came to me knowing nothing about autos—in 50 days they were commanding big money—I'll do the same for you!

FREE R. R. Fare and Board

For a limited time you can get in on my special tuition rate which includes railroad fare to either school and 8 weeks' board. Fill in the coupon and send it to me personally at the address nearest you.

Learn Cartooning

—and Increase Your Income

IF you like to draw—if you find pleasure in trying to make sketches and cartoons, have your ability developed and earn a good income as a cartoonist.

Hundreds of nationally known cartoonists such as Branner of the Chicago Tribune, Blosser who draws "Freckles and His Friends," Gene Byrnes, creator of "Reg'lar Fellers," Locher of the New York World and others equally well known, took the Landon Course at home in their spare time and fitted themselves for excellent positions that pay from $50 to $200 and more per week.

What others have done you can do with the same training. The Landon method of teaching makes **original drawing** easy to learn. By means of an extensive series of "Landon Picture Charts" every necessary detail of original drawing is explained step by step, so that you can **easily learn** to do successful creative work.

Facts That Determine the Superiority of the LANDON SCHOOL

1. **From the very beginning the Landon Course teaches original drawing — no copying. The Picture Chart Method is used exclusively.**
2. **Individual attention and criticism of students' work. Personal coaching wherever necessary.**
3. **Instruction on how to originate new cartoon ideas is an exclusive feature of the Landon Course.**
4. **Cost is within reach of all. Easy payments can be arranged.**

Write for full information, sample Picture Chart and book of cartoons by successful Landon students. Please state your age.

No Limit to Salaries in Aviation

NO other industry offers the wonderful chances for big money-making that the Airplane industry offers to ambitious men. Many more trained men will be needed to fill big paying jobs. The airplane has come to stay—it will soon be a part of our everyday life. The men who get in now are the ones that will cash in big. Look at the "big fellows" in the automobile game today. They represent power and wealth because they got in early—you can do the same in Aviation and you have an advantage because you can be trained before you start.

Thousands of Airplane Mechanics Will Be Needed

The Airplane Industry is going forward by leaps and bounds. Transportation—passenger carrying and mail carrying lines are being opened up everywhere. This means men—men—men! Trained men only are wanted—men who know what's what. Get ready now to make big money. The industry is calling for real red-blooded fellows—heed the call—now is the time to get started—while the industry is still in its infancy.

Learn at Home

In Your Spare Time

Keep right on with the work you are doing now. A little spare time is all you need. Our Special Course is simplified for home instruction and is endorsed by airplane manufacturers, aeronautical experts, aviators and the leading aero clubs. Any man that can read English can understand it. The Lessons are self-explanatory and are made plain as day with Blueprints, Diagrams, etc. Our Advisory Council and Instructors are behind you all the time, giving you everything you must know. The entire field of Practical Aeronautics and Science of Aviation is laid right before your eyes. You are bound to succeed with this training. This means for you a man's size job with a man's size pay.

Here Are a Few Jobs That Will Pay:

$50 to $250 a Week:

Airplane Repairman | *Airplane Assembler*
Airplane Salesman | *Airplane Mechanician*
Airplane Inspector | *Aeronautical Engineer*
Airplane Builder | *Aeronautical Instructor*
Aeronautical Contractor

BIG BOOK OF OPPORTUNITIES

FREE!

Send for our big free book showing just what is going on in the Airplane industry. It also shows what other men have done in this fascinating field and what you can do, too. It gives a list of some large manufacturers and dealers in airplanes and some of the jobs that are open to trained men. With the book we will send you a special offer that you will be glad to know about. This special offer may be withdrawn at any time without notice. *Send the coupon now and take advantage of this offer.*

Be a Finger Print Expert

Have you ever thought of becoming a professional man? Have you decided against the Law, or Medicine, or Engineering because of the long expensive education required? Have you ever considered the Finger Print profession as a lifework? Probably not, because few people have any idea of the wonderful field for this fascinating, unique line of work.

Big, Increased Demand for Trained Men

The demand for Finger Print Experts is increasing at the rate of 89% each year. Even today there are not enough well trained men to supply the demand. Seven States and innumerable cities have installed Finger Print Bureaus during the past year.

Graduates U. of A. S
recently appointed Finger Print Experts of these States, Cities and Institutions.

Big Salaries Are Paid

Promotion is rapid. During "hard times," when ordinary jobs are scarce, more and more Finger Print Experts are needed to keep pace with the inevitable crime wave. Many experts earn regularly $3,000 to $10,000 a year. There is every chance for promotion to high official positions. Big rewards are constantly being offered and it is the Finger Print Expert who usually claims the money. Often life and death depend upon finger print evidence. It is big, important, fascinating work. Why don't you be a Finger Print Expert?

Learn at Home in Spare Time!

To fit yourself for this profession, no long, costly education. If you have a common school education and can spend a few hours a week at home in easy, pleasant study, then you can become a Finger Print Expert in a surprisingly short time. Finger Print Courses are not yet offered by the State universities and colleges. The leaders in the profession look to me to supply the trained men for this most important work. The U. of A. S. is known as the "School of Achievement." Many of the biggest finger print men in the country gained their training in this University.

FREE

For a limited time we are making a special offer of a Course in Secret Service Intelligence FREE to all students of the Course in Finger Print Identification. Methods used by the biggest detectives in the country. Mastery of these two kindred professions will open a brilliant career for you.

Professional Finger Print Outfit FREE. Just the kind of outfit the Finger Print Expert uses in the laboratory and at the scene of crime. You do actual Finger Print Work while studying. In a few months you will be able to take an official position or establish a private bureau of your own. Find out more about this great opportunity.

Send for FREE Book!

Write today for fully illustrated free book on Finger Prints. Tells of achievements of Finger Print Experts, explains this wonderful training in detail, tells how you can learn right at home. Don't wait till this offer has expired. Send for the book. There is no obligation. Mail the coupon NOW.

"Have the Voice You Want"

Says Eugene Feuchtinger

Eugene Feuchtinger, A. M.
Master of Voice
European Maestro. Creator of many of the greatest voices of the Operatic World. Teacher of Forena, formerly with Kubelik, Paul Bauer, and scores of others.

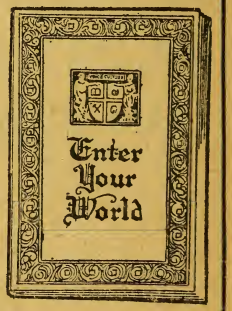
YOUR voice can be rich, full and vibrant. Its overtones can be greatly multiplied. You can add many notes to its range, and have them clear, limpid and alluring. You can have a voice round, rolling and compelling, and so strong and magnetic that it will be the marvel of your associates.

100% Improvement Guaranteed

By the Feuchtinger System, you can develop your voice by simple, agreeable methods in your spare time, and in your own home. Professor Feuchtinger, the eminent Maestro, will direct your efforts, and a REDOUBLEMENT of your voice—an improvement of AT LEAST 100%—is absolutely guaranteed. Think of being trained by one of the great masters of Voice Culture, in your own home, at a mere fraction of the usual cost, under a positive guarantee. It is the opportunity of a lifetime.

You Do Not Know Your Real Voice

THE FEUCHTINGER SYSTEM OF VOICE PRODUCTION will be a source of wonder to you. It arouses at once complete confidence and great enthusiasm. Results are assured and rapidly secured. Its secret is in the **Control of the Vital Vocal Muscles,** which you can understand in five minutes and practice to the point of perfection, ANYWHERE—SILENTLY. No tiresome, noisy scale-running is allowed; you can study **secretly** if you wish—and in a few weeks only, the increase in the range, power and beauty of your voice should be STRIKINGLY evident, a priceless joy to yourself and an astonishment to your friends.



A Beautiful Voice for You!

Until you understand the Feuchtinger System you cannot know the possibilities of your vocal gifts. The Feuchtinger System PRODUCES, as well as DEVELOPS, the true voice. It corrects all strain and falsetto, and makes clear the wonderful fact that any normal person can develop a fine voice if expertly trained. Thousands of delighted graduates testify to this—many of them great vocal successes who, before coming to Professor Feuchtinger, sang very poorly or not at all.

FREE Learn to sing well and be a Vital Personality Get the handsome De Luxe book describing the Feuchtinger method Send coupon or a postal now for this great book and particulars of the special price concession in the cost of Professor Feuchtinger's teaching now being made to readers of this publication for a limited time only. Act at once before this wonderful offer is withdrawn. Don't delay. Send the coupon or a postal to-day—NOW!

"I Can Teach You to Dance Like This"

—Sergei Marinoff

"And you can study under my personal direction right in your own home."

FEW people living outside of New York, Chicago or the great European capitals have the opportunity to study dancing with any of the really great masters. And the private, personal instructions of even average teachers range upward from ten dollars an hour.

But now, the famous Sergei Marinoff has worked out a system of home instruction. You can learn classic dancing in all its forms—interpretive, Russian, ballet, aesthetic, Greek—at a mere fraction of the cost of lessons in the studio.

A Fascinating Way to Learn

It is so easy and so delightful. Just put the record on the phonograph, slip into the dainty little dancing costume (furnished free with the Course) and you are ready to start. And guided by the charts, the photographs of Marinoff students and the easy text, you master the technique of the dance.

Charm and Grace

The natural beauty of the body is developed, an exquisite grace of flexibility cultivated by correct training in classic dancing. For better health—for greater beauty—for poise—for slenderness—dance!

—Outfit Given—

Dancing Costume, Phonograph Records, Complete Studio Outfit

A dainty costume, designed so as to permit free use of the limbs, ballet slippers, everything you need to help you with your lessons, comes with the course. Simple charts and beautiful photographs illustrate every lesson, while phonograph records and the simply worded text teach the essential points of technique.

As a means of developing grace in children, dancing is unsurpassed. And with my method, mother and daughter can grow graceful together.

For the theatre—vaudeville—the movies—civic and college pageants—for private and social affairs—everywhere the dancer is in demand. Startling salaries are paid. And those who can dance for charitable entertainments or for the pleasure of their friends quickly become social favorites.

Write to Sergei Marinoff

Everyone interested in dancing should write to Sergei Marinoff at once and get complete information concerning his splendid system of home instruction in Classic Dancing. This information is FREE. Send the coupon today.

"I'll give you a raise when you *Stop Stammering!*"

"UNTIL you learn to talk smoothly and convincingly, all that you know about this business will not help you to get ahead. Jim, no one has the patience or time to listen to a man who stammers."

Jim Geary felt miserable. He was a likeable chap with his fair share of personality, brains and ambition, which only made his predicament more insufferable. The affliction that his parents had thought he would outgrow was making his life a failure.

That night, while looking through a current magazine, he came upon a story of the work Benjamin N. Bogue was doing. He saw his chance and wrote Mr. Bogue. A few days later he received from Indianapolis a catalog and other pieces of literature. He looked at the photographs of the dormitories and classrooms of the Bogue Institute, of Indianapolis. He read some of the numerous letters written by former students. . . . Then he made his decision and enrolled in the school.

His Salary Doubled

He obtained a leave of absence and hurried to Indianapolis, anxious to be cured of his affliction as soon as possible. Under the personal supervision of Mr. Bogue, aided by a staff of assistants, he showed remarkable daily improvement. And in five weeks he was absolutely cured of stammering. He had learned how to speak correctly and convincingly.

It was a new Jim Geary who returned to the old position. He had confidence in himself. His employer, quick to notice the change in him, made him a salesman at double his former salary and gave him a car to use in his work. Jim's going ahead fast now.

Jim is only one of hundreds of men, women, boys and girls who have been cured of stammering at Bogue Institute. Benjamin N. Bogue, the founder of the Institute, stammered for twenty years. Then he worked out a method of curing himself which proved so successful that he offered it to other stammerers.

At first he had only a small class of students, but his fame spread quickly. And he was compelled to open the Bogue Institute, of Indianapolis, not as a mail-order school, but as a resident school operated exactly like any other boarding school. This school, founded 1901, has grown steadily under the careful supervision of Mr. Bogue. The average student speaks easily and distinctly in from three to eight weeks.

Find out what the Bogue Institute can do for you. Mailing the coupon below will put you under no obligation whatsoever. By return mail you will receive complete information regarding this scientific, *guaranteed* cure for stammerers and stutterers.

Or perhaps you know someone who stammers. Send us his name and we will get in touch with him without mentioning your part in the matter. The Bogue Institute can open up a new world of opportunity and happiness for anyone who stammers or stutters. Remember . . . stammering cannot be outgrown—but it can be cured.

BENJAMIN N. BOGUE
10600 Bogue Building
1147 N. Illinois St., Indianapolis, Ind.

Without obligation on my part, please send me full information regarding the Bogue Institute and the new scientific cure for stammerers and stutterers.

GUARANTEED TYPEWRITERS

Easy Terms

The Famous L.C.Smith Silent No. 8

Only $5.00 a month and the machine is yours. This is absolutely the most generous typewriter offer we ever made. Do not rent a machine when you can pay $5 a month and own one. Think of it—Buying a perfect, late model, highest grade $105 Typewriter at a bargain price—at only $5.00 a month.

This is the famous L. C. Smith typewriter which has set the world's standard for quality and service for over twenty years. Perfect machines. Standard size. Keyboard of Standard Universal arrangement, 42 Keys, writing 84 characters—universally used in teaching the touch system. The entire line of writing completely visible at all times, has the decimal tabulator, the two color ribbon, with automatic reverse, the back spacer, **ball bearing** type bars, **ball bearing** carriage action, **ball bearing** shift action. This ball bearing construction makes it much easier to learn operating on an L. C. Smith than any other typewriter. Also, it gives unlimited speed. Every late style feature and modern operating convenience. Comes to you with everything complete; tools, cover, operating book and instructions—nothing extra to buy. **You cannot imagine the perfection of this beautiful typewriter until you have seen it. We do the most perfect and highest class job of rebuilding known to the typewriter industry. We have sold thousands of these perfect late style machines at this bargain price and every one of these satisfied customers had this splendid, strictly up-to-date machine on five days' free trial before deciding to buy it.** We will send it to you F. O. B. Chicago, for five days' free trial It will sell itself, but if you are not satisfied that this is the greatest typewriter you ever saw, you can return it at our expense. You won't want to return it after you try it, for you cannot equal this wonderful value anywhere.

FREE COURSE OF INSTRUCTION in the Touch System of typewriting given with every order. The best and quickest method of learning. Specially adapted to the L. C. Smith. **FREE BOOKLET giving description of this machine and other models, also valuable typewriter information sent on request.**

When the typewriter arrives, deposit with the express agent $6.20 and take the machine for five days' trial. If you are convinced that it is the best typewriter you ever saw, keep it, and after 30 days send us $5.00 a month until our bargain price of $66.20 is paid. All cash, $61.70, just a little more than half its original price.. If you don't want it, return it to the express agent, receive your $6.20 and return the machine. We will pay the return express charges. This machine is guaranteed just as if you paid $105.00 for it. It is standard. Over half a million people own and use these typewriters and think them the best ever manufactured. **The supply at this price is limited; the price will probably be raised when next advertisement appears, so don't delay. Fill in the coupon today—the typewriter will be shipped promptly.** There is no red tape. We employ no solicitors—no collectors—no chattel mortgage. It is simply understood that we retain title to the machine until full $66.20 is paid. You cannot lose. Your deposit does not leave your home town unless you are satisfied. **Do not send us one cent. Get the coupon in the mails to-day—sure.**

Easiest, Fastest

sales specialty ever invented

17 Years in Perfecting

The only check protector fountain pen in the world—

No Competition—

Nine sales out of every 10 calls—

Smoothest writing pen ever made—

5 yr. guarantee

5 other exclusive patented features—

No. 600
$5.00

Life-Time Opportunity

18,000,000 fountain pens were sold in America last year, double the number sold only 10 years ago. What a tremendous demand there is for the ordinary fountain pen! Just think what a sales opportunity that means for an extraordinary pen like the SECURITY—with a feature no other fountain pen has or can have. Thousands upon thousands will be sold by our old and new distributors. Do you want to share this splendid opportunity?

No Capital Required

Your only investment is the price of a SECURITY. Send for A SECURITY TODAY and we will give you a complete demonstrating outfit free. After you have received the pen, given it a fair trial, and sold yourself thoroughly on its merits, and convinced yourself that it is the best fountain pen that money will buy, that its smooth and excellent writing qualities are far superior to any other fountain pen on the market, and that the check protector alone is worth many times the price of the pen itself, then go and show it to your friends and acquaintances, business and professional men, including your banker, and you will be surprised how easily you can get their order.

Exceptional Side Line

Your spare time, even an hour now and then, will net you splendid returns. Office people in many cases have made as much as $100 a month extra by merely showing their SECURITY to friends and acquaintances. Practically every "showing" makes a sale. Everybody who writes is a prospect. Send for a SECURITY. Give it a trial. Show it to your friends —then watch! We can arrange small or large territory for your exclusive use. Get particulars at once.

Money Back Guarantee

If you do not find the Security all that we claim it to be and are not thoroughly satisfied after giving it a fair trial for ten days, return it to us at our expense and the full purchase price will be refunded to you without any "ifs" or "ands."

PRICES	
No. 300	$3.50

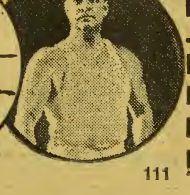
I make Champs

I CAN do for any girl, boy, man or woman what I have done for thousands in every branch of athletics—whether it be for pleasure or as a profession, we can guide you. Ask Charles Daniels, champion swimmer; Tim Jordan, home run hitter; Steve McClave, Princeton football star; Harry Babcock, world's champion pole vaulter, and a long list of others. They will tell you that my system always starts a man right and keeps him right. My system never fails. Over 25 years as a trainer in all branches of sport is my record—and I can still make the present-day record holders step some to keep up with me.

28 Champs to my Credit

"PEP UP"—Let Me Help You

I hold the world's all around athletic championship. Picture No. 2 is a photo of myself. It shows my perfect development. I don't just develop you so that you can show off. I pep you up, so that you are better able to do your daily work. I don't try to make you do something you don't like. I let you pick the exercise or sport you like best—whether it be football, basketball, boxing, hockey, golf, track, swimming, tumbling, skating, muscle building or any of the fifty other sports. Teams in all sports. Football players coached by my system make their team. I tell you how to become perfect in the sport of your own choice. You surely get all of the real body development any one needs. I actually guarantee to make you an expert in the sport you select. You will find several sports pictured here, but these are only a few of the many I can help you in.



I Coach on 27 Sports

Below you will find list of sports I coach and can train you. I'll make you a champ in any one of them:
Golf, Tennis, Swimming, Fancy Diving, Baseball, Boxing, Wrestling, Track Athletics, Field Athletics, Football, Basketball, Hockey, Skating, Tumbling, Fencing.

Booklet Free

Write me telling what sport you are interested in and I will advise you personally and send you a booklet describing your needs and my system. Do it now. My system never fails.

Comfort First

Know outdoor temperatures

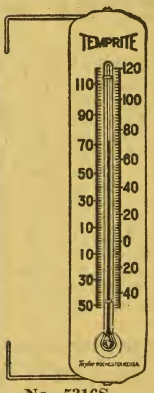
From the cozy interior. A glance out of the window—without opening it—is sufficient.

You don't have to step out on the porch—exposing yourself or incidentally perhaps creating a draught whereby grandpa or the baby might catch cold.

A

Taylor

TEMPRITE THERMOMETER



No. 5316S

Keeps the cold outdoors and gives you the right temperature for dress. Wear clothes according to the weather. A convenience that can be enjoyed by the whole family.

Heavy white enamel finish. Black, far-reading figures. Red, permacolor-filled column, highly magnified. Complete with brackets ready for fastening to window casing.

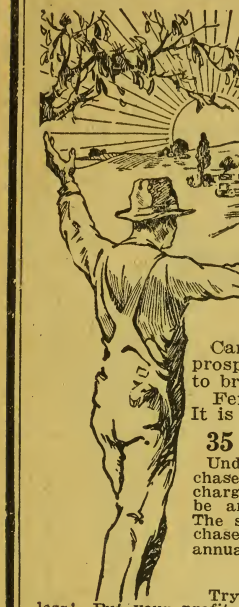
Western Canada
is Calling You



Come where rich land is low priced —where virgin soil produces big crops—where you can double or triple your acreage with the same investment, with 35 years to pay.

Free Use of Land for One Year

Stop Paying the Penalty of Farming High-Priced Land

Canada needs farmers. In return she offers independence, prosperity and wealth. Canada wants you for a partner—to bring your skill as a farmer to her rich, low-priced soil. Fertile land sells for an average of twenty dollars an acre. It is near the railroad, stores, towns, churches and schools.

35 Years to Pay—First Year, Free Use of Land

Under our liberal plan, you pay down only 7% of the total purchase price—then use the land a year without even an interest charge, after which the balance of the principal and interest will be amortized on an easy payment plan of 34 equal payments. The second payment does not fall due until two years after purchase. On 160 acres costing $3,000, you pay down but $210. Your annual payments will be but $195.30.

Interest Receipts Are Worthless

Try to buy a mower with your interest receipts. They are worthless! Put your profits back in your pocket—we don't want them. We want farmers—business men farmers—to build the country and fortunes for themselves.

No Taxes on Improvements

Taxes are low. No tax on livestock, buildings, improvements, implements or personal effects. Good markets nearby. Modern schools, churches, roads and amusements make farm life worth while in Western Canada.

Irrigated Farm Lands Also

In sunny Southern Alberta—a district especially adapted to mixed farming—the Company has constructed a vast irrigation system with an unfailing water supply. This insures a crop every year—makes you independent of weather conditions—produces great quantities of coarse grains, pastures, alfalfa, etc. Here the stockman prospers in an industry ultimately more profitable than wheat farming. These lands are for sale on the same easy terms.

We Won't Sell Until You Investigate

You must investigate before you buy. Special inspection trips at reduced fares. We arrange details. Write for information.

How about your boys? Where will they find farms if present prices increase further? This is your chance. Don't turn this page until you clip and mail the coupon. Act now.

The World's Shorthand Championship

For the second time in succession, Mr. Charles Lee Swem, for eight years personal stenographer to Woodrow Wilson, won the world's shorthand championship trophy in the National Shorthand Reporters' Association speed contest held in August, 1924.

CHARLES L. SWEM,
World's Champion Shorthand Writer for 1923 and 1924.

In 1921 the cup was won by Mr. Albert Schneider, who studied Gregg Shorthand in the New York High School of Commerce, and was recently appointed to the shorthand reporting staff of the United States Congress.

The success of Gregg Shorthand in speed contests, and in the reporting field, is equalled only by its success in the schools everywhere. To thousands and thousands of young people the simplicity of Gregg Shorthand has meant the difference between success and failure. In selecting a system of shorthand you may safely rely on the judgment of the educational authorities.

As will be seen from the following tabulation, Gregg Shorthand is taught in 92% of the high schools in the United States that teach shorthand:

Relative Standing of Systems

On January 1, 1924, shorthand was taught in the high schools of 5009 cities and towns in the United States. The status of the five leading systems was as follows:

System or Text	Number of Cities	Percentage
GREGG	4633	92.41%
Benn Pitman	146	2.91%
Isaac Pitman	58	1.16%
Graham	47	.94%
Munson	13	.26%
26 Miscellaneous Systems	112	2.24%
Total all systems	5009	100.00%

Growth of Gregg Shorthand

The following table showing the growth of shorthand in the public high schools of the United States from January 1, 1914, to January 1, 1924, is based on the number of cities and towns whose high schools teach shorthand:

Date	Total	Gregg	Other System	Percentage Teaching Gregg
1914	1837	986	851	53%
1915	2113	1250	863	59%
1916	2414	1559	855	64%
1917	2692	1899	793	70%
1918	2899	2171	728	75%
1919	3321	2652	669	80%
1920	3677	3053	624	83%
1921	4101	3593	508	87.62%
1922	4329	3901	428	90.11%
1923	4656	4243	413	91.13%
1924	5009	4633	376	92.49%

In the private schools "Gregg" and "shorthand" are almost synonymous. In brief—Gregg is the standard shorthand system of the American people.

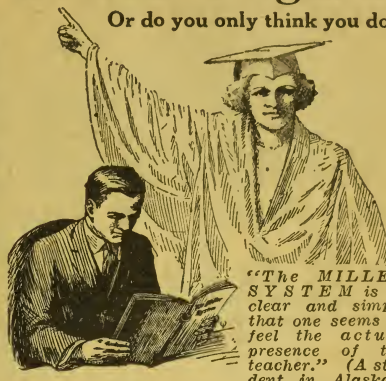
Do You Speak Correct English?

You owe yourself time for self-culture. Study the MILLER SYSTEM OF CORRECT ENGLISH as a basis. You can never rise to the top in business, society, club, church or lodge unless you speak and write correct English.

The MILLER SYSTEM is bright, brief and practical, with entertainment and variety that will hold your attention. Look it over without obligation and BE YOUR OWN JUDGE.

Or do you only think you do?



"The MILLER SYSTEM is so clear and simple that one seems to feel the actual presence of the teacher." (A student in Alaska.)

Does your English *embarrass* or *betray* you?
Do you *know* when you make mistakes?
You cannot *afford* not to know your own language

DO YOU SAY—
—in'kwirry for *inqui'ry*, ad'dress for *ad-dress'*, cu-pon for *cou'pon*, press'idence for *prece'dence*, conver'sant for *con'ver-sant*, epi-tome for *epit-o-me*, ac'climated for *accli'mated*, progrum for *program*, hydth for *height*, ali'as for *a'lias*, oleo-marjerine for *oleomargarine*, grimmy for *gri'my*, compar'able for *com'parable?*

CAN YOU PRONOUNCE FOREIGN WORDS LIKE—
Masseuse, 'cello, bourgeois, lingerie, decol-lete', faux pas, hors d'oeuvre, mara-schino, Sinn Fein, Bolsheviki, Reichstag, Ypres, Il Trovatore, Thais, Paderewski, Ysaye, Nazimova, Galli-Curci, Les Miser-ables?

DO YOU SAY—
—between you and I; a raise in salary; a long ways off; a setting hen; let's you and I go somewheres; those kind of hats set good; he don't know as he can; a mutual friend; the bread raises; where will I meet you; he referred back to; a poor widow woman; we are having friends for dinner?

DO YOU KNOW WHEN TO USE—
—sits or sets, laying or lying, farther or further, drank or drunk, who or whom, I or me, lunch or luncheon, affect or ef-fect, council or counsel or consul, prac-tical or practicable, admittance or ad-mission, shall or will?

500 PUNCTURES Yet Leaks No Air

We Want Agents

A new Puncture Proof inner tube has been invented by Mr. Milburn of the Milburn Puncture Proof Tube Company, Chicago. In actual test it was punctured with 500 nail holes without the LOSS OF AIR. This amazing new inner tube increases mileage from 10,000 to 12,000 miles; eliminates changing tires, and makes riding a real pleasure. Many users have run over 20,000 miles without removing a tire from the wheel.

These wonderful, no-trouble, puncture proof inner tubes cost no more than ordinary tubes and Mr. Milburn wants agents everywhere to help him introduce them.

CAR OWNERS WANTED

To sell and demonstrate this wonder tube. Interests everyone immediately. Automobile owners buy on sight. It makes no difference what car they drive or what tires they use. Our salesmen are coining money on our "DIRECT FROM FACTORY" scheme of selling. Absolutely no competition. We control all basic patents. No capital required to start. Previous selling experience not necessary.

EARN $5,000 to $10,000 A YEAR

Earn $5,000 to $10,000 yearly or more. Get into business for yourself. Sell Milburn Puncture Proof Inner Tubes. Every car owner is a prospect. Your field is unlimited. Get in while it is good. Be independent. Find out all about it now and get started at once.

FREE TUBE SPECIAL FREE TUBE OFFER

Send coupon or write today for special free tube offer and further details. References, Industrial State Bank of Chicago, National Bank of the Republic, Chicago; Baker State Bank of Chicago. Don't hesitate. Fill out the coupon and send it in or write and send name and we will send you all details. This is your opportunity, so don't delay. Address

Read What These Men Say

J. D. Cooper—"I have made 30,000 miles with my Milburn Puncture Proof Tubes and have not as yet removed a rim or casing and my casings are still in excellent condition."

J. C. Jerves—"I sold 50 Milburn Tubes in the first three days."

Chas. Cayton—"I sold twelve tubes yesterday in ten minutes."

L. S. Knapp—"My first few hours out I sold eight tubes; no trouble at all to sell them. The most wonderful tube on the market to-day, I think. I am hoping you will give me the agency for a big territory."

D. Ederle—"I have driven seventy-five nails in one of the 30x3 tubes and twenty were spike nails. It has gone above the test that you recommended to me it would do."

A Law Course Recognized by Bar Examiners

BECOME a lawyer and earn a lawyer's big fees. Some lawyers have earned as high as a million dollars in a single case.

You can prepare in your spare time at home through the Blackstone Legal Training Course and Service, which contains sufficient instruction in law to pass the bar in any State. LL.B. degree conferred.

The Blackstone course was prepared by 80 of the most eminent legal authorities in the United States, including Chief Justice William Howard Taft and Associate Justice George Sutherland of the United States Supreme Court.

The course is endorsed and recommended by leading law and commerce schools as the foremost non-resident law course in the country. It is arranged in a way that makes law the most fascinating of all home courses. Easy to grasp—interesting—practical—complete.

45,000 students have been enrolled. Hundreds of them have been admitted to the bar and are today successful lawyers and judges. Thousands of others have been fitted for bigger and better positions in business.

Regardless of the kind of work in which you are engaged—whether you are an accountant, salesman, banker or executive—a knowledge of law will pave the way for bigger responsibilities and increased income.

Write for Free Book

Write today for a free copy of our 128 page book, "The Law Trained Man," which tells about the successes which have come to Blackstone students through the home reading of law.

In addition, the book contains a full description of the Blackstone Legal Training Course and Service, and also gives many helpful legal pointers that will be of value to you in your everyday work. It answers such important questions, as "Must an agreement, to be binding, always be in writing?" "Does a receipt in full protect the holder against further demands?" etc.

The legal illustrations it contains, written in story form, may be the means of saving you thousands of dollars. The book is yours, free, for the asking. Mail the coupon today —NOW—there is no obligation.

Great- FOR CHICKS

Scientists have recently discovered that Cod Liver Oil, being extremely rich in A and D Vitamines, when combined with other health-giving ingredients overcomes leg weaknesses and produces such strong bones and healthy, vigorous growth that chick death losses are greatly reduced. They also found that Cod Liver Oil had the same effect as May sunshine on chicks that were raised indoors—in short, Cod Liver Oil proved to be "Bottled Sunshine" for baby chicks, making it possible to raise chicks in the early and late cold months as in May or June. That's why

FUL-O-PEP CHICK STARTER

is great for chicks. We've taken Cod Liver Oil and combined it with other health-giving ingredients and are now offering to poultrymen in Ful-O-Pep Chick Starter a feed that our research department has proved reduces death losses to the minimum and makes chicks grow and thrive in the cold winter and spring months just as if they were out of doors in the warm May sunshine with all the bugs and tender grasses they could eat. The Cod Liver Oil is so thoroughly mixed by our own process that it is completely absorbed by other ingredients. Ful-O-Pep Chick Starter is perfectly dry—not oily or gummy.

Feed Ful-O-Pep Chick Starter to your chicks this year—it will cut down your death losses by eliminating leg weakness. It will make your chicks grow this season as they never grew before. Your dealer can supply you with Ful-O-Pep Chick Starter.

The Quaker Oats Company

Poultry Service Dept.

Address Chicago, U. S. A.

It's a fact—

That

FUL-O-PEP EGG MASH

Makes More Eggs

Better Health—Less Cost

Every extra egg means extra profit.

Feeding Ful-O-Pep Egg Mash to your hens will produce those extra eggs and extra profit.

Don't make the mistake of thinking some other feed will do. There is only one Ful-O-Pep Egg Mash.

Ful-O-Pep Egg Mash makes eggs. Keep it before your hens and you will get eggs in abundance.

Ful-O-Pep Egg Mash is a health producing feed as well as an egg producing feed.

It's because Ful-O-Pep Egg Mash so completely nourishes the hens that they lay their best.

That is why Ful-O-Pep users get more eggs at a lower feed cost.

That's why, too, you will always see vigorous, healthy birds in pens of Ful-O-Pep users. Give Ful-O-Pep Egg Mash a trial. Your dealer can supply you.

You Can Make Money Printing

High printers' wages give you a wonderful opportunity to print cards, stationery, circulars, &c., at a big profit. Our complete instructions make everything easy. Equally good as spare time or full time proposition. Press $12.00. Larger $35.00. Also foot and power presses. Your time is worth $2.00 an hour or more printing for others. Sold direct from factory. Write for catalog of presses, type, cards, paper, &c., and all details. THE PRESS CO., X-12, Meriden, Conn.

"Mary, I Owe It All to You"

"MR. WILLIAMS called me into his office to-day and told me he was going to raise my salary $50 a month.

"'I am glad to give you this opportunity,' he said, 'for the best reason in the world. You deserve it.

"'You may not know it, but I've been watching your work ever since the International Correspondence Schools wrote me that you had enrolled for a course of home study. Keep it up, young man, and you'll go far. I wish we had more men like you.'

"And to think, Mary, I owe it all to you! I might still be drudging along in the same old job at the same old salary if you hadn't urged me to send in that I. C. S. coupon!"

How about you? Are you always going to work for a small salary? Are you going to waste your natural ability all your life? Or are you going to get ahead in a big way?

More than 180,000 men are getting ready for promotion right now in the I. C. S. way. Let us tell you what we are doing for them and what we can do for you.

Mail the Coupon To-day!

Free Dog Book

by noted specialist. Tells how to
FEED AND TRAIN
your dog
KEEP HIM HEALTHY
and
CURE DOG DISEASES.
How to put dog in condition, kill fleas, cure scratching, mange, distemper. Gives twenty-five famous

Q-W DOG REMEDIES

and 150 illustrations of dog leads, training collars, harness, stripping combs, dog houses, etc. Mailed free.

Q-W LABORATORIES
Dept 22 Bound Brook, New Jersey

Druggists! Sporting Dealers! Kennels!

We have an unusually profitable proposition to make you. You can make more money handling Q-W DOG REMEDIES than any other dog remedies on the market to-day. We will be pleased to show you just how, and will send you full particulars on request. Write to-day.

The World

THE WORLD ALMANAC

AND

BOOK OF FACTS

FOR

1925

EDITED BY

ROBERT HUNT LYMAN

Fortieth Year of Publication

PUBLISHED BY

THE NEW YORK WORLD

Pulitzer Building, 53-63 Park Row, New York

Copyrighted, 1925, by the Press Publishing Company

FOREWORD

The World Almanac and Book of Facts for 1925 has reached its fortieth year of publication—a better book of reference each year. It continues to be as handy to consult, as easy to read and as ready of reference as it is possible to make it. The aim of the editor is accuracy in the collection of essential facts, terseness in handling them, and accessibility in their presentation.

The editor again with pleasure renews his thanks to the heads of administrative departments of the United States Government, the several States, and of the large cities, for their unfailing courtesy and assistance in preparing and correcting the statistical tables of every kind, and descriptions of governmental activities. Especial thanks are due to William M. Steuart, Director of the Census; Dr. Julius Klein, of the Department of Commerce; William Tyler Page, Secretary of the House of Representatives; George A. Sanderson, Secretary of the Senate; Major Gen. Robert C. Davis, Adjutant General of the Army, and the officers of the United States Shipping Board.

Dr. Gilbert Grosvenor, President of the National Geographic Society, receives our thanks for again supervising the full and exact record of the Scientific Progress of the year; and the great development of Radio Telephony has been set forth by the engineering staff of the American Telephone and Telegraph Company.

The Almanac presents, carefully revised, the essential descriptive facts of the several States of the Union, the Territories and the Dependencies; also brought up to date are descriptive articles on the foreign countries, especially full as to the British Empire, France, Japan, Italy, Germany, and Russia; and our immediate neighbors, Canada (kindly revised by R. H. Coats, the Dominion Statistician) and Mexico. To the members of the several Embassies, Ministries and Consulates who have helped in this constant work of revision our thanks are extended.

The Big Problems of the Year have again been carefully studied to bring together facts that will help the user of the Almanac in forming judgment; and the political history and election returns of the Presidential year are complete.

Those features to which the reader has been accustomed to turn for years—such as the chronological record, necrology, benefactions, financial and economical review, labor review, sporting events and records, the development of aviation and its outstanding events for 1924—will be found more satisfactory than ever. The editor again with pleasure acknowledges his appreciation of valuable suggestions sent him by readers; and repeats that he will welcome any that may be made to the future benefit of The Almanac.

INDEX.

The contents of the ALMANAC are arranged topically, so far as feasible, as will be seen on consulting the table of contents. See *italic running head* at top of each page for guide to topic.

In looking for an organization not in the Index, consult the general list of Associations and Societies; for institutions of learning, see the list of Colleges and Universities.

Dates of great fires, celebrations and other historical events will be found in Memorable Dates, Marine Disasters, the Dictionary of Biography and other tables of dates grouped toward the end of the book.

DEATH OF SAMUEL COMPERS, PRESIDENT OF THE A. F. OF L.

Samuel Gompers, President of the American Federation of Labor since its foundation 43 years ago, with the exception of one year, died in San Antonio, Tex., on Dec. 13. He had been stricken with a heart attack in Mexico City, being unable to stand the high altitude, and had been hurriedly brought to the United States, as he ardently wished to be in his own country when he died. He was 74 years old.

The passage of the funeral train to Washington and New York was marked by unusual demonstrations of respect and sorrow. The funeral was held in the Elks Club, New York City, Dec. 18, and the burial was in Sleepy Hollow Cemetery.

The members of the Executive Council of the American Federation of Labor, on Dec. 19, elected as President to fill out the unexpired term, William Green, Third Vice President, and a member of the United Mine Workers. (See pages 154-155 of The Almanac.)

CHILD WELFARE COMMITTEE.

The charter of the Child Welfare Committee has been approved by Supreme Court Justice Jeremiah T. Mahoney.

On the list of petitioners were Gov. Smith, August B. Heckscher, Margaret Woodrow Wilson, Sophie Irene Loeb, Mrs. Oliver Harriman, Fannie Hurst, John H. Tennant, George Washington Ochs Oakes, Lewis Nixon, Catherine A. Smith, Dr. John A. Harriss, and Rhinelander Waldo.

Heckscher, donor of the Heckscher Foundation and long interested in child welfare, has publicly and in the courts approved methods of the Society for Prevention of Cruelty to Children.

The purpose of the committee is "as far as possible to secure home life for every child, to prevent the placing of normal dependent children in institutions and to prevent pauperism among children."

It proposes "to promote the study, investigation and revision of mothers' pension laws, to raise the standard of child welfare, to investigate and report facts about child welfare problems, to secure the adoption of proper standards of child welfare, to aid in the enforcement of laws concerning child welfare, and to form, when and where necessary, auxiliary associations for promotion of child welfare.

The directors will be Heckscher, Miss Loeb, Col. H. H. Lehman, Miss Wilson, State Senator Benjamin Antin, Mrs. Harriman, Bernard L. Shientag, appointed Justice of the City Court, Dr. Harriss, Justice Samuel D. Levy, Mr. Tennant, and Dr. H. Dwight Chapin.

CADMAN HEADS FEDERAL COUNCIL OF CHURCHES.

The Rev. Dr. S. Parkes Cadman, pastor of the Central Congregational Church of Brooklyn, was elected President of the Federal Council of Churches of Christ in America at the Atlanta, Ga., session of the fifth quadrennial meeting, Dec. 4, 1924.

He succeeds Dr. Robert A. Speer of New York, who has held the office four years.

Frank H. Mann, President of the Union Mortgage Company of New York, was named Treasurer to succeed Alfred R. Kimball. Dr. Rivington D. Lord of New York was re-elected Secretary.

Occurrences During Printing.

GERMAN GENERAL ELECTIONS.

The general elections in Germany on Sunday Dec. 7, 1924, failed to return a majority for Chancellor Marx by any combination of parties in the Reichstag (see page 627 of THE ALMANAC).

The Republican parties controlled about 230 seats and the Monarchist groups 185, each short of majority. Chancellor Marx resigned on the 15th.

The campaign was vigorous and the voting very heavy, nearly 80 per cent. of the registration going to the polls. Under the German system of proportional representation, one Deputy is returned for every 60,000 votes. Whereas, on May 4, 1924, 472 Deputies were elected, on Dec. 7, 497 won seats.

The federal budget for 1925, which was approved by the Federal Council on Dec. 11, estimates ordinary expenditures at 5,900,000,000 marks and revenue at 5,500,000,000 marks. The extraordinary budget expenditure is estimated at 433,000,000 marks, with revenue of 155,000,000 marks, about 277,000,000 marks to be covered by a loan. The war burden budget shows expenditures of 1,236,000,000 marks, of which 1,095,000,000 marks are for reparation.

The complexion of the new Reichstag, according to unofficial returns and with some districts unreported, and the approximate vote polled by each party, is as follows:

PARTIES.	NEW REICHSTAG.		Old Reg. M'brs.
	Pop. Vote.	Members.	
Social Democrats	7,800,000	130	100
Nationalists	6,120,000	102	96
Centrists (Clericals)	4,080,000	68	65
People's Party	3,000,000	50	44

Others	720,000	12	15
Scattered	700,000	...	...
Total	30,040,000	489	480

ASSASSINATION OF THE EGYPTIAN SIRDAR.

Major Gen. Sir Lee Stack, Sirdar of the Egyptian Army and Governor General of the Anglo-Egyptian Soudan, was waylaid and shot by a band of assassins, in Cairo, while riding in his automobile, on Nov. 19, 1924. He died on the following day. (See Egypt, pages 613-615; and the Soudan, page 665, in The Almanac.)

King Fuad by proclamation deplored the "odious attack on the devoted Sirdar of our Army," and the Premier, Zaghloul Pasha, denounced the crime and pledged the best efforts of the Government to punish the assassins.

Lord Allenby, British High Commissioner in Egypt, presented on Nov. 22, a note—practically an ultimatum—of the British Government demanding a proper apology for the assassination, and punishment of the criminals, an indemnity of £500,000, prohibition of political demonstrations and the withdrawal within 24 hours of all Egyptian officers and troops from the Soudan, where there had been serious disturbances prior to the assassination. The note further formally notified Egypt that the Soudan, Government will increase the area to be irrigated, at Gezira, from 300,000 acres to an unlimited figure as the need may arise.

The Egyptian Government made the apology and paid the fine, but rejected the other demands. The British sent five warships and sent additional regiments to strengthen the garrison of 12,000 men.

They evacuated the Egyptian troops from the Soudan. Premier Zaghloul resigned on the 24th; Ziwar Pasha formed a government, and parliament was prorogued for a month.

The Chamber of Deputies addressed a protest against the demands to the League of Nations, but the British Government notified the League that it considered the matter not a subject for the League, because Great Britain had special relations with Egypt.

Four prominent Nationalists were arrested by the British military authorities in Cairo and, after a protest, turned over to the Egyptian authorities. Many agitators were arrested and some of the assassins also. Part of the 11th Soudanese Regiment mutinied at Khartoum, killing two British officers and two physicians, and suffered severe casualties before surrendering. Three Egyptian officers were court-martialed and shot.

Foreign Minister Austen Chamberlain, speaking in the House of Commons on Dec. 15, said that in the Egyptian matter the interests of the British Empire were vitally involved and the Government would not admit them to be questioned by any other power. He said that there was complete disloyalty on the part of the former Egyptian Government, but that if the new and friendly government would work with the British "the condominion in the Soudan will continue to exist," and be loyally supported.

Sir Geoffrey Archer, Governor of Uganda, was made Governor-General of the Soudan.

PROVISIONAL GOVERNMENT IN CHINA.

Following the coup d'etat of Gen. Feng Yu-tsiang backed by Gen. Chang Tso-lin, the turchin of Manchuria, in Peking, Oct. 23, when President Tsao Kun was deposed (see page 606 of The Almanac) a provisional government was set up on Oct. 31 with Gen. Huang Fu as Premier. Gen. Tuan Chi-jui was proclaimed Provisional Chief Executive on Nov. 24 pending the establishment of a formal government representing all the provinces and parties in the republic. This notification was sent to all the legations, and on Dec. 9 recognition was extended to the provisional government in a joint note by the envoys of the United States, Great Britain, France, Belgium, Italy, Japan and the Netherlands.

The "Boy Emperor" of China, Hsuan Tung, who has been living in the Imperial Palace in the Forbidden City since the downfall of the Manchu dynasty in the revolution of 1911, was forced out by Gen. Feng on Nov. 7, and after a stay in the home of his father, the former Regent Prince Chun, found asylum in the Japanese Legation on Nov. 29. His titles were abrogated and his pension much reduced.

LATE SPORTS.

Boxing—Dec. 9—Tom Gibbons knocked out Kid Norfolk in six rounds; Tiger Flowers knocked out Johnny Wilson at New York. Gene Tunney defeated Jeff Smith in fifteen rounds at New Orleans, according to popular verdict. Mickey Walker defeated Jock Malone in ten-round bout at Milwaukee.

Bicycling—Reggie McNamara and Peter Van Kempen won the six-day bicycle race at New York ending Dec. 6. The score of the nine teams finishing, showing miles and laps and points scored follow:

TEAMS.	Miles.	Laps.	Pts.
McNamara-Van Kempen	2,368	5	1,057
Walthour-Georgetti	2,368	5	543
Buysse-Goosens	2,368	4	103
Kockler-Stockholm	2,368	3	359
Benezato-Taylor	2,368	3	248
Belloni-De Ruyter	2,368	3	221
Stockelynch-De Wolfe	2,368	2	639
Goullet-McBeath	2,368	2	327
Gastman-Lawrence	2,368	2	55

Football—Dec. 6—Univ. of Southern California defeated Syracuse Univ., 16 to 0, at Los Angeles.

Auto Racing—Dec. 14—250-mile speedway race at Culver City, Cal., won by Bennett Hill in 1 hr. 58 min. 18 3-5 sec, an average speed of 126.9 miles per hour. Harry Hartz second; Tom Milton third.

Joint meeting of officers of American League and National League Baseball Clubs, at Chicago, substituted Vice President Frank J. Nevin of the American League for President Ban B. Johnson on the Advisory Council of which ex-Judge K. M. Landis is Commissioner.

Lieut. J. Kendrick, Aviation Squadron, N. Y. S. National Guard, flew from Station Island to Bolling Field, Washington, D. C., on May 30, 1924, in a race against a flock of thirty carrier pigeons. The airplane and pigeons left Miller Field simultaneously, each carrying messages to Washington officials. Lieut. Kendrick arrived 2 hours 41 minutes ahead of the first pigeon to register at its homing roost.

The World.

JOSEPH PULITZER.

April 10, 1847 ✣ October 29, 1911.

THE WORLD, as established by JOSEPH PULITZER, May 10, 1883:—

"An institution that should always fight for progress and reform, never tolerate injustice or corruption, always fight demagogues of all parties, never belong to any party, always oppose privileged classes and public plunderers, never lack sympathy with the poor, always remain devoted to the public welfare, never be satisfied with merely printing news, always be drastically independent, never be afraid to attack wrong, whether by predatory plutocracy or predatory poverty."

"Joseph Pulitzer: His Life and Letters," by Don C. Seitz; a biography of that notable genius who founded in 1883 The World that remains his monument, was published in November, 1924. It was greeted with instant favor, especially by newspaper men and thoughtful students of public affairs, for his extraordinary career and his forceful journalism will remain an inspiration and a sure guide. The demand for the book called for a second printing within a month.

Again in 1924, as in every year since the signing of the Armistice, the editorial policy of The World has been concerned chiefly with the aftermath of a destructive war. Not despairing of adhesion to the League of Nations in the long run, The World has unhesitatingly and without condition or interruption praised the efforts of President Coolidge, as it praised those of President Harding, to accept for the United States full membership in the world court, of which a distinguished American, Elihu Root, was chief founder, and a great American jurisconsult, John Bassett Moore, is a leading member. The year closed with the project hanging precariously upon the favor of a "lame duck" Senate, the desire to avoid an extra session after March 4, 1925, serving as an immediate excuse for inaction.

One noble achievement the year did witness which should bring nations somewhat closer together. The World was consistently among the foremost advocates of the Dawes plan, or as it was formally known, the plan of the International Committee of Experts, of which Gen. Dawes, Vice President-elect, Owen D. Young and Henry M. Robinson were members. Presumably because the Administration did not care to risk offending the Senate, though the Dawes plan and the effort to secure it were in line with Secretary Hughes's New Haven speech of Dec. 29, 1922, announcing a policy of co-operation with foreign nations, these distinguished Americans did not represent our Government. But they accepted the appointment with the direct approval of the State Department and did represent our people, in whose name The World greeted the result of their work with commendation. One of the first fruits of the better understanding it ushered in was the beginning of a retirement of French troops from the Ruhr, where their useless and irritating presence constituted a danger against which The World had from the first protested.

Upon our foreign policy the Presidential election of 1924 might well have turned. That it did not, in the main, was due to a variety of causes affecting issues nearer at hand if less vital to the world. The Republican schism under Senator La Follette, the dissatisfaction of the farm bloc, greatly allayed by the rise in the price of wheat during the campaign, the ramifications of the Ku Klux Klan, north and south, all affected the campaign and its result. In the pre-convention jockeying of favorite sons for the nomination of the Democratic candidate—the Republican nominee being singled out by fate—The World was first to recognize the danger in the candidacy of William G. McAdoo who, while not an avowed defender of the Klan, was pushed by that organization as its favorite. It led the press of the country in declaring its unalterable opposition to Mr. McAdoo in the first weeks of the new year, when the oil revelations were ringing through the land. Because of the advocacy of the Klan and his unfortunate connection with oil interests The World felt that the nomination of Mr. McAdoo would be unfortunate for the party and the country, and it continued its opposition to him throughout the protracted meeting of the Democratic National Convention.

During the campaign that followed The World steadfastly maintained, against great odds, the cause of John W. Davis, a Presidential candidate worthy of better support than he received. Toward Progressivism its attitude was friendly, though opposed. In comment upon the farm problem, it did not sneer at the plight of many thousands of American citizens; it advocated relieving farmers from the burden of the tariff to cheapen their costs of living, and the extension of our aid toward tranquillizing Europe and restoring our foreign market for surplus food, rather than dangerous expedients of ill-disguised Government price-fixing.

The World continued throughout the year its running fight against the Ku Klux Klan, which is not yet ended. In general, the Klan seemed, as the year closed, weaker in its old strongholds, as in Texas, stronger in some Northern States, where the disease should presently run its course. The picturesque campaign of William Allen White for Governor of Kansas on an anti-Klan issue was strongly, though at a distance, supported. In the fine and successful campaign of Alfred E. Smith for Governor of New York The World took, editorially, a leading role. And to his program of reorganization of the State's departments for economy and efficiency—which is good Republican doctrine also, except with office brokers and placeholders—The World continued its support.

The World opposed the sacrifice of the Government's great investment at Muscle Shoals at ruinous terms to any private interest. It strongly backed the attempt, foiled for a time by a Presidential veto, to increase the pay of postal employees. It cordially praised the President's budgetary policy of economy while criticising him for ignoring the larger economies of the people in neglecting to use his power to reduce the sugar tariff. As the year closed it was vigorously protesting against the attempt in Washington by the Navy League and other jingo forces to destroy by trick and indirection the beneficent Washington treaties for the restriction of naval armament, which were the chief glory of the Administration of President Harding. So it ended the year as it began, upon the note of international friendship and fair dealing.

THE CONVENTION FOR NEW YORK.

The most interesting, if not indeed the most important, achievement of The World in 1924 was the successful culmination of its campaign to have New York selected as the meeting place of the Democratic National Convention. The World made the first proposal toward this end. It marshaled public opinion, throughout the country no less than in the city itself, holding that the metropolis of the Nation had too long been discriminated against—there had been no National Convention here since 1868—and that it was time to "bring New York back into the Union."

It was not an easy undertaking. There were deep and surprising objections to the proposal, in New York City even more than elsewhere, oddly enough. But the project was carried through; in January the Democratic National Committee named New York as its meeting place, and in the last week of June and through the opening days of July, Madison Square Garden housed a convention that will remain historic. The acclaim that marked this achievement by The World was as sincere as it was widespread, and the Non-Partisan Committee that attended so

skilfully and so successfully to the details of the undertaking has already begun a movement to bring to New York the Republican National Convention of 1928.

Throughout the Presidential campaign The World maintained its traditional standards as a newspaper. Its staff correspondents were traveling over the entire country from the beginning of the contest, and as a single illustration of the accuracy and shrewdness of their observations may be cited the fact that George F. Authier, alone among the "experts," forecast the carrying of Wisconsin, and of Wisconsin alone, by La Follette.

The World is first of all, of course, a newspaper. It is much more than that, however, for it believes in and practises "selectivity" to a degree that is unusual among American newspapers and that makes the completed product still more unusual. The World is, indeed, coming more and more widely to be known as the best edited paper in the country as it is already known, to quote Chester T. Crowell in the American Mercury, as "decidedly the most readable newspaper in this country."

To these distinctions there are the contributions of a staff exceptionally qualified in sympathy, judgment, resource and the gift of vivid, authoritative writing. Its galaxy (there is no other adequate word) of critics continues unchanged: Heywood Broun, critic of the drama, and the humanities; F. P. A., of men and manners; Deems Taylor, of music; Quinn Martin, of the motion picture; Laurence Stallings, of books in the notable thrice-a-week department the First Reader; Forbes Watson, of the fine arts; and J. Otis Swift, the poet of News Outside the Door.

The ancient glory of The World remains—its dedication to the public service. This purpose found tribute again in the words of Simeon Strunsky of the New York Times: "The World stands as the type of the predominatingly crusading newspaper as opposed to the predominatingly news newspaper. To a very considerable degree The World makes its news; in the honorable sense of digging up evils, causes and public services."

This reputation was added to materially during the year. To take them in the order of their appearance, distinctive examples of "World-made news" included Catharine Brody's vivid recital of her experiences in job hunting in the chief cities of the Far West and the South; Will Irwin's biting review of the Forbes administration of the Veterans' Bureau; a first-hand inquiry into child labor conditions throughout the Nation by Henry F. Pringle; a study of the astonishing growth of the business activities of the United States Courts by reason of their equity receiverships, by Frank L. Hopkins; a provocative series by John F. Sinclair on "Can Taxes Be Cut?," and a series of really historic importance, since it was the first assembling of the data, even by officers of the Government, on the status of aviation in the United States, by Peter Vischer.

There appeared in addition, from time to time in The World expositions of his principles and hopes by J. Ramsay MacDonald, and by such other Ministers of the Labor Government of England as Philip Snowden; illuminating articles upon Russia by Samuel Spewack and Arthur Ransome, especially at the time of Lenin's death; a series of discussions of international economic affairs by John Maynard Keynes, and the publication, four days before the formal announcement was made, of the terms of the Dawes plan by Arno Dosch-Fleurot of The World's Paris Bureau, and a far-in-advance publication of the conclusions of a month-long conference of the Premiers on the reparation plan in London, by John L. Balderston of The World's Bureau there.

PRIZES FOR THE HIGH SCHOOLS.

The year was marked by the first award—to Stuyvesant High School—of The World's trophy in its "Biggest News of the Week" contest. Brief essays on subjects indicated by the title are the basis of this competition, which is for weekly prizes, with a monthly bonus for the best of the best weekly submissions. Certain credits are allotted each high school on the basis of the prizes won, and these credits determine at the end of the year the award of the trophy—a handsome bronze plaque.

During the year more than 32,000 essays were submitted in this competition. These came from thirty-four high schools in the greater city. The prizes awarded had a cash value of $12,000, but of far greater value was the stimulus to intelligent reading of the newspapers and the utilization of the knowledge gained thereby. Dr. Frederick Houk Law, head of the English department of Stuyvesant High School, has called the contest the "best extramural aid to education" he knew of.

Another notable service of The World was the contribution of its department of Missing People. Requests for its assistance came in 1,852 instances, and there is reason to believe that more than 578 of these were found. Not every success is reported, and naturally, The World makes no effort to require any final response. Three official agencies of as many countries refer their inquiries to The World: the police departments of a number of European cities refer inquiries here, and in addition individual requests came last year from Ireland, England, Scotland, Germany, Switzerland, Poland, South Africa and Canada.

Under the auspices of The World was held, during the year, a boys' pilgrimage in support of the project for the purchase and endowment as a National shrine of Monticello, the Virginian home of Thomas Jefferson. Elections held in New York and other cities sent bands of boys to the Democratic National Convention, to Philadelphia, Baltimore, Washington and Monticello, and brought about an addition of nearly $50,000 to the fund. A collateral issue of this undertaking was the raising, through The World, of the money for the bust of Jefferson unveiled in the Hall of Fame at New York University early in the summer.

Sports in The World for 1924 were based on accuracy and authority, and covered the full field. Daily happenings were carefully and conscientiously chronicled by members of the regular staff, who are recognized as authorities in their several lines. These include George Daley, Sports Editor, who wrote on racing and football and whose Sport Talk each Monday morning aimed to make constructive suggestions in keeping sports up to the highest standard; E. G. Brown, Assistant Sports Editor; G. F. T. Ryall, who contributed a number of racing features; Monitor, a widely acknowledged authority on baseball; Hype Igoe, accepted as one of the leading authorities in boxing; Charles E. Parker, who wrote on track and field athletics, lawn tennis and football; William Hennigan, who built up the column on amateur and semi-pro baseball; Peter Vischer, who with others is aiming to popularize polo, and L. deB. Handley, the outstanding authority of the day in swimming.

Among men of prominence who contributed to the sports page during the year were Francis Ouimet, one of the leaders in amateur golf; W. W. Roper, coach of the Princeton football eleven; Christy Mathewson, one time great pitcher in baseball; Jack Kearns, manager of Jack Dempsey; Luis Angel Firpo, Harry Wills, Benny Leonard and Jimmy De Forest, greatest of all trainers of his line, in boxing.

The Religious Department, edited by Mrs. Mary H. Spencer, in The World has three distinctive features. In addition to spreading church announcements on Saturday mornings it sends a representative to some church on Sunday and publishes on Monday morning a report of the sermon with a picture of the minister and a brief biography. This series of "Messages of New York Churches" is in its third year and has been called a "constructive feature in modern journalism," inasmuch as it avoids controversial issues. Since February, 1924, The Evening World has devoted a department to religious news under the caption "Churches in Action."

FEATURES OF THE SUNDAY WORLD.

The Sunday World Magazine during 1924 published some of the most vivid and striking features in its history. It was livelier and more entertaining than it has ever been before, but its pages continued to carry the informative popular science articles which have contributed so much to its pre-eminent position in Sunday journalism.

Undoubtedly the most striking achievement which must be ascribed to the Magazine is the astoundingly popular cross word puzzle. For years these puzzles have been appearing in The World Magazine, and they have quietly, from year to year, attracted their faithful band of addicts. This year this indoor sport, quite suddenly, became a violent national fad, one of the most widespread of any of the fads which have ever swept the country. The puzzle books which started it all were prepared by the editors of the Magazine's cross word puzzle page and were, for the most part, made up of puzzles contributed to the Magazine.

No less than four series of articles, each running from six to eight weeks, were offered to the Sunday readers. The titles of these were "My Escape from the International Underworld" by Baroness Tamara Steinheil; "The True Story of Clara Phillips's Escape," by J. C. Carson, the man who engineered this extraordinary and internationally known exploit; "Men Who Have Loved Me," an amusing series of confidences by Mme. Marguerite d'Alvarez, grand opera's colorful star; and "The Strange Secrets of my Fashion Studio," by Hickson, New York's famous couturier.

Shorter features which attracted special attention and were reprinted in many papers included the

story of Germaine Berton, the girl Anarchist of Paris; Karl K. Kitchen's series about Luxor, Deauville, Cairo, Gibraltar and elsewhere, and some exceptional short stories by Henry Tyrrell based on the Grand Guignol plays. These latter were a distinct departure in the Sunday field.

In addition several full length fiction stories were served up, and the tangram page for the youngsters was welcomed by them, bringing in a flood of letters every week. Other regular features were a page of gleanings for the lovers of popular science, a fashion page, and a page of exercises for the home.

The year has served to intrench the Magazine more firmly in its position as the leader in its field.

EVENING WORLD CAMPAIGNS.

During 1924 The Evening World continued its campaign for better housing conditions in New York with increased vigor. It printed an exhaustive study of costs in the construction of garden apartments in New York, showing with the aid of Andrew J. Thomas, architect, that the slums could be cleared and homes built to rent at $9 a month a room. The series was followed by the announcement that John D. Rockefeller jr. would build such apartments on Avenue A, with Mr. Thomas as the architect.

The Evening World urged the extension of the Emergency Rent Laws for two years, and when the State Legislature finally voted to extend the laws until May 1, 1926, the bill as passed embodied many of the suggestions made by The Evening World.

It was The Evening World that first showed by a series of articles that bribery and graft was rampant in the Income Tax Division of the Internal Revenue Department, and largely as a result of its expose a Senate investigating committee began an exhaustive investigation of the department.

The long campaign of The Evening World for improved taxicab service in New York at reduced rates of fare was followed in the fall of the year by reductions by leading companies to the lowest rates New York City has ever enjoyed.

SPORTS IN THE EVENING WORLD.

The Evening World sports pages furnished up-to-the-minute news by a corps of experts, whose regular contributions were supplemented by articles from many of the foremost authorities in practically every pastime. John McGraw, recognized as the master mind of baseball, contributed a weekly article during the season, commenting on the progress of the pennant race. Special stories ware also furnished by Miller Huggins, manager of the New York American League Club. William T. Tilden wrote regularly on tennis. Walter Camp contributed stories on football and on amateur athletics. Also many other outstanding names in the sports world appeared in the columns of The Evening World.

Of the regular staff, Vincent Treanor, one of the greatest descriptive writers on the "sport of kings," kept the readers in close touch with everything of interest to the followers of the turf. Baseball was covered by Bozeman Bulger, one of the most colorful writers of diamond affairs, and Robert Boyd, a keen student of our national pastime. William Abbott wrote interestingly of football, golf and tennis. Ed Van Every gave vivid accounts of all the big boxing matches, while Leonard Cohen covered college sports. Robert Edgren wrote brilliantly on general sports and his accompanying cartoons were as usual a big feature of his contributions. Burris Jenkins jr., staff cartoonist, pictured all the big sports events in a style that has brought favorable comment from all sides. This array of experts under the supervision of Richard Freyer was credited with scoring more notable "beats" than that of any other evening contemporary.

RADIO AND REAL ESTATE.

The radio department of The Evening World, with a staff of carefully chosen experts whose combined special knowledge covers the entire field, has won for itself a reputation that has become national for dependability and enterprise. During the past year it has assumed leadership in its field, not only in the presentation of real radio news, both popular and technical, but in the publication of informative text matters found generally useful to the average radio enthusiast.

The "Own Your Own Home" Department, a feature of The Evening World each Saturday, and designed to assist in every possible way New Yorkers who wish to buy homes, was inaugurated late in 1923. It has constantly expanded, and sometimes occupies three or four pages. A regular daily real estate section was started in the fall of 1924, and unusual efforts were made to furnish, in the late editions, not only the usual news of the day before but accounts of transactions of the date of issue. Both departments are edited by Roger Batchelder.

MAGAZINE PAGE'S FEATURES.

Women and their interests took first place in the magazine pages of The Evening World. Marguerite Mooers Marshall, one of the few woman columnists in the country, sustained a reputation for piquant brilliancy. Ida Bailey Allen, noted food economist, added a unique household feature captioned "Within Your Income." Fay Stevenson continued her serials based on lovers' problems. Dr. Josephine P. Baker, foremost of experts in her line, continued "Your Baby's Health," giving practical and scientific advice to mothers. Beth McIlvaine contributed a series on the ethical problems of business women. A large staff of women contributors upheld the paper's reputation for entertaining and practical articles. In addition, Margery Wells and Mildred Lodewick contributed fashion articles regularly.

The Evening World's Kiddie Klub, under the direction of Eleanor Schorer (Cousin Eleanor), boasts a membership of over 164,000 children. Founded on May 1, 1916, it has steadily grown until it is now one of the largest children's clubs in America.

The summer activities included two outings, one at Luna Amusement Park, Coney Island, on July 23, the other at Starlight Park, Bronx, on Aug. 5. 20,000 children attended the Luna party and almost that many came to Starlight. All the attractions were free to members on Kiddie Klub Days at Luna and Starlight.

The Kiddie Klub's Ninth Annual Christmas Show, free to club members and parents, was given at Jolson's 59th Street Theatre (courtesy of Messrs. Lee and J. J. Shubert), on the mornings of Dec. 30, 31, Jan. 1 and 2. There were more than fifty kiddie performers, all under sixteen years of age, selected from the Klub membership.

PUBLIC SCHOOL ATHLETIC LEAGUE.

Co-operating with the Board of Education and the Public School Athletic League, The World, for nineteen years has given its support to the field day activities of the public schools, providing the prize medals and class trophies for each event and organizing the final championship meet, which is the largest athletic event, in point of entries, in the United States.

In 1924 a total of 133,000 boys took part in the interclass field days, which were held by 183 schools. More than 3,000 were entered in the final meet, which was held in December, in the 22d Regiment Armory.

A swimming club, likewise with this newspaper's support, held fifty meets during the year, in which 7,000 boys took part. Thousands of boys have become proficient swimmers through their participation in these water events.

One hundred and fifty-nine school garden and nature study clubs, encouraged by The World, had a membership of 23,583. These clubs raised vegetables on school plots valued at $11,550. Prizes were given to the expert juvenile gardeners.

BUREAU OF ACCURACY AND FAIR PLAY.

The World's Bureau of Accuracy and Fair Play is maintained to promote accuracy and fair play in the columns of The World, to correct carelessness and to stamp out fakes and fakers. Complaints are carefully investigated by the bureau, and if they are well grounded, corrections are published and given approximately the same prominence as was given the matter complained of.

The inquiries made by the bureau and the corrections published are a constant reminder to editors, reporters and correspondents that great care is necessary in order to maintain The World's reputation for accuracy and fair play. Members of The World staff and its correspondents generally have worked in hearty accord with the bureau. There has been a very material decrease in libel suits since the bureau was created. It has occasionally demonstrated to complainants who, in good faith, accused The World of error that they themselves were mistaken. The corrections published are continually building up a spirit of friendliness and good-will between The World and its readers and increasing public confidence in The World as an institution. The bureau receives many cordial letters of thanks and appreciation from individuals, societies and corporations who have had dealings with it.

The bureau has guarded against complaints that have no merit. Unfortunately, there are lawyers who make a specialty of stirring up litigation. Several have been discovered who, seemingly, are not averse to representing disreputable persons and who do not hesitate to bring suits on false and perjured complaints. Neither trouble nor expense is spared in fighting these suits.

PRODUCTION OF GOLD AND SILVER IN THE WORLD SINCE 1860.

(The annual production of 1860 to 1872 is obtained from five-year period estimates compiled by Dr. Adolph Soetbeer. Since 1872 the estimates are those of the Bureau of the Mint.)

Cal. Yr.	Gold. Fine Ounces.	Gold. Value.	Silver. Fine Ounces.	Silver. Com'rcial Value.	Cal. Yr.	Gold. Fine Ounces.	Gold. Value.	Silver. Fine Ounces.	Silver. Com'rcial Value.

Silver is valued in the above table at $0.70028 an ounce.

TREASURERS OF THE UNITED STATES.

The germ of the Treasury Department was planted when, on July 29, 1775, the Continental Congress appointed two Treasurers. The appointments were Michael Hillegas and George Clymer. The latter soon resigned to accept his seat as delegate to the Congress. Mr. Hillegas discharged the duties of Treasurer until September 11, 1789. The Treasury Department was organized under the act of September 2, 1789. Strictly speaking, it was reorganized, for the department under various names had been in existence since 1775. The Constitution went into effect March 4, 1789. Washington was inaugurated as the first President of the United States April 30, 1789. It will thus be seen that Mr. Hillegas was Treasurer for nearly five months after the inauguration of Washington, and for nine days after the Treasury Department was organized under the Constitution.

SLAUGHTERING AND MEAT PACKING WHOLESALE.

According to the reports collected at the biennial United States census of manufactures, 1923, establishments engaged primarily in wholesale slaughtering and meat packing reported products valued at $2,585,803,888, an increase of 17.5 per cent. as compared with $2,200,942,072 in 1921, the last preceding census year.

This industry classification covers establishments engaged both in slaughtering cattle, hogs, sheep, or other animals, and in preserving all or a part of the raw stock by canning, salting, smoking, or otherwise curing it for the trade; establishments which purchase raw stock from slaughter houses and preserve it, and establishments engaged in slaughtering only.

The output of the principal classes of products in 1923 and the percentages of increase as compared with 1921 are as follows:

Fresh beef, 4,834,780,580 pounds, valued at $607,468,593, the rates of increase in quantity and value being 14.8 per cent. and 10.9 per cent., respectively; pickled and other cured pork, 3,891,034,833 pounds, valued at $609,184,888, increases of 29.9 and 11.8 per cent., respectively; fresh pork, 3,265,684,201 pounds, valued at $429,104,502, increases of 40.7 and 14.8 per cent., respectively; lard, 2 131,993,455 pounds, valued at $263,887,257, increases of 35.3 and 38.6 per cent., respectively.

The numbers and weights on hoof of the several classes of animals slaughtered in 1923, together with their percentages of increase or decrease as compared with 1921, are as follows:

Beeves, 10,178,496, weighing 9,681,793,427 pounds, increases of 23.2 and 19.1 per cent., respectively; calves, 5,100,012, weighing 865,548,500 pounds, increases of 18.2 and 22.2 per cent., respectively; sheep and lambs, 13,193,856 weighing 1,060 268,890 pounds, decreases of 10 7 and 10.6 per cent., respectively; hogs, 57,018,292, weighing 12,631,881,880 pounds, increases of 40 and 39.5 per cent., respectively.

THE AGRICULTURAL CONFERENCE.

President Coolidge appointed on Nov. 7, 1924, to serve as members of the commission to inquire into agricultural conditions these men:

Former Gov. Robert D. Carey, Careyhurst, Wyo., Chairman; O. E. Bradfute, President American Farm Bureau Federation, Chicago, Ill.; Charles S. Barrett, Chairman National Board of Farm Organizations, Union City, Ga.; Louis J. Taber, Master, the National Grange, Columbus, O.; Ralph P. Merritt, President, Sun-Maid Raisin Growers, Fresno, Cal.; R. W. Thatcher, Director of the New York Experiment Stations, Geneva, N. Y.; W. C. Coffey, Dean of the College of Agriculture and Director of Experiment Station of the University of Minnesota, University Farm, St. Paul, Minn.; Fred H. Bixby, President of the American National Livestock Association, Long Beach, Cal; and William M. Jardine, President, Kansas State Agricultural College, Manhattan, Kan.

CHIEF APPROPRIATIONS BY ROCKEFELLER FOUNDATION IN 1924.

Medical schools (including $500,000 for McGill University, Montreal, Canada; $475,000 for University of Cambridge, England; $450,000 for the State University of Iowa; smaller amounts for ten other medical schools, as well as for premedical schools and hospitals in China)	$3,545,664.65
Measures for relief and control of hookworm disease, yellow fever, malaria and tuberculosis	1,949,900.73
State and national health services	$106,910.60
County health work (United States, Canada and Brazil)	241,000.71
Schools of hygiene and public health	802,500.00
Nurse training and dispensary service	287,000.00
Fellowships in medical education and public health	776,900.00
Scientific research institutions	604,500.00
League of Nations	142,380.00

HIGHEST RANKING OFFICERS IN THE UNITED STATES ARMY.

(The list is as of Nov. 1, 1924, and includes both staff and line. Retirement age is sixty-four years.)

CHIEF OF STAFF.

Major Gen. John L. Hines, 1868. 1887, 1921.

PARTY STRENGTH IN CONGRESS.

FEDERALISTS AND REPUBLICANS.

Congress.		Federalists.		Republicans.		President.	Remarks.
		Senate.	House.	Senate.	House.		
1st.	1789–1791	24	53	2	12	Washington.	In Colonial and Revolutionary Days the Americans were either Whigs (Liberals), or Tories (Conservatives). John Adams called it a division between the Court party and the Country party. There was, however, no party organization, and the Colonists were mostly Whigs. The rulers sent from England were the Tories. In the Revolution, the people were divided between Patriots (Whigs), and Loyalists (Tories). Immediately after the Revolution the people became either Nationalists (Republicans), or Federalists, according as they favored States' rights, or a strongly centralized government. The Federalists were stronger in the big States, such as Va., Pa., and Mass. The Republicans also were called Democrats, or Democratic-Republicans.
2nd.	1791–1793	17	55	13	14	Washington.	
3rd.	1793–1795	18	51	12	54	Washington.	
4th.	1795–1797	19	47	13	59	Washington.	
5th.	1797–1799	21	52	11	54	Adams.	
6th.	1799–1801	19	58	13	48	Adams.	
7th.	1801–1803	13	35	19	71	Jefferson.	
8th.	1803–1805	10	39	24	103	Jefferson.	
9th.	1805–1807	7	30	27	112	Jefferson.	
10th.	1807–1809	7	28	31	110	Jefferson.	
11th.	1809–1811	10	47	24	95	Madison.	
12th.	1811–1813	6	36	30	105	Madison.	
13th.	1813–1815	9	67	27	115	Madison.	
14th.	1815–1817	12	61	26	122	Madison.

18th.	1823–1825	8	72	40	141	Monroe.	
19th.	1825–1827	10	79	38	134	Adams.	
20th.	1827–1829	11	85	37	128	Adams.	

DEMOCRATS AND WHIGS.

Congress.		Democrats.		Whigs.		President.	Remarks.
		Senate.	House.	Senate.	House.		
21st.	1829–1831	38	142	10	71	Jackson.	The Whig party at first included National Republicans, Nullifiers, Anti-Masons, and Federalists It finally went to pieces, as a party, on the slavery issue, and its last Presidential candidate was Gen. Scott, in 1852, who carried but four States —Mass., Vt., Ky., and Tenn. The Democratic party gradually absorbed the various pro-Slavery and States' rights elements. In the 25th Congress there were 5 Independents in the Senate and 13 in the House; in the 26th, 2 in the Senate and 6 in the House; in the 30th, 4 in the House. In the 29th Congress there were 6 Native Americans in the House as Independents.
22nd.	1831–1833	35	130	13	83	Jackson.	
23rd.	1833–1835	30	147	18	93	Jackson.	
24th.	1835–1837	33	144	19	98	Jackson.	
25th.	1837–1839	29	109	18	120	Van Buren.	
26th.	1839–1841	29	124	20	112	Van Buren.	
27th.	1841–1843	20	106	28	134	Harrison-Tyler.	
28th.	1843–1845	23	142	29	81	Tyler.	
29th.	1845–1847	32	142	24	77	Polk.	
30th.	1847–1849	34	109	21	115	Polk.	
31st.	1849–1851	33	116	25	107	Taylor-Fillmore.	
32nd.	1851–1853	36	140	23	88	Fillmore.	
33rd.	1853–1855	39	157	18	73	Pierce.	

DEMOCRATS AND REPUBLICANS.

Congress.		Democrats.		Republicans.		President.	Independents in Congress (Not Counted in Regular Table). S stands for Senate; H, for House.
		Senate.	House.	Senate.	House.		
34th.	1855–1857	41	83	16	108	Pierce.	Americans, S., 5; H., 43.

PARTY STRENGTH IN EARLY CONGRESSES.

The figures as to party strength in the First to the Twentieth, and also in the Twenty-first to the Thirty-first Congresses are slightly at variance as between different political authorities. The data in the table above for the Sixty-eighth and Sixty-ninth Congresses are as of Dec. 17, 1924

Astronomical Calculations for 1925.

The Astronomical Calculations, beginning on the next page, are given in local Mean Time, except as otherwise indicated, and were made expressly for THE WORLD ALMANAC by Arthur Newton of the United States Naval Observatory, Washington, D. C.

THE SEASONS.

In the temperate zones, these are four in number: Spring, Summer, Autumn and Winter; beginning respectively at the vernal equinox, the summer solstice, the autumnal equinox and the winter solstice; for which, in the north temperate zone, the approximate dates are March 21, June 21, September 23, and December 21. In the south temperate zone, the vernal equinox or the beginning of spring is September 23, the summer solstice or the beginning of summer is December 21, and so on.

The earth's axis continually points in the same direction, and if the axis were perpendicular to the plane of the earth's orbit around the sun there would be no change of seasons. Day and night would everywhere be of equal length and equable conditions of temperature would prevail throughout the year. But the axis is tilted 23° 27' away from a perpendicular to the orbit, and only in March and September is the axis at right angles to the direction of the sun. In those months occur the equinoxes, when day and night are equal the world over. In June, the North Pole is tilted 23° 27' toward the sun and the days in the northern hemisphere are longer than the nights; at the same time, the days in the southern hemisphere are shorter than the nights. In December the North Pole is tilted 23° 27' away from the sun and the nights in the northern hemisphere are longer than the days; at the same time the nights in the southern hemisphere are shorter than the days.

The heating influence of the sun increases with the length of the day and with the sun's altitude at noon. The greatest daily accession of heat is, therefore, at the time of the summer solstice; and the least is at the time of the winter solstice. In June, in the north temperate zone, the heat received by day far exceeds the loss through radiation by night, and it is not until July or August that the two become equal and the maximum temperature of the year is experienced. In December, the heat received by day fails to make good the loss by night, and it is not until January or February that gain and loss become equal and the thermometer ceases to show a downward tendency.

The seasons in 1925 (Eastern Standard Time) begin as follows: Vernal equinox (Spring), March 20 (10.13 P. M.); summer solstice (Summer), June 21 (5.50 P. M.); autumnal equinox (Autumn), Sept. 23 (8.44 A. M.); winter solstice (Winter), Dec. 22 (3.37 A. M.).

1st Month. **JANUARY.** *(Local Mean Time.)* 31 Days.

METHOD OF USING THE TABLE ABOVE, WITH NEW YORK CITY AS AN EXAMPLE.

Directions:—From New York City, subtract 4m. from the Calendar for that city and the result is in Eastern standard time; for other cities, use the Calendar named at head of column and add or subtract the given number of minutes; this gives the required standard time, which is Eastern, Central, Mountain or Pacific, according as the letter E, C, M or P is found in the table. A small letter indicates that in case of sunrise and sunset, a correction for latitude is advisable; which correction is to be found in the table below, in the column headed by the small letter and on line with the date.

CORRECTION TO SUNRISE.

NOTE.—To ascertain any day of the week, first look in the table for the year required, and under the months are figures which refer to the corresponding figures at the head of the columns of days below. *For Example:*—To know on what day of the week July 4, 1918, fell, look in the table of years for 1918, and in a parallel line under July is figure 1, which directs to column 1 in which it will be seen that July 4 fell on Thursday.

* 1752 same as 1772 from January 1 to September 2. From September 14 to December 31 same as 1780 (September 3–13 were omitted). (Whitaker's Almanack).

THE ANCIENT AND MODERN YEAR.

THE Athenians began the year in June, the Macedonians in September, the Romans first in March and afterward in January, the Persians on August 11, the ancient Mexicans on February 23, the Mohammedans in July. The Chinese year, which begins late in January or early in February, is similar to the Mohammedan in having 12 months of 29 and 30 days alternately; but in every nineteen years there are seven years which have 13 months. This is not quite correct, and the Chinese have therefore formed a cycle of 60 years, in which period 22 intercalary months occur.

THE FRENCH REVOLUTIONARY ERA.

IN September, 1793, the convention decreed that the common era should be abolished in all civil affairs, and that the new French era should begin on September 22, 1792, the day of the true Autumnal Equinox, and that each succeeding year should begin at the midnight of the day on which the true Autumnal Equinox falls. The year was divided into twelve months of thirty days each. In ordinary years there were five extra days, from the 17th to the 21st of our September, and at the end of every fourth year was a sixth complementary day. This reckoning was first used on November 22, 1793, and was continued until December 31, 1805, when it was discontinued, and the Gregorian Calendar was resumed.

CHURCH FASTS.

THE Roman Catholic days of obligation are: Jan. 1 (Circumcision of Christ); Ascension Day (forty days after Easter Sunday); Aug. 15 (Assumption of the Blessed Virgin Mary); Nov. 1 (All Saints' Day); Dec. 8 (Immaculate Conception); Dec. 25 (Christmas), and all the Sundays of the year.

THE Roman Catholic Days of fasting are the forty days of Lent, the Ember Days, the Fridays of the four weeks in Advent, and certain vigils or evenings prior to the greater feasts, while all Fridays of the year are days of abstinence from flesh meat. In the American Episcopal Church the days of fasting or abstinence to be observed, according to the Book of Common Prayer, are the forty days of Lent, the Ember Days, the three Rogation Days, and all the Fridays of the year except Christmas Day. In the Greek Church the four principal fasts are those in Lent, the week succeeding Whitsuntide, the fortnight before the Assumption, and forty days before Christmas.

EMBER AND ROGATION DAYS.

EMBER and Rogation Days are certain periods of the year devoted to prayer and fasting. Ember Days (twelve annually), about the beginning of the four seasons, are the Wednesday, Friday, and Saturday after the first Sunday in Lent, in Spring; after the feast of Pentecost (Whitsunday), Summer; after the festival of the Holy Cross, Autumn, and after the festival of St. Lucia, Winter. Ember Weeks are the weeks in which the Ember Days appear.

Rogation Days occur on the Feast of St. Mark, April 25, and on the three days immediately preceding Ascension Day.

GREEK CHURCH CALENDAR, 1925.

A. D. 1925. A. M. 8034.

DATE.	Holy Days.	DATE.	Holy Days.	DATE.	Holy Days.
Jan. 1	Circumcision	May 21	Ascension	Sept. 8	Nativity of Theotokos
Jan. 6	Theophany (Epiphany)	May 31	Pentecost	Sept. 14	Exaltation of Cross
Feb. 2	Hypapante (Purification)	June 1	Holy Ghost	Oct. 1	Patronage of Theotokos

Easter Sunday (Easter Day) is the first Sunday after Paschal Full Moon, that is, the first Sunday after the ecclesiastical full moon on or next after March 21, and therefore cannot be earlier than March 22, or later than April 25. If Paschal Full Moon falls on a Sunday, then Easter Day is the next Sunday. The Paschal Full Moon is the Fourteenth Day of a Lunar month reckoned according to an ancient ecclesiastical computation and not the real or astronomical full moon.

The Golden Number, used in the table below is greater by unity than the remainder obtained upon dividing the given year by 19; for example, 7 is the Golden Number for the year 1925; from the table, the date of Paschal Full Moon is April 8; and this being Wednesday, Easter Sunday is on April 12, 1925.

Lent begins on Ash Wednesday, which comes 40 days previous to Easter Sunday, not counting Sundays.

DATE OF PASCHAL FULL MOON, 1900-2199.

5	March 31	10	April 5	15	April 10		

DIVISIONS OF TIME.

The interval between two consecutive meridian transits of a fixed star having no proper motion, or the interval during which the earth makes one absolute revolution on its axis, is invariable. Very slightly differing from this is a Sidereal Day, which is the interval between two consecutive transits of the Vernal Equinox over any meridian. Vernal Equinox is employed in two senses: It may mean either the date when Spring commences, or else, as here, the point in the heavens occupied by the sun's centre when Spring commences. The interval between two consecutive transits of the Sun over any meridian is called an *Apparent* Solar Day, and its length varies from day to day by reason of the variable motion of the earth in its orbit and the inclination of this orbit to the Equator on which time is measured.

A *Mean* Solar Day is the average or mean of all the apparent solar days in a year; it is equal to 1 day 3 minutes and 56.555 seconds, when measured in units of the Sidereal Day. *Mean Solar Time* is that shown by a well-regulated clock or watch, while *Apparent Solar Time* is that shown by a well-constructed sun-dial; the difference between the two at any time is the *Equation of Time*, and may amount to 16 minutes and 22 seconds. The Astronomical Day begins at noon and the Civil Day at the preceding midnight: but, beginning with 1925, astronomers will adopt the use of the Civil Day.

The interval during which the earth makes one absolute revolution round the Sun is called a *Sidereal*

Year, and consists of 365 days 6 hours 9 minutes and 9.6 seconds, which is invariable.

The Tropical Year is the interval between two consecutive returns of the sun to the Vernal Equinox. If this were a fixed point, the Sidereal and Tropical Years would be identical; but in consequence of the action of the Sun and Moon upon the equatorial protuberance of the Earth's mass and, in a much less degree, the disturbing influence of the planets upon the Earth's orbit, the Equinox has a slow, retrograde mean motion of 50″.26 annually, so that the Sun returns to the Equinox sooner every year than he otherwise would by 20 minutes 23.6 seconds; the Tropical Year, therefore, consists of 365 days 5 hours 48 minutes and 46 seconds. The Tropical Year is not of uniform length; it is now slowly decreasing at the rate of .530 second per century, but this variation will not always continue.

Julius Cæsar, in B. C. 45, reformed the Roman calendar so that thereafter every fourth year should contain 366 days, and all the other years 365 days. The intercalary day was introduced by counting the *sixth* day before the Kalends of March *bicies*, hence the name bissextile, from bis, twice, and sex, six. He also changed the beginning of the year from the first of March to the first of January, and also changed the name of the fifth month (Quintilis) to July, after himself. The average length of the Julian year is therefore 365¼ days, which, however, is too long by 11 minutes and 14 seconds, and this would accumulate in 400 years to about three days. The Julian Calendar continued in use until A. D. 1582, when the Gregorian Calendar was introduced by Pope Gregory XIII. with the view of keeping the Equinox to the same day of the year. Of the centurial years only those which are exactly divisible by 400 thenceforward contained 366 days. The length of the mean Gregorian Year may therefore be set down at 365 days 5 hours 49 minutes 12 seconds, and the error will amount to one day in 3,000 years. The Gregorian Calendar was introduced into England and her colonies in 1752, at which time the Equinox had retrograded 11 days since the Council of Nice in A. D. 325, when the rule for Easter Day was established and the Equinox occurred on March 21; hence September 3, 1752, was called September 14, and at the same time the commencement of the legal year was changed from March 25 to January 1, so that the year 1751 lost the months of January and February and the first 24 days of March. The difference between the Julian and Gregorian Calendars is now 13 days.

The Gregorian Calendar was adopted by Japan in 1873, by the Chinese Republic in 1912, by the Turkish Parliament in 1917, by the Bolshevist Government of Russia in 1918, by Roumania in 1919, and by Greece and the Greek Church in 1923.

STANDARD TIME.

The United States adopted standard time in 1883, on the initiative of the American Railway Association, and at noon of November 18, 1883, the telegraphic time signals sent out daily from the Naval Observatory at Washington were changed to the new system, according to which the meridians of 75°, 90°, 105° and 120° west from Greenwich became the time meridians of Eastern, Central, Mountain, and Pacific standard time respectively.

By Act of Congress, approved March 19, 1918, standard time is made the legal time throughout the United States; in addition to the four time meridians already mentioned, the meridian 150° west from Greenwich is established the time meridian of standard Alaska time; authority to readjust the boundary line between the time zones is lodged with the Interstate Commerce Commission. The Commission has made the readjustment so as to bring the new limits of the zones about half way between the standard meridians.

United States standard Eastern time is used from the Atlantic Ocean to a line through Toledo, Monroeville, Mansfield and Newark, O.; thence through Huntington, W. Va.; Norton, Va.; Johnson City, Tenn.; Asheville, N. C.; Atlanta and Macon, Ga., and Apalachicola, Fla. U. S. standard Central time is used from this first line to a line through Mandan, N. D.; Pierre, S. D.; McCook, Neb.; Dodge City, Kan., and along west line of Okla. and Tex.; standard Mountain time is used from the second line to a line that forms the western boundary of Mont., thence follows the Salmon River westward, the western boundary of Idaho southward, the southern boundary of Idaho eastward, and thence passes southward through Ogden and Salt Lake City, Utah; Parker and Yuma, Ariz. U. S. standard Pacific time is used from the third line to the Pacific Ocean.

Almost all countries throughout the world use standard time that differs from Greenwich time by a whole number of hours or half-hours; a few countries, however, use standard time based on the longitude of their national observatories.

TIME DIFFERENCE.

12 o'Clock Noon U. S. Standard Eastern Time Compared With Clocks in Foreign Cities:

United States standard Eastern time is time of the meridian 75° west from Greenwich. If Daylight Saving time be desired one hour must be added to the time given in the two tables above. Daylight Saving time is still in use in Europe; also in some American cities and Commonwealths.

Longitude Difference Between N. Y. City and Foreign Cities Measured From N. Y. East or West.

The above table of days' lengths at New York City serves as the basis for similar computations elsewhere.

HOLIDAYS OF THE WORLD.

(For full list of fixed, historical, commemorative, and religious holidays, see 1919 ALMANAC.)

Christmas and New Year's are observed the world over.

In Episcopal countries, such as England, the only church days which are regular legal holidays, aside from Christmas, are Good Friday, Easter Monday, and Whit-Monday. This holds good for the British colonies, in some of which several Roman Catholic Church holidays are established. Whit-Sunday, or White Sunday, comes seven weeks after Easter. It commemorates the descent of the Holy Ghost upon the Apostles; the old feast of Pentecost.

In Roman Catholic countries, such as Spain, the church days other than Christmas which are almost universally legal holidays are Epiphany, Ascension, Assumption, All Saints', and Immaculate Conception. Throughout the Latin-American countries it is usual to observe, in addition, Good Friday and Corpus Christi. Good Friday is in many of these countries a 3-day holiday season, beginning on Holy Thursday and closing on Holy Saturday.

In Lutheran countries, such as Sweden and Prussia, Epiphany, Annunciation, Good Friday, Easter Monday, Ascension Day, Whit-Monday, Ash Wednesday, and Corpus Christi are holidays.

OLD ENGLISH HOLIDAYS.

JANUARY 6. TWELFTH DAY, or Twelfth-tide, sometimes called Old Christmas Day, the same as Epiphany. The previous evening is Twelfth Night, with which many social rites have long been connected.

FEBRUARY 2. CANDLEMAS: Festival of the Purification of the Virgin. Consecration of the lighted candles to be used in the church during the year. Also known as "Groundhog Day."

FEBRUARY 14. OLD CANDLEMAS: St. Valentine's Day.

MARCH 25. LADY DAY: Annunciation of the Virgin. April 6 is old Lady Day.

June 24. MIDSUMMER DAY: Feast of the Nativity of John the Baptist. July 7 is old Midsummer Day.

JULY 15. ST. SWITHIN'S DAY. There was an old superstition that if rain fell on this day it would continue forty days.

AUGUST 1. LAMMAS DAY. Originally in England the festival of the wheat harvest. In the church the festival of St. Peter's miraculous deliverance from prison. Old Lammas Day is August 13.

SEPTEMBER 29. MICHAELMAS: Feast of St. Michael the Archangel. Old Michaelmas is October 11.

NOVEMBER 1. ALL-HALLOWMAS: All-hallows, or All Saints' Day. The previous evening is All-hallow-e'en, observed by home gatherings and old-time festive rites.

NOVEMBER 2. ALL SOULS' DAY: Day of prayer for the souls of the dead.

NOVEMBER 11. MARTINMAS: Feast of St. Martin. Old Martinmas is November 23.

DECEMBER 28. CHILDERMAS: Holy Innocents' Day.

Lady Day, Midsummer Day, Michaelmas and Christmas are quarter (rent) days in England, and Whitsunday, Martinmas, Candlemas and Lammas Day in Scotland.

Shrove Tuesday, the day before Ash Wednesday, and Maundy Thursday, the day before Good Friday, are observed by the church. Mothering Sunday is Mid-Lent Sunday, in which the old rural custom obtains of visiting one's parents and making them presents.

LEGAL OR PUBLIC HOLIDAYS IN THE UNITED STATES IN 1925.

The chief legal or public holidays are:

Jan. 1—New Year's Day (all the States, Territories and colonial possessions).

Feb. 12—Lincoln's Birthday (Alaska, Cal., Colo., Conn., Del., Ill., Ind., Ia., Kan., Ky., Mich., Minn., Mo., Mont., Neb., Nev., N. J., N. Y., N. Dak., Ohio, Ore., Pa., S. Dak., Tenn., Utah, Wash., W. Va., Wyo. and observed by Governor's proclamation in Mass.).

Feb. 22—Washington's Birthday (all the States, Territories and possessions).

April 10—Good Friday (Conn., Del., Fla., La., Md., Minn., N. J., Pa., Philippines, Porto Rico, Tenn.). In Conn. Good Friday is usually proclaimed by the Governor as a day of fasting and prayer.

May 30—Decoration or Memorial Day (all States and possessions, except Ala., Fla., Ga., La., Miss., N. Car. and S. Car.).

July 4—Independence Day (all the States, Territories and possessions).

Sept. 7—Labor Day (every State and Territory except Wyoming and the Philippines).

Oct 12—Columbus Day (Ark., Ariz., Cal., Col., Conn., Del., Fla., Idaho, Ill., Ind., Kan., Ky., La., Me., Md., Mass., Mich., Mo., Mont., Nev., Nev., N. H., N. J., N. M., N. Y., N. Dak., Ohio, Ore., Pa., R. I., Tex., Utah, Vt., Wash., W. Va.; also in Porto Rico. In Arkansas and Kansas it does not affect notes or judicial proceedings).

Nov. 3—General Election Day (1st Tuesday after 1st Monday in Nov.). Every State and Territory except Alaska, Dist. of Col., Hawaii, Ill., Mass., Miss., Philippines and Vt. In Illinois it is a legal holiday in Chicago, Springfield, East St. Louis, Galesburg, Danville, Cairo and Rockford. In Ohio it is a half holiday. In Maine it is a legal holiday only as to the courts, which also close on the State Election Day (biennially, 2d Monday in Sept.).

Nov. 11—Armistice Day (Ala., Ariz., Cal., Fla., Ill., Iowa, La., Minn., Mo., Mont., Neb., N. J., N. Car., N. Dak., Pa., R. I., S. Dak., Tenn., Tex., Vt., Va. and Hawaii In other States by Governor's proclamation only).

Nov. 26—Thanksgiving Day (last Thursday in Nov. Every State, Territory and possession except Utah, where it is observed, though not on the statute books).

Dec. 25—Christmas Day (every State, Territory and possession).

LAW AS TO NEGOTIABLE INSTRUMENTS.

Under the Negotiable Instruments Law every negotiable instrument is payable at the time fixed therein without grace. When the day of maturity falls upon Sunday or a holiday, the instrument is payable on the next succeeding business day. In the United States legal holidays are fixed by State and Territorial legislation. No national holidays have been established by Congressional action.

OTHER LEGAL OR PUBLIC HOLIDAYS IN 1925 (SEE ALSO ARBOR DAYS).

Jan. 8—Battle of New Orleans (at New Orleans only).

Jan. 19—R. E. Lee's Birthday (observed in Ala., Ark., Fla., Ga., Miss., N. C., S. C., Tenn. and Va.).

Feb. 12—Georgia Day (in that State only. Date of Oglethorpe's landing in 1733).

Feb. 14—Admission Day (in Arizona).

Feb. 24—Shrove Tuesday (observed as Mardi Gras in Ala., Fla. and La.).

Mar. 2—Sam Houston Memorial Day (in Texas).

Mar. 4—Inauguration Day (once every 4 years in the Dist. of Col. only).

Mar 22—Emancipation Day (in Porto Rico).

Mar. 25—Maryland Day (in that State only).

Mar. 30—Seward Day (in Alaska).

April 9—Holy Thursday (in the Philippines).

April 12—Date of passage of Halifax Resolutions (in North Carolina).

April 15—Birthday of Thomas Jefferson (in Ala.).

April 19—Observed as Patriots' Day (in Me. and Mass.).

April 21—Anniversary Battle of San Jacinto (in Tex.).

April 21 (3rd Tuesday) State elections (in La.).

April 26—Confederate Memorial Day (in Ala., Fla., Ga. and Miss.).

April 30 (Last Thursday)—Fast Day (in N. H.).

May 1—Labor Day (in Philippines).

May 10—Confederate Memorial Day (observed in N. Car. and S. Car.).

May 20—Anniversary signing of Mecklenburg Declaration of Independence (observed in N. C.).

June 3—Confed. Memorial Day (in Tenn.).

June 3—Birthday of Jefferson Davis (in Ala., Ark., Fla., Ga., La., Miss., S. C., Tenn., Tex. and Va.).

June 11—Kamehameha Day (in Hawaii).

June 15—Pioneer Day (in Idaho).

July 13—Birthday of Gen. Bedford Forrest (Tennessee only).

July 17—Muno Rivera Day (in Porto Rico).

July 24—Pioneer Day (in Utah).

July 25—Occupation Day (in Porto Rico).

Aug. 1—Colorado Day (in that State only).

Aug. 13—Occupation Day (in Philippines).

Aug. 16—Anniv. Battle of Bennington (in Vt.).

Sept. 6—Lafayette Day (also the anniversary of the First Battle of the Marne) is not a legal holiday, but is celebrated in New York and ten other States.

Sept. 9—Admission Day (in Cal.).

Sept. 12—Defenders' Day (in Md.).

Oct. 1—Missouri Day (in that State only).

Oct. 9—Fraternal Day (Alabama only).

Oct. 18—Alaska Day (in Alaska only).

Oct. 31—Admission Day (in Nev.).

Nov. 1—All Saints' Day (in La.).

Dec. 30—Rizal Day (in Philippines).

Mother's Day is observed on the second Sunday in May.

DATES ON WHICH ARBOR DAY IS OBSERVED.

The Fifty-first Anniversary of Arbor Day was celebrated throughout the United States on April 22, 1923, as a part of Forest Protection Week, nationally observed because of Proclamation issued by the President.

Arbor Day in the United States is mostly a spring observance. In some States it is combined with Bird Day. In the following list, the first year named is when observance began, the second is when the law was enacted. "Proclamation" means date is set each year by Governor's proclamation.

Alabama (1887)—In Spring, often on Audubon or Bird Day.
Arizona (1890)—In northern part, first Friday after April 1; in southern part, first Friday after February 1.
Arkansas (1906-1905)—First Saturday in March.
California (1886-1909)—March 7, Luther Burbank's birthday.
Colorado (1885-1889)—Third Friday in April. Proclamation.
Connecticut (1886-1886)—In the spring. Proclamation.
Delaware (1901)—In April. Proclamation.
District of Columbia (1920)—Third Friday in April.
Florida (1886)—First Friday in February.
Georgia (1887-1890)—Third Friday in December.
Hawaii (1905)—In November. Proclamation.
Idaho (1886-1903)—In April. Fixed by County School Superintendents.
Illinois (1887-1887)—April or October. Proclamation.
Indiana (1884-1916)—Third Friday in April.
Iowa (1887)—Proclamation.
Kansas (1875)—Proclamation.
Kentucky (1886)—In autumn. Proclamation.
Louisiana (1888)—Second Friday in January.
Maine (1887)—In spring. Proclamation.
Maryland (1884-1884)—In April. Proclamation.
Massachusetts (1886)—Last Saturday in April. Proclamation.
Michigan (1885)—April or May. Proclamation.
Minnesota (1876)—Latter part of April. Proclamation.
Mississippi (1890)—December and February. Set by State Board of Education.
Missouri (1886-1889)—First Friday after first Thursday in April.
Montana (1888-1887)—Second Tuesday in May.
Nebraska (1872-1885)—April 22, J. S. Morton's birthday. **Public Holiday.**
Nevada (1887)—Proclamation.
New Hampshire (1886)—Early in May. Proclamation.
New Jersey (1884-1908)—Second Friday in April.
New Mexico (1890)—Second Friday in March. Proclamation.
New York (1889-1889)—First Friday after May 1.
North Carolina (1893-1915)—First Friday after November 1. Proclamation.
North Dakota (1882)—Proclamation.
Ohio (1882-1892)—In April. Proclamation.
Oklahoma (1898-1901)—Friday after second Monday in March.
Oregon (1889)—Second Friday in February in east; second Friday in April in west.
Pennsylvania (1887-1887)—In Spring and Autumn. Proclamation.
Philippines (1906)—September or October. Proclamation.
Porto Rico—Last Friday in November.
Rhode Island (1887-1887)—Second Friday in May. **Public Holiday.**
South Carolina (1898-1898)—Third Friday in November.
South Dakota—In April.
Tennessee—First Friday in April. Proclamation.
Texas (1890-1889)—Washington's Birthday.
Utah—April 15
Vermont—First Friday in May. Proclamation.
Virginia (1892-1902)—In spring. Proclamation.
Washington (1894)—First Friday in May. Proclamation.
West Virginia (1883)—Second Friday in April.
Wisconsin (1892-1889)—First Friday in May.
Wyoming (1888)—First Friday in May. Proclamation.

ASTRONOMICAL CONSTANTS.

MEAN solar parallax, 8″.80. Nutation constant, 9″.21.

Aberration constant, 20″.47. Annual precession, 50″.2564+0″.000222 (t—1900).

Obliquity of the ecliptic, 23° 27′ 8″.26—0″.4684 (t—1900).

Annual diminution of obliquity, 0″.4684.

Moon's equatorial horizontal parallax, 57′ 2″.63.

Moon's mean distance from the earth (centre to centre), 238,857 miles.

Sun's mean distance from the earth (astronomical unit), 92,897,400 miles.

Velocity of light, 186,324 miles per second.

Light travels unit of distance—viz. 92,897,400 miles in 498.580 seconds.

Length of the Year—Tropical (equinox to equinox, 365.2421988 days. Sidereal or absolute revolution, 365.2563604 days. Anomalistic (from perihelion to perihelion), 365.2596413 days.

Length of Day—Sidereal, 23 hours 56 minutes 4.091 seconds (mean solar time). Mean solar, 24 hours 3 minutes 56.555 seconds (sidereal time).

Length of the Month—Synodical (from new moon to new moon), 29 days 12 hours 44 minutes 2.8 seconds. Tropical, 27 days 7 hours 43 minutes 4.7 seconds. Sidereal (absolute revolution), 27 days 7 hours 43 minutes 11.5 seconds. Anomalistic (from perigree to perigree), 27 days 13 hours 18 minutes 33.1 seconds.

Dimensions of the Earth—Equatorial radius, 3,963.34 miles. Polar radius, 3,949.99 miles. Eccentricity of the oblate spheroid, 0.0819981.

ASTRONOMICAL SIGNS AND SYMBOLS.

☉	The Sun.	♂	Mars.	☌	Conjunction.
☾	The Moon.	♃	Jupiter.	□	Quadrature.
☿	Mercury.	♄	Saturn.	☍	Opposition.
♀	Venus.	♅	Uranus.	☊	Ascending Node.
⊕	The Earth.	♆	Neptune.	☋	Descending Node.

Two heavenly bodies are in "conjunction" (☌) when they have the same *Right Ascension*, or are on the *same meridian*, *i. e.*, when one is due *north* or *south* of the other; if the bodies are near each other as seen from the earth, they will rise and set at the same time; they are in "opposition" (☍) when in opposite quarters of the heavens, or when one rises as the other is setting. "Quadrature" (□) is half way between conjunction and opposition. By "greatest elongation" is meant the greatest apparent *angular* distance from the sun; the planet is then generally most favorably situated for observation. Mercury can be seen with the naked eye only at this time. When a planet is in its "ascending" (☊) or "descending" (☋) node it is passing through the plane of the earth's orbit. The term "Perihelion" means nearest to the sun, and "Aphelion" furthest from the sun. An "occultation" of a planet or star is an eclipse of it by some other body, usually the moon.

THE ZODIAC.

THE sun's apparent yearly path among the stars is known as the ecliptic. The zone 16° wide, 8° on each side of the ecliptic, is known as the zodiac. Beginning at the point on the ecliptic which marks the position of the sun at the vernal equinox, and thence proceeding eastward, the zodiac is divided into twelve signs of 30° each, as follows:

Spring Signs.	1. ♈ Aries.	The Ram.
	2. ♉ Taurus.	The Bull.
	3. ♊ Gemini.	The Twins.
Summer Signs.	4. ♋ Cancer.	The Crab.
	5. ♌ Leo.	The Lion.
	6. ♍ Virgo.	The Virgin.
Autumn Signs.	7. ♎ Libra.	The Balance.
	8. ♏ Scorpius.	The Scorpion.
	9. ♐ Sagittarius.	The Archer.
Winter Signs.	10. ♑ Capricornus.	The Goat.
	11. ♒ Aquarius.	The Water-Bearer.
	12. ♓ Pisces.	The Fishes.

These signs are named from the twelve constellations of the zodiac; with which the signs coincided in the time of the astronomer Hipparchus, about two thousand years ago. Owing to the precession of the equinoxes, that is to say, to the retrograde motion of the equinoxes along the ecliptic, each sign in the zodiac has, in the course of two thousand years, moved backward 30° into the constellation west of it; so that the sign Aries is now in the constellation Pisces, and so on.

THE SUN'S RIGHT ASCENSION AND DECLINATION.

(Washington—Apparent Noon.)

Date, 1925.	Ap'ar'nt Right Asc'ns'n	Apparent Declination.

ECLIPSES IN 1925.

In 1925 there will be four eclipses, two of the sun and two of the moon.

I. A total eclipse of the sun, January 24, 1925, visible as total in a track varying from 80 to 110 miles in width, extending from Minnesota to the Atlantic Ocean and including the cities of Duluth, Escanaba, Stratford, Buffalo, Binghamton, Ithaca, Poughkeepsie, New Haven, and Providence; also the northern part of the City of New York. Details are given below.

II. A partial eclipse of the moon on the evening of February 8; the ending visible in the eastern part of the United States. Beginning of eclipse at 3.09 P. M., Eastern standard time; middle at 4.42 P. M.; ending at 6.15 P. M. Magnitude of greatest eclipse 0.735 (moon's diameter = 1.0).

III. An annular eclipse of the sun, July 20-21, visible in the southern Pacific Ocean. Greatest duration of annular phase will be seven and one-quarter minutes.

IV. A partial eclipse of the moon on the morning of August 4; visible in the far Western States. Beginning of eclipse at 2.27 A. M., Pacific standard time; middle at 3.53 A. M.; ending at 5.18 A. M. Magnitude of greatest eclipse 0.751 (moon's diameter = 1.0).

TOTAL ECLIPSE OF THE SUN, JANUARY 24, 1925.

Upper transit of Polaris, or of any star, occurs 3m. 56s. earlier each day. The interval between lower and upper transit of Polaris is 11h. 58m. 2s. In the United States, the greatest Eastern elongation of Polaris occurs 5h. 55m. before upper transit and 6h. 3m. after lower transit; while the greatest Western elongation occurs 5h. 55m. after upper transit and 6h. 3m. before lower transit. The sine of the azimuth of Polaris at greatest elongation is found by dividing the sine of the polar distance by the cosine of the latitude.

MARS A ZERO PLANETARY ABODE?

Belief that the temperature of Mars is low and its atmosphere rare was expressed in September, 1924, by the Carnegie Institution of Washington, announcing the results of the observations made at the Mount Wilson Observatory in California during the approach of the planet to the earth.

Measurements of the temperature and heat radiation of Mars were made with a vacuum thermocouple attached to the observatory's 100-inch reflecting telescope.

The measurements indicate that the temperature of the tropical regions of Mars at Martian noon is about 10 degrees above freezing, and that the mean temperature over the south polar cap is about 95 degrees below zero Fahrenheit.

THE MAGNETIC POLES.

The geographical poles of the earth are the extremities of the imaginary line passing through its centre of gravity and about which it revolves, and are therefore symmetrically located with regard to the equator.

The magnetic poles, however, are not coincident with the geographical poles, nor are they diametrically opposite to each other.

Recent investigations of the magnetic observations made in polar regions lead to the conclusion that the north magnetic pole may cover a region of considerable area, and that the present approximate mean position is latitude 70.8° N. and longitude 96° W.

For the south magnetic pole, from a consideration of all the results available, according to the United States Coast and Geodetic Survey, the position latitude 72.7° S. and longitude 156° E. has been tentatively adopted.

Because of the observed change in the direction of the magnetic needle from year to year it is believed that the magnetic poles are not stationary; but their motion is undoubtedly slow.

* At mean distance.

THE MOON.

Of all the secondary planets the earth's satellite is by far the most interesting and important. The moon completes her circuit around the earth in a period whose mean or average length is 27 days 7 hours 43.2 minutes; but in consequence of her motion in common with the earth around the sun, the mean duration of the lunar month—that is, the time from new moon to new moon—is 29 days 12 hours 44.05 minutes, which is called the moon's synodical period. If the earth were motionless in space the moon's orbit would be nearly an ellipse, having the earth in one of the foci; hence her distance from the earth varies during the course of a lunar month. Her mean distance from the earth is 238,857 miles. Her maximum distance, however, may reach 252,715 miles, and the least distance to which she can approach the earth is 221,466 miles. Her diameter is 2,160 miles, and if we deduct from her distance from the earth the sum of the two radii of the earth and moon—viz., 3,963 and 1,080 miles, respectively—we shall have for the nearest approach of the surfaces of the two bodies 216,423 miles. Her orbit is a very intricate one, because the earth in moving around the sun carries the moon along with it; hence the latter is sometimes within and sometimes without the earth's orbit. Its form is that of a serpentine curve, always *concave* toward the sun, and its plane is inclined to the plane of the earth's orbit at an angle of 5° 9′, in consequence of which our satellite appears sometimes above and sometimes below the plane of the earth's orbit, through which she passes twice in a revolution. These points of intersection with the ecliptic are called nodes, and it is only at or near them that eclipses can occur. The nodes have a retrograde motion, which causes them to make an entire revolution in 18 years 218 days 21 hours 22 minutes and 46 seconds. Both sun and moon return to a node after 18 years and 11 days, so that an eclipse is followed by another of the same general character at the end of this period, which was well known to the ancients, who called it the Saros, and which was made use of by them in roughly predicting eclipses.

The moon always presents the same face to us, as is evident from the permanency of the various markings on her surface. This circumstance proves that she revolves on an axis, and the time of rotation is exactly equal to the time of revolution around the earth—viz., 27.32166 days. The moon's axis is not perpendicular to the plane of her orbit, but deviates therefrom by an angle of about 6° 41′. In consequence of this fact the poles of the moon lean alternately to and from the earth. When the north pole leans toward the earth we see somewhat more of the region surrounding it, and somewhat less when it leans the contrary way. This displacement is known by the name of libration in latitude. By reason of irregular motion in her orbit, we see more of her eastern or western edge at one time than at another. This phenomenon is known as libration in longitude.

The moon's surface contains about 14,657,000 square miles, or nearly four times the area of Europe. Her volume is 1-49 and her mass 1-81 that of the earth, and hence her density is about 3-5 that of the earth, or about 3 2-5 that of water. At the lunar surface gravity is only 1-6 of what it is at the earth; and therefore a body which weighs 6 pounds here would weigh only 1 pound there.

The centre of gravity of the earth and moon, or the point about which they both actually revolve in their course around the sun, lies *within* the earth it is 1,050 miles below the surface.

The tides are caused mainly by the moon, the tide-raising power of moon and sun being as 11 to 5.

Astronomers cling to the old idea that the moon is a dead world, destitute alike of air and water.

THE EARTH'S ATMOSPHERE.

The earth's sensible atmosphere extends more than 100 miles in height. The condition and motions of this aerial ocean play a most important part in the determination of climate, modifying, by absorbing, the otherwise intense heat of the sun, and, when laden with clouds, hindering the earth from radiating its acquired heat into space.

THE MOON'S PERIGEE AND APOGEE.

(*Eastern Standard Time.*)

April	28	12 P. M.	November	7	5 P. M.
May	26	4 P. M.	December	5	1 P. M.
June	23	3 A. M.			

Each month the moon is said to be in perigee when nearest to the earth and in apogee when furthest from the earth. The average time from perigee to perigee, or from apogee to apogee, is 27d. 13h. 18m. 33s.; and this period is known as the anomalistic month. The moon's distance when in perigee or apogee is not exactly the same in different months but varies considerably according to the phase and the month of the year. The distance is the very least when the full moon nearest to January 1 occurs at the time of perigee. And the distance is the very greatest when the new moon nearest to January 1 occurs at the time of apogee.

HALLEY'S AND OTHER COMETS.

Of the great number of comets which have temporarily visited our solar system or have become permanent members of it none has surpassed Halley's in historical associations. It has a record dating back to B. C. 240; its visitations spread alarm and consternation throughout Europe during the Middle Ages, it was the first whose return was predicted by an Astronomer Royal of England, and will, therefore, for these reasons, be an object of great scientific interest for all time. Its periodic time is 76.8 years, and in April, 1910, it made the perihelion passage for the twenty-ninth time.

ENCKE'S COMET.

The second of the periodic comets to be discovered was Encke's, as Halley's was the first. Encke's Comet has the shortest period known—namely, about 40 months. The observed visitations, from January, 1819, to September, 1924, form an uninterrupted series, thirty-three in number.

Encke's is unique among comets in that its motion is constantly accelerating and its period is decreasing in proportion, being now 1,203 days as compared with 1,205 days in 1819. At first this was ascribed to a resisting medium, but it is more probably due to repeated passage of the comet through a cloud of meteors.

COMETS OF 1843 AND 1882.

In the last 100 years only two comets have been brilliant enough to be seen by day with the unaided eye. Of these one was in February, 1843, the other in September, 1882. Together with the comet of 1668 and that of 1887, they form a comet group; each member, at perihelion, nearly brushes the sun's surface, that of 1843 having a velocity of 366 miles per second and passing halfway around the sun in two hours. These visitors are expected to return after six or seven centuries. The four comets were probably a single body until too close an encounter with the sun resulted in disruption.

DONATI'S COMET.

This was the finest comet of the nineteenth century and is known as the typical comet. In October, 1858, its tail reached halfway from the horizon to the zenith. Its period is 2,000 years.

DOES THE MOON AFFECT WEATHER ON THE EARTH?

There has been a renewal recently of the controversy as to whether the moon at its changes of phases has any influence on the weather. United States Weather Bureau officials say there is no such influence, but the old legend to the contrary persists.

DENSITY OF STARS.

From the photometric study of eclipsing binary stars it has been shown by Roberts and by Russell that the average densities of these stars are small, no more than one-eighth of that of the sun. On this and other grounds astronomers are of the opinion that stars are generally less dense than the sun; that is, that they occupy a larger volume when of equal mass. The sun is only 1.4 times as dense as water, or half as dense as glass, while our earth is 5.5 times as dense as water, or 4 times as dense as the sun.

We may suppose that certain meteors are efficacious for troubling the surface of the sun because they are subject to closer approaches to it. Turner was led to adopt the idea, formerly held by J. Herschel, while trying to represent the variable frequency of sun spots by a series of periodical terms. For a course of years certain constant values may be adopted for the coefficients of these terms, and then these values have to be altered. The epochs of all these perturbations, according to Turner, fall close to the time of the perihelion passage of the Leonids. It is true the distance of the Leonids from the sun, even at perihelion passage, is somewhat great and necessitates recourse to a secondary stream derived through the intervention of some planet. This theory finds a certain degree of confirmation in the Chinese annals, which record ancient increases in sun spots when the Leonids swarm must have passed close to Saturn.

THE HEAT OF THE STARS.

The heat of three stars—Aldebaran, Capella and Betelgvese—has been measured by C. G. Abbot and L. B. Aldrich of the Smithsonian Institution at the Carnegie Solar Observatory on Mt. Wilson, Cal.

The heat of the stars first was gathered and brought to focus by the 100-inch telescope. The heat and light then were passed through a prism and spread out into a rainbow-colored spectrum. The observers then measured the light in each color as well as the invisible heat.

As the hotter a body is the whiter and bluer is its light, the intensities of the heat in the various colors allowed an estimate of the temperature of the stars, which was fixed at approximately 10,000 degrees centigrade, or 18,000 degrees Fahrenheit.

STAR TABLE.

To find the time when star is on meridian, subtract R. A. M. S. of the sun table below from the star's Right Ascension, first adding 24h. to the latter, if necessary; mark this result P. M. if less than 12h.; but if greater than 12h. subtract 12h. and mark the remainder A. M. Thus, on January 1, Sirius is on the meridian at 11.58 P. M., approximately.

Our universe—the space marked out by the distance to the outermost star of the Milky Way—is believed to be 350,000 light years across.

A light year is the distance that light travels in a year, moving at the rate of 186,324 miles a second. It is the yardstick of modern astronomy.

A light year is in round numbers six trillion miles, and the distance across our universe is taken as 350,000 times six trillion miles.

RIGHT ASCENSION OF MEAN SUN, 1925.

(At Washington—Mean Noon.)

The R. A. M. S. increases at the rate of 3.943 minutes daily.

MAGNETIC DECLINATIONS.

OR VARIATION OF COMPASS FOR JANUARY, 1925—WITH THE ANNUAL CHANGE IN 1922 FOR SELECTED PLACES IN THE UNITED STATES.

A plus (+) sign to the annual change denotes that the declination is increasing, and a minus (—) sign the reverse.

(Specially prepared for THE WORLD ALMANAC in the office of the United States Coast and Geodetic Survey.)

* Observatories. Lt. denotes a lighthouse. †Highest latitude in U. S. territory.

DEGREES OF LONGITUDE AND LATITUDE.

The length of one degree of longitude, along the equator is 69.2 miles; each degree of longitude represents 4 minutes of time; the lines of longitude are termed *meridians*.

A degree of latitude, according to Keith Johnston, measures 68.7 miles at the equator, and gradually increases to 69.4 miles in the vicinity of the poles.

Latitude of a place is its angular distance from the equator and is measured by an arc of the meridian between the zenith and the equator. Longitude of a place is measured by the arc of the equator, intercepted between the prime meridian and the meridian passing through the place, or by the angle at the pole between these two meridians.

HIGH-TIDE TABLES.

NOTE—The time as above given from April to October, inclusive, must be increased by one hour in order to obtain Daylight Saving Time.

HIGH-TIDE TABLES—*Continued.*

TIME OF HIGH WATER AT POINTS ON THE ATLANTIC COAST.

The standard time of high water at the following places may be found approximately for each day by adding to or subtracting from the time of high water at Governor's Island, N. Y., the hours and minutes annexed.

		H.	M.
Albany, N. Y.	add	9	54
Annapolis, Md.	add	9	13
Atlantic City, N. J.	sub.		51
Baltimore, Md.	add	11	5
Bar Harbor, Me.	add	2	31
Beaufort, S. C.	add		33
Block Island, R. I.	sub.		41
Boston, Mass.	add	3	12
Bridgeport, Conn.	add	3	2
Bristol, R. I.	sub.		13
Cape May, N. J.	sub.		10
Charleston, S. C.	sub.		15
Eastport, Me.	add	2	37
Fernandina, Fla.	add		26
Gloucester, Mass.	add	2	57
Hell Gate Ferry, East River, N. Y.	add	2	6
Isle of Shoals, N. H.	add	3	1
Jacksonville, Fla.	add	1	30
Key West, Fla.	add	2	19
League Island, Pa.	add	5	26
Marblehead, Mass.	add	3	0
Nahant, Mass.	add	2	59
Nantucket, Mass.	add	4	4
Newark, N. J.	add		58
New Bedford, Mass.	sub.		19
Newburyport, Mass.	add	3	23

San Francisco, Cal.	3	11
Savannah, Ga.	6	6
Seattle, Wash.	11	4
Tampa, Fla.	2	2
Washington, D. C.	2	11

Highest tide at Eastport, Me., 218 inches. At the head of the Bay of Fundy, N. S., the tide rises 70 feet; in the Bristol Channel, England, 60 feet; on the coast of Wales, 36 feet.

VARIATIONS IN RAINFALL.

Cultivation of semi-arid lands does not cause any appreciable difference in the rainfall in that region, according to records of the Weather Bureau of the Department of Agriculture. Special attention has been given by the bureau to this subject and in arriving at this conclusion the specialists delved into the weather records for the last fifty years. During that period there has been a decided increase in the area under cultivation in the Great Plain States. If increasing the area of cultivation in any district increased the precipitation, the specialists point out, a steady rise in the annual rainfall of this region could be expected. Instead of a regular increase, the records show there are well-defined but comparatively short periods of increasing and decreasing rainfall, which cannot be due to cultivation.

The records of the average rainfall over the Western Great Plains show that for twenty-five years from 1868 to 1892 inclusive, it was 19.2 inches, and from 1893 to 1917 inclusive, 18.4 inches. Over the Southern Great Plains the average rainfall for the twenty-five years, from 1868 to 1892 inclusive, was 19.8 inches, and for the next twenty-five years only 17.8 inches.

WEATHER SEASONS NOT CHANGING, SAYS U. S. WEATHER BUREAU.

The coldest January at New Haven, Conn., since 1790 was in 1857. The coldest February occurred eight years after the warmest one. The coldest March was as late as 1870 and again in 1885. The coldest April was in 1874, and many years after the warmest one. The lowest temperature in May was in 1812, 1815, 1870, and 1882. The highest figures in June were in 1779, 1790, 1803, and 1876. In July the lowest was in 1816, with the warmest as early as 1780 and equalled in 1876. The coldest August occurred 61 years after the warmest. In September the coolest months were in the earlier years, but for October, November and December the coldest year came after the warmest year in each case.

WEATHER FLAGS.

OF THE WEATHER BUREAU, U. S. DEPARTMENT OF AGRICULTURE.

THE Weather Bureau furnishes, when practicable, for the benefit of all interests dependent upon weather conditions, the "Forecasts" which are prepared daily at the Central Office in Washington, D. C., and certain designated stations. These forecasts are telegraphed to stations of the Weather Bureau, railway officials, postmasters, and many others, to be communicated to the public by telegraph, telephone, radio, and mail or by means of flags or steam whistles. The flags adopted for this purpose are five in number, and of the forms and colors indicated below:

EXPLANATION OF WEATHER FLAGS.

Fair weather. Rain or snow. Local rain or snow. Temperature. Cold wave.

When number 4 is placed above number 1, 2 or 3, it indicates warmer; when below, colder; when not displayed, the temperature is expected to remain about stationary.

WHISTLE SIGNALS.

A warning blast of from fifteen to twenty seconds' duration is sounded to attract attention. After this warning the longer blasts (of from four to six seconds' duration) refer to weather, and shorter blasts (of from one to three seconds' duration) refer to temperature; those for weather are sounded first.

Blasts.	Indicate.
One long	Fair weather.
Two long	Rain or snow.
Three long	Local rain or snow.

Blasts.	Indicate.
One short	Lower temperature.
Two short	Higher temperature.
Three short	Cold wave.

By repeating each combination a few times, with intervals of ten seconds, liability to error in reading the signals may be avoided.

The forecast messages are telegraphed at the expense of the Weather Bureaus, to places where they are distributed to nearby and local communities; they are furnished at the regular commercial rates and sent "collect." In no case are the forecasts sent to a second address in any place, except at the expense of the applicant.

SMALL CRAFT, STORM AND HURRICANE WARNINGS.

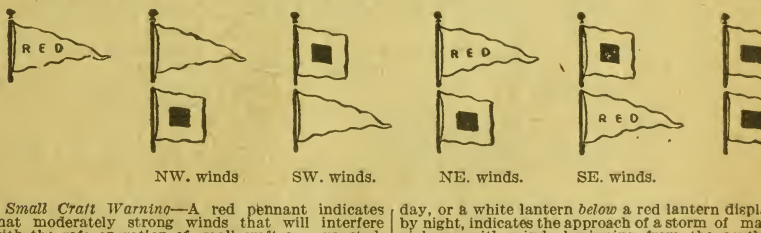
OF THE WEATHER BUREAU, U. S. DEPARTMENT OF AGRICULTURE.

(For lantern signals, see reading matter below the cuts.)

VERIFICATION OF FORECASTS.

The U. S. Weather Bureau in its Administrative Report, claims that its A. M. 36-hour forecasts throughout the whole country, averaged (1915-1919) 86.5 per cent. correct for weather, and 90.2 per cent. correct for temperature. For the Eastern New York locality, in the same period, it is claimed, the A. M. 36-hour forecasts were 85.7 per cent. correct as to weather, and 89.9 per cent. correct as to temperature. The highest percentage of accurate weather forecasts (92.6) was for Southern California; the lowest (81.6) in Upper Michigan. The highest accuracy in temperature forecasts (96.4) was in Florida; the lowest (84.4) in Montana.

All square flags shown here are red with black centre when displayed as warnings.



NW. winds SW. winds. NE. winds. SE. winds.

Small Craft Warning—A red pennant indicates that moderately strong winds that will interfere with the safe operation of small craft are expected. No night display of small craft warnings is made.

Northeast Storm Warning—A red pennant *above* a square red flag with black centre displayed by day, or two red lanterns, one above the other, displayed by night, indicates the approach of a storm of marked violence with winds beginning from the *northeast*.

Southeast Storm Warning—A red pennant *below* a square red flag with black centre displayed by day, or one red lantern displayed by night, indicates the approach of a storm of marked violence with winds beginning from the *southeast*.

Southwest Storm Warning—A white pennant *below* a square red flag with black centre displayed by day, or a white lantern *below* a red lantern displayed by night, indicates the approach of a storm of marked violence with winds beginning from the *southwest*.

Northwest Storm Warning—A white pennant *above* a square red flag with black centre displayed by day, or a white latern *above* a red lantern displayed by night, indicates the approach of a storm of marked violence with winds beginning from the *northwest*.

Hurricane, or Whole Gale Warning—Two square flags, red with black centres, one above the other, displayed by day, or two red lanterns, with a white lantern between, displayed by night, indicate the approach of a tropical hurricane, or of one of the extremely severe and dangerous storms which occasionally move across the Great Lakes and Atlantic Coast.

RULES FOR FORETELLING THE WEATHER.

ADAPTED FOR USE WITH ANEROID BAROMETERS.

A RISING BAROMETER.

A rapid rise indicates unsettled weather.

A gradual rise indicates settled weather.

A rise with dry air and cold increasing in Summer indicates wind from the northward; and if rain has fallen, better weather may be expected.

A rise with moist air and a low temperature indicates wind and rain from the northward.

A rise with southerly winds indicates fine weather.

A STEADY BAROMETER

with dry air and seasonable temperature indicates a continuance of very fine weather.

A FALLING BAROMETER.

A rapid fall indicates stormy weather.

A rapid fall with westerly wind indicates stormy weather from the northward.

A fall with a northerly wind indicates storm, with rain and hail in Summer, and snow in Winter.

A fall with increased moisture in the air, and heat increasing, indicates wind and rain from the southward.

A fall with dry air and cold increasing in Winter indicates snow.

A fall after very calm and warm weather indicates rain with squally weather.

The barometer rises for northerly winds, including from northwest by north to the eastward for dry or less wet weather, for less wind, or for more than one of these changes, except on a few occasions, when rain, hail or snow comes from the northward with strong wind.

The barometer falls for southerly wind, including from southeast by south to the westward, for wet weather, for stronger wind or for more than one of these changes, except on a few occasions, when moderate wind, with rain or snow, comes from the northward.

DURATION OF DIFFERENT KINDS OF WEATHER IN THE SEVERAL STORMS—VICINITY OF NEW YORK.

Critical Winds.	Clear Hours.	Cloudy Hours.	Rain Hours.	Clearing Hours.
South to Southwest	9	8	8.3	14
South to Southeast	14	13.4	15.6	15.4
East to Northeast	20	17.6	31	20.6

WEATHER WISDOM.

A gray, lowering sunset, or one where the sky is green or yellowish-green, indicates rain. A red sunrise, with clouds lowering later in the morning, also indicates rain. A halo occurring after fine weather indicates a storm. A corona growing smaller indicates rain; growing larger, fair weather. A morning rainbow is regarded as a sign of rain; an evening rainbow of fair weather. A deep-blue color of the sky, even when seen through clouds, indicates fair weather, a growing whiteness an approaching storm. Fogs indicate settled weather. A morning fog usually breaks away before noon. Unusual clearness of the atmosphere, unusual brightness or twinkling of the stars, indicate rain. The first frost and last frost are usually preceded by a temperature very much above the mean.

ABSOLUTE ZERO—ABSOLUTE TEMPERATURE.

The zero points on the Fahrenheit, Centigrade, and Reaumur thermometer scales are simply arbitrary. Absolute zero—the point at which bodies on the earth are entirely devoid of heat—exists at 459.4 degrees below the Fahrenheit and 273.1 degrees below the Centigrade zero points. This is the beginning of what is known in dynamic meteorology as Absolute Temperature, as determined by observations of the contraction of gases when cooled, and from thermo-dynamical considerations. Thus, water freezes at 273.1 degrees of Absolute Temperature on the Centigrade scale of registration.

Figures represent mean of the 8 A. M. and 8 P. M. relative humidity, seventy-fifth meridian time, for the period 1889 to 1913, inclusive. A few of the stations have a shorter record.

THE AURORA BOREALIS.

The Aurora Borealis, or Northern Lights, is a display of light in the upper regions of the atmosphere, seen in the direction of the north magnetic pole: its counterpart is the Aurora Australis, or Southern Lights, seen in Australia and elsewhere, in the direction of the south magnetic pole.

The aurora is usually a broad arch of light, with streamers above it reaching toward the zenith and often suggesting tongues of flame. The color throughout may be white; or there may be brilliant hues of red, yellow and green.

The "auroral line" of the spectrum is green and is apparently always present in the sky; it has been suggested that this is due to constant bombardment of the earth by meteoric dust.

The rays or beams of light proceeding from the arch are really parallel to the dipping needle; that is, they follow the lines of magnetic force.

In a general way, sun-spot activity is accompanied both by magnetic storms and by brilliant auroras; during the prevalence of which both wire and wireless communication is at times seriously interfered with over a large part of the earth's surface.

The theory of to-day is that auroras are due to streams of alpha particles, that is, to positively charged corpuscles of helium that are hurled upon the earth by the sun, and all which are stopped in the upper regions of the atmosphere.

Auroras occur most frequently in March and September; least frequently in June and December.

North America, in Lat. 60° N., and the North Atlantic are especially noted for the frequency (100 occurrences per annum) and for the brilliancy of the display. Farther north as well as farther south, there is a marked falling off.

The height of auroras is at last fairly ascertained: 50 to 100 miles for the lower strata of light, and 75 to 200 miles for the upper.

VELOCITY OF WINDS IN THE UNITED STATES.

THE MEANING OF "1 INCH OF RAIN."

An acre of ground contains 43,560 square feet. Consequently, a rainfall of 1 inch over 1 acre of ground would mean a total of $43,560 \times 144$, or 6,272,640 cubic inches of water. This is equivalent to 3,630 cubic feet. As a cubic foot of pure water weighs about 62.4 pounds, the exact amount varying slightly with the density, it follows that the weight of a uniform coating of 1 inch of rain over 1 acre of surface would be $3,630 \times 62.4 = 226,512$ pounds, or 113¼ short tons.

The weight of 1 United States gallon of pure water is 8.345 pounds. Consequently a rainfall of 1 inch over 1 acre of ground would mean $226,512 \div 8.345 = 27,143$ gallons of water on the acre. This is equivalent to 603 barrels of 45 gallons each, and would be sufficient to fill a tank or pool about 20 feet square and 9 feet in depth.

A rainfall of 1 inch on a roof of 3,000 square feet capacity would mean a total volume of 432,000 cubic inches, or 250 cubic feet, available for the cistern (loss from splashing, etc., not considered). This is equal to 1,870 United States gallons, or about 41.5 barrels of 45 gallons each, enough to fill a cistern 8 feet in diameter to a depth of 4.97 feet.

THE COLOR OF THE SEA.

Absolutely pure water, says a National Geographic Society bulletin, is a clear blue color because the blue rays of sunlight are not absorbed by the water as the red rays are. Thus the open ocean seems intensely blue.

Distilled water has a greenish cast due to the impurities which still remain after the distillation. This makes it clear why the shallow water in bays and estuaries is green or yellowish green.

One explanation of the olive green of the ocean in the vicinity of the South Pole is that it contains enormous quantities of diatoms in suspension.

Two factors contribute largely to the blueness of the Mediterranean: there are few large rivers, which ordinarily bring enormous quantities of impurities, flowing into it, and there is a constant steam of salty water pouring into it from the Atlantic Ocean through the Strait of Gibraltar.

It is said by some oceanographers that the blue of sea water bears a direct ratio to its saltiness. As an example of this the band of tropical waters extending about thirty degrees on each side of the Equator, where there is tremendous evaporation under a blazing sun, is cited. It is true that these waters are very salty and an exquisite azure in color.

On the other hand, the Arctic and Antarctic waters, which are cold and less salt, are vivid green.

The Yellow Sea derives its golden tints from the sediment brought to it by the Yellow River and several other streams rising near the desert areas in western China. Scientists also believe that the billions of minute living organisms found in its waters helped give it its name.

In January, 1909, a peculiar phenomenon was observed in the Atlantic Ocean. Running parallel with the warm clear blue waters of the Gulf Stream from Cape Florida to Cape Hatteras, there was a yellow river three miles wide. It lasted for a few weeks and then faded away into the surrounding ocean. Some cataclysm on the face of the deep, probably of volcanic origin, had evidently set this yellow stream in motion.

The dull reddish tint of the Red Sea is imparted to it by millions of microscopic algae. A host of the minute Dinoflagellata sometimes will redden the ocean for miles.

The lovely blue of the waters surrounding the coral islands of the South Seas, which have long been famous in song and story, is said to be due to the calcium carbonate held in solution.

The degree of penetration of light into water is a contributing factor in the color of various bodies of water.

The Saguenay River, a tributary of the St. Lawrence from the north, is sombre and impressive because its waters seem almost black. It winds through high hills which shut out the light and its bed is cut 600 feet deeper than that of the river into which it flows.

In 1901, the sea off the California coast turned almost black, the waters of Santa Cruz Bay becoming particularly inky, but no satisfactory explanation has ever been offered of the occurrence.

Record of the Year.

Chronology, Dec. 12, 1923—Dec. 11, 1924.

1923—DECEMBER

Dec. 12—Mexican revolution spreads to part of west coast and Yucatan.
Dec. 13—Portuguese Cabinet resigned.
—At London, Lord Alfred Douglas was sentenced to six months' imprisonment on the charge of having criminally libeled Winston Churchill in printing the accusation that Mr. Churchill issued a false communique after the battle of Jutland.
—13 died in New Mexico blizzard; 300 motorists are snowbound in Nogal Canyon, where the snow is 20 feet deep in places.
—The Cement Manufacturers Protective Assoc. agreed in U. S. Court at N. Y. to dissolution decree.
—In U. S. Court at N. Y. City, Albert E. Guimares and 3 associates were convicted of misuse of the mails.
—The airplane in which L. B. Sperry, of Brooklyn, N. Y., started to fly from England to the Continent was found in Channel, 3 miles off Rye. His body was found later.
Dec. 14. Poland extended recognition to Soviet Russia.
—Robbers tied U. S. mail truck driver, at Rochester, N. Y., and stole registered pouch containing over $15,000.
—Lieut. E. D. Willis and De Ainand, a private, died in fall of army airplane at San Antonio, Tex.

WARTIME OFFENDERS PARDONED.

Dec. 15—President Coolidge pardoned the last of the wartime offenders, thirty-one in number, convicted under the Espionage Act for speaking against the Government during the war and in inciting sentiment against the Selective Draft Act. The men freed by the President are: Convicted at Sacramento in January, 1919, and sentenced to ten-year terms: Elmer Anderson, Chris A. Luber, Harry Brewer, Phil McLaughlin, Robert Connellan, George O'Connell, Roy P. Connor, John Potthast, Pete de Bernardi, Edward Quigley, Mortimer Downing, James Quinlan, Frank Elliott, Myron Sprague, John Graves, Caesar Tabib, Henry Hammer, Jacob Tori, William Hood, George F. Voetter, Harry Gray, Vincent Santilli. Convicted at Kansas City in December, 1919: Wencil Francik, serving seven years, six months, and F. J. Gallagher, eight years. Convicted at Chicago in 1919, fined $20,000 each and sentenced to five to twenty years: C. J. Bourg, Alexander Cournos, Harry Lloyd, Burt Lorton, Charles H. McKinnon, James Rowan, James P. Thompson. President Harding offered Francik and those convicted at Chicago conditional pardon last year, but they refused to accept the conditions, among which was that they should not engage in similar acts again.
—Jury at N. Y. City convicted of murder, 2d degree, Louis Kushner, alias Cohen, slayer of "Kid Dropper," He got 20-yr. sentence.
—Posse with machine guns killed, near Drew, Miss., negro, after he had slain 3 white men.
—Earthquake shocks destroyed several towns in Ecuador and Colombia; 3,000 died at or near Tulcan.
Dec. 16—In the general election in Greece the Liberals or Venizelists won majority of seats in National Assembly.
—More than 30,000 Japanese farmers are preparing to abandon nearly 500,000 acres of California's richest crop lands as a result of the recent decision of the United States Supreme Court upholding anti-alien land laws passed by the California legislature.
—Lieut. W. D. Fowler and Sergt. H. Lightfoot, of Army Reserve, died in airplane fall at Santa Monica, Cal.
Dec. 17—The shrine of King Tutankhamen was exposed to view, at Luxor, Egypt.
—Berlin Bourse began gold mark stock quotations.
—Mob at Marlow, Okla., killed A. W. Birch, hotel owner, and negro in his employ who stayed in town over one day.
Dec. 18—Greek Government asked King George II. to leave that country.
—Mexican rebels seized Merida, capital of Yucatan.
—French dirigible, Dixmude, arose at Insalah, Algeria, for endurance test with 50 aboard.
—United States Senate ratified arbitration treaties with Britain, France, Japan, Norway and Portugal.
—At Newark, N. J., F. E. Dewey, guarding $1,000 payroll, shot and killed Jos. F. Boyle, N. Y. hold-up man; at Brockport, N. Y., E. A. Coupman, garage owner, shot and killed 2 hold-up men of Rochester.
—14 died in fire at Capitol Hotel, Houston, Tex.
—Capt. H. E. Sturcken and Sergt. C. E. Ryals died in army plane fall near Dallas, Tex.
—Court at Paris, France, decided against Marquis de Pontzves in his suit to recover 500,000 francs from Countess de Beaurepaire (formerly Mrs. F. Thompson of N. Y.), for alleged breach of promise of marriage.
—Britain, France, and Spain signed agreement on future status of Tangier.
Dec. 19—Henry Ford announced he will not run against Coolidge for President.

RUSSIAN ADVANCES REFUSED.

—Sec. Hughes, in refusing relations with Soviet Russia, published alleged directions by the Communist International for raising the red flag over the White House "in the not too distant future."
—French Chamber of Deputies pensioned Mme. Curie, radium discoverer, at 40,000 francs a year.
—The widow of the Earl of Carnarvon married Lieut. Col. I. O. Dennistoun, at London.
—Many were killed by earthquake in State of Sonora, Mex., towns of Granades, Huasbas, and Opoto were destroyed.
Dec. 20—Congress adjourned to Jan. 3.
—In Italy, Premier Mussolini's conference of capital and labor established a permanent committee of 5 representatives from each side to discuss labor problems under government supervision.
—Admiral Koundouriotis has assumed the Regency of Greece.
—The Council of the League of Nations ended its Paris meeting with announcement of a provisional agreement for financial reconstruction of Hungary.
—German Reichstag Committee of Fifteen approved law to cut legal expenses by reducing jury membership by suspending private trials for 3 months. etc.
—Burton S. Tucker, 17, of Essex, Mass., and his wealthy wife, the former Mrs. Susan Simpson, 48, whose marriage in Union Hill, N. J., Oct. 2 caused the bridegroom's father to attempt to have the ceremony annulled, were remarried, at Carthage, N. C.
—At New Brunswick, N. J., a jury found the Penn. R. R. Co. guilty of manslaughter due to 6 deaths in explosion of powder on train at South Amboy, Sept. 6.
Dec. 21—At Atlanta, Ga., Philip E. Fox, publicity director of the Ku Klux Klan was sentenced to life imprisonment for the murder of William S. Coburn, Klan attorney, on Nov. 5.
—The New York Evening Post was bought by Cyrus H. K. Curtis of Philadelphia.
—Jury at Brooklyn found Eugene Vetter and wife guilty of manslaughter for killing A. J. Story, sentence 8 to 15 years each in prison.
—Frank Irving Cobb, 54, Editor-in-Chief of The World, died at his home, N. Y. City.
Dec. 22—Jack C. Walton, impeached and removed as Governor of Oklahoma, asked U. S. Supreme Court to review his case, alleging prejudice by the State legislature.
—John Snow, crazed Pole, killed wife, 4 other relatives, and himself, at Cooper's Mills, Me., on Dec. 25. Snow's body was dug up and burned in revenge.
—The King and Queen of Greece have taken refuge at Bucharest.
—Following the P. E. Bishops' pastoral letter against Modernism, Prof. D. S. Miller has resigned from faculty of the General Theological Seminary at N. Y.

OUTSTANDING AMERICAN SOLDIER.

—Master Sergt. Samuel Woodfill, named by Gen. Pershing as the outstanding American soldier in the World War, was mustered out of the Army with full military honors at Ft. Benj Harrison, Indianapolis, after 22 yrs. 5 mos. service, he draws pension of $133.76 a month.
Dec. 23—Mexican troops retook Puebla from rebels, who capture City of Cuernavaca, in Morelos.
Dec. 24—James (Dinty") Moore, United States air mail pilot, died in plane fall near Burns, Wyo.
—Irish Free State Government released from prison Countess Georgine Markievicz.
—20 were killed in train wreck near Celaya, Mexico.
—Jury at Paris acquitted Miss Berthon, 20, who, in Jan. 1923, killed the Royalist Editor and leader, Marius Plateau.
—6,000 sang carols in the White House grounds at Washington.
Dec. 25—N. Y. State Commission on Housing and Regional planning reported to Gov. Smith that scarcity of homes for poor people is greater than in 1920.

Dec. 25—The mangled body of F. S. Cusack, of Ft. Bliss, Tex., a cadet at the United States Military Academy, West Point, was found in Subway track at Wall and William Sts., N. Y. City.
Dec. 26—Mexican troops captured Tamacula from rebels.
—18 patients died in fire in Illinois State Hospital for Insane, near Chicago.
—Captain Edward H. Watson, commander of the destroyer squadron wrecked on the California coast, near Point Honda, in September, will lose 150 numbers, and Lieut. Commander Donald T. Hunter, commander of the destroyer Delphi, one of the squadron, will lose 100 numbers as a result of court martial sentences approved by Secretary Denby.
Dec. 27—A communist youth at Tokio fired at but missed Prince Regent Hirohito, 22, oldest son of Emperor Yoshihito. The Japanese Cabinet resigned to-day.
—The body of Lieut. de Plessis, commander of the vanished dirigible balloon, Dixmude, was found in the Mediterranean, south of Sicily.
Dec. 28—The Mexican Senate ratified the special United States Mexican Claims Convention by a vote of 42 to 5. The General Claims Convention was approved as a whole, 38 to 1.
—Home Rule party has won about one-fourth of members elected to new India Assembly and Provincial Councils.
—United States Shipping Board steamship Conejos hit mine and sank in Black Sea; crew saved.
—Man, although the product of evolution, did not descend directly from the ape of to-day and had his origin in Europe 400,000 years ago, instead of in Asia, as generally presumed, Dr. Ales Hrdlicka of the National Museum, Washington, D. C., a leading anthropologist, told the American Association for the Advancement of Science Convention at Cincinnati, O.

NOTABLE MILKING CONTEST.

Dec. 29—Secretary of Agriculture Wallace beat Senator Magnus Johnson, Minnesota dirt farmer, by a pint in a milking contest at the Soldiers' Home, Washington, D. C. Gen. Tasker H. Bliss held the watch and called time after five minutes.
—Sir Auckland Geddes resigned as British Ambassador to United States.
Dec. 30—4 convicts tunneled to freedom from yard of Federal Penitentiary, Atlanta, Ga. The fugitives are George Anderson, serving a 25-year sentence for New York City mail truck holdup, for which Chapman also was convicted; Hiram Lepper, Ludwig Schmidt of Tonawanda, N. Y., and Frank Haynes.

—British Columbia Legislature authorized the lash for convicted drug Bafflckers.
—Japanese subjects are given full liberty to enter and sojourn with their families in Mexico, engage in commerce and industry, and "freely acquire and hold" any kind of real or personal property which the law permits citizens of any other foreign country to hold, under terms of a commercial treaty agreed on at Mexico City, Oct. 8, just made public but not yet ratified by either country.
Nov. 19—Robert F. McAllister, the "flying cop," was acquitted by a jury, at N. Y. City, of the charge of murdering Vincent Fighera, whom, he testified, he shot when he fired in self-defense at Fighera's companion, Jos. Dandio.

EGYPTIAN SIRDAR ASSASSINATED.

—Assassins at Cairo, Egypt, shot and wounded Major Gen. Sir Lee Stack, Sirdar of the Egyptian Army. He died Nov. 20.
Nov. 20—N. Y. State Board of Parole issued order to parole from Sing Sing on Dec. 24, W. H. Anderson, ex-Supt. of Anti-Saloon League, who was convicted of 3d degree forgery. The board granted parole, as of Dec. 26, 1924, to R. P. Brindell, convicted on charge of extorting money from laborers in Building Trades Council and from contractors.
—U. S. Grand Jury at Baltimore indicted Daily Post of that city for publishing income tax assessments after the books had been opened by the Internal Revenue Office.
—The N. Y. Central's railroad bridge over the Hudson River, at Castleton, N. Y., was opened to traffic.
Nov. 21—Great Britain formally repudiated the treaties with Russia negotiated by former Prime Minister MacDonald and his Labor Government in a note from Foreign Secretary Chamberlain to the Soviet Charge d'Affaires, Christian Rakovsky. The note announced that the treaties will not be recommended to Parliament nor submitted to the King for ratification.
—Mrs. Florence Kling Harding, widow of President W. G. Harding, died at White Oaks Farm, near Marion, O.
—Peter Hughes, member of the Dail Eireann from County Louth, was appointed Minister of Defense of the Irish Free State and his appointment was ratified by the Dail. President Cosgrave has been filling the post since resignation of Richard Mulcahy.
—At San Juan, Porto Rico, W. Russell Winslow of Carthage, Ind., professor at the University of Porto Rico, died after having been attacked while sea bathing by a fish which bit off one of his arms.
—Nov. 22—A British 24-hour ultimatum was served on Egypt, at Cairo, demanding (on account of the assassination of Major Gen. Stack) apology, a £500,000 indemnity, suppression of popular political demonstrations and the evacuation of the Sudan by Egyptian troops. Responsibility for the killing was denied.
—Governor-elect Howard M. Gore of W. Va. was appointed Sec. of Agriculture, succeeding H. C. Wallace, deceased.
—N. B. Broward was killed and Mrs. Hal Cady wounded after party at Cady home, Orlando, Fla.
Nov. 23—Egypt agreed to Great Britain's demand for apology and indemnity for assassination of Major Gen. Stack but balked at withdrawing Egyptian troops from Sudan. Thereupon, Great Britain ordered Sudan Govt. to send those troops back to Egypt.
—The Rev. Percy Stickney Grant, whose resignation as rector of the Church of the Ascension, Fifth Ave. and Tenth St., was accepted last June 20, after 30 years' service, entered New York Hospital to undergo treatment for anaemia.
—At Paris, the ashes of Jean Jaures, the Socialist leader who was assassinated with the outbreak of the World War in 1914, were transferred to the Pantheon in the presence of an immense throng. The Government's formal ceremony honoring the pacifist was carried out without serious disturbances.
Nov.24—Italy, Jugo-Slavia, and Roumania have made, it is said, a military alliance.
—Egyptian troops are evacuating the Sudan. Zaghloul Pasha and his Cabinet resigned; new Cabinet is headed by Ziwar Pasha. British forces seized Alexandria Custom House. The Egyptian Govt. paid Great Britain £500,000 indemnity for Gen. Stack's assassination.
—The $100,000,000 loan to France through J. P. Morgan & Co., was oversubscribed in 45 minutes, it was announced at N. Y. City.
—Dr. M. A. Hayes was shot to death in a drug store in Audubon Ave., N. Y. City.
Nov. 25—Radio broadcasters in Europe have been heard in the U. S., and broadcasters in the U. S. have been heard in Europe since the tests began on Nov. 24.
—At Chicago, William Fahy, former Federal Post Office Inspector, and James Murray, Chicago politician, tried for the $2,000,000 Rondout mail robbery, were found guilty by a Federal jury. Walter McComb, a third defendant, was acquitted. Fahy and Murray got 25 years each in prison.
—Capt., D. W. Bedinger and Sergt. Irving Astol were burned to death on the Fort Riley military reservation when their plane burst into flame shortly after they took off from Marshall Field, Kan., the Fort Riley flying field.
—At the request of Russian Soviet representatives, the Russian Orthodox Church in Paris was sequestered while its ultimate disposal will be fought out in the French courts.
—Samuel Gompers was re-elected President of Amer. Fed. of Labor, in convention at El Paso, Tex.
—The body of W. R. Fee, a banker of Los Angeles, shot to death, was found in mountain cabin in Laurel Creek Canon.

INCOME TAX PUBLICITY IN COURT.

—The New York Tribune, Inc., publishers of the New York Herald Tribune, was indicted by a Federal Grand Jury on a charge of unlawfully "printing and publishing" parts of income tax returns for 1923. The indictment is against the corporation only and does not name any individual. It was obtained by U. S. Attorney Hayward at the request of Attorney General Stone. When the case came to trial Judge Knox ordered a verdict of not guilty. A reindictment, to enable the Government to appeal, then was had.
—The condemned uncompleted U. S. battleship Washington was sunk in target practice off the Virginia Capes by 14-inch projectiles from the battleship Texas.
—The Egyptian Parliament was prorogued a month.
—Charlie Chaplin and Lita Gray, movie actors, were married at Guaymas, Mex.
—Mrs. Coolidge, at Washington, christened the German-built dirigible, ZR-3, and renamed it Los Angeles.
—Nov. 26—The Egyptian Chamber of Deputies has addressed a protest to the League of Nations against the British demands bearing on the assassination of Sir Lee Stack, Sirdar of the Egyptian army. This protest was taken under consideration, and after an hour's meeting of the department chiefs of the Secretariat, under the Chairmanship of Sir Eric Drummond, it was decided not to distribute the Egyptian protest to the members of the League. The decision was based on the constitutional procedure of the Secretariat, which is not to circulate documents that do not emanate from governments.
—Bodily transfer of the Prohibition Unit from the Treasury Department to the Department of Justice is among the recommendations adopted by the judicial conference of Senior Circuit Judges, it became known when Chief Justice Taft, as Chairman of the conference, addressed a letter to Attorney General Stone transmitting a request that he embody the proposal in his annual report to Congress.
—The Executive Committee of the Anti-Saloon League of America asked President Coolidge for stricter enforcement of the Prohibition Law.
—The von Nathusius incident was definitely ended, so far as France is concerned, when the German General, who was sentenced to a year's imprisonment by the Lille court-martial, having been pardoned by President Doumergue, was placed on a train by two French officers assigned to escort him to the frontier.
—At Paris, at a meeting of the allied financial experts preparing the ground for the meeting of Finance Ministers, who will consider the question of distribution of the annuities under the Dawes plan, Col. James A. Logan, the American representative, formally presented as a subject for discussion the American claims for the cost of the armies of occupation and for material losses of American citizens in the war.
—At Washington, Secretary Hughes concluded agreement with the representatives of Austria and Hungary, by the terms of which a Commissioner is to be selected to pass upon all claims for losses, damages or injuries suffered by the United States or its nationals embraced within the terms of the treaty of Aug. 24, 1921, between the United States and Austria, and the treaty of Aug. 29, 1921, between the United States and Hungary.
—Prof. G. F. Baker has resigned from the Harvard Faculty and is to head the Department of Dramatic Literature at Yale, just endowed with $1,000,000 by E. S. Harkness of N. Y. City.

Nov. 26—Two sisters, Cynthia and Neotia Foste', 14 and 10 years, have been found murdered in a fisherman's shack at Fosterville, N. B.
—Fire at Atkinson stock farm, Collingswood, N. J., killed several show horses, including Achievement, Pride's Gateway, Glen Haven, Trixie, Queen of Irvington, and Lady Wilkes.

Nov. 27—At Cairo, the British military authorities arrested Barakat Pasha, Minister of the Interior under Zaghloul Pasha; Nekrashy Bey, Secretary at the Ministry of the Interior in Zaghloul's Ministry; Abd-el Rahman Fahmy Bey, one of Zaghloul's closest political assistants, and William Makram Obeid, a Coptic member of the Nationalist delegation that visited London with the former Premier.
—The Church of England's House of Clergy rejected a proposal requiring men as well as women to wear wedding rings. The question arose during discussion of the revision of the marriage service, which earlier had been altered so as to eliminate the time-honored word "obey" from the bride's response in one of the two passages in which it occurs in the ritual.
—A religious woman maniac at Plainfield, N. J., killed G. H. Davey with an ax, and wounded Mrs. Davey and a daughter, Winifred, Davey.
—The freight steamship Hartley sank off Portland, England; 17 of the crew were drowned.
—The Rev. John J. Roche, believed to be the oldest priest in the world, died in the Franciscan Priory at Wexford, Ireland, aged 100 years. During his 75 years as a churchman he was present at many notable events, including the obsequies for Pope Gregory XVI. in 1846, and the funeral services of Daniel O'Connell in 1847.

INSURGENT SENATORS READ OUT OF PARTY.

Nov. 28—Caucus of Republican Senators, at Washington, chose Curtis of Kansas as party leader in that body in place of Lodge of Mass., deceased. The following resolution by Senator Reed (Rep., Pa.) was adopted:

"Resolved, That it is the sense of the conference that Senators La Follette, Ladd, Brookhart and Frazier be not invited to future Republican conferences, and be not named to fill any Republican vacancies in Senate Committees."

—Sudanese troops mutinied at Khartum, attacking the military hospital and killing 3 British doctors, the natives later "receiving very severe casualties" from British guns.
—12 more alleged anti-British agitators were arrested at Cario.
—A jury at London found Charles Robinson, bookmaker, and his wife, not guilty of blackmailing an unnamed Indian Rajah, who, it was alleged, paid £150,000 after having been surprised in a woman's company.
—At New York City, the Appellate Division of the Supreme Court reversed the conviction of Abraham S. Baylinson, Secretary of the Society of Independent Artists, for hanging a picture, in 1923, the subject of which was a raid on the marriage feast of Cana after Christ had turned water into wine.
—Eamon de Valera was freed from prison and went to Dublin.

Nov. 29—After 15 of their number had been killed, the surviving mutineers of the 11th Sudanese Regiment surrendered to the British, at Khartum; 2 British officers, 1 British physician, and 2 Syrian doctors were killed and 9 British soldiers wounded.
—At New York City, after 3 jurors had informed the Federal prosecuting authorities that attempts had been made to "reach" them, William S. Silkworth, former President of the Consolidated Stock Exchange, and former Olympic trapshooting champion, and 5 other defendants on trial with him, were convicted in the U. S. District Court. The charges against all the convicted men grew out of the collapse of the brokerage firm of Raynor, Nichols & Truesdell, which failed in April, 1922, for $1,800,000. Only one of what were originally 8 defendants was declared innocent—C. Peter Ovens, office manager of the defunct firm.
—Fire at Jersey City destroyed part of Penn. R. R. pier at Morgan St., with 21 freight cars.

Nov. 30—The 4th Battalion of Egyptian Infantry arrived at Cairo from Khartum and was imprisoned in the Abassia Barracks. 34 agitators so far have been arrested by the British at Cairo and Alexandria; several have been executed by court martial.
—Gov. Smith appointed Supreme Court Justice J. V. McAvoy of the Appellate Division to inquire, as a commissioner under the Moreland act, into the delay in subway construction in N. Y. City.
—The Radio Corporation of America demonstrated a method of transmitting photographs across the Atlantic by wireless telegraphy. More than a dozen pictures were sent from London to the offices of the Radio Corporation at N. Y. City, including photographs of Queen Alexandra and Ellen Terry, obtained by and transmitted for The World. The transmission time was from 20 to 25 minutes for each picture.
—Gen. Plutarco E. Calles took office at Mexico City as President of Mexico in succession to Gen. Obregon.

DECEMBER.

Dec. 1—The 68th Congress assembled at Washington in final session.
—Reval, capital of Esthonia, was wrested from Communist hands after a Bolshevist revolution which lasted 10 hours. The uprising began at 8 A. M., when Communist detachments occupied Government buildings, railroad stations and the telegraph and telephone exchange. Street fighting followed, with scores killed and several hundred wounded. Minister of Transportation Kark was assassinated by one of the Communist leaders. The uprising was the result of the conviction of Esthonian Communist conspirators and the execution of the Red leader, Jaan Toomp.
—7 persons died in rooming-house fire on W. 63d St., N. Y. City.

Dec. 2—President Coolidge submitted to Congress the United States budget for the year beginning July 1, 1925. He urged economy. (For details, see under Budget, in Index.)
—At Kansas City, Mo., Federal Judge Reeves sustained the demurrer of Kansas City Journal-Post to indictment charging illegal publication of Federal income tax returns. Judge Reeves held that prohibiting publication of tax lists by newspapers was in violation of the First Amendment to the Constitution, which provides for freedom of the press.
—Judgment with costs was given, at London, to the defendants, the Midland Bank, in the suit over the alleged blackmailing of an Indian Prince, alleged to be the Rajah, Gen. Sir Hari Singh, heir to the throne of Jammu and Kashmir. In delivering the judgment Lord Darling ruled that the £125,000 which the plaintiff, Charles Robinson, was suing for was stolen property and under no theory or fiction that could be stated was there a law in England which could permit him to award the Prince's property to Robinson.
—President Calles and ex-President Obregon entertained, at Mexico City, the American Federation of Labor Convention delegates who went in armored train from El Paso, Tex.
—The Anglo-German commercial treaty was signed at London.

ECONOMY COOLIDGE'S PLEA.

Dec. 3—President Coolidge, in annual message to Congress, urged economy, and advised repeal of income tax publicity; he favored voluntary use of the Permanent Court of International Justice by U. S., subject to no compulsion.
—Equality for America and Americans in Palestine is guaranteed under the terms of a treaty signed at London by Ambassador Kellogg and Foreign Secretary Chamberlain.
—Limitation of steel production and division of markets have been agreed to in principle by German and French steel manufacturers.
—At Geneva, the first opium conference, which recently deadlocked, was revived when a revised protocol was submitted. The United States was not invited and is not participating.

Dec. 4—President Coolidge and wife, traveling as ordinary Pullman passengers on a regular train from Washington, arrived at Chicago, where the President spoke first at a Commercial Club luncheon and then at the Live Stock Exposition.
—At Chicago, Leo Koretz was sentenced to prison from 1 to 10 years on a charge of larceny, to which he pleaded guilty.
—7 were killed, 40 injured, in a rear-end electric suburban train collision near Oakland, Cal.
—A young woman shot and wounded at Belgrade the U. S. Vice Consul, H. A. Dayton, then killed herself. He died Dec. 8.

Dec. 5—The charters of local branches of the United Mine Workers of America, near Scranton, Pa., have been revoked because of an outlaw strike of 12,000 employees of the Pennsylvania Coal Co.
—President Coolidge returned to Washington from Chicago, again as an ordinary Pullman passenger.
—Liberty Statue in N. Y. Harbor has been made a national monument and its base a national park, by proclamation of President Coolidge.

Dec. 6—A jury in Bronx Supreme Court acquitted Mrs. Buzzi of the charge of murdering Frederick Schneider, contractor, Feb. 26, 1923. In June, 1923, she was convicted and sentenced to death, but the Court of Appeals gave her a new trial.

Dec. 6—The French Government began a nation-wide seizure of Russian Reds for expulsion; over 300 were arrested at Paris and elsewhere; Premier Herriot received the Soviet Ambassador, Krassin.
—The Grand Duchess Victoria Feodorovna, wife of the Grand Duke Cyril Vladimirovitch, who issued a manifesto at Coburg on Aug. 8, 1922, proclaiming himself as the head of the Romanoff family and the Czar of Russia, arrived at New York City on the French liner Paris.
Dec. 7—General parliamentary elections in Germany gave the Socialists and Nationalists gains, but strengthen, it is said, the republic and insure Dawes plan.
—Bandits in Hunan Province, China, have kidnapped several American Catholic nuns and priests, near Hankow. Bandits, near Canton, kidnapped 48 Chinese Christian teachers and students.
Dec. 8—The League of Nations Council, in opening session at Rome, received from ex-Premier Briand of France a pronosal which the French hope will replace the disarmament protocol drafted at Geneva by the Assembly. This is a mutual peace guarantee between Great Britain, France and Belgium with especial reference to the Rhine frontier.
—Robbers got $10,000 in cash and $204,200 in securities at Northwestern Nat'l Bank, Milwaukee.
Dec. 9—The State Dept. announced that the American Govt. has decided to participate in an international conference under the auspices of the League of Nations next April or May to consider restriction of international trade in arms and munitions of war.
—40,000 Spanish troops in Morocco are withdrawing, under fire, from Riff territory.
—W. G. Smith, who murdered Mrs. W. Bousfield, was hanged at Hull, England.
—King George opened the British Parliament and announced that the Prince of Wales will visit South Africa and the Argentine next year.
—N. Y. City Transportation Board announced $300,000,000 plan for 8 new subway routes in Manhattan to link up all boroughs.
—President Coolidge extended for one year Gen S. D. Butler's leave of absence from U. S. Marine Corps, to direct Philadelphia police.

SYNDICALISM ACT UPHELD.

Dec. 10—The conviction of Charles E. Ruthenberg for violation of the Michigan Syndicalism Act was affirmed by the State Supreme Court. The arrest and conviction of Ruthenberg followed a raid on a secret convention of the Communist Party of America in Berrien County, in August, 1922, by Federal agents and local officers. The Court upheld the constitutionality of the Syndicalism Act.
—5 died whan a navy airplane fell into San Diego, Cal., Bay. In the cockpit were found the bodies of Lieuts. Varini and A. C. Thurston and Machinist's Mate F. C. Grull. The bodies of Lieut J. H. Roby and Radioman J. Wiezzk are believed to have been washed to sea.
—The German Government named Baron Ago von Maltzahn to succeed Otto Wiedfeldt as Ambassador to Washington.
—Headed by a squad of motorcycle policemen, guarded by detectives, gazed at by street throngs, the Grand Duchess Victoria Feodorovna, wife of the self-proclaimed Czar, Cyril of Russia, made her social rounds in Philadelphia.
—Probate Court at Laconia, N. H., accepted resignation of J. V. Dittemore of Boston, as a trustee of estate of Mary Baker Eddy, Christian Science leader.
Dec. 11—War Minister Leon Trotzky of Soviet Russia is ill and has been ordered to the Caucasus.
—Robbers, who were captured, killed Paymaster Howard Huff, Nat'l Carbon Works, Niagara Falls, N. Y.

FRENCH ACADEMY ELECTS THREE NEW MEMBERS.

The Academy of France, on Nov. 27, 1924, elected three more "Immortals" to fill the chairs vacated by the death of Frederic Masson, Pierre Loti, and Charles de Freycinet.

Three other chairs remained, at that date, to be filled—those of Anatole France, Maurice Barres, and Count de Haussonville.

The new members are: Georges Lecomte, journalist, President of the Authors' Society of France; Emile Picard, mathematician of the Academy of Science and the Sorbonne; and Albert Besnard, painter, Director of the Beaux Arts Academy.

Lecomte was born in 1867, Picard in 1856, and Besnard in 1849. Lecomte is author of a political biography of Georges Clemenceau.

Besnard, it is said, is the first painter to enter the French Academy. His "Port of Algiers" is in the gallery of the Luxembourg.

SOME THINGS MADE IN THE UNITED STATES IN 1923.

(Census Bureau data; values are in parentheses.)

Phonographs, 981,635 ($55,551,817); records and blanks, 98,104,279 ($36,372,410).
Pianos, 328,185 ($103,586,738).
Engines and water wheels ($266,997,778), excluding locomotives but including 365,259 auto engines ($51,831,591); 30,117 marine engines ($7,402,-810); and 118,282 stationary engines ($22,409,667).
Locomotives, 3,422 ($177,891,022).
Baking powder and yeast ($51,691,123).
Machine tools ($136,871,096), including all power-driven tools.
Cash registers ($95,105,570).
Textile machinery ($140,661,358).
Matches, 4,069,319,296 ($23,839,271).
Printing inks ($29,412,122).
Playing cards ($12,548,465).
Ice cream and water ice ($258,666,575).
Confectionery ($365,265,659).
Jewelry ($174,033,912).
Wool carpets and rugs ($197,402,288).
Soft drinks ($226,188,562).
Cement ($285,050,551), including 137,460,238 bbls. of Portland.
Men's collars ($42,666,218).
Leather ($487,600,580).
Brass, bronze and copper products ($511,470,131).
Chewing gum ($40,870,914).
Coffins ($65,557,821).
Explosives ($75,029,127), including 262,290,012 lbs. of dynamite; 71,087,865 lbs. of nitroglycerine; and 216,353,372 lbs. of powder.
Aircraft ($12,945,263), including 505 airplanes and 82 seaplanes.
Ammunition ($51,508,622).
Firearms ($17,527,121), including 380,397 rifles and 471,965 shot guns. The number of pistols and revolvers was not fully reported.
Fur-felt hats, 1,969,692 doz. ($62,423,203).
Straw hats ($32,534,763), excluding trimmed hats for women and children.
Sporting and athletic goods ($41,797,075).
Vegetable oils, 2,025,000,000 lbs.
Edible animal fats, 2,059,000,000 lbs.
Fish oils, 85,000,000 lbs.
Wall plaster, wall board, and floor composition ($73,800,539), of which wall plaster represented $37,825,147 and wall board, $20,627,408.
Oilcloth ($17,719,054); asphalted felt base floor coverings ($25,280,160); linoleum ($52,527,106), 53,060,155 square yards, including 515,720 square yards of cork carpet ($582,520). Of the linoleum, 4,418,216 square yards were rugs ($3,436,291).
Saddlery and harness ($42,123,100).
Pottery ($113,896,055), of which white ware was valued at $39,346,201; sanitary ware, $27,017,675, and porcelain electrical supplies, $21,981,831.
Surgical appliances ($44,968,237).
Acids ($79,590,368), of which inorganic acids were valued at $61,383,618, including 4,369,941 tons of sulphuric.
Paving materials ($71,648,660), including granite blocks, and various mixtures.
Photographic apparatus and materials ($71,828,-028), including cameras and movie machines.
Coffee and spices (roasting and grinding) ($297,527,-593), of which coffee represented $255,228,021.

MURRAY HULBERT HEADS A. A. U.

Murray Hulbert of New York City was elected President of the A. A. U., at close of the thirty-sixth Annual Convention held at Atlantic City, Nov. 16-18, 1924. Other officers elected were:

First Vice President, W. S. Haddock, Pittsburgh; Second Vice President, A. A. Doonan, Atlanta; Third Vice President, C. P. Wendell, Omaha; Fourth Vice President, E. S. Ferris, Spokane, Wash.; Secretary-Treasurer, F. W. Rubien, New York, re-elected for eleventh time; Trustees, Charles Dean, Chicago; Samuel Goodman, San Francisco, and John T. Taylor, Pittsburgh; Trustees of the James E. Sullivan Memorial Fund, Joseph MacCabe of Boston; F. W. Rubien, New York, and J. T. Mahoney, New York; Delegates at Large, Col. A. G. Mills, New York; Henry Lapham and F. W. Moore, Boston; William F. Humphrey, San Francisco, and Judge Rufus E. Foster, New Orleans

DEATH ROLL OF 1924.

Abbot, Prof. F. F. (64), of Princeton Univ.; in Switzerland, July 27.
Abrams, Dr. Albert (60), Pres. Amer. Soc. for Psycho-Physical Research; San Francisco, Jan. 13.
Adams, C. E., Past Commander in Chief G. A. R.; Los Angeles, Feb. 23.
Adee, A. A. (81), 2d Asst. Sec. of State; Wash., D. C., July 5.
Alden, Prof. R. M. (51), of Columbia Univ.; Phila., Sept. 28.
Alerding, R. C., Bishop H. J. (79); Ft. Wayne, Ind., Dec. 6.
Allen, Thos. (74), painter, capitalist, Chairman Boston Art Commission; Worcester, Mass., Aug. 25.
Allen, ex-U. S. Senator W. V. (76), Neb. Judge; Los Angeles, Jan. 12.
Anable, C. V. (64), lawyer; N. Y., April 2.
Appleton, W. W. (78), book publisher; N. Y., Jan. 27.
Araula, Manuel, Chief Justice of the Philippines; Manila, July 26.
Archduchess Marie Valerie, daughter of late Emperor Franz Joseph of Austria; Vienna, Sept. 6.
Armaghdale, Lord (J. B. Lonsdale), (74); London, June 8.
Arnold, E. D. (65), Standard Oil executive; Larchmont, N. Y., June 6.
Asche, F. D. (51), Vice Pres. Standard Oil Co. of N. J.; N. Y., June 3
Ashburnham, Earl of (69); London, May 12.
Ashe, J. E. (84), ex-State Supt. of Public Works; Gloversville, N. Y., June 16.
Aspegren, John (49), produce merchant, capitalist; N. Y. City, Nov. 8.
Ayer, F. F. (74), poet; Boston, June 9.
Bacon, E. R. (66), grain merchant; Chicago, Dec. 22, 1923.
Bacon, Henry (57), architect; N. Y., Feb. 16.
Baer, Prof J. M., explorer; on Panama Isthmus, May 28.
Bagg, Dr. C. L. (68), surgeon; N. Y., Sept. 19.
Bailey, E. N., "Iowa's 'Mark Twain,'" newspaper editor; Britt, Iowa, Dec. 21, 1923.
Baker, Andrew (87), Adirondack guide; Saranac, N. Y., Feb. 29.
Baker, F. E. (64), U. S. Judge; Chicago, March 15.
Baker, Dr. P. A. (65), Gen'l Supt. Nat'l Anti-Saloon League; Waterville, Ohio, March 30.
Baldwin, W. J. (79), pioneer skyscraper building constructor; Brooklyn, May 7.
Bancroft, Dr. C. P. (71), alienist; Hanover, N. H., Dec. 14, 1923.
Baring-Gould, Rev. S. (90), author; in England, Jan. 2.
Barker, A. E. (48), Vice Pres. Maxwell-Chalmers Motor Co.; Detroit, Jan. 2.
Bates, L. W. (66), Amer. waterways engineer; Paris, April 22.
Batten, E. C. (54), Christian Science leader; N. Y. City, Dec. 27, 1923.
Baylies, Sir W. M. (64), physiologist; in England, Aug. 27.
Bayne, S. G. (79), oil man, chairman board, Seaboard Nat'l Bank; N. Y., April 20.
Beaufort, Duke of (77), in England, Nov. 27.
Beckman, Ernst (74), ex-leader Liberal Party of Sweden; Santa Barbara, Cal., April 16.
Bell, Edw. (42), U. S. Charge d'Affaires; Peking, Oct. 28.
Belmont, August (72), subway owner, banker, sportsman; N. Y. City, Dec. 10.
Benham, G. A., ex-Chairman Dem. Nat'l Committee; Los Angeles, Dec. 27, 1923.
Benington, Arthur (59), journalist; Brooklyn, March 20.
Bergh, Henry (70), Treas., Amer. S. P. C. A.; N. Y., May 23.
Bernard, Barney (45), ("Abe Potash"), actor; N. Y., March 21.
Bertin, L. E. (94), naval architect; in France, Oct. 24.
Best, Leigh (56), Vice Pres. Amer. Locomotive Co.; N. Y., April 27.
Bien, Franklin (71), N. Y. lawyer; Englewood, N. J., Sept. 27.
Biglin, Bern. (83), ex-champion oarsman; N. Y., May 11.
Bimberg, Chas. ("Bim, the Button Man"), (63), campaign button mnfr.; N. Y. City, Dec. 3.
Blackall, Rev. C. R. (93), retired editor of the Amer. Baptist Publication Soc.; Phila., Jan. 25.
Blackburne, J. H. (82), chess player; London, Sept. 1.

M. C. A., Presbyterian Hospital and Yale University; $50,000 each to New York Public Library, Metropolitan Museum of Art, American Museum of Natural History.

Robert K. Smith, $50,000 each to University of North Carolina and Davidson College.

Miss Reading Sterrit, Newburgh, N. Y., $50,000 to New York Institute for Blind.

Isidor Straus's sons, Jesse I., Percy S. and Herbert N., New York City, $300,000 to Harvard University for dormitory.

Catharine E. S. Stuyvesant, New York City, residue of $1,800,000 estate on death of heirs and descendants to found a "Van Horne Stuyvesant Memorial Hospital."

Miss Mary G. Thompson, $200,000 to P. E. Cathedral of St. John the Divine, toward building the nave.

Col. W. B. Thompson, Yonkers, N. Y., $5,000,000 to Boyce Thompson Institute for Plant Research, to study plant and vegetable diseases.

Henry R. Towne, New York City, $50,000 to Merchants' Association of New York; $50,000 to United Engineering Society of New York; $10,000 to Franklin Institute of Philadelphia; $10,000 to Lincoln Memorial University, Tenn.; residuary estate, estimated at $2,000,000, to form a "Henry R. Towne Endowment Fund, to erect and maintain museum buildings."

William Pierce Tuttle, Chicago, $800,000 to Home for Crippled Children and other charities.

Felix M. Warburg, New York City, $19,000 to American Museum of Natural History; $100 000 to Hebrew University in Jerusalem; $25.000 to American Committee for Relief of German Children.

Felix M. Warburg and wife, trust fund of $500,000 to New York Community Trust, to maintain nurse service at Henry Street Settlement.

Mrs. Montgomery Ward, Chicago, $3,000,000 to Northwestern University.

Miss Emily A. Watson of New York City, $50,000 to Home for Incurables, Fordham; $70,000 to Lincoln Hospital and Home; $50,000 to New York Skin and Cancer Hospital; $50,000 to New York Association for Improving the Condition of the Poor.

Payne Whitney, New York City, $100,000 to Young Women's Christian Association.

Mrs. Addie V. Wilbur, Brookline, Mass., $100,000 to Boston University.

Miss Josephine Williams Estate, Hartford, Conn., $1,200,000 to hospitals.

THE GENERAL EDUCATION BOARD.

(Chief appropriations for the fiscal year 1923-24.)

For Medical Schools—Endowment, $1,050,000; buildings, $530,000; current purposes, $681,058.20; medical fellowships, $100,000; total—$2,361,058.20.

For Colleges and Universities—General endowment, $1,375,000; endowment for teachers' salaries, $3,383,333; buildings, $180,000; grants, $347,067.57; total—$5,279,400.57.

Lincoln School—$153,178.40.

Fellowships and Scholarships—$75,400.

For Negro Education—Colleges and schools, $2,356,149.15; county training schools, $84,500; supervising industrial teachers of Jeanes Foundation, $77,500; John F. Slater Fund, $15,500; summer schools, $52,255; miscellaneous purposes, $31,322.20; total—$2,617,226.35.

Secondary and Rural Education—$278,161.67.

Miscellaneous Appropriations—$272,838.35.

Total Appropriations—$11,037,263.54.

THE AMERICAN RED CROSS IN 1924.

The American Red Cross operates under its charter by Act of Congress of Jan. 5, 1905, "to furnish volunteer aid to the sick and wounded of armies in time of war in accordance with the convention of Geneva; to act in matters of voluntary relief and in accord with the military and naval authorities as a medium of communication between the American people and their army and navy; to continue and carry on a system of national and international relief in time of peace and to apply the same in mitigating the suffering caused by pestilence, famine, fire, floods and other great national calamities, and to devise and carry on measures for preventing the same."

Calvin Coolidge is President of the American Red Cross and John Barton Payne is Chairman of the Central Committee, the governing body composed of eighteen persons, six of whom represent the Federal Government. National headquarters is located at Washington, D. C., and from it the activities of 3,576 chapters are directed through six divisional headquarters.

All accounts of the American Red Cross are audited by the War Department, through which also the annual report of the organization is submitted to Congress. The report for the fiscal year ended June 30, 1924, shows that in addition to relief of the Japanese earthquake sufferers and to Americans in Japan, for which the Red Cross raised more than $11,000,000, relief was extended to refugees in Greece at a cost of about $200,000; to refugees in Syria; to famine victims in Albania; to earthquake sufferers in Costa Rica, Ecuador, Colombia and Mexico; and to Russian refugees in Constantinople. Red Cross relief operations were also carried on in 192 disasters in the United States, a new annual record. The report shows that 2,609 chapters were assisting disabled ex-service men and their families at a cost of nearly $2,000,000; assistance was extended in more than 304,000 instances in behalf of the men in the regular army and navy; and Red Cross members made 744,200 visits to sick and disabled enlisted men.

Public health nurses were maintained by 916 chapters; 1,088 nurses instructed 62,706 women and girls in home hygiene and care of the sick; 270,000 adults and children were reached with regular nutrition instruction; 147,176 persons were instructed in first aid by the surgical staff of the Red Cross First Aid Instruction Car. No. 1, which traveled 9,646 miles over trunk railway lines; 50,000 men, women and children were enrolled in the Red Cross Life-Saving Corps and a campaign carried on at Boy Scout camps and citizen's military training camps. Volunteers gave a variety of services in 1,500 chapters.

The active enrolment of Red Cross nurses is 28,653, who by law are a reserve of the Army Nurse Corps, and by request also serve the Navy, Veterans' Bureau and the United States Public Health Service.

	Expenditures, Fiscal Year, 1923-24.	Budget, Fiscal Year, 1924-25.
Domestic Operations.	*Dollars.*	*Dollars.*
Service to disabled veterans	1,735,825	1,969,648
Service to men of the Regular Army and Navy	308,285	312,416
Disaster relief	450,603	312,416
Enrolled Nurses' reserve	43,508	45,286
Public health nursing	267,240	256,478
Home hygiene and care of the sick	68,532	67,563
Nutrition	65,604	71,684
First aid and life saving	216 234	245,816
Junior Red Cross	233.510	255,334
Other domestic operations	283,473	275,184
Insular and foreign operations.		
Japanese relief, including relief for Americans in Japan	11,768,802	
Relief of refugees in Greece	200 887	
League of Red Cross Societies	165,000	192,450
Junior Red Cross foreign projects	99 579	98,707
Other Insular and foreign work	221,855	200,241
Supervision of service activities and general management	368,310	371,563
Total	16,497,255	4,674,790

Revenues of the national organization during the fiscal year ended June 30, 1924, were $15 075,215, or $1,422,040 less than expenditures. There having been at the beginning of the fiscal year a balance of $21,784,344; there was on June 30, 1924, a balance of $20,362,304. There having been budgeted for the fiscal year ending June 30, 1925, $4,674,791 and $11,747,589 set aside for specified activities, there remained on June 30, 1924, unobligated funds totaling $3,939,924.

The membership of the American Red Cross at the end of the last fiscal year was 3,123,674 adults and 5,596,663 juniors.

THE AMERICAN PEACE AWARD.

The American Peace Award created by Edward W. Bok offered $100.000 to the author of the best practicable plan by which the United States may co-operate with other nations looking toward the prevention of war. The award was first announced on July 2, 1923. Plans submitted numbered 22,165.

The purpose of the award was stated to be "to give the American people from coast to coast a direct opportunity to evolve a plan that will be acceptable to many groups of our citizens, who, while now perhaps disagreeing as to the best method of international association, strongly desire to see the United States do its share in preventing war and in establishing a workable basis of co-operation among the nations of the earth."

The conditions of award were made public on July 23, 1923. These conditions were devised, and the award was conducted by an administrative committee consisting of the following members:

John W. Davis, former Ambassador to Great Britain.

Learned Hand, Judge of the United States Court for the Southern District of New York since 1909.

William H. Johnston, President of the International Association of Machinists and executive officer of the Conference for Progressive Political Action.

Esther Everett Lape, Member in Charge, writer.

Nathan L. Miller, former Governor of New York State, State Comptroller and Judge of the Court of Appeals, now practicing law in New York City.

Mrs. Gifford Pinchot, active in political life and many social welfare movements.

Mrs Ogden Reid, Vice President of the New York Tribune, Inc.

Mrs. Franklin D. Roosevelt, Vice Chairman of the New York League of Women Voters.

Henry L Stimson, former Secretary of War and United States Attorney for the Southern District of New York, now a practicing lawyer.

Melville E. Stone, formerly general manager, now counsellor of the Associated Press.

Mrs. Frank A. Vanderlip, Regional Director of the New York League of Women Voters.

Cornelius N. Bliss jr., Treasurer.

The conditions of the award provide that $50,000 would be paid to the author of the winning plan as soon as chosen by the jury; the other $50,000 to be paid to the author of the winning plan "if and when the plan, in substance and intent, is approved by the U. S. Senate; or if and when the Jury of Award decides than an adequate degree of popular support has been demonstrated for the winning plan."

The second part of the award, or $50,000, is not to be deemed to have been won unless the conditions above stated have been fulfilled on or before March 4, 1925.

Since the plan finally selected by the jury might probably be a composite of more than one plan, there was also offered, in addition to the main award of one hundred thousand dollars ($100,000), second, third, fourth and fifth awards of five thousand dollars ($5,000) each for any plan or portion of plans used by the Jury of Award in a composite plan.

The Jury of Award consisted of: Elihu Root, Col. Edward M. House, Gen. James Guthrie Harbord, Ellen Fitz Pendleton, Roscoe Pound, William Allen White, and Brand Whitlock.

The first prize of $50,000 was awarded to Dr Charles Herbert Levermore, former President of Adelphi College, Brooklyn.

The plan written by Dr. Levermore proposed, briefly, the immediate entry of the United States into the World Court with the Harding-Hughes reservations, and the co-operation of the United States with the League of Nations on certain definite conditions, looking toward the ultimate full participation of the United States in the League.

The plan also provided a method for codifying international law under the direction of a commission responsible to the League of Nations.

The American Peace Award is continuing its activities throughout 1924-25, with the object of securing the reporting of the World Court resolution by the Senate Foreign Relations Committee, and with the further object of making articulate the interest of the American public in the participation of the United States in the League of Nations.

WORK OF NEAR EAST RELIEF IN 1924.

Near East Relief operates under its charter by act of Congress of Aug. 6, 1919, "to provide relief and to assist in the repatriation, rehabilitation, and re-establishment of suffering and dependent people of the Near East and adjacent areas; to provide for the care of orphans and widows and to promote the social, economic and industrial welfare of those who have been rendered destitute or dependent, directly or indirectly, by the vicissitudes of war, the cruelties of men, or other causes beyond their control." The field of operations embraces three areas: Greece and her Islands· Russian Armenia, and Persia; Syria and Palestine. Administrative centres are Athens, Alexandropol (Armenia), Tabriz (Persia), and Beirut (Syria). Annual report is made to Congress

The organization is indorsed by President Coolidge and Congress; by the National Information Bureau; by the churches, Protestant, Catholic and Jewish, by civic, commercial, industrial, fraternal, educational and social organizations; by American and foreign officials in Europe, Turkey and other countries of the Near East.

The central headquarters of Near East Relief are at 151 Fifth Avenue, New York City. In every State of the Union there is a branch office, and most of the larger States have a State Director. European headquarters are at Geneva.

The officers of Near East Relief are: James L. Barton, Chairman; John H. Finley, Vice Chairman; Charles V. Vickrey, General Secretary; Cleveland H. Dodge, Treasurer, and Frank L. Polk, General Counsel. The Executive Committee are: Edwin M. Buckley, Chairman; James L. Barton, Cleveland H. Dodge, Abram I. Elkus, Harold A. Hatch, William B. Millar, Henry Morgenthau, George A. Plimpton, Charles V. Vickrey, and Albert Shaw.

This organization succeeded the Armenian and Syrian Relief Committee, originally established in 1915, following an appeal for American relief to victims of massacres coming from Henry Morgenthau, then United States Ambassador to Turkey. Near East Relief has saved from starvation more than a million women, children and old men. Its activities now are almost exclusively with children orphaned by the war, but the organization is also carrying on broken family work centres where employment is furnished 15,500 old men and widowed mothers with dependents.

The total number of hospitals and clinics maintained by Near East Relief is 62, giving 363,000 treatments every month.

Used clothing and shoes to the amount of 2,471,417 lbs. net was contributed through the year from every part of the United States. This material is cleaned and repaired by needy men and women and may be bought for a few cents per garment, thereby maintaining the respect of the refugee wearers, who would otherwise be half-naked.

The overseas staff of Near East Relief comprises 115 American men and women and several hundreds of native helpers.

The end of 1924 finds 40,000 children under Near East Relief care. Of these, 29,000 are in the organization's institutions and 2,000 in Armenian, Greek and Jewish orphanages in Constantinople and Jerusalem. Supported in families are 4,000, and supervised in homes into which they have been adopted are 5,000 more. Wholly or partly maintained are 39 orphanage centres. A total of 25,000 more children in the refugee camps of Greece and 5,000 in Syria must be cared for if funds permit.

The total value of Near East Relief operations to date approximates $93,000,000. The auditor's report covering the period ending June 30, 1924, shows that up to that date net cash relief contributions had been made amounting to $75,356,593.14, and that relief payments had been made amounting to $76,169,291.58. In addition, the Near East Relief received flour previous to 1921 through the United States Relief Administration, valued at $12,800,000, and it values the buildings, land, transportation, equipment, service, food and other supplies contributed in the Near East at $5,000,000. This brings the total amount administered up to $93,969,291.58. The deficit noted above was caused by the Smyrna disaster, from which the organization has not yet entirely recovered.

The policies of 1924 include an extension of American influence and training through an increase in the outplacing of the children. There are now more than 10,000 children in homes in ten countries —Bulgaria, Roumania, Macedonia, Greece, Egypt, Syria, Palestine, Armenia, Georgia and Persia. A necessary adjunct to this work is an educational campaign by which native housewives are taught hygiene, sanitation, good cooking and skilful baby tending by older orphan girls who have been trained as community nurses.

Near East Relief is desirous of leaving permanent contributions in the areas in which it is operating and to that end has organized on a lasting basis schools for the blind at Alexandropol in Armenia and at Athens, and one for the deaf and dumb in Athens. The Polyclinic Hospital at Athens is cooperating with Near East Relief in the maintenance of a nurses' training school, and the Armenian Government has requested the similar school at Alexandropol to furnish the Government with graduates for Government hospitals and with public health nurses for several years to come.

Whenever possible the relief organization has pursued a policy of putting the people back on the land. Government grants in the Caucasus, Greece and Syria have put 24,282 acres in the hands of the Americans for purposes of production and education. At Karakala, Near East Relief has established an agricultural school; at the Alexandropol orphanage the girls are taught the many duties of a farmer's wife. At Oropos, in Greece, the orphans are specializing in truck gardening pending the increase in size of its small farm.

At Polygon Post, Alexandropol, an Industrial Institute has been started, the beginning of a permanent technical school. On the Aegean Island of Syra, where a new orphanage has been built as a permanency, the chief emphasis is to be laid on industry. The industrial training schools of the organization at present have an average monthly enrolment of 8,960.

At Corinth a bad form of malaria has been prevalent for centuries. Near East Relief older boys now have fifty miles of irrigation ditches under constant inspection. They have covered wells and oiled irrigation tanks. The check to the disease was immediate, and, it is hoped, will be permanent.

The League of Nations commission engaged in placing men on the farms has been in charge of an international committee headed by Henry Morgenthau of the Executive Committee of Near East Relief, who inaugurated this important undertaking.

Another Near East Relief man is acting as liaison between Turkey and Greece in the negotiations for the exchange of prisoners of war. Fifteen thousand were repatriated during 1923 and 1924.

For the second time International Golden Rule Sunday was observed on the first Sunday in December. The people of a score of countries gave of their abundance for the aid of the children whose upbringing in friendliness and love may well prove an aid to international peace in that upheaved corner of the world. The day was appointed by the International Near East Association, of which Charles V. Vickrey is President.

AMERICAN RELIEF FOR GERMAN CHILDREN.

Gen. Henry T. Allen, U. S. A., National Chairman, announced on June 21, 1924, that the work of the American Committee for the Relief of German children had come to an end because of the increased food supplies in Germany. He said:

"Unassailable evidence from official and non-official sources established the fact that not less than two million German children were undernourished and hungry. Tuberculosis and rickets, the inevitable companions of famine, had already laid inexorable hands on tens of thousands of infants, who by no stretch of imagination could be held responsible for the pitiable conditions into which they had fallen. Skilled medical observers like Dr. Haven Emerson of Columbia University declared unequivocally that these two diseases threatened disaster to the childhood of Germany unless food diets were quickly balanced, and such balance could be obtained only by importing in large quantities those necessary foods which were lacking in their own country.

"To put our shoulders to this gigantic task of saving these children of our former enemies, and building them back to strength and health, seemed to me then, as it does to-day, when the work is finished, one of the finest gestures that America could make.

"Our work is finished. America did not fail. The children have been saved. The Quakers, who have had complete charge of the feeding, report that they have fed as many as 1,040,000 children in one day. They have enough food in their warehouses to continue their program through the summer. They have large supplies of powdered milk, designed for combating tuberculosis. The American people have put in their hands the means of bringing these little ones through to the new harvest and safety.

"With the rapidly improving conditions and the promise of the early return of more normal times, every participant in this great humanitarian task may feel that the results achieved are permanent. The children, against whom America never waged war, have been given their chance and will live."

Scientific Progress in 1924.

(Covering period from Oct. 1, 1923 to Oct. 1, 1924).

Compiled by the National Geographic Society, Washington, D. C. Gilbert Grosvenor, President.

ARCHAEOLOGY AND PALEONTOLOGY.

The fourth year of exploration work at the ruins of Pueblo Bonito under Dr. Neil M. Judd, director of the National Geographic Society's expeditions, has added many interesting facts to our knowledge of this communal dwelling of possibly 800 rooms housing 1,200 people. Three more burial chambers have been cleared and 65 skeletons recovered, revealing that prehistoric vandals entered the burial rooms, tore portions of the bodies apart and stripped them of their turquoise and shell ornaments.

A skull and other human bones, fragments of matting and wooden implements have been found in Carlsbad Caverns of New Mexico by Dr. Willis T. Lee, leader of the National Geographic Society expedition which is exploring, mapping and photographing the caverns, and seeking for entrances which will make this new national monument accessible to visitors.

The National Geographic Society also had an expedition at work upon the ruins of Cuicuilco, south of Mexico City, probably the oldest structure yet found on the American continent, which has already disclosed an artificial mound 412 feet in diameter and 52 feet high. Skeletal remains of these Americans of 7,000 years ago and specimens of their emblems and idols have already upset current theories about the origin of human life on our continent, and it is believed that further explorations may revolutionize the history of ancient America. Dr. N. H. Darton who is with the expedition, will study especially the sequence of geological events including the lava flows and the recession of Lake Texcoco, with a view to determining more nearly the exact period of the civilization.

Chichen Itza, the Maya capital of 1000 A. D., is being excavated by an expedition of the Carnegie Institution under the leadership of Dr. Sylvanus G. Morley. A ten-year program of archaeological research in cooperation with the Mexican government has been arranged by the Institution. Dr. Manuel Gamio, director of the Bureau of Anthropology of Mexico, is to be associated with the work.

Mr. Earl H. Morris has been assembling a collection of pre-pueblo material from the Canyon del Muerto, New Mexico.

Mr. Albert Thomson, of the American Museum of Natural History, has recovered from the Snake Creek Fossil Quarries an interesting ape tooth, the first found in the New World, as well as other valuable fossil remains, including the skull and jaws of a gigantic camel, bones of the three-toed horse, of deer and other extinct animals.

Several very remarkable finds of elephant remains have been made in Minnesota, notably in Freeborn County, in the superficial deposits of the Rice Lake area.

Dr. J. Walter Fewkes has been engaged in excavating a large burial mound, near St. Petersburg, Fla. Thus far, more than 450 human burials have been found, arranged in two layers, or strata, one above the other.

Mr. Howard Carter recently returned to London to make preparations for continuing his work upon the tomb of Tutankhamen at Luxor, only half of which has been completed. Operations during the last year revealed many more notable art treasures, including a gold-plated statue of Apis, alabaster vases mounted in silver and gold, a cosmetic vase in calcite, walking sticks belonging to the King, and numerous other relics. The partition wall between the antechamber and the mortuary room was demolished, and the lid of the sarcophagus raised on February 12. The coffin which was covered almost entirely by two linen shrouds, perfectly preserved, filled the sarcophagus. It was of wood and gessoglit, was of colossal size, and rested on a low bier, with superbly modeled lion heads at the head. The hands were crossed upon the chest, the right holding a flail, and the left a crooked sceptre. On each side of the coffin was a protective goddess with arms and wings outstretched. The face, of gold, and apparently in one solid piece, with eyes of crystal, was evidently a portrait.

It was recently reported that the early stone buildings of the Third Egyptian Dynasty were uncovered at Sakkara by the Egyptian Department of Antiquities.

Prof. Flinders Petrie resumed work at Sua, the old capital of the ninth Egyptian Dynasty, 30 miles south of Assuit, to obtain further data concerning the Paleolithic human remains found last season.

The Egypt Exploration Society has continued its work at Tell-el-Amarna, a large portion of the central part of the town being excavated.

In view of the work which has been found to do upon the important fossil deposits in east-central Mongolia, the Third Asiatic Expedition of the American Museum of Natural History expects to continue its operations in that area for five years. Prof. Henry Fairfield Osborn summarizes the results of the expedition as follows: thirteen new fauna horizons have been discovered thus far, the earliest of which is in the lower Cretaceous, and most recent at the close of the Pliocene; three of the lower Cretaceous horizons are entirely new to science; a new Eocene horizon has just been discovered which is believed to prove to be quite close to similar formations in northern New Mexico; in one of the upper Eocene horizons has just been determined an animal which apparently is ancestral to the old family of ruminants. The 10,000,000-years-old dinosaur eggs and other fossil remains recovered last year have been put on exhibition in New York.

The British Museum has sent an expedition to Tendaguru, near the southern end of Lake Tanganyika to seek for fossil remains of giant dinosaurs.

Russian archaeologists have uncovered at Krasnoyarsk, Siberia, human skeletons of the Stone Age, prehistoric mammoths, dinosaurs, bison and stags.

Fathers Licent and Teilhard have recently found a fine series of remains of Pleistocene mammals in the fossil beds of northern China.

Dr. Barnum Brown discovered three fossil jaws of a primitive creature in the Siwalik Hills of India, believed to be an ancestor of both man and the apes.

The British School of Archaeology in Palestine recently discovered at Tell Barak, a magnificent marble sarcophagus, similar to that called the Tomb of Alexander the Great, sculptured with bas-reliefs, and another of the Alexandrine style of the second century. At Tanturah, the same institution discovered ruins of an imposing Graeco-Phoenician building of the early Ionic order, inclosing a still earlier shrine. Prof. R. A. Stewart Macalister, working under the auspices of the Palestine Exploration Fund, recently discovered a cave with a shaft leading down to a spring. In the time of David, this Spring of Gihon and a series of underground canals comprised the water system of Jerusalem—an amazing engineering triumph of ancient times. Through the shafts the inhabitants drew up the water in buckets. Prof. Macalister also found traces of the City of David on Mount Oppel, which dates from 2000 B. C., with evidence that it may date back as far as 3000 B. C. He has also discovered the north wall of the Jebusite stronghold, the Millo, to the south of the temple area in Jerusalem.

At Kish, near Bagdad in Mesopotamia, the Oxford University and Field Museum expedition has found a magnificent Sumerian palace, with pillars, stairways, and decorated walls bearing specimens of the earliest known form of pictographic writing, a library of cuneiform tablets, a bone stylus six inches long, solid gold earrings and other jewelry. Kish is said to be the oldest city of which any human records exist, and the seat of a semi-mythical line of kings as early as 5000 B. C.

The joint expedition of the British Museum and the University Museum of Philadelphia at Tel-el-Obeid, about 4½ miles from Ur, has discovered the oldest dated document yet known—a tablet recording the foundation of a building discovered in 1919. Scientists have been able, from the fragmentary indications of scanty walls and broken floors, to determine the original character of the great ziggurat, or tower, of the Temple of the Moon God at Ur, which evidently consisted of two stages, the lower a rectangle 195 feet long, its corners toward the cardinal points. On this Nabonidus, in reconstructing the tower about 550 B. C., had erected three stages capped with a shrine. At Tel-el-Obeid more than a dozen examples of copper friezes of cattle in relief have been recovered.

Dr. Clarence S. Fisher of the University of Pennsylvania has been excavating five layers of earth, each containing traces of a separate civilization, at Bethshean, fifty miles north of Jerusalem. The finding of a stone with certain markings upon it at the Garden Tomb, outside the Damascus Gate of Jerusalem, has led some archaeologists to regard this as the Tomb of the Resurrection.

Interesting examples of Egyptian influence upon the Phoenician kingdom on the Syrian coast have recently been found. At Jebeil, the ancient Byblos, a hypogeum containing a sarcophagus with an Egyptian vase bearing the name of Amenemhat III., a marble

vase of beautiful workmanship, and a jewel casket of obsidian and other objects bearing Egyptian inscriptions have been uncovered. A larger tomb, bearing an inscription five centuries earlier than the oldest inscription hitherto known, was also found.

Continued work at Mycenae, the City of Agamemnon, has brought to light, in the private apartments of the palace, a tank-bath lined with red stucco, and unusual domed tombs which show an elaborate system of counter-weighting and wedging the stones.

Recent excavations at Knossos have revealed evidence of the existence of a portico with a rising line of supporting pillars which formed a prolonged entrance.

Crown Prince Gustaf Adolf of Sweden unearthed at Asine, Greece, 250 gold ornaments of the time of Homer, and opened a Greek tomb that has not been disturbed.

It has just been discovered that one of the chalices recovered from underground chambers at Antioch in 1910 probably contains authentic portraits of Christ and several of the Apostles, by a contemporary artist.

During the past five years, wonderfully preserved upper parts of houses and innumerable objects of daily life of lake-dwellers have been discovered embedded in the Federsee Moor near Euchau in Wurttemberg. Even the pollen of birch and poplar as well as berries, fruits, nuts, wheat and barley have been obtained in a perfect state of preservation.

An underground structure bearing a striking resemblance to the Catacombs of Rome has recently been uncovered near High Beech, in the heart of Epping Forest, near London. Steps have been taken to purchase at Reculver, near Canterbury, a plot of ground in order to make excavations in the Roman structures there.

Norbert Casteret discovered in the subterranean cavern at Montespan, France, rock-drawings and sculpture which is ascribed to the Aurignacian artists of 25,000 years ago.

Skeletons have been discovered in prehistoric strata in the village of Solutre, France, by Prof. George G. MacCurdy, of Yale University. They are reported to belong to the Cro-Magnon tribes of 15,000 years ago.

Continued excavations at Ostia have uncovered a fresh block of houses, huge new buildings, and beneath the level of the streets portions of the earlier Latin castrum, or fortified settlement.

ASTRONOMY.

The United States Naval Observatory and other scientific bodies are making preparations to observe the total eclipse of the sun of Jan. 24, 1925, the part of the totality of which is over Fisher's Island, New York, and the eclipse of January, 1926, which reaches totality over Sumatra. The object of the expeditions is to procure valuable data on magnetic disturbances on the sun, the behavior of the sun's corona during a total solar eclipse, and the effect of sun spots and magnetic disturbances on the meteorological conditions of the earth.

A comet, brighter than any comet that has appeared for several years and of the eighth magnitude, was discovered on September 15th by Prof. Finsler, of Bonn, Germany. Apparently it is moving southeast in the western sky.

A new astronomical station of Harvard Observatory, equipped with two photographic telescopes, has just been installed on the edge of the nitrate desert of Northern Chile to test atmospheric conditions and to watch and photograph the southern stars.

A new magnetic observatory to replace Greenwich is now being built at Abinger, Surrey, 20 miles from London, by the Southeastern and Chatham Railway, the electrification of whose lines made necessary the discontinuance of work at the latter station. The new station is in latitude 51° 11' 03" N. and longitude 0° 23' 12" W. at an elevation of 800 feet above sea level.

A 26-inch refracting telescope is to be installed at Johannesburg, South Africa, by Yale University.

Dr. C. G. Aboot, of the Smithsonian Institution, has succeeded in measuring the heat of the stars to the hundred millionth of a degree at Mount Wilson, California, with the aid of the 100-inch reflector.

Mr. Doubiaco at Kasan, Russia, discovered a comet of the eighth magnitude on Oct. 14, 1923.

The U. S. Nautical Almanac of 1925 will follow, in indicating astronomical time, civil time, by which the day begins and ends at midnight, instead of beginning and ending at noon as formerly.

Mr. Reid at the Royal Observatory of the Cape of Good Hope discovered a new comet 123° from the north pole of the heavens, and 44° to the right of the first point of Aries. It was moving northward at 30' a day.

A very faint companion to the variable star, Omicron Ceti, called Mira, or the "Strange Star," has recently been discovered.

Mars was closer to the earth during Aug. 23 and 24, 1924, than it has been at any time in the past 120 years—34,637,000 miles. Extended observations of the planet and its two moons were made in various parts of the United States.

The light from the giant twin-stars B. D. 6° 1309 was recently analyzed at the Dominion Astrophysical Observatory, Victoria, B. C., and their diameters and distance apart measured.

BIOLOGY.

Dr. Joseph F. Rock, leader of the National Geographic Society's expedition into Yunnan, China, recently brought back to the United States, 1,700 specimens of birds, 500 mammal specimens and more than 60,000 plants, including a species of blight-resisting chestnut tree which, it is hoped, will aid in restoring the diseased chestnut timber crop of the country. Especially fine collections of seeds of coniferous plants, such as firs, spruces, hemlocks, pines, junipers, etc., were sent to the U. S Department of Agriculture, and a collection of the seeds of 493 species of rhododendron, constituting the largest single introduction ever made into this country. The seeds reached the office of Foreign Seed and Plant Introduction in excellent condition and have all germinated. The Smithsonian Institution states that the bird skins represent by all odds the most important single contribution which has been received by that organization from the localities in Asia represented.

Dr. Edward Wigglesworth and Mr. W. S. Brooks, of the Boston Museum of Natural History, have spent some time in Central America and Cuba in connection with the organization of the biological station to be erected on Barro Colorado Island in Gatun Lake, in which more than twenty of the leading museums, societies and universities are co-operating.

Mr. Edmund Heller, of the Field Museum of Natural History of Chicago, has gone to Central Africa to search for the biggest living elephant.

Mr. George G. Goodwin, of the American Museum of Natural History, obtained from the Gaspe Peninsula of Quebec 200 specimens of the smaller mammals of that area. Mr. H. E. Anthony, of the same institution, has been collecting specimens in Ecuador, having obtained an excellent series of the comparatively rare *Caenolestes*. Mr. Herbert Land and James P. Chapin have brought back from the Congo new genera of the African genets and the African monkeys.

The Fauthorpe-Vernay Expedition into Burma, Assam and Siam has been making valuable additions to the bird collection of the American Museum, filling in the gaps among the avifauna of tropical Asia and the islands south of that continent. A total of 847 birds from these localities have been collected.

Profs. Frosch and Dahmen of Berlin have discovered the long-sought virus of foot-and-mouth disease.

Dr. H. V. Harlan, of the Bureau of Cereal Investigation, U. S. Department of Agriculture, has returned from the Abyssinian plateau, where he sought primitive species of wheat and barley in the land in which they or ginated.

Dr. William R. Maxon, of the Smithsonian Institution has brought back from Central America, 4,500 botanical specimens, many of which come from the rain-forests on the slopes of volcanoes in the interior mountain region of Costa Rica.

More than 6,000 species of rare plants have been brought to the Field Museum of Chicago, by Profs. G. S. Bryan and Francis MacBride, from the western part of South America. About 400 specimens of birds and mammals were obtained rom the Island of Chiloe, by Mr. H. B. Conover, who accompanied the party.

Prof. David Lumsden, of the Federal Horticultural Board, has announced that plants treated with ether, either by inhalation or injection, wake from their winter's sleep and begin growing immediately.

A new laboratory for marine biological research has been opened at Batavia. The first of its kind near the Equator, it offers rare opportunities to naturalists for investigating the marine life of the Tropics.

The eighth expedition of the Department of Tropical Research, New York Zoological Society, is now at work at Kartabo, British Guiana, under the direction of William Beebe, who hopes to bring back living specimens of the hoactzin, the missing link between reptiles and birds.

Mr. Ludlow Griscom, director of an expedition of the American Museum of Natural History to Western Panama, made a collection of the birds of that area.

Great Britain has set aside the Farne Islands, off the coast of Northumberland, as a bird sanctuary.

Mr. Arthur I. Ortenburger, of the American

Museum of Natural History, is making a collection of the reptiles of the Santa Catalina Mountains.

Dr. Noguchi, of the Rockefeller Institute, has been doing research work on the plague at Bahia.

A research expedition of the London School of Tropical Medicine is at work in Samoa studying filariasis and associated diseases, especially elephantiasis.

The Whitney South Sea Expedition has been making a protracted study of bird life on the islands of the Pacific.

Dr. J. Howard Brown, of Johns Hopkins Medical School, has announced a serum to cure botulinus poisoning.

The California Academy of Sciences sent a collecting party under E. P. Van Duzee, to study the Sonoran fauna of the Southern Arizona mountains.

A minute crustacean called *Thermosbaena mirabilita*, a representative of a new order in a certain group of animals, was discovered by Th. Monod, at El Hamma, Algeria. The animal is about 3mm. long, is colorless, and has no trace of eyes, its habitat probably being subterranean reservoirs.

Prof. W. B. Herms, of the University of California, has been studying the fauna and flora of Fanning and neighboring islands, with special reference to cocoanut pests.

CHEMISTRY.

The General Electric Company has recently perfected the most transparent solid known—fused quartz. It is said to have qualities which will make it the standard for length and pitch, replacing the metals now used. It is so clear that there is no obstruction in passing light and heat rays through a tube of it, and a meter of fused quartz transmits 92 per cent. of the light passed through one end, as against 65 per cent. for the best optical glass and 35 per cent. for ordinary glass; and it does not shut out ultra-violet rays. The light even passes through tubing which is bent or twisted, proving that light, which is supposed to travel in straight lines, can be made to turn corners.

Dr. Walter H. Eddy, of Columbia University, has announced the isolation of Vitamin D., which he believes opens up the possibility of producing synthetic foods of high nutritive value. Two Japanese chemists, K. Takahashi and K. Kawakami, recently announced the isolation of Vitamin A, the fat soluble vitamin, which is essential to the growth of children and young animals.

A new mineral, benjaminite, has recently been discovered in a quartz vein near Round Mountain, Nye County, Nevada.

Dr. William D. Harkins, while photographing the bombardment of atoms in his laboratory at the University of Chicago, recently discovered a new light radiation emanating from minute particles of matter, which he has named the Zeta Ray. He believes it might prove to be the secret force required for the disintegration of the atom.

By putting powdered copper and powdered tin under heavy compression, and heating it, a motor company has developed an alloy for bearings or bushings. This alloy has the unusual property of absorbing and holding oil, and bearings made from it can be used for a long time without further lubrication.

A new sulphuric acid process, the Schmiedel process—designed to work efficiently on gases of variable or very low sulphur dioxide content—has just been developed.

A new alloy containing copper, manganese, silicon, tungsten, aluminum, iron, molybdenum, chromium, and nickel, resists the action of nitric acid and can be machined in a lathe like tool-steel.

A new ammonia catalyst, which brings about the permanent union of nitrogen and hydrogen and yields ammonia, has been developed by the Department of Agriculture.

Thorium oxide, the most resistant to heat of all known substances, has been melted at the Bureau of Standards, at a temperature of nearly 6400° F.

The composition of Bayer 205, the famous German remedy for African sleeping sickness, is believed to have been solved by the French chemist, Fourneau.

A new process has been invented whereby it is possible to tie gray or white cast iron in knots. Cold cast iron is heated just above 1600° F. in a muffle surrounded by a gas flame and open at the top, and the whole is allowed to cool in the open air.

At the Geophysical Laboratory of the Carnegie Institute experiments in making synthetic minerals and rocks have been conducted with marked success.

A revolutionary method for making phosphoric acid, which will save the farmer millions of dollars, has recently been perfected by the Bureau of Soils of the United States Department of Agriculture.

A new lubricant made from castor oil is being used with success on the Chinese Eastern Railway.

A variety of yeast capable of assimilating nitrogen has been discovered. It is regarded as having immense possibilities in enlarging the available supply of nitrogenous food.

A new process for the fixation of atmospheric nitrogen, which can be used for fertilizers or explosives, has been developed by W. A. Bone of the Imperial College of Science, London.

Dr. William Beach Pratt has announced from his laboratory in Italy that he has developed a method of dispersing rubber in water in such a way that it can be used for coating fabrics, making paper, treating leather, etc.

Dr. John J. Abel, of Johns Hopkins University, has developed an artificial kidney to wash out of the blood such mineral poisons as bichloride of mercury.

Prof. H. Kamerlingh Onnes, of the University of Leyden, Holland, recently attained, in an unsuccessful attempt to solidify liquid helium, the nearest approach to absolute zero ever attained —272.18° C.

The important discovery of the use of glycerin to supplement insulin in treatment of diabetes has been made at Johns Hopkins Hospital.

The Ford Motor Company has developed plans for the manufacture of cylinder castings from blast furnace dust mixed with cast-iron borings.

It has recently been found that the waters of the Dead Sea contain a strong precipitate of potash which can be extracted inexpensively.

ENGINEERING.

Work upon the vehicular tunnel beneath the Hudson River from the Canal Street section of New York City to New Jersey is rapidly progressing. The two great shields, which were boring toward each other from opposite ends, met under the river on Oct. 27 and the tunnel was officially opened by President Coolidge.

Two great shafts have been sunk beneath the Narrows for the proposed $75,000,000 Brooklyn-Staten Island freight and passenger tunnel, one of the city's chief plans for the development of the Port of New York.

The Shandaken Tunnel, which will eventually add 250,000,000 gallons of pure mountain water to New York City's supply, was opened early in the year. The tunnel, which is the connecting link between two adjoining watersheds, the Esopus and the Schoharie, has been bored through 18.2 miles of solid rock, and its total capacity is 600,000,000 gallons daily.

President Millerand, of France, on Oct. 14, 1923, officially opened the longest reinforced concrete bridge of its kind in existence over the Seine at Paris. The length of the span is 390 feet, and the highest point of the arches is 97½ feet above the river.

What is reported to be the largest bridge in the world is shortly to be built over the Elorn River to connect Brest with Plougastel. It will be six miles long.

A bridge half again as large as New York's Hell Gate Bridge is shortly to span the harbor of Sydney, Australia. It will allow the largest liners to pass below it, and will carry four railway tracks, as well as roadways and walks. The chief feature of the bridge will be a single arch of 1,650-foot span; the total length, including approach spans, will be 3,770 feet. The head-room for ships will be 170 feet at high water, and the top of the arch will be 450 feet.

The South African Railways and Harbors Administration is building at Durban two terminal grain elevators of 42,000 and 30,000 ton capacities, as well as 34 country elevators to take care of the enormous increase in grain now exported.

A hydroelectric project to cost $15,000,000 will harness the watersheds over a 300-square-mile area in Scotland, the energy being concentrated at Fort William, where equipment necessary to generate 100,000 horse power will be installed.

What is said to be the largest floating drydock in the world was recently opened at Southampton, England. The over-all length of the dock is 960 feet; width, 170 feet; height, more than 70 feet; and lifting power, 60,000 tons.

A mechanical device which multiplies the heat of a man's hand to power enough to lift many tons of weight has recently been perfected in Sweden. It is expected to take the place of man in regulating valves automatically in industrial establishments with a precision which no human could attain.

The professors of the French Military Wireless Centre have perfected an instrument by which luminous signals can be greatly amplified and transformed from light into sound.

Rapid progress is being made with the plan to erect at Santo Domingo the largest lighthouse in the world as a memorial to Christopher Columbus.

The Lloyd Dam, or the Sukkur Barrage, at Bhatghar, India, now being built by the Government of India and known as one of the largest irrigation projects in the world, will provide water for irrigating

6,000,000 acres of land, at a cost of $50,000,000. The dam across the Indus River will be one mile long with sixty-six arched openings of sixty feet each, and is being constructed of a local limestone.

A great irrigation project involving the storage of 80,000,000 cubic feet of water has been planned on the Cauvery River in Southern India.

A great irrigation scheme for cotton-growing purposes in the Soudan is now under way. It involves an area of 300,000 acres and it is hoped ultimately, of 1,000,000 acres—the great plain lying between the White and Blue Niles. It comprises a dam at Makwa, a main canal sixty-two miles in length, 535 miles of minor canals, 3,125 miles of subsidiary canals, and 5,625 miles of field channels.

A $6,000,000 irrigation project on the Dawson River in New South Wales has been approved by the Australian Parliament.

Marconi reports great success in employing extremely short wave lengths for directional messages by radio. By their use a conversation between England and Australia cannot be heard in America or in Japan.

The American Telephone and Telegraph Company has announced a new and simple system of transmitting photographs over long distance telephone lines.

A plan for fifty miles of subways at an estimated cost of $100,000,000 has been officially approved for Tokio.

The longest railway in West Africa, the Thies-Kayes section of the Dakar-Niger line, having a total length of 810 miles, was opened on Dec. 31, 1923.

Work is being completed upon the line from Perth, Western Australia, to Cairns, North Queensland, a distance of 4,000 miles.

Work has begun on the Moffat Tunnel, through the Continental Divide, about 50 miles west of Denver.

A hydroelectric project involving an earth dam 200 feet high, 1,300 feet thick at the base and 1,250 feet across, and a reservoir with an estimated capacity of 38,000,000,000 gallons of water is now being completed in the Deerfield Valley, in Southern Vermont.

The Apulian Aqueduct, in Southern Italy, now nearing completion, has a main line 152 miles long, and 841 miles of branches.

An electric generator weighing more than 600 tons has been placed in commercial operation at Niagara Falls. It is said to be the largest in the world, its frame weighing 471,000 pounds, and the revolving element 784,000 pounds.

C. Francis Jenkins succeeded in transmitting photographs by radio from Washington to Philadelphia, and is planning an exhibit of motion pictures by radio at the Washington meeting of the American Association for the Advancement of Science in December.

GEOGRAPHY.

Arctic. The National Geographic Society commissioned Robert A. Bartlett during the summer of 1924 to gather data in the far north in preparation for future aerial explorations of the Arctic regions. He brought back valuable observations on the salinity of the water and tides, air, temperatures and wind velocities, and, in addition many specimens of the flora and fauna of far northern waters.

In October, President Coolidge announced that it is probable that one of the new dirigibles will be sent over the Arctic regions in the near future, since the information collected proves the feasibility of the undertaking.

The Arctic expedition of Donald B. MacMillan, which wintered at Etah, Greenland, reaching home, reported very satisfactory results of its work in the north. They crossed the sound to Cape Sabine, Ellesmere Land, with a dog team three times, landed the National Geographic Society's memorial tablet in commemoration of the men who perished on the Greely Arctic Expedition of 1882, made valuable observations in the vicinity of the North Magnetic Pole, and gathered interesting data on radio conditions in the Arctic.

The Danish ship, Godthaab visited the settlements in northeast Greenland during the summer of 1924 and transmitted to Tromso by wireless its meteorological reports.

Mr. Lauge Koch, noted Danish explorer who has been for many years making a study of the glacier covering interior Greenland, was in the United States recently lecturing on the geology of Greenland in american universities.

Knud Rasmussen recently emerged at Kotzebue, Alaska, from a nine months' trip across Arctic Canada during which time he was studying the Eskimos. He reports that the Greenlandic dialect was understood by Eskimos across the area, a fact which tends to prove the close kinship among all Eskimo peoples.

Capt. Roald Amundsen, noted Arctic explorer, has had to abandon his projected aerial trip to the North Pole on account of lack of funds. His vessel, the Maud, under the command of Capt. Wisting, is drifting with the ice in the Arctic Ocean, gathering data of importance. She was reported in February as being in latitude 73.13° N. and longitude 156.40° E.

A small vessel, fitted out by the Lomen Brothers of Alaska, landed on Herald Island, 40 miles to the east of Wrangell Island, on Aug. 20, 1924, and claimed it for the United States. They had hoped to rescue the small party left on Wrangell Island by Capt. Noice, who rescued the sole survivor, Ada Blackjack, of the Stefansson party.

Antarctic. L. W. Malcom of Melbourne, Australia, discovered on the Farneaux group of islands in the Antarctic a race of people who are interesting from an anthropological standpoint.

Asia. The National Geographic Society's expedition to Kansu, China, under the leadership of Frederick R. Wulsin, still at work in that area, reports having encountered curious peoples, lost tribes of early Asiatic migrations, and mentions notably blond Chinese with curly yellow hair.

The Mount Everest Expedition of 1924 reached at least a height of 28,227 feet, on East Rongbuk Glacier, the point at which George Leigh Mallory and A. C. Irvine were last seen, less than 800 feet of the top, the world's height record. Some members of the party believe that the two climbers reached the top of the mountain.

A complete scientific survey of the Red Sea and adjacent shores is being undertaken by the Italian Government in order to prepare hydrographic maps of the sea itself, showing currents, tides, etc.

Dr. H. J. Dorsett is conducting an expedition to the Provinces of Chihli and Shensi, China, for the U. S. Department of Agriculture, to study agricultural conditions and the principal crops of these areas.

North America. Exceptional interest has been aroused by the so-called white Indians of the Darien district of Panama brought back to this country by Mr. Richard O. Marsh, director of an expedition to that area. Disagreement has arisen as to the origin of these Indians and the cause of their whiteness, at least three explanations having been advanced. One is that they have a disease akin to leucodermia, another is that they are abnormal race types, and still another is that their condition has been brought about by disturbances of the secretion of one or more of the ductless glands.

Prof. Rollin T. Chamberlin's exploration party recently found and ascended eight new mountains, definitely located the hitherto unknown Cariboo Range in British Columbia, and located the headwaters of the Thompson and Canoe Rivers. They are the first white men to note the glacial sources of the two mountain streams.

The Canadian Government recently sent a party of 45 men to the upper shores of Hudson Bay to study atmospheric conditions for use in weather forecasting.

On Sept. 18, 1924, approximately 15 acres of the surface snow on Mount Shasta crashed down into Mud Creek Canyon, causing the collapse of the walls for a distance of 8 miles.

Dr. Charles D. Walcott and Mrs. Walcott continued their scientific researches on complicated geological formations in the Canadian Rocky Mountains during the past summer. As the result of their explorations last year, Illecillewaet Glacier, British Columbia, is reported to have receded 1,070 feet in the past seven years.

Panama recently ceded to the United States 22 square miles of land in the San Juan de Pequeni and El Vigia districts around the headwaters of the Chagres River. The United States expects to construct a dam across the Chagres in this neighborhood to furnish an adequate supply of water for the canal.

South America. Dr. Alexander Hamilton Rice and his wife are conducting a two-year expedition into interior South America. They hope to find and map the source of the Orinoco River and explore the regions in which the Orinoco and the Amazon are connected by the Cassiquiare.

Prof. N. E. Pearson of Indiana University recently returned from a fish-collecting expedition across the Western Andes of northern Peru. Many of his specimens were taken from the basin of the Rio Jequetepec from sea level to about 4,000 feet.

Europe. Earth currents, with particular relation to their disturbance or interruption of telegraph communications, is being intensively studied by Dr. David Stenquist of Sweden.

Dr. G. Clyde Fisher of the American Museum of Natural History has been making a tour of Lapland and northern Sweden, where Englishmen and Americans have never been.

The southern slope of the Grasberg, Oberaschau, Austria, has been in motion, portions of the forest

having migrated to the valley. The landslide covers about 100 acres, is a quarter mile broad and 50 feet deep.

Novaya Zemlya, north of Siberia, is being explored by a party under the auspices of the Leningrad Academy of Sciences, for the purpose of obtaining geological, ethnical, geographical and other data.

The Oxford University Expedition to North-East Land, Spitzbergen, carried on its work during the summer of 1924 under very adverse weather conditions. Existing charts of the islands proved very inaccurate, and unmarked land was located at several points.

A landslip accompanied by storms and torrential rain devastated the southern coast of the Sorrento Peninsula, Italy, between Amalfi and Positano, on March 26.

Africa. M. Bruneau de Laborie crossed the Libyan Desert from Lake Chad to Alexandria, by way of Borku, Tibesti, and Kufra.

Hassanein Bey, the Egyptian explorer, on his recent journey across the Libyan Desert from Solluin, on the Mediterranean, to El Fasher discovered the two hitherto unknown oases of Arkenu and Ouenat.

Two or more automobile expeditions crossed the western portion of the Sahara Desert from Colomb Bechar, the terminus of the Algerian Railway, to Burem, on the Niger, during the early part of this year.

Records left in the Libyan Desert 45 years ago by the German explorer Rohlfs have recently been brought to Cairo by the Egyptian Prince Kemal ed Din from the Libyan Desert in the vicinity of Kufra.

Interesting survey work was done by the Italian Government in the volcanic region of southern Eritrea, between Abyssinia and the Red Sea.

Mr. T. A. Barns, directing an expedition to East Africa, remote parts of the Congo Basin and northern Angola, hopes to bring back entomological specimens.

M. C. Moureu of the College de France has gone to Madagascar to make a study of the mineral waters of Antsirabe, which are said to be radioactive.

Oceanica. Extended studies of the oceans to cover a period of four or five years have been planned by the International Council for the Exploration of the Sea, at its meeting in Paris, by the Hydrographic Office, U. S. Navy Department, and other scientific bodies.

An expedition of the Cleveland Museum of Natural History is now in the South Atlantic exploring some of the least known islands of that area.

Capt. Frank Hurley penetrated 250 miles up the Fly River, in New Guinea, and reports the discovery of a new race called Sambios, who had never seen metal and did all of their boiling in stone or bamboo.

Scientific explorations of Nihoa and Laysan, 800 miles south of the Hawaiian group, and other islands in the vicinity is being undertaken by the U. S. Government.

Vilhjalmur Stefansson is exploring portions of Australia and Africa hitherto considered uninhabitable.

It was recently reported that the Japanese Navy survey ship measured a new deep in the Pacific of 32,636 feet, 145 miles southeast of Tokio, exceeding by 548 feet the trench of 32,088 feet of Mindanao.

EARTHQUAKES AND VOLCANOES.

Much agitation for the study of earthquakes, as well as urban conditions, both in this country and abroad, with a view to predicting quakes and relieving congested areas, has followed the disaster in Japan on Sept. 1, 1923. Dr. T. A. Jaggar, Director of the Hawaiian Volcano Observatory, and others are urging the building at various places in North America, of geophysical stations, such as those in Berlin, Goettingen, Strasburg and Leningrad, equipped with the most up-to-date instruments for measuring earth tremors, sounds, tilts and temperatures, and placed in charge of efficient scientists. There is an urgent need in this country particularly for better knowledge of earth law (geonomy), especially with reference to sections subject to quakes, and for seismological instruments, all of which we now buy in Germany.

Kilauea volcano in the Island of Hawaii exploded on May 18, 1924, with an eruption comparable to those of Vesuvius. The tremendous lava flows since 1920, which justified predictions of experts, caused the fire pit to collapse and plug down the accumulated gases, with the resultant explosion. Earthquakes accompanied the eruptions, those during the months of May and June being particularly violent. Two severe ones were felt on Hilo, in the Honakaa district, on Sept. 10. A tidal wave, 15 feet in height, in Kaumalapau Harbor on June 1, did much damage.

A volcano on Babuyan Island, situated between the Philippines and Japan, was reported in eruption during March and July, 1924, and the natives of San Dionisio, Batag Island, were driven from their homes by an active volcano. Earthquakes were reported from Mindanao as being continuous from Aug. 30 to Sept. 11; from Panay, on June 11; earthquakes and tidal wave from Agno, in the province of Pangasinan, on June 1; from Southeast Mindanao during April; from Northern Luzon, on April 4.

Ngauruhoe volcano on North Island, New Zealand, was reported in eruption on Jan. 9, 1924.

A severe earthquake was reported at Sydney, Australia, on June 26, 1924.

Asia—Between 300 and 400 people were reported killed and 10,000 rendered homeless in the earthquakes of Sept. 23, in the region of Erzerum, Armenia.

A small volcano which appeared ten years ago, 8 miles off the Arkan coast, in the Bay of Bengal, between Calcutta and Rangoon has disappeared into the water.

More than 5,400 lesser quakes have occurred in Japan since the disaster of the fall of 1923, some of them minor disturbances registered on seismographs and not felt by humans. In September there were 3,350 shocks; in October, 1,069; in November, 249; in December, 234; in January, 364; and numbers since that time. Perhaps the strongest after-shock occurred on Jan. 15, causing the death of 60 persons, in Tokio, Yokohama and the surrounding district. Railway communications between Tokio and Osaka were severed and 7 trains were derailed.

The Japanese Government recently issued maps showing the changes of elevation of the shores of Sagami and Tokio Bays, and in the depth of Sagami Bay since the quake, but, due to the short time which has elapsed, they show only preliminary surveys. The rise is small along the west coast of Sagami Bay, a maximum elevation 7.8 and 8.4 feet occurring in two small islands to the east of Atami. Remarkable changes, however, took place in the depth of Sagami Bay, maximum uplifts of from 96 to 135 fathoms occurring from west to east and maximum depressions of 63 fathoms. North of the bay depressions of 166 and 259 fathoms occurred.

Earthquakes at Kerman, Persia, on Sept. 27, 1923, caused considerable loss of life; quakes were reported from Southern Azerbaijan, on Nov. 1, 1923; about 300 persons were killed and over 2,000 made homeless by a severe quake in the Kerman district early in November, 1923; 400 houses were destroyed and 83 persons killed at Ura Tyube, Russian Turkestan, on Jan. 4, 1924; a violent quake was reported from Erzerum, Armenia, on May 14-16, 1924, the list of victims being given as 120; from Tashkent, Russian Turkestan, on May 27 and July 17; 40 persons were reported killed and 3,100 houses destroyed in the Province of Ferghana, on Aug. 9, 1924; 41 persons were reported killed in the Province of Semiryechensk, Asiatic Russia, on Aug. 20, 1924.

On July 19, it was reported that a new island had been formed at the entrance to the Sea of Azov as a result of an earthquake.

Russian seismographs registered extraordinarily violent earthquakes centred in the Kamchatka Peninsula, on March 12-15, at which time the volcanoes of the peninsula were unusually active.

Africa—Earth tremors were reported from the northern districts of Samburu, Kenya Colony, and from Turkana in Uganda, on Aug. 6.

South America—A sharp quake was reported from Cordoba, Argentina, on July 7. It lasted for five seconds and did minor damage. Earth shocks were felt on Jan. 28, from Talca to La Serena, Chile; at Coquimbo and Talca, on June 10; and at Valparaiso on April 14. A series of very severe earth shocks occurred along the Ecuadorean-Colombian frontier, particularly in the Department of Narino, near the towns of Ipiales and Tulcan, from Dec. 13 to Dec. 20, 1923. The villages of Cumbal, Carlsana, Aldama and Chiles were totally destroyed and damage was done at Tuquerres and Ipiales. Conservative estimates place the dead at 200 to 300 and the homeless at 20,000. After-shocks were reported from the area on Dec. 22 and 24.

Many sections of Ecuador suffered from an earthquake of considerable violence, on July 21, 1924.

North America—Mount Lassen, California, was reported in eruption on Nov. 9, 1923; for the unusual period of three hours on Dec. 27, 1923; and for an hour on April 17, 1924.

Quakes were reported from Riverside, Cal., on Oct. 4, 1923; from El Centro and Calexico and other cities in the Imperial Valley, on Nov. 5, 1923; from Calexico, on Nov. 6 and 7; from Los Angeles and nearby cities, on Nov. 8; from Quincy, Cal., on Dec. 4; from various parts of the Imperial Valley, on Jan 1-5; from Los Angeles on Jan. 3; from Eureka, on Jan. 9; from San Francisco, Stockton and Monterey, Cal., on April 3; and at Brawley, Cal., on July 18, 1924.

An earthquake of slight intensity was felt in many

parts of Maine, on Sept. 30, 1924, particularly in Aroostook County and towns along the Canadian border.

Two deaths resulted from the earthquake which struck Oputo and vicinity, in Sonora, Mexico, on Dec. 19, 1923.

Earth tremors occurred at the following places during the past year: Pendleton, Ore., Jan. 6; Seattle, Wash., April 25; at Walla Walla, Wash., Pendleton, Ore., Jan. 7; Winchester, Va., Jan. 1; Hendersonville and Saluda, N. C., Oct. 18, 1923; Cairo, Ill., and Paducah, Ky., on April 2; at Memphis, Tenn., Oct. 28, 1923, Nov. 26, 1923, Dec. 31, 1923, and April 2; Owensboro, Ky., Nov. 28, 1923; Springfield, Ill., Nov. 9, 1923.

It was reported that the Costa Rican villages of San Mateo, Naranjo, Orotina, San Ramon and Grecia were completely destroyed by earthquakes of more than 500 distinct tremors extending from March 4 to 15. More than $15,000,000 worth of Government and church property was destroyed.

The volcano Las Granadillas, in the Department of Santa Ana, Salvador, was reported active on April 23, 1924, and seismic disturbances were reported from San Salvador, on July 12. Earth shocks were reported from Mexico City and the surrounding plateau region, on April 21.

An earth shock at Port-de-Paix, Hayti, on May 27, killed three persons, injured several others, and demolished property. A slight earth shock was recorded at Kingston, Jamaica, on July 28.

Severe earth shocks were experienced on Oct. 6, 1923, in Quebec. Earth shocks occurred in the Aleutian Islands, on April 14; the inhabitants of Belkofsky, Alaska, and vicinity reported a severe earthquake on Jan. 15, 1924; Pavlof volcano was in eruption on Jan. 17, 1924.

Europe—A severe earthquake was felt on the night of April 4 in the border districts of Nottinghamshire and Derbyshire England, the disturbance area being about 20 miles long, 12 miles wide. Subsequent shocks in the same area were reported on April 19, 20 and 21. Slight shocks were reported from Hereford, on Jan. 26, from South Devon on Dec. 25; from Pontypridd, Wales, on July 22; from Inverness County, Scotland, on Aug. 22.

A violent explosion occurred in the crater of the volcano of Stromboli, on March 28, 1924. Quakes were reported from Italy on the following dates: From Avellino, Nov. 8, 1923; Ceprano, Dec. 1, 1923; Ancona, Rimini and Macerata, Jan. 2-7; Orvieto, Province of Perugia, April 10; Milan, April 15; Pievepelago, Pavullo and other places near Bologna, May 20. A scientific expedition under Prof. Filippo Eredia has been making interesting meteorological and geophysical observations of Mt. Etna. Vesuvius was reported in eruption early in June.

Great damage was done along the French coast, from Brittany to the Basque region, on Jan. 9, by a series of tidal floods.

Earthquakes were reported from Spain on the following dates: From Padrello and Villareal, Oct. 23, 1923; Sitjes, Tremp, Gandesa, Nov. 7, 1923; the French-Spanish border, Nov. 19, 1923; Algaida and Villanueva, near Malaga, Jan. 18; Monachil, April 4; Carcagente, July 27.

Other quakes were reported from Iceland on Aug. 26; and from Munich, on May 12.

GEOLOGY.

Oil-bearing shale was discovered in January, 1924, in West Somerset, England. It covers a large area, has a mining surface of 600 or 700 feet, and is said to be of high quality.

Extensive potash deposits have been discovered near Klein Kihren, Hanover, Germany.

William T. Foran, directing a party of the United States Geological Survey, landed at Wainwright, Alaska, in July and made their way up the Kuk River, thence overland a distance of several hundred miles to the headwaters of the Noatak River, over the De Long Mountains and back to Kotzebue, with the object of mapping and charting this hitherto unmapped region.

A United States Geological Survey party under Dr. Philip S. Smith explored the Naval Petroleum Reserve No. 4 in the Colville River region of Northern Alaska during the summer of 1924.

By tracing more than a hundred diamonds found in a glacial drift in Ohio, Indiana, Michigan, and Wisconsin, Dr. George F. Kunz has succeeded in outlining the route of the glacier which carried them from Canada and in indicating the area of the mines in Canada.

An oil well, said to pour out 600,000 pounds of oil daily, has been reported from Hanover, Germany.

Drillings in the oil fields near Maracaibo, Venezuela, recently have been increased and one company has reached the producing stage.

A gas well, flowing 4,000,000 feet a day, has been reported from Mount Morris, Pa.

Geological investigation of the Deep River coal field in North Carolina recently revealed that there are 68,000,000 tons of recoverable coal in about 25 square miles of that region.

Dr. Samuel C. Gordon of the Academy of Natural Sciences of Philadelphia recently brought from Greenland specimens of minerals believed to be more than 50,000,000 years old.

Dr. Roy Miner collected at Andros, Bahama Islands, 40 tons of coral for the construction of a coral reef to be installed at the American Museum of Natural History.

Rich radium deposits have been found in Czechoslovakia.

A large deposit of soapstone has been found on Trap Lake in the Kenora District of Canada, more than 1,000,000 cubic feet of the material being above water level.

Valuable deposits of iridium are reported to have been discovered on the upper waters of the Peace River, Canada.

Investigations of fossil deposits in Trabuco Canyon, near Los Angeles, California, have led scientists to believe that much of California was at the bottom of the ocean not more than 8,000,000 years ago.

Valuable diamond mines have been found at Cuyuni, Venezuela.

LABRADOR CURRENT LOST?

The west coast of Greenland is always less icy than the east coast, where the supply ship for the American world flyers had difficulty in August, 1924, in penetrating the ice floes. But Western Greenland was even freer from ice that year, for the great Labrador Current seems to have gotten lost or at least to have been greatly slowed up.

Product of vast melting ice fields, the Labrador Current, constant as the seasons for uncounted years, has swept down from snowbound Baffin and Hudson Bays, through Davis Strait between Newfoundland and Greenland. Most of it drifted over the Grand Banks, one of the world's greatest fishing grounds, slipping over the bank's edge near the ocean-liner path, either mingling with the Gulf Stream or sliding under it, seeping down toward the Equator along the ocean bottom.

A small offshoot flowed through Belle Isle Straits between Newfoundland and the tip of Labrador and joining the St. Lawrence, hugged the Nova Scotian and east Atlantic shores, only completely fusing with the mighty Gulf Stream off the Carolinas.

This "Cabot Stream" gave New England the same climatic temperatures as the British Isles, although Edinburgh, for example, is as much nearer the North Pole than New York, as New York is north of Havana, Cuba.

Certain scientists planned a great dike across Belle Isle Straits, diverting the chill waters to mid-ocean. Others proposed stretching a great cable over the Grand Banks to cause a sandbar which was expected to confine the Arctic outflow to a deep depression near Greenland where it could flow under the Gulf Stream without cooling it and on into the Sargasso Sea.

Now nature seems to be putting these dreams to the test! Ebb of the Labrador Current has left the great reservoir of the Grand Banks water from six to seven degrees warmer than normal.

Coast Guard men searching for the lost Labrador Current suggested two possibilities. The underwater ridge between Greenland and North America may have been thrown up by earthquake action, forcing the melting Arctic waters out past Spitzbergen or through the Bering Sea.

Temperature is but one strand of the net of contemporary climate which may be torn in the Labrador Current accident. The mid-Atlantic Ocean current junction has supposedly given rise to a permanent low pressure spot near Iceland. With the junction vanished, the "low," which guides storms to Europe, might be displaced and send the storms which sweep across America to a different European port. If the storms which track across Denmark and through Russia should by any chance be wiped out, catastrophies even greater than the Volga famine might occur.

How the matter is to turn out will be indicated by whether the ocean on the Grand Banks stays green or turns blue. Scientists have determined that plankton, minute life in sea water necessary for fish, thrive in the Labrador Current and give it a characteristic green color.

How much the Gulf Stream can replace the Labrador Current is another puzzler for scientists, because, impelled by the prevailing west wind and slipping under the rotating earth, it tends to drift toward Europe.

HISTORY OF WIRELESS TELEGRAPHY AND TELEPHONY.

(Prepared for THE WORLD ALMANAC by the American Telephone and Telegraph Co.)

Wireless telegraphy may be said to trace its descent directly from the theoretical work of J. C. Maxwell, who in 1865, as a result of his researches in mathematical physics, was led to make the prediction that visible light consists of electric waves in the ether. For years the importance of Maxwell's prediction was unrecognized because it lay undissociated from the complicated mathematical reasoning by which he had arrived at it. It was not until 1887 that interest was really aroused in the subject when Heinrich Hertz gave an experimental proof of the truth of Maxwell's prediction. Hertz showed that the ether of space would transmit electric waves, and he showed how these waves might be produced and detected.

In 1890 the remarkable fact was noted by Branly that metal filings when loosely packed in a small glass tube normally formed a very poor conductor of electricity but that they became a good conductor under the influence of a nearby electric spark, the action of the spark apparently being to weld the metal grains lightly together. Branly's device received the name *coherer* and it was found to be a much more sensitive means of detecting electric waves than the device which Hertz had used.

Between the years 1894 and 1896 Marconi initiated his experiments which were destined to become famous, first devoting himself to improvements in the coherer. He adopted an idea originating with Popoff of using an electro-magnetic buzzer to decohere the coherer between signals and also found that the coherer when placed between an earth connection and a wire running to a large metal screen supported in the air became a very sensitive detector of electric waves. At about the same time Marconi modified the original oscillator of Hertz by connecting one terminal of the spark gap to the earth and the other to a large aerial conductor. By this means, which constitutes the first use of what is now known as antenna, he was able to greatly increase the efficiency and amount of energy radiated from the oscillator.

Marconi tried out his developments in the field of space telegraphy in England in 1896 and by 1898 had succeeded in telegraphing a distance of 14½ miles. During the same year his apparatus was applied to a lightship and communication successfully established over a short stretch of water. By 1901 he had telegraphed from Cornwall to the Isle of Wight, a distance of 200 miles. At about this time he developed an oscillation transformer by means of which the coherer was inductively coupled to the receiving antenna.

INDUCTIVE COUPLING

In the use of inductive coupling, Marconi was anticipated by Sir Oliver Lodge, who devised a wireless telegraph system in which such coupling was used and in which the natural period of the antenna circuit was made equal to the period of the oscillating circuit. Lodge's antenna was not earth connected like Marconi's but consisted of an upper and lower conducting surface, an arrangement which is coming into quite general use in recent years and is known as an antenna with counterpoise. Patents on inductive coupling and tuning were also taken out by Marconi, Arco and Slaby, Braun, Stone, and others. By the use of an auxiliary oscillating circuit, the capacity of which could be made much larger than the capacity of the antenna, means were provided for greatly increasing the amount of energy radiated as well as sharpening the frequency of radiation. In 1900 both Arco and Slaby and Marconi showed that two messages could be simultaneously received on different wave lengths by one antenna.

The next important development in spark sets came in 1908 with the invention by Wien of the quenched spark. The use of the quenched spark narrowed materially the band of wave lengths radiated from a transmitting station and made sharper tuning possible.

In 1902 Castelli, an officer in the Italian Navy, invented the first self-restoring coherer. This permitted the use of the ordinary telephone receiver as a receiving instrument and thereby very greatly improved the sensitiveness of the receiving set. Shortly afterward the magnetic and electrolytic detectors were developed, but while they were self-restoring they were never generally used because the crustal detectors, introduced in 1906 as a result of the work of Dunwoody and Picard in America, proved far more satisfactory in practically every respect.

DEVELOPMENT OF THE ARC.

In 1903, Poulson, of Denmark, developed a form of arc which was characterized by a hydrogen atmosphere surrounding the electrodes and a transverse magnetic electric field between the electrodes, the field being formed by solenoids through which the current feeding the arc flows. The Poulsen arc proved a very satisfactory generator of oscillating currents up to frequencies of 20,000 to 30,000 and as subsequently developed is used in many of the largest radio telegraph stations throughout the world. Arcs have recently been built, as for the Lafayette Station in France, which are capable of delivering several hundred k. w. to an antenna.

The development of the arc, because it supplied a source of continuous waves, held certain promise of making radio telephony practicable, but until the advent of the vacuum tube no satisfactory means was found of effecting the necessary modulation with speech frequencies.

Another form of continuous wave generator which has received much attention is the high frequency alternator. The names best known in this field are those of Goldschmidt and Alexanderson. In recent years the Alexanderson type of alternator has been the object of important developments by the General Electric Company and is being used extensively by the Radio Corporation of America in its large telegraph stations.

Briefly, the importance of continuous wave radio telegraph lies in the fact that it makes possible the use of larger amounts of power than the spark and it permits the generation of narrower bands of waves, thus tending to reduce interference between simultaneous messages. It also led to the introduction of heterodyne reception, by Fessenden about 1905.

THE VACUUM TUBE.

Within the past few years the vacuum tube or thermionic amplifier has become one of the most important types of generator for continuous waves. It was introduced in 1906 by De Forest as a detector and amplifier of electric waves and although it proved under favorable conditions, to be extremely sensitive in these capacities it was not entirely reliable. The vacuum tube or "audion," as made by De Forest, contained an appreciable amount of residual gas within the evacuated bulb which proved to be largely responsible for its uncertain behavior. Because it gave promise of containing the germ of a sensitive electric amplifier, the Bell Telephone System became interested in developing it, beginning 1912, as a means of attaining transcontinental telephony. The telephone engineers undertook a thorough study of its electrical characteristics and applied means for thoroughly exhausting the gas. The resulting tubes acted so satisfactorily as telephone repeaters that the development of much larger power tubes was immediately undertaken with the object of applying them to radio telephony.

These developments produced vacuum tubes which were used successfully as continuous wave generators and speech modulators and led, in the year 1915, to a successful trial of transoceanic radio-telephony. The development of a vacuum tube in very large sizes is still in its infancy, but is already taking its place beside the arc and alternator for the handling of very large amounts of energy, both for radio telegraphy and telephony.

The use of the vacuum tube detector and amplifier for receiving purposes, by making possible the detection of very faint signals, is at present giving rise to extensive use of the loop antenna for directive reception, and this in turn is leading to the erection of many radio compass stations and radio beacons for the supplying of ships' bearings to navigators at sea.

The vacuum tube has also been generally responsible for the rapid development during the past few years of radio-telephony for ship-to-shore communication, for military purposes—especially for guiding aircraft—and for radio broadcasting.

ANTENNA DEVELOPMENT.

In the last few years increased attention has been devoted to antenna design, and two types of noteworthy merit, one for transmitting purposes and one for receiving, have been developed. These are commonly known as the multiple tuned antenna and the wave antenna, respectively.

The multiple tuned antenna provides several parallel paths to ground, thereby lowering the resistance offered to the ground currents and raising the radiating efficiency. The increase in efficiency under favorable conditions may be several times.

The wave antenna now coming into use for receiving purposes partakes of the nature of a telephone or telegraph transmission line. The length usually runs between one and two wave lengths of the signals being received.

The antenna is terminated to ground at the end nearest the transmitting station by a characteristic

impedance, and is terminated at the other end by the receiving set whose input impedance is made identical with the characteristic impedance of the antenna.

The advantage of a wave antenna lies in its directive property, being highly selective for signals coming head on. It therefore tends to increase the signal-to-interference and signal-to-static ratios.

BROADCASTING.

The outstanding popular development in radio is the broadcasting of music and other entertainment from radio telephone stations. Broadcasting is a most natural use for radio in that radio waves spread out in all directions.

Stations have been installed in most of the large cities of the country and are transmitting regular programs of music, speeches, etc.

In 1922 the wire lines were first used as an adjunct to broadcasting, thereby adding events to broadcasting programs which may take place many miles from the station.

Typical illustrations are the broadcasting of a wide variety of musical and sporting events and addresses by prominent speakers. The distance over which the long distance telephone lines have been employed for the transmission of programs, and the number of radio stations to which these programs have been transmitted simultaneously has ushered in what is known as nation-wide broadcasting.

As a typical broadcast of this sort, reference may be made to a recent address of Mr. J. J. Carty before the Bond Club of Chicago. On this occasion, twenty radio stations extending all the way from Havana to San Francisco by way of New York, were connected together by long distance telephone lines and all received the program, part of which originated at each of some 12 telephone stations located along the route.

Similar nation-wide broadcasting also had a conspicuous part in the 1924 Presidential campaign.

Many speeches were broadcast. On Nov. 3, for President Coolidge's speech, 27 stations from coast to coast were hooked up, the greatest on record; and for John W. Davis's speech, 14, stretching from the Atlantic seaboard to the Middle West and into the South.

More than 10,000,000 radio "fans" received Election returns on the night of Nov. 4, one broadcasting station with its "hook-ups" alone reaching 6,000,000; and 28 newspapers put their news on the air for the benefit of their communities.

Public interest in broadcasting is attracting much attention to the subject of radio receiving sets. One of the most meritorious designs from many points of view is the superheterodyne or double-detection set.

Essentially, this set involves the use of a local oscillator of a frequency some 50,000 cycles different from that of the incoming signals, so that after passing through an initial detector there is obtained an intermediate frequency of 50,000 cycles carrying the signal side bands. This is amplified, then passed through another detector, the output of which contains the desired audio frequencies and these may again be amplified, if desired.

Such sets possess marked stability, owing to the fact that their selectivity and amplification can be varied quite independently of one another.

In spite of the fact that great attention is now being given to receiving sets, and great numbers of the radio audience are interested in reception over as great distances as possible, it seems likely that this is a passing phase in the progress of broadcasting.

As programs steadily improve in quality a demand will naturally arise for increased accuracy of reception, along with decreased interference from other radio signals and static. This demand will probably result in the use of broadcasting stations of greater power, and receiving sets designed not for sensitivity but for high selectivity and high quality of reproduction.

The broadcasting stations in the United States, which daily and nightly send out music, lectures, news and other entertainment, on September 1, 1924, numbered 537; of which California had 44, Illinois, 29; New York, 28; Ohio, 32; Pennsylvania, 35; and Texas 29. According to Government classification these stations are divided as follows: Class "A," 389; Class "B," 56; Class "C," 90; and Class "D," 2.

It is estimated that there are about 3,700,000 radio receiving sets, costing an average of $60 each without tubes and batteries, in operation, representing a total investment of approximately $222,000,000.

OTHER RECENT DEVELOPMENTS.

1921-24—During this period announcements were made of notable developments in facilities for extending the wire telephone service of a land system to ships at sea by means of radio. This permits of two-way conversation exactly as carried on in ordinary telephone practice.

On January 15, 1923, an important demonstration of trans-Atlantic radio telephony was given when officials of the American Telephone and Telegraph Company talked to an assemblage of sixty people located in London. The radio apparatus and system used during this test was made possible by co-operation between the American Telephone and Telegraph Company and the Radio Corporation of America.

Messages were continued without interruption for about two hours. The necessary high power for this work was made available economically by the development of a vacuum tube in which the plate element or anode can be cooled by direct contact with circulating water. These new tubes are capable of generating from 20 to 200 times as much power as hitherto possible.

A method of single side band transmission was employed whereby greatly increased efficiency is secured and also more speech channels become available in any given wave length band.

One of the most recent announcements in regard to transatlantic radio telephony was that by the British Post Office, that they would erect a radio telephone transmitting station similar to the one now operating on this side of the ocean. When this British station is in operation, it will permit of two-way conversation across the Atlantic, and will increase the rate at which the investigations can go on that must underlie the institution of commercial service.

Some very interesting and promising experiments with short waves have been carried out, particularly by the Westinghouse Company and the General Electric Company in this country; and by the Marconi Company in England, the latter company having investigated the possibility of directing short waves in the form of beams. The results show that under favorable conditions at least, waves of no greater than 100 metres length can be used for transmission over great distances. However, the transmission varies greatly with the time of day and because of changes in atmospheric conditions and it is too early to determine to what extent these variations will limit the practical application of short waves.

WIRELESS AND RADIO CHRONOLOGY.

Following are a few of the more important dates relating to the application of the radio-telegraph and telephone to commercial and other uses, notably military and broadcasting:

1901—Marconi first succeeded in telegraphing certain signals across the Atlantic and in 1903 a complete message was sent.

1904—A regular telegraph service to handle press news and private messages was begun from Poldhu and Cape Breton to Atlantic liners. This led to the publication of small daily newspapers on board many of the trans-Atlantic steamships.

1906—The use of radio-telegraphy by steamships had so demonstrated its value as a means of increasing the safety of travel at sea that an International Radio Convention was called in Berlin to consider the desirability of establishing certain uniform international practices. The articles of this convention, which dealt largely with the international use of the radio telegraph, particularly as concerned its use by ships at sea, were subscribed to by practically all nations.

1907—Press despatches were being handled by radio-telegraphy across the Atlantic.

1909—Collision between the steamships Republic and Florida occurred, and by summoning aid the radio-telegraph was instrumental in saving the lives of all on board. The first wireless shipping report was published at Lloyd's in 1910.

1912—The second International Radio-Telegraph Convention was signed at London; like the first one signed at Berlin it had to do especially with safety at sea.

1915—Experimental transoceanic telephony was first achieved, speech being transmitted by the Bell Telephone System engineers from Washington, D. C., to Paris and to Honolulu, the latter distance being nearly 5,000 miles. During the demonstration a telephone message was sent by wire from New York to Washington and then radiated from Washington to San Francisco, thus establishing the radio-telephone as a supplement to the wire system. It is this possibility which must lie at the heart of all successful ship-to-shore and transoceanic telephone systems.

1914-19—During the World War the value of the radio-telegraph and telephone for many military and naval purposes was thoroughly established. The wireless telephone proved particularly useful as a means of directing aircraft.

1920—Following the close of the war, the development of the radio art in the United States was in danger of being seriously retarded because of the diversified ownership of essential patents. At the suggestion of the United States Govern-

ment, the leading holders of these patents, namely the American Telephone & Telegraph Company, the General Electric Company, the Radio Corporation of America and the Westinghouse Electric and Manufacturing Company entered into a cross-licensing agreement permitting each company to avail itself of the patents of the others in its particular fields.

SECRETARY HOOVER ON RADIO PROBLEMS.

Secretary of Commerce, Herbert Hoover, in an address at Washington, Oct. 7, 1924, at the Third National Radio Conference, estimated the sales of radio apparatus at $1,000,000 a day, with 200,000 men employed in the industry, and a radio audience of 20,000,000 persons.

"Radio activities" he said, "so long as they remain within the legislative restriction which holds for the Government the fundamental control of the ether, are largely free. The industry's future conduct with a single view to public interest, a voluntary imposition of its own rules and a high sense of service would go far to make further new legislative or administrative intervention unnecessary.' The Secretary held that the local stations must be able to deliver every important national event with regularity; be able to bring to its listeners the greatest music and entertainment of the nation; and be able to deliver important pronouncements of public men.

"This can only be accomplished," he said, "by regularly organized interconnection on a national basis with nationally organized and directed programs for some part of the day in supplement to more local material. I do not believe," he added, "there is any practical method of payment from the receivers. I believe the quickest way to kill broadcasting would be to use it for direct advertising."

Development in the United States during the last twelve years may be shown thus:

	1912.	1924.
American ships equipped with radio..	485	2,723
Land stations	123	790
Transoceanic stations	1	12
Amateur stations	1,224	16,590
Broadcasting stations	0	537

EXISTING RADIO LEGISLATION.

The first Radio Communications Act was approved June 24, 1910. This act was superseded by the Radio Communications Act of Aug. 13, 1912, which still remains the basic legislation on this subject. This act asserts the jurisdiction of the Government over radio communication between the States and with foreign countries. It gives the Secretary of Commerce authority to classify and license radio stations, to assign bands of wave lengths and to prescribe regulations applicable to all licensed stations. While many of the provisions of the existing law are obsolete, the provision for licensing, and the policy of the Secretary of Commerce in granting licenses for three-month periods only, have prevented any corporation from securing a vested right in any wave length or band of wave lengths, thus safeguarding against this form of possible monopoly.

The broadcasting at present carried on in the United States is estimated to cost the owners of broadcasting stations in the neighborhood of $5,000,000 a year. A direct return on the service given by statements owned by manufacturers of radio apparatus is received in the form of increased sales of radio apparatus. The only return received by newspapers, department stores, and other owners of broadcasting stations, outside the radio industry, is incidental advertising. The American Telephone and Telegraph Company obtains some revenue from the sale of advertising time through its New York station, WEAF.

The Radio Corporation of America has a virtual monopoly of transoceanic communication, with high powered stations at New Brunswick, N. J., Belmar, N. J., Marion, Mass., Chatham, Mass., Bolinas, Cal., Marshall, Cal., Kahuku, Hawaii, and Kokohead, Hawaii. It has also taken over the German station at Sayville, Long Island, and the French station at Tuckerton, N. J. It has additional stations at Rocky Point and Riverhead, L. I.

These comprise all the high power stations in the United States except those owned by the Government. It has in operation communication circuits with Great Britain, Norway, France, Germany, Poland, Italy and Japan. Direct communication with Sweden and the Argentine is expected soon, and later with China, the Netherlands and South and Central American countries generally. It handled 30 per cent. of the entire volume of cable and radio messages between the United States and European countries from its Atlantic Coast stations and 50 per cent. of the volume of messages between the Pacific Coast and the Far East from its Pacific Coast stations. The number of paid words transmitted was 7,000,000 in 1920, 18,000,000 in 1921, and 23,000,000 in 1922.

The United States Lighthouse Service now has twelve radio fog-signal stations in operation, with three lightships equipped for relief, and is proceeding with the establishment of other stations. This aid to navigation has met with great favor with mariners, as evidenced by the demand for additional installations, and the equipment of vessels with radio compasses. The United States was the first to establish successful radio fog signals and now has more stations in operation than all the countries of Europe combined. Canada has also made important progress in radio aids to navigation.

RADIO BROADCASTING ABROAD.

In the early stages of the radio's development, the transmission of messages through the ether was declared by the British Parliament to be a matter of communication falling under the jurisdiction of the British Post Office. All development of broadcasting has been under the observation of the postal authorities and subject to their control. With the development of the radio the British Government permitted the formation of a Government corporation, the British Broadcasting Company, to which was granted the exclusive right to operate broadcasting stations at various points in the British Islands.

For the support of this corporation fees are collected upon the sale of every piece of radio apparatus and for every outside aerial. These fees bring in large sums annually, which are expended in providing programs. The corporation maintains a large symphony orchestra, and salaried tellers of children's stories, who are known among the children as "uncles". No commercial propaganda or advertising is broadcasted in Great Britain.

Enthusiasm for radio-telephony is growing throughout Great Britain. Up to March 1, 1924, over 600,000 licenses for receiving sets had been issued. It was estimated that over 2,000,000 persons were listening in daily at a cost of one farthing each.

In Great Britain, France, Germany, Sweden, Switzerland, Holland, Belgium, Denmark and Czechoslovakia the broadcasting of programs of entertainment and news is on a rather regular basis, while in Italy, Finland, Spain and Austria, programs are sent out at irregular periods with a likelihood of regular schedules being adopted soon.

In South America, Argentina has made the greatest progress in the dissemination of music and other entertainment by radio, and Chile also maintains regular broadcasting service.

Australia and New Zealand have each displayed much interest in radio broadcasting and some is provided in India and Ceylon. In Japan, adequate legislation has been enacted making provision for the establishment of broadcasting stations, but little progress has taken place.

In no foreign country is the use of radio receiving sets as free and unrestricted as in the United States. Even in Canada users of receiving sets must pay a nominal license fee therefor, while in some countries the restrictions imposed and the license fees assessed are onerous.

LEGION OF HONOR IN THE UNITED STATES.

The organization of an American Society of the French Legion of Honor, Inc., has been completed at New York City. The objects of the society are:

"To provide a social and fraternal medium by which members of the French Order of the Legion of Honor who are resident in the United States may co-operate in taking such action from time to time as shall seem to them likely to promote and uphold the traditions, prestige and standard of the order."

The officers (Nov., 1924) are:

President of Honor—J. J. Jusserand.

President—Myron T. Herrick.

Vice Presidents—Cass Gilbert, William Nelson Cromwell, William D. Guthrie, John Grier Hibben, Henry T. Mayo, John F. O'Ryan, George W. Wickersham.

Secretary and Treasurer—W. Francklyn Paris, New York City.

The directors include William W. Atterbury, James M. Beck, Frederic R. Coudert, William H. Crocker, Frederick Cunliffe-Owen, Chauncey M. Depew, Henry Van Dyke, John H. Finley, James W. Gerard, George W. Goethals, Bishop William T. Manning, Frank D. Pavey, Pierre S. du Pont, Edward R. Stettinius and Samuel M. Vauclain.

Aviation Progress and Records in 1924.

Complete conquest of the air was brought nearer from various aeronautical angles during the year 1924 and in this advance American aviators and machines played a prominent part.

A round-the-world flight, almost the last unaccomplished feat in aviation at the close of 1924, was successfully completed in 365 hours flying time by United States Army Air Service planes.

The Shenandoah, an American constructed rigid dirigible made a transcontinental trip from the Atlantic to the Pacific Coast and return in 235 air hours.

The ZR-3, the mammoth dirigible constructed in Germany at the Zeppelin works, under the treaty provisions, for the United States Government, flew across the Atlantic and was delivered in perfect condition after a flight of 81 hours.

The Pulitzer Trophy and the Schneider Cup, emblematic of world speed race championships for airplanes and seaplanes respectively were retained by the United States entrants in 1924 races.

The American continent was spanned between dawn and dusk by a United States Air Service aviator who flew from New York to San Francisco in 17 hrs., 52 m. flying time and 21 hrs., 44 m., including six stops.

The development of mail air service as well as passenger and commercial airplane service continued. New records in distance, weight lifting and controlled direction were established with helicopters, while the development of gliders and light planes disclosed encouraging progress.

Predictions have been made by some of the leading scientists and aeronautical authorities that the synchronizing of knowledge being gained almost daily in aviation experiments, tests and feats will within a comparatively short space of years place the airplane upon a basis of safety, speed and general utility which will enable it to take its place with the greatest developments of the twentieth century.

The notable aviation records and performances of 1924 are printed herewith.

OFFICIAL AERONAUTIC WORLD RECORDS.

These world records have been recognized by the International Aeronautic Federation and are corrected to Nov. 15, 1924.

Translated and compiled by the Contest Committee of the National Aeronautic Association of U. S. A.

CLASS A—(SPHERICAL BALLOONS).

1st Category (600 cubic metres).

Duration—(France), M. Ernest Demuyter, May 17, 1924, 20 hr. 37 min.

Distance—(France), Georges Cormier, July 1, 1922, 804.173 kilometres, 499.69 miles.

Altitude—No record.

2nd Category (601-900 cubic metres).

Duration—(France), Jules Dubois, May 14-15, 1922, 23 hr. 28 min.

Distance—(France), Georges Cormier, July 1, 1922, 804.173 kilometres, 499.69 miles.

Altitude—No record.

3d Category (901-1,200 cubic metres).

Duration—(France), Jules Dubois, May 14-15, 1922, 23 hr. 28 min.

Distance—(France), Georges Cormier, July 1, 1922, 804.173 kilometres, 499.69 miles.

Altitude—No record.

4th to 8th Categories, inclusive.

Duration—(Germany), H. Kaulen, Dec. 13-17, 1913, 87 hrs.

Distance—(Germany), Berliner, Feb. 8-10, 1914, 3,052.7 kilometres, 1,896.9 miles.

Altitude—(Germany), Suring and Berson, June 30, 1901, 10,800 metres, 35,424 feet.

CLASS B—(DIRIGIBLES).

Returning to point of departure.

Duration—(Italy), Castracane and Castruccio, P-5, June 25, 1913, 15 hrs.

Distance—(Italy), Castracane and Castruccio, P-5, July 30, 1913, 810 kilometres, 503.3 miles.

Altitude—(France), Cohen, at Conte, June 18, 1912, 3,080 metres, 10,102 feet.

Maximum Speed—(Italy), Castracane and Castruccio, P-5, July 30, 1913, 64.8 K. P. H., 40.26 M. P. H.

Speed—100, 200, 300 kilometres, etc. No record.

CLASS C—(AIRPLANES).

Returning to point of departure without refueling.

Duration—(France), Coupet and Drouhin, Farman Goliath, Farman 450 H. P., at Toussus, July 16-17, 1924, 37 hr. 59 min. 10 sec.

Distance—(United States), Lieuts. Kelly and Macready, U. S. Army T-2, Liberty 375 H. P., at Wilbur Wright Field, Dayton, Ohio, April 16-17, 1923, 4,050 kilometres, 2,516.55 miles.

Altitude—(France), Sadi Lecointe, Nieuport Delage, Hispano 300 H. P., at Issy-les-Moullineaux, France, Oct. 30, 1923, 11,145 metres, 36,555 feet.

Airline Without Landing.

Distance—No record.

CLASS C—(SPEED).

Maximum Speed—(United States), Lieut. A. J. Williams, U. S. N., Curtiss Racer R-201, Curtiss D-12a, 500 H. P., at Mitchel Field, Mineola, L. I., Nov. 4, 1923, 429.025 K. P. H., 266.50 M. P. H.

Returning to point of departure without refueling.

100 Km. (62.14 miles)—(United States), Lieut. A. J. Williams, U. S. N., Curtiss Racer R-201, Curtiss D-12a, 500 H. P., at St. Louis, Mo., Oct. 6, 1923, 392.379 K. P. H., 243.81 M. P. H.

200 Km. (124.27 miles)—(United States), Lieut. A. J. Williams, U. S. N., Curtiss Racer R-201, Curtiss D-12a, 500 H. P., at St. Louis, Mo., Oct. 6, 1923, 392.154 K. P. H., 243.67 M. P. H.

500 Km. (310.688 miles)—(United States), Lieut. Alex Pearson, U. S. A., Verville Sperry R-3, Wright 350 H. P., at Wilbur Wright Field, Dayton, Ohio, March 29, 1923, 270.06 K. P. H., 167.80 M. P. H.

1,000 Km. (621.37 miles)—(United States) Lieut. Harold R. Harris, U. S. A., and Ralph Lockwood, DH-4B, Liberty 400 H. P., at Wilbur Wright Field, Dayton, Ohio, March 29, 1923, 205.06 K. P. H., 127.42 M. P. H.

1,500 Km. (932.05 miles)—(United States), Lieut. Harold R. Harris, U. S. A., DH-4B, Liberty 375 H. P., at Wilbur Wright Field, Dayton, Ohio, April 17, 1923, 184.03 K. P. H., 114.35 M. P. H.

2,000 Km. (1,242.74 miles)—(United States), Lieut. Harold R. Harris, U. S. A., DH-4B, Liberty 375 H. P., at Wilbur Wright Field, Dayton, Ohio, April 17, 1923, 183.83 K. P. H., 114.22 M. P. H.

2,500 Km. (1,553.42 miles)—(United States) Lieuts. Kelly and Macready, Army T-2, Liberty 375 H. P., at Wilbur Wright Field, Dayton, Ohio, April 16-17, 1923, 115.60 K. P. H., 71.83 M. P. H.

3,000 Km. (United States), Lieuts. Kelly and Macready, Army T-2, Liberty 375 H. P., at Wilbur Wright Field, Dayton, Ohio, April 16-17, 1923, 115.27 K. P. H., 71.62 M. P. H.

3,500 Km. (2,174.79 miles)—(United States), Lieuts. Kelly and Macready, Army T-2, Liberty 375 H. P., at Wilbur Wright Field, Dayton, Ohio, April 16-17, 1923, 114.82 K. P. H., 71.34 M. P. H.

4,000 Km. (2,485.48 miles)—(United States), Lieuts. Kelly and Macready, Army T-2, Liberty 375 H. P., at Wilbur Wright Field, Dayton, Ohio, April 16-17, 1923, 113.93 K. P. H., 70.79 M. P. H.

CLASS C—WITH USEFUL LOAD OF 250 KILOGRAMS (551.15 LBS.)

Returning to point of departure.

Duration—(United States), Lieut. Harold R. Harris, U. S. A. S., Douglas DT-2, Liberty 400 H. P., at Wilbur Wright Field, Dayton, Ohio, June 28, 1924, 9 hr. 11 min. 53.4 sec.

Distance—(United States), Lieut. Harold R. Harris, U. S. A. S., Douglas DT-2, Liberty 400 H. P., at Wilbur Wright Field, Dayton, Ohio, June 28, 1924, 950 kilometres, 590.3 miles.

Altitude—(United States), Lieut. H. R. Harris, U. S. A., TP-1, Liberty 400 H. P. (supercharged), at McCook Field, Dayton, Ohio, March 27, 1924, 8,980 metres, 29,462 feet.

Speed, 100 km. (62.14 miles)—(United States), R. Lockwood, Army CO-5, Liberty 400 H. P., at Wilbur Wright Field, Dayton, Ohio, June 28, 1924, 180.805 K. P. H., 112.346 M. P. H.

Speed, 200 km. (124.27 miles)—(United States), R. Lockwood, Army CO-5, Liberty 400 H. P., at Wilbur Wright Field, Dayton, Ohio, June 28, 1924, 180.805 K. P. H., 112.346 M. P. H.

Speed, 500 km. (310.69 miles)—(United States), Louis G. Meister, Martin Bomber, MB-2, 2 Liberty, 400 H. P., at Wilbur Wright Field, Dayton, Ohio, June 28, 1924, 120.55 K. P. H., 74.86 M. P. H.

CLASS C—WITH USEFUL LOAD OF 500 KILOGRAMS (1,102.31 LBS.)

Returning to point of departure.

Duration—(United States), Lieut. H. R. Harris, U. S. A. S., Douglas DT-2, Liberty 400 H. P., at Wilbur Wright Field, Dayton, Ohio, June 28, 1924, 9 hr. 11 min. 53.4 sec.

Distance—(United States), Lieut. H. R. Harris, U. S. A. S., Douglas DT-2, Liberty 400 H. P., at Wilbur Wright Field, Dayton, Ohio, June 28, 1924, 950 kilometres, 590.3 miles.

Altitude—(United States). Lieut. H. R. Harris, U. S. A. S., U. S. Army TP-1, Liberty 400 H. P., at McCook Field, Dayton, Ohio, May 21, 1924, 8,578 metres, 28,143 feet.

Speed, 100 km. (62.14 miles)—(United States), R. Lockwood, Army CO-5, Liberty 400 H. P., at Wilbur Wright Field, Dayton, Ohio, June 28, 1924, 180.805 K. P. H., 112.346 M. P. H.

Speed, 200 km. (124.27 miles)—(United States), R. Lockwood, Army CO-5, Liberty 400 H. P., at Wilbur Wright Field, Dayton, Ohio, June 28, 1924, 180.805 K. P. H., 112.346 M. P. H.

Speed, 500 km. (310.69 miles)—(United States), Louis G. Meister, Martin Bomber, MB-2, 2 Liberty 400 H. P., at Wilbur Wright Field, Dayton, Ohio, June 28, 1924, 120.55 K. P. H., 74.86 M. P. H.

CLASS C—WITH USEFUL LOAD OF 1,000 KILOGRAMS (2,204.62 LBS.)

Returning to point of departure.

***Duration**—(United States), Lieut. J. A. Macready, U. S. A. S., Curtiss-Martin Bomber, NBS-1, 2 Liberty 400 H. P., at Wilbur Wright Field, Dayton, Ohio, Oct. 2, 1924, 2 hr. 13 min. 49.6 sec.

Distance—No record.

Altitude—(France), Lucien Coupet, Goliath monomotor Farman, Farman motor, 600 H. P., at Toussus (S. et O.), May 6, 1924, 5,751 metres, 18,868 feet.

Speed—No record.

CLASS C—WITH USEFUL LOAD OF 1,500 KILOGRAMS (3,306.93 LBS.)

Returning to point of departure.

***Duration**—(United States), Lieut. J. A. Macready, U. S. A. S., Curtiss-Martin Bomber, NBS-1, 2 Liberty 400 H. P., at Wilbur Wright Field, Dayton, Ohio, Oct. 2, 1924, 2 hr. 13 min. 49.6 sec.

Distance—No record.

***Altitude**—(United States), Lieut. J. A. Macready, U. S. A. S., Curtiss-Martin Bomber, NBS-1, 2 Liberty 400 H. P., at Wilbur Wright Field, Dayton, Ohio, Oct. 2, 1924, 4,953 metres, 16,250 feet.

Speed—No record.

CLASS C—WITH USEFUL LOAD OF 2,000 KILOGRAMS (4,408.24 LBS.)

Returning to point of departure,

***Duration**—(United States), Lieut. H. R. Harris, U. S. A. S., and Mechanician Doug. Culver, Barling Bomber, 6 Liberty, 400 H. P., at Wilbur Wright Field, Dayton, Ohio, Oct. 3, 1924, 1 hr. 47 min. 10.5 sec.

Distance—No record.

Altitude—(France), Lucien Bossoutrot, Goliath monomotor Farman, Farman motor, 600 H. P, at Toussus-le-Noble, May 8, 1924, 4,475 metres, 14,682 feet.

Speed—No record.

CLASS C—WITH USEFUL LOAD OF 3,000 KILOGRAMS (6,613.58 LBS.)

Returning to point of departure.

***Duration**—(United States), Lieut. H. R. Harris, U. S. A. S., and Mechanician Doug. Culver, Barling Bomber, 6 Liberty, 400 H. P., at Wilbur Wright Field, Dayton, Ohio, Oct. 3, 1924, 1 hr. 47 min. 10.5 sec.

Distance—No record.

Altitude—(France), Lucien Bossoutrot, Goliath-Farman monomotor, Farman motor, 600 H. P., at Toussus-le-Noble, May 17, 1924, 1,942 metres. 6,371 feet.

Speed—No record.

CLASS C—WITH USEFUL LOAD OF 4,000 KILOGRAMS (8,818.49 LBS.)

Returning to point of departure.

***Duration**—(United States), Lieut. H. R. Harris, U. S. A. S., and Mechanician Doug. Culver, Barling Bomber, 6 Liberty, 400 H. P., at Wilbur Wright Field, Dayton, Ohio, Oct. 3, 1924, 1 hr. 47 min. 10.5 sec.

Distance—No record.

Altitude—(United States), Lieut. H. R. Harris, U. S. A. S., and Mechanician Doug. Culver. Barling Bomber, 6 Liberty, 400 H. P., at Wilbur Wright Field, Dayton, Onio, Oct. 3, 1924, 1,363 metres, 4,472 feet.

CLASS C—REFUELED IN FLIGHT.

Returning to point of departure.

New Category recognized by the F. A. I.

Duration—(United States), Lieuts. Smith and Richter, U. S. A., DH-4B, Liberty 400 H. P., at Rockwell Field, San Diego, Cal., Aug. 27-28, 1923, 37 hr. 15 min. 14.8 sec.

Distance—(United States), Lieuts. Smith and Richter, U. S. A., DH-4B, Liberty 400 H. P., at Rockwell Field, San Diego, Cal., Aug. 27-28, 1923, 5,300 kilometres, 3,293.26 miles.

CLASS C—SPEED.

Refueled in flight.

2,500 Km. (1,553.42 miles)—(United States), Lieuts. Smith and Richter, U. S. A., DH-4B, Liberty 400 H. P., at Rockwell Field, San Diego, Cal., Aug. 27-28, 1923, 142.78 K. P. H., 88.72 M. P. H.

3,000 Km. (1,864.11 miles)—(United States), Lieuts. Smith and Richter, U. S. A., DH-4B, Liberty 400 H. P., at Rockwell Field, San Diego, Cal., Aug. 27-28, 1923, 141.37 K. P. H., 88.15 M. P. H.

3,500 Km. (2,174.79 miles)—(United States), Lieuts. Smith and Richter, U. S. A., DH-4B, Liberty 400 H. P., at Rockwell Field, San Diego, Cal., Aug. 27-28, 1923, 142.17 K. P. H., 88.34 M. P. H.

4,000 Km. (2,485.48 miles)—(United States), Lieuts. Smith and Richter, U. S. A., DH-4B, Liberty 400 H. P., at Rockwell Field, San Diego, Cal., Aug. 27-28, 1923, 142.00 K. P. H., 88.23 M. P. H.

4,500 Km. (2,796.16 miles)—(United States), Lieuts. Smith and Richter, U. S. A., DH-4B, Liberty 400 H. P., at Rockwell Field, San Diego, Cal., Aug. 27-28, 1923, 142.36 K. P. H., 88.45 M. P. H.

5,000 Km. (3,106.85 miles)—(United States), Lieuts. Smith and Richter, U. S. A., DH-4B, Liberty 400 H. P., at Rockwell Field, San Diego, Cal., Aug. 27-28, 1923, 142.53 K. P. H., 88.55 M. P. H.

CLASS C1—SEAPLANES.

Returning to point of departure.

Duration—(United States), Lieuts. F. W. Wead and J. D. Price, U. S. N., Navy CS-2 seaplane, Wright 585 H. P., at Washington, D. C., July 11-12, 1924, 14 hr. 53 min. 44.2 sec.

Distance—(United States), Lieuts. F. W. Wead and J. D. Price, U. S. N., Navy CS-2 seaplane, Wright 585 H. P., at Washington, D. C., July 11-12, 1924, 1,600 kilometres, 994.19 miles.

Altitude—(France), Sadi Lecointe, Nieuport Delage, Hispano 300 H. P., at Meulan, March 11, 1924, 8,980 metres, 29,462 feet.

Airline without landing.

Distance—No record.

CLASS C2—SPEED.

Maximum Speed—(United States), Lieut. George Cuddihy, U. S. N., Curtiss Navy C-R seaplane, Curtiss D12, 450 H. P., at Bay Shore, Baltimore, Md., Oct. 25, 1924, 302.68 K. P. H., 188.08 M. P. H.

Returning to point of departure.

Speed for 100 Kilometres—(United States), Lieut. R. A. Ofstie, U. S. N., Curtiss Navy C-R Seaplane, Curtiss D12, 450 H. P., at Bay Shore, Baltimore, Md., Oct. 25, 1924, 286.86 K. P. H., 178.25 M. P. H.

Speed for 200 Kilometres—(United States), Lieut. R. A. Ofstie, U. S. N., Curtiss Navy C-R, seaplane, Curtiss D12, 450 H. P., at Bay Shore, Baltimore, Md., Oct. 25, 1924, 286.86 K. P. H., 178.25 M. P. H.

***Speed for 500 Kilometres**—(United States), Lieut. R. A. Ofstie, U. S. N., Curtiss Navy C-R, seaplane, Curtiss D12, 450 H. P., at Bay Shore, Baltimore, Md., Oct. 25, 1924, 259.33 K. P. H., 161.14 M. P. H.

***1,000 Km.** (621.37 miles)—Lieuts. Victor E. Bertrandias and George C. McDonald, Loening Air Yacht, Liberty 400 H. P., at Hampton Roads, Va., Nov. 7, 1924, 163.578 K. P. H., 101.642 M. P. H.

1,500 Km. (932.05 miles)—(United States), Lieuts. F. W. Wead and J. D. Price, Navy CS-2 seaplane, Wright 585 H. P., at Washington, D. C., June 22-23, 1924, 119.36 K. P. H., 74.17 M. P. H.

CLASS C1—WITH USEFUL LOAD OF 250 KILOGRAMS (551.15 LBS.)

Returning to point of departure.

Duration—(United States), Lieut. H. T. Stanley, U. S. N., F-5-L, flying boat, 2 Liberty 400 H. P., at San Diego, Cal., June 6, 1923, 10 hr. 23 min. 58 sec.

Distance—(United States), Lieut. H. T. Stanley, U. S. N., F-5-L, flying boat, 2 Liberty 400 H. P. at San Diego, Cal., June 6, 1923, 925 kilometres, 574.75 miles.
Altitude—(France), J. F. Laporte, Shreck seaplane, F. B. A. Hispano 300 H. P., at Argentina, Aug. 27, 1924, 4,735 metres, 15,600 feet.
***Speed for 100 Km.**—(United States), Lieut. Geo. R. Henderson, U. S. N., PN7-1, flying boat, 2 Wright T-2, 535 H. P., at Bay Shore, Baltimore, Md., Oct. 25, 1924, 126.345 K. P. H., 78.507 M. P. H.
***Speed for 200 Km.**—(United States), Lieut. Geo. R. Henderson, U. S. N., PN-7-1, flying boat, 2 Wright T-2, 535 H. P., at Bay Shore, Baltimore, Md., Oct. 25, 1924, 126.345 K. P. H., 78.507 M. P. H.

CLASS C1—WITH USEFUL LOAD OF 500 KILOGRAMS (1,102.31 LBS.)
Returning to point of departure.

Duration—(United States), Lieut. H. E. Holland, U. S. N., F-5-L, flying boat, 2 Liberty 400 H. P. at San Diego, Cal., June 6, 1923, 7 hr. 35 min. 54 sec.
Distance—(United States), Lieut. H. E. Holland, U. S. N. F-5-L, flying boat, 2 Liberty 400 H. P., at San Diego, Cal., June 6, 1923, 750 kilometres, 466 miles.
Altitude—(France), J. F. Laporte, Shreck seaplane, F. B. A. Hispano 300 H. P., at Argentina, Aug. 27, 1924, 4,735 metres, 15,600 feet.
***Speed for 100 Km.**—(United States), Lieut. Geo. R. Henderson, U. S. N., PN-7-1, flying boat, 2 Wright T-2, 535 H. P., at Bay Shore, Baltimore, Md., Oct. 25, 1924, 126.345 K. P. H., 78.507 M. P. H.
***Speed for 200 Km.**—(United States), Lieut. Geo. R. Henderson, U. S. N., PN-7-1, flying boat, 2 Wright T-2, 535 H. P., at Bay Shore, Baltimore, Md., Oct. 25, 1924, 126.345 K. P. H., 78.507 M. P. H.

CLASS C1—WITH USEFUL LOAD OF 1,000 KILOGRAMS (2,204.62 LBS.)
Returning to point of departure.

***Duration**—(United States), Lieut. Geo. R. Henderson, U. S. N., PN7-1, flying boat, 2 Wright T-2, 535 H. P., at Bay Shore, Baltimore, Md., Oct. 25, 1924, 5 hr. 28 min. 43 sec.
***Distance**—(United States), Lieut. Geo. R. Henderson, U. S. N., PN7-1, flying boat, 2 Wright T-2, 535 H. P., at Bay Shore, Baltimore, Md., Oct. 25, 1924, 400 kilometres, 248.55 miles.
Altitude—(France), Burri, Blanchard flying boat, 2 Hispano Suiza 300 H. P., June 11, 1924, 3,744 metres, 12,283 feet.
***Speed for 100 Km.**—(United States), Lieut. Geo. R. Henderson, U. S. N., PN7-1, flying boat, 2 Wright T-2, 535 H. P., at Bay Shore, Baltimore, Md., Oct. 25, 1924, 126.345 K. P. H., 78.507 M. P. H.
***Speed for 200 Km.**—(United States), Lieut. Geo. R. Henderson, U. S. N., PN7-1, flying boat, 2 Wright T-2, 535 H. P., at Bay Shore, Baltimore, Md., Oct. 25, 1924, 126.345 K. P. H., 78.507 M. P. H.
Distance—(United States), Lieut. O. B. Hardison, U. S. N., PN7-2, flying boat, 2 Wright T-2, 535 H. P., at Bay Shore, Baltimore, Md., Oct. 25, 1924, 100 kilometres, 62.137 miles.
Altitude—(France), Naval Lieut. Pelletier d'Oisy, Blanchard seaplane, 2 Hispano-Suiza 300 H. P. at St. Rapnael, April 17, 1924, 2,130 metres, 6,988 feet.
***Speed for 100 Km.**—(United States), Lieut. O. B. Hardison, U. S. N., PN7-2, flying boat, 2 Wright T-2, 535 H. P., at Bay Shore, Baltimore, Md., Oct. 25, 1924. 110.03 K. P. H., 68.4 M. P. H.

CLASS C1—WITH USEFUL LOAD OF 2,000 KILOGRAMS (4,409.24 LBS.)
Returning to point of departure.

***Duration**—(United States), Lieut. O. B. Hardison, U. S. N., PN7-2, flying boat, 2 Wright T-2, 535 H. P., at Bay Shore, Baltimore, Md., Oct. 25, 1924, 1 hr. 43 min. 11.9 sec.
***Distance**—Lieut. O. B. Hardison, U. S. N., PN7-2, flying boat, 2 Wright T-2, 535 H. P., at Bay Shore, Baltimore, Md., Oct. 25, 1924, 100 kilometres, 62.137 miles.
Altitude—(United States), Lieut. H. E. Holland, U. S. N., F-5-L, flying boat, 2 Liberty 400 H. P., at San Diego, Cal., June 7, 1923, 1,489 metres, 4,885 feet.
***Speed for 100 Km.**—(United States), Lieut. O. B. Hardison, U. S. N., PN7-2, flying boat, 2 Wright T-2, 535 H. P., at Bay Shore, Baltimore, Md., Oct. 25, 1924, 110.08 K. P. H., 68.4 M. P. H.

CLASS C1—REFUELED IN FLIGHT.
Returning to point of departure.

No records.

CLASS D—GLIDERS.

Duration—(France), Alexis Manyrol, Peyret Glider, at Vauville, France, Jan. 29, 1923, 8 hr. 4 min. 50.4 sec.
Distance—(France), Lieut. Thoret, Bardin Glider, at Vauville, France, Aug. 26, 1923, 8,100 metres, 26,568 feet.
Altitude—(France), E. Descamps, Dewoitine Glider, at Biskra, Feb. 7, 1923, 545 metres, 1,787.6 feet.
Airline without landing.
Distance—No record.

CLASS G—HELICOPTERS.

Distance—No record.

CLASS G—HELICOPTERS.
Airline without landing.

Distance—(France), Pescara, Pescara helicopters, 2-propellers, Hispano-Suisa, 180 H. P., at Issy-les Moulineaux, April 18, 1924, 736 metres, 2,414 feet.

* Official American records recognized by the National Aeronautic Association and reported forward to the Federation Aeronautique Internationale for homologation as World's records.

GLIDERS AND LIGHT PLANES.

No new glider or sailplane records were recognized by the International Aeronautic Federation up to Oct. 1. On May 11 Ferdinand Schulz, during competition at Koenigberg, Germany, sailed continuously for 8 hr. 42 min. at an average altitude of 46 metres.

Lieut. Thoret of France, on Aug. 29, glided 9 hr. 4 min. at the Airdrome des Alpilles in a regulation airplane with motor sealed.

In the Italian National Air League glider meet held at Asiago, Italy, the German pilot Martens glided 12½ miles in 19 minutes in a wind of but 5 feet per second.

In the Lympe competition held in England for light planes a number of excellent performances were recorded, although the lack of standard or general recognized specifications for so-called light planes makes it difficult to classify these planes. The prize winners and performances at the Lympe meet follow:

Beardmore Wee Bee I—No. 4. Pilot M. W. Piercey. High speed 71.11 miles per hour. Low speed 39.66 miles per hour. Speed range 76.77 per cent. Get-off 235 yards. Pull-up 124 yards. Hours flown 11 hr. 54 min. Miles flown 737.5. 1st Air Ministry prize £2,000.

Bristol Brownie—No. 1. Pilot C. F. Uwins. High speed 65.19 miles per hour. Low speed 38.73. Speed range 68.33 per cent. Get-off 215 yards. Pull-up 102.6 yards. Hours flown 10 hr. 23 min. Miles flown 512.5. 2d Air Ministry prize £1,000. Duke of Sutherland's prize £500 for get-off and pull-up.

Hawker Cygnet—No. 15. Pilot F. P. Raynham. Low speed 37.42 miles per hour. Get-off 250 yards. Pull-up 72.66 yards. Hours flown 10 hr. 29 min. Capt. C. B. Wilson prize £100 for get-off and pull-up.

Cranwell CLA2—No. 3. Pilot Flight Lieut. Comper. Hours flown 17 hr. 53 min. Miles flown 762.5. S. M. M. T. prize £150 and B. C. M. C. M. T. prize £150 for maximum distance flown.

The Tour de France des Avionettes or light plane race over a 1,100-mile cross-country circuit held in July was won by Drouhin in a Farman light plane equipped with 25 H. P. 3-cylinder Anzani engine, which was the only entry to finish in compliance with the regulations. Drouhin's flying time was 20 hr. 40 min. and elapsed time 15 days.

1924 UNITED STATES INTERNATIONAL RACE MEET.

The International Race Meet held at Dayton, O., Oct. 2-4, 1924, was the outstanding event of the American aviation season. Although there was a decrease of foreign entrants and new records, the number of events and entries were greater and the competition keen.

The Pulitzer Trophy race was again the feature event. The custody of the valuable trophy given by Ralph Pulitzer, Joseph Pulitzer and Herbert Pulitzer was transferred by mutual consent to the National Aeronautic Association of the U. S. A. on June 15, 1923, and the practice of awarding gold, silver and bronze plaques to the first three aviators in this event annually by the donors continued.

The winners have been:

1920—Lieut. C. C. Moseley, Verveille-Packard airplane.

1921—Bert Acosta, Curtiss navy racer.

1922—Lieut. R. L. Maughan, Curtiss H. S. pursuit plane.

1923—Lieut. S. W. Callaway, Curtiss Oriole.

The result of the various contests at the Dayton Meet, the winners being marked with *, follow:

ON TO DAYTON RACE.

Pilot.	Plane.	Point of Departure.	Distance. Miles.	Points.	No. of Pass.
Charles S. Jones	Curtiss Oriole	Rantoul, Ill	233	239	2
Charles Holman	TM Type S4C	Minot, N. D	1020	228	–
M. M. Merrill	Canuck Special	Dallas, Tex	870	216.7	–

AIRCRAFT MANUFACTURING CENSUS FOR 1923.

The Department of Commerce is authority for the statement that, according to data collected at the biennial census of manufacturers, 1923, the establishments engaged primarily in the manufacture of aircraft produced 505 airplanes valued at $6,166,218, and 82 seaplanes and flying boats valued at $1,570,851, together with other products to the value of $5,208,194, making a total of $12,945,263. The rate of increase in this total as compared with 1921, the last preceding census year, was 94.9 per cent

In addition, airplanes, seaplanes, and parts were made to some extent by establishments engaged primarily in other industries. The value of such planes and parts thus produced outside the industry proper in 1921 was $777,843, an amount equal to 11.7 per cent. of the total value of products reported for the aircraft industry. The corresponding value for 1923 has not yet been ascertained, but will be shown in the final reports of the present census.

Of the 33 establishments reporting for 1923, 12 were located in New York, 4 each in California and Ohio, 3 in Illinois, and the remaining 10 in Connecticut, Maryland, Michigan, Nebraska, New Jersey, Pennsylvania, Rhode Island, Washington, and Wisconsin. The number of workmen employed was 2,901.

THE ROUND-THE-WORLD FLIGHT.

The Round-the-World flight of the United States Army Air Service planes during 1924 was one of the greatest achievements in the history of aviation and a feat which had been discussed and considered by aeronautic authorities and the Governments of the world for several years as the one remaining accomplishment to complete the conquest of the air. The honor gained by the United States Army Air Service, pilots and planes in circling the globe, a distance of approximately 26,103 miles in 365 hrs. 11 min. flying time and a total elapsed period of 175 days between the departure from Seattle, Wash., on April 6 and the return to Seattle on Sept. 28 is likely to remain one of the high lights of aviation for all time. The achievement brought forth congratulatory messages to the aviators from President Coolidge, King George of England and scores of other governmental heads and enthusiastic receptions at every landing place during the flight. The original plane flotilla consisted of:

Flagplane Seattle (No. 1)—Pilot and flight commander, Major Frederick Martin; mechanic, Sergt. Alva L. Harvey.

Plane Chicago (No. 2)—Pilot (and flight commander after the Seattle's crash in Alaska), Lieut. Lowell H. Smith; mechanic and alternate pilot, Lieut. Leslie P. Arnold.

Plane Boston (No. 3)—Pilot, Lieut. Leigh Wade; mechanic, Staff Sergt. (later 2d Lieut.) Henry H. Ogden.

Plane New Orleans (No. 4)—Pilot and engineer officer, Lieut. Erik Nelson; mechanic and maintenance officer, Lieut. John Harding jr.

Of these four planes, the Chicago and the New Orleans alone circled the globe from Seattle to the Atlantic Coast; the Boston was forced out off the Faroe Islands, but the crew resumed the flight at Pictou, N. S., on a spare plane, the Boston II., which was sent to them in recognition of their splendid effort. The Seattle, the original flagplane, only reached Alaska, where it crashed into a mountain in low visibility. The crew returned to the United States.

The planes used were Douglas air cruisers, built especially for the flight, and equipped with 400 H. P. Liberty engines and gas capacity for cruising radius of 1,500 to 2,000 miles.

The route of the aviators traversed or touched twenty-one foreign countries and twenty-five States and one Territory of the Union. A total of fifty-seven hops were made, with an average of 483 miles to each jump.

With each air cruiser consuming twenty gallons of gasoline an hour of flying, the three planes used, in approximately 351 flying hours, 21,060 gallons. Each plane used about thirty gallons of oil every 2,400 miles.

Four world records were shattered when the army planes completed their 26,000-mile flight.

The first was broken when the Americans crossed the Pacific Ocean from Attu Island to Paramashiru Island in the Kuriles of Japan. This 900-miles stretch was the longest jump of the entire trip. It was made in twelve hours and five minutes of flying time. The second title came when the fliers crossed a 500-mile stretch over the China Sea from Kagoshima, Japan, to Shanghai, China. This was the first time the China Sea had been crossed by air. The third honor was the completion of the Round-the-World flight, a feat never before achieved by man in heavier-than-air machines.

Lastly, the flight theoretically set a speed mark for traveling around the globe. The entire 26,000-mile trip was made in approximately 365 hours of actual flying.

Official Government figures covering flight were not available when THE ALMANAC went to press, but an unofficial log shows the following record of the round-the-world air cruise, which started unofficially from San Monica, Cal., March 17, 1924, and officially from Seattle, Wash., April 6, 1924:

DATE OF ARRIVAL.		Miles	Hrs.	Min.
Start from	Santa Monica, Cal., to			
March 17	Sacramento	370	4	32
March 18	Eugene, Ore	660	6	5

From Washington the flyers crossed the continent by the southern route, arriving at San Diego, Cal., on Sept. 22. The remainder of the flight was via Santa Monica, San Francisco, Eugene, Ore., and thence to Seattle.

During 1924 aviators of several other nations started upon round-the-world flights but were unable to complete the flights for various reasons. The British personnel consisted of Squadron Leader A. S. Maclaren, pilot; Flight Officer W. N. Plemberleith, navigator; Engineer Sergeant Andrews, mechanic. The start was near Southampton, March 25. On Aug. 4 the flight was abandoned at Nikoiski, Komandorski Islands, Siberia, after a crash in the fog.

Major Pedro Lanni of the Argentine Flying Corps started from Amsterdam, Holland, on July 22. Following his arrival at Tokio, Japan, it was announced on Nov. 3 that continuation of the flight would be postponed until spring, due to ice-locked harbors in Russia.

ARMY AVIATION FATALITIES IN 1923.

United States Army aviators flew 9,093,360 miles during 1923 with a loss of but 18 lives, according to statistics compiled at McCook Field, Dayton, Ohio.

The number of miles covered by the airmen is based upon the speed of the slowest airplane, the De Haviland, which ordinarily travels at 120 miles an hour.

Continuing the figures on the 120-mile-an-hour basis, it is shown by the table that for every 605,080 miles the airmen covered, one human life was lost. For every 57,480 miles there was one accident.

The distance covered is more than 314 times around the world. Army fliers put in 75,778 hours in the air.

CROSS-COUNTRY, DURATION FLIGHTS.

Notable events in aviation in 1924 also were the dawn-to-dusk flight of Lieut. R. A. Maughan, U. S. A. S., between New York and San Francisco and the Paris-to-Tokio flight of Pelletier d'Oisy of France.

Lieut. Maughan, on June 23, in a Curtiss pursuit plane successfully achieved the dawn-to-dusk flight from New York to San Francisco, which he twice failed to accomplish in 1923. The 1922 Pulitzer Trophy winner covered the 2,700 miles from Mitchel Field to Crissy Field in a total elapsed time of 21 hr. 44 min. and in a total flying time of 17 hr. 52 min. The flight was made in six hops as follows: From Mitchel Field to McCook Field, Dayton, Ohio, 570 miles; from McCook Field to St. Joseph, Mo., 570 miles; from St. Joseph to North Platte, Neb., 325 miles; from North Platte to Cheyenne, Wyo., 215 miles; from Cheyenne to Salduro, Utah, 500 miles; from Salduro to San Francisco, 520 miles.

Capt. d'Oisy flew from Paris on April 24, en route to Tokio, where he arrived on June 9, covering 12,350 miles in 120 hours of flying time spread over 47 days. D'Oisy flew a Breguet 19A2 as far as Shanghai, China, where a landing accident crashed the plane. The log of d'Oisy's flight follows:

Date.		Miles.	Date.		Miles.
April 24..	Paris-Bucharest, Roumania.....	1,240	May 13..	Saigon-Hanoi, Indo-China.....	800
April 25..	Bucharest-Aleppo, Syria.....	990	May 18..	Hanoi-Canton, China.....	500
April 26..	Aleppo-Bagdad, Irak.....	500	May 20..	Canton-Shanghai, China.....	800
April 27..	Bagdad-Bushire, Persia.....	560	May 29..	Shanghai-Peking, China.....	700
April 28..	Bushire-Bender Abbas, Persia....	430	June 2..	Peking-Mukden, Manchuria.....	400
April 29..	Bender Abbas-Karachi, India....	900	June 3..	Mukden-Pingyang, Corea.....	230
May 3..	Karachi-Agra, India.....	800	June 4..	Pingyang-Taiku, Corea.....	300
May 5..	Agra-Calcutta, India.....	840	June 8..	Taiku-Osaka, Japan.....	425
May 9..	Calcutta-Rangoon, Burma.....	770	June 9..	Osaka-Tokorozawa (Tokio).....	295
May 10..	Rangoon-Bangkok, Siam.....	370			
May 11..	Bangkok-Saigon, Indo-China.....	500		Total distance.....	12,350

Total elapsed time, 47 days total flying time, 120 hours.

Some of the last six sections were covered with several intermediate stops en route, due to the much shorter cruising range of the Breguet 14A2 plane, a present of the Chinese Governor of Shanghai which d'Oisy used after he had crashed on the golf course of the latter place by running into a bunker.

OTHER NOTABLE FLIGHTS.

Oct. 1-Nov. 24—T. van der Hoop, Royal Dutch Air Line, Amsterdam to Batavia, Dutch East Indies; via Constantinople, Calcutta, Rangoon and Singapore, 9,300 miles.

Aug. 7-29—Col. Brinsmead, Controller Civil Aviation, Australia, flew around the Australian Continent, a distance of approximately 8,000 miles, in twenty-two days, including stops at principal cities.

July 16-17—Coupet and Drouhin flew a Farman Goliath over 100-kilometre course near Paris continuously, without refueling, for 37 hr. 59 min. 10 sec. for a new world's record.

July 12—Lieuts. F. W. Wead and J. D. Price flew a navy CS2 plane over a Potomac River course continuously for 15 hr. 19 min.

Aug. 8—Lieut. W. R. Peck flew a DH4B plane from Kelly Field, Texas, to Kokomo, Ind., without a stop, a distance of 1,118 miles, in 9 hr. 20 min.

Oct. 14-15—Lieuts. A. Crinkley and R. D. Lyon flew scouting plane SDW over a Potomac River course at Anacostia, D. C., continuously for 20 hr. 10 min. 20 sec., a new world's endurance record for a seaplane.

SCHNEIDER MARITIME CUP RACE.

The annual race for the Schneider Maritime Cup, won by Lieut. Rittenhouse, U. S. N., at Cowes, Isle of Wight, Sept. 28, 1923, and scheduled to be held at Baltimore Oct. 25, 1924, was called off owing to the withdrawal of the three Italian entries and the accidental wrecking of the sole British entry.

The cancellation of this race did not, however, affect the meeting held at Baltimore. The racing seaplanes prepared by the navy to keep the cup in this country were sent to Baltimore and made thirteen new seaplane records during the meet. The results of the events held Oct. 25 follow:

Baltimore Sun Trophy Race—Distance 80 miles in 12 laps. Won by Pilot Nirmaver, plane MF-C6, average 76.18 miles an hour.

Torpedo Plane Race—Distance 52.28 miles in 8 laps. Won by plane T11, average 80.88 miles an hour.

NATIONAL AIR CONGRESS MEET.

The National Air Congress Meet was held at Wichita, Kan., Oct. 11-12, with these results:

Walter Innes Trophy Race (for low-powered commercial planes)—Won by Pilot W. H. Beech, plane Swallow, average speed 92.7 miles an hour.

A. W. Hinkel Trophy Race (for high-powered commercial planes)—Won by Pilot B. L. Rowe, plane SVA, average speed 112.5 miles an hour.

Wichita Chamber of Commerce Trophy Race (for army pursuit planes)—Won by Pilot Major T. Lamphier, plane Curtiss PWS, average speed 158 miles an hour.

On to Wichita Race—Won by Pilot Dick Phillips, plane Swallow, who carried three passengers from Bartleville, Okla., scoring 243 points.

Wichita Eagle Trophy Race (for Liberty-engined two-place planes)—Won by Pilot Lieut. J. B. Haddon, plane DH4B, average speed 127.2 miles an hour.

MIAMI AVIATION MEET.

The Miami Aviation Meet was held at Miami, Fla., March 7-8, with these results:

Miami Chamber of Commerce Race (93.2 miles)—Won by Pilot Henry Rogers, plane Curtiss Seagull, average speed 69.6 miles per hour.

Flamingo Handicap Trophy Race (124.27 miles)—Won by Pilot Lieut. Richards, plane HN2, average speed 97.05 miles per hour.

Curtiss Marine Trophy Race (124.27 miles)—Won by Pilot Lieut. Grant, plane VE7H, average speed 116.1 miles per hour.

FOREIGN AIR RACES.

French Cross Country Touring Race (1,320 miles with 17 stops to be completed in 11 days)—Won by Pilot Labouchere, plane Potez VIII., average speed 55 miles per hour.

Commodore Beaumont Cup Race (held June 23 at Istres, France)—Won by Pilot Sadi Lecointe, plane Nieuport Deloge. Time for 300 kilometres, 57 min. 50 sec. (192.8 miles per hour).

French Grand Prix Transport Plane Race (held at Le Bourget, France, Aug. 20-22. Three consecutive daily trips, Paris to Bordeaux to Paris, total distance 1,920 miles)—Won by Pilots Bossoutrol and Coupet, plane Farman Jabiru cantilever monoplane, average speeds 113.3, 112.5, 110 miles per hour.

Lamblin Cup Race (750-mile circuit, Paris to Istres to Paris, to be completed between sunrise and sunset)—Won by Pilots Hernu and Philippe, plane Farman Jabiru cantilever monoplane. Time 7 hr. 37 min. less 2 hr. deduction for contest load.

Kings Cup Race (held in England Aug. 12, distance 960 miles)—Won by Pilot A. Cobham, plane DH50. Time 8 hr. 57 min. (average speed 106 miles per hour).

Prague Aviation Meet (President's Trophy speed race, 124 miles)—Won by Pilot J. Novak, plane A18B, average speed 164.8 miles per hour.

PREVIOUS WINNERS OF SCHNEIDER CUP RACES.

Year.	Place.	Type of Plane.	Motor and Horse Power.	Speed per Hour.	Winner.	Pilot.
1913...	Monaco.....	Deperdussin fl't mono.	Gnome (160).....	44.7 (72)	France...	Prevost.

In "Speed" column, figures in parentheses show kilometres, other figures in that column show miles.

TRANSATLANTIC FLIGHT OF THE DIRIGIBLE ZR-3.

Scarcely less important and impressive than the round-the-world flight of the United States planes was the transatlantic flight of the dirigible balloon ZR-3, later christened Los Angeles, constructed by Zeppelin Airship Company of Friedrichshafen, Germany, for the United States Government to replace two smaller type airships to which the United States was entitled at the close of the war. The general characteristics of the ZR-3 are: Length, 658 feet; diameter, 92 feet; height, 100 feet; gas capacity 2,470,000 cubic feet; number of gas cells, 14; Total lift, inflated with helium gas, about 148,000 pounds, dead weight, about 85,000 pounds; speed, maximum, 75 miles per hour; speed, cruising, 60 miles per hour; horsepower, 2,000, five engines of 400 H. P. each; cruising radius without stopping, over 6,000 miles; crew, 35 officers and men.

The ZR-3 left Friedrichshafen on Oct. 12 in charge of a German airship crew, commanded by Dr. Hugo Eckener with 32 persons aboard and 95,000 pounds of freight, including fuel. It arrived at Lakehurst, N. J. Naval Air Station on Oct. 15, after a comparatively uneventful air voyage of 81 hrs. 17 m., during which 5,066 miles were covered at an average speed of approximately 62 miles per hour. Of gas and oil 24½ tons were consumed.

The log of the ZR-3 flight follows, all time given being on Eastern Standard basis:

Oct. 12—12.35 A. M.—Leaves Friedrichshafen, Germany; 2.40 A. M.—Over Belfort, France; 3.36 P. M.—Over Cape Ortegal, Spain; 8.30 P. M.—Twenty miles off Portugal coast; 10.30 P. M.—Midway between Spanish coast and Azores.

Oct. 13—9 A. M.—Sighted from Azores; 11.30 A. M.—Passes Fayal, Azores; 2.35 P. M.—135 miles west of Fayal.

Oct. 14—1.20 A. M.—960 miles west of Azores. Approximately 640 miles from Bermuda. 8.00 A. M.—1,500 miles east of Lakehurst; noon—1,300 miles east of Lakehurst; 4.00 P. M.—1,000 miles east of Cape Sable, Nova Scotia; 10.00 P. M.—500 miles due east of New York.

Oct. 15—3.00 A. M.—ZR-3 sighted Cape Cod lighthouse; 4.15—passed over Boston; 4.48—passed over Providence, R. I.; 5.00—sighted at Newport, R. I.; 6.30—At New Haven, Conn.; 6.40—Bridgeport, Conn., passed; 7.10—sighted at Mitchel Field, L. I.; 8.00—reached New York; 8.40—left New York for Lakehurst; 9.16—arrived over Lakehurst, N. J.; 9.55—grounded safely.

Greatest altitude, 12,000 feet.

The American observers and the German officers in charge of the ZR-3 until it was formally taken over by the United States Government were: American officers—Capt. George W. Steele jr., U. S. N., commander after delivery; Comdr. Jacob H. Klein jr., U. S. N., executive officer after delivery; Lieut. Commander Sydney M. Kraus, U. S. N., engineer officer after delivery; and Major Frank M. Kennedy, U. S. Air Service.

German Officers—Dr. Hugo Eckener, commanding, president of the Zeppelin Co.; Ernst A. Lehmann, executive officer; Lieut. Hans C. Flemming, navigator, chief pilot of the Zeppelin Co.; Wilhelm C. Siegle, shop superintendent of the Zeppelin Co.; Lieut. Hans von Schiller, airship pilot; Franz Wittemann, chief quartermaster, airship pilot; Wolter Scherz, quartermaster; assistant to the director of the German Airship Operating Co. ("Delag").

In connection with the ZR-3 flight it is interesting to note that the Atlantic Ocean has been crossed by airship and airplane seven times without a fatality. The Navy NC-4, starting May 16, 1919, from Rockaway, flew from Trepassey to Lisbon, with stops, in 26 hours, 46 minutes, a distance of 2,472 miles. Alcock and Brown, in a Vickers-Vimy Bomber, made first successful non-stop transatlantic flight by airplane from St. John's, Newfoundland, N. S., June 15, 1919, to Clifden, Ireland, June 16, a distance of 1,936 miles in 15 hours, 57 minutes. R-34, British Airship, left Scotland, July 2, 1919; arrived Hazelhurst Field, N. Y., July 6; total time, 108 hours, 12 minutes; distance 3,130 sea miles. R-34 left New York, July 9, 1919; arrived Pulham, England, July 13; total time, 75 hours, 3 minutes; distance 3,300 miles. World flyers crossed to Iceland, Greenland and Labrador, July 30, to Sept. 6, 1924. ZR-3, German-built airship for U. S. Government, arrived here Oct. 15, 1924. Couhitnho and Cabral, Portuguese naval officers, flew by airplane from Spain to Brazil, 4,019 miles, in the summer of 1922.

TRANSCONTINENTAL FLIGHT OF THE SHENANDOAH.

The transcontinental flight of the Shenandoah, formerly the ZR-1, an American constructed rigid dirigible, was another remarkable demonstration of the advance made in aeronautics in 1924. Leaving the Naval Air Station at Lakehurst, N. J., on Oct. 7, the Shenandoah cruised to the Pacific Coast and return—a distance of 8,100 miles—in 235 air hours, completing the round tour on Oct. 25. The cruise included two crossings of the Rocky Mountains, together with a stay of eleven days on the west coast. She was away from Lakehurst for eighteen days, or 446 hours. This time was divided between about 258 hours in flight with the engines running and about 188 hours moored to the masts at Fort Worth, San Diego and Camp Lewis. This latter figure includes five days, or 120 hours, while being repaired at the mast at San Diego (Oct. 11 to 16). It is interesting to note that the actual flying time between Lakehurst, Fort Worth, San Diego and Camp Lewis and return, not counting the time taken in locating the mooring masts through fog on two occasions, was 235 hours and 11 minutes. The fastest express trains between these points make the run in 272 hours and 30 minutes, deducting time for connections.

The log of the Shenandoah's trip follows:

Oct.	*Flight Hours*	*Air Hours*	*Miles*
7- 9 Lakehurst-Fort Worth	36.45	38.05	1,45
9-11 Fort Worth-San Diego	39.14	41.14	1,300
16-18 San Diego-Camp Lewis	47.15	57.55	1,300
19-21 Camp Lewis-San Diego	39.55	47.35	1,300
22-24 San Diego-Fort Worth	36.25	37.22	1,300
24-25 Fort Worth-Lakehurst	35.28	36.27	1,450
Total	235.02	258.38	8,100

The difference between flight hours and air hours was the time spent in cruising or hovering before tieing to the mooring masts, the delays being due to weather or buoyancy conditions.

The Rocky Mountains were crossed at altitudes as high as 7,200 and 7,300 feet without any untoward incidents, despite unfavorable weather on the westward crossing. The fuel consumption averaged about one gallon to the mile flown. There were aboard when the ship left Lakehurst forty-one persons, including Rear Admiral Moffett and eleven other officers and Mr. Junius B. Wood, representative of the national news gathering organizations. These officers participated: Lieut. Commander Zachary Lansdowne, Commanding Officer; Lieut. Commander L. Hancock, Executive Officer; Lieut. J. B. Lawrence, Lieut. A. R. Houghton, Lieut. C. H. Rosendahl, Lieut. R. G. Mayer, Lieut. (junior grade) C. E. Bauch, Lieut. (junior grade) E. W. Sheppard, Chief Machinist S. S. Halliburton, Lieut. (junior grade) C. D. Palmer, Radio Gunner G. W. Almour, Lieut. J. B. Anderson.

A feature of the flight was the remarkable performances of the radio equipment. While on the west coast the Shenandoah was heard by the Naval Research Laboratory at Bellevue, D. C., and also by a vessel in the mid-Pacific. On Oct. 25, while over Ohio, the airship was in communication with the U. S. S. Milwaukee near Key West.

The Shenandoah was designed by the Navy Department, fabricated by the Naval Aircraft Factory of Philadelphia, assembled and erected at the Naval Air Station, Lakehurst, N. J. It is American built throughout. The metal framework is of duraluminum, a composition of aluminum, copper and manganese, has a tensile strength of mild steel and of only one-third its weight. The gas bags, 20 in number, are made of a special fabric called gold-beater skin, manufactured by the Goodyear Tire and Rubber Company. The engines are special gasoline engines, 6-cylinder, 300 H. P., made by the Packard Motor Company. Each car carries one engine. The outer cover is of cotton fabric painted aluminum and only serves as a weather protection and stream line the ship. The fuel used is gasoline, carried in a number of tanks in the inclosed keel of the ship with a total capacity of 8,000 gallons. The supporting gas is helium, a non-inflammable, non-poisonous gas and is the next lightest gas to hydrogen. It is found in the natural gas of certain gas fields of Texas and Kansas. The Government has a plant for extracting this gas in Texas. This gas is not found in commercial quantities elsewhere. The ship is controlled from the forward car, the inside of which looks much like the bridge of a steamship. It is in communication with the ground by radio and radio telephone.

The general characteristics of the Shenandoah are: length—680 feet; diameter—78 feet; height—96 feet; gas capacity—2,150,000 cubic feet; total lift (helium)—about 130,000 pounds; dead weight—about 75,000 pounds; speed—about 65 miles per hour; horse power—five 300 H. P. engines, total 1,500 H. P.; cruising radius without stopping—over 4,000 miles; and crew—9 officers, 22 enlisted men.

AIR FLEETS OF THE GREAT POWERS.

The nations of the world are annually devoting more money and attention to their air navies. In the development and expansion of the air forces, France now leads with the United States second. Ladislas d'Orcy, editor of Aviation, has prepared for THE WORLD ALMANAC these tables showing the status of air forces in the leading countries:

Air Strength of Great Powers Dec. 1, 1924:

COUNTRY.	1st Line Planes.	Plane Squadrons.	Personnel.
France	1,250	140	40,000
United States	750	51	15,000
Italy	600	66	11,000
Great Britain	600	50	35,000
Japan	400	36	35,000
Russia	300	30	4,000

Contemplated Air Strength of Great Powers:

COUNTRY.	Line Planes.	Plane Squadrons.
France	2,500	258
United States	1,200	..
Great Britain	1,000	81
Russia	928	99
Italy	800	90
Japan	650	58

France has authorized 2,000 planes under 1924 program; 500 planes planned for Naval Air Service (not yet authorized).

The United States Army Air Service program provides for 850 first line planes by July 1, 1925; the naval air strength is conjectural.

Under the 1923 program fifty-two of the eighty-four British air squadrons are to be for home defense, and thirteen of these are to be special reserve and auxiliary squadrons, which are skeleton organizations comparable to our National Guard air squadrons, which are not included under United States.

The Russian figures are under reorganization program adopted Feb. 1, 1924.

It seems probable that the Italian 1924 program will be expanded to include at least 1,200 first line planes.

Japan's 1924 program provides for the creation of twelve new Army air squadrons and ten new Naval air squadrons.

Types of Combatant Plane Squadrons of Great Powers Now in Commission:

COUNTRY.	TYPES OF PLANE SQUADRONS. Pursuit.	Bomb. Torp. & Attack.	Observ. and Patrol.	Total No.
France	33	34	73	140
Italy	20	14	32	66
United States	12	12	27	51
Great Britain	13	22½	14½	50
Japan				36
Russia				30

Distribution of Combatant Plane Squadrons of Great Powers:

COUNTRY.	Home.	Over-seas.	With Fleets.	Total.
France	113	27 *a*	0	140
Italy	60	6 *b*	0	66
United States	26	13 *c*	12	51
Great Britain	25½	18 *d*	6½	50
Japan	30	3 *e*	3	36
Russia	30	0	0	30

Notes—*a* Including 8 squadrons in Algeria and Tunis, 8 in Morocco, 8 in Syria, 1 in French West Africa and 2 in Indo-China.

b Including 4 squadrons in Tripolis and 2 in Cyrenaica.

c Including 5 squadrons in Hawaii, 3 in the Panama Canal Zone, 3 in the Philippines, 2 in Hayti and 1 in Guam. The three last named are Marine Corps squadrons.

d Including 2 squadrons in Egypt, 1½ in Palestine, 8 in Iraq (Mesopotamia), 6 in India and ½ in Malta.

e In Korea.

"Home" for France includes continental France and Corsica; "Overseas" comprises Algeria and all colonies, protectorates and mandates.

"Home" for Italy includes continental Italy, Sicily and Sardinia; "Overseas" comprises Tripolis, Cyrenaica, Erythrea and Italian Somaliland.

"Home" for the United States includes the continental United States; "Overseas' comprises Hawaii, the Philippines, Guam, the Panama Canal Zone and Hayti.

"Home" for Great Britain includes England, Wales and Scotland; "Overseas" comprises all British colonies, protectorates and mandates, but does not include the self-governing British Dominions (Irish Free State, Canada, Australia, New Zealand and Union of South Africa), which maintain small air establishments of their own.

"Home" for Japan includes the Japanese islands proper; "Overseas' comprises Formosa (Taiwan), Korea (Chosen), Manchuria and the mandated islands in the Pacific.

Aviation Budgets of the Great Powers, 1924-25:

COUNTRY.	Amounts Appropriated.
France	francs 641,000,000 (*a*)
Great Britain	£19,392,000 (*b*)
United States	$56,000,000 (*c*)
Italy	lire 400,000,000
Japan	Not available (*d*)
Russia	Not available (*e*)

a Including 138,000,000 francs for civil aviation.

b Including £355,000 for civil aviation.

c Including $2,750,000 for U. S. Air Mail Service.

d The 1922-23 budget was 42,000,000 yen.

e The 1923 budget was 35,000,000 roubles (gold).

United States Government Air Service Expenditures, 1922-23:

Army Air Service	$28,144,131.97
Navy Air Service	36,947,195.98
Air Mail Service	1,900,000.00
National Advisory Committee	250,000.00
Total	$67,241,327.95

GORDON BENNETT INTERNATIONAL BALLOON RACE.

The thirteenth annual international balloon race for the James Gordon Bennett Trophy started at Brussels, Belgium, June 15. It was won by Lieut. de Muyter of Belgium. As this was the third consecutive victory for a Belgian entrant the Gordon Bennett Cup becomes the permanent property of Belgium. Lieut. de Muyter won in 1922, 1923 and 1924 as well as in 1920 when the race started from Birmingham, Ala., U. S. A.

Lieut. de Muyter's balloon landed at St. Albans Head, England; approximate distance 600 kilometres. Laporte of France landed at Brighton, England. Previous winners were:

YEAR.	Starting Point.	Winner.	Country.	Distance.	Duration.
				Kms.	H. M.
1906	Paris, France	F. P. Lahm	United States	647	22 5
1907	St. Louis, Mo.	O. Erbsloh	Germany	1,403	40 ..
1908	Berlin, Germany	Col. Schack	Switzerland	1,212	73 ..
1909	Zurich, Switzerland	E. Mix	United States	1,121	35 ..
1910	St. Louis, Mo.	A. R. Hawley	United States	1,837.6	44 25
1911	Kansas City, Mo.	O. Gericke	Germany	758	12 28
1912	Stuttgart, Germany	A. Bienaime	France	2,191	46 ..
1913	Paris, France	Ralph Upson	United States	618	43 10
1920	Birmingham, Ala.	Lieut. de Muyter	Belgium	1,769	40 ..
1921	Brussels, Belgium	Capt. Armbruster	Switzerland	766	27 23
1922	Geneva, Switzerland	Lieut. de Muyter	Belgium	1,372	25 45
1923	Brussels, Belgium	Lieut. de Muyter	Belgium	1,115	21 ..

The national balloon race to select the three teams to represent the United States in the Gordon Bennett International Balloon Race started from San Antonio, Tex., April 23 with seven balloons competing. It was won by W. T. Van Orman and C. K. Wollam who landed five miles north of Rochester, Minn., traveling 1,072 miles in 44 hr. 4 min. 44 sec.; second, H. E. Honeywell and Capt. T. E. Budinot, 1,042 miles in 39 hr. 11 min.; third, Major N. W. Peck and Lieut. W. A. Gray, 1,021 miles in 32 hr. 30 min.

BUSINESS REVIEW AND OUTLOOK.

By G. F. Hughes, Business Editor, The World.

In a business way, 1924 was almost a repetition of 1923, with this exception—the upward and downward movements were sharper in the past year. Moreover, there were two major developments, lacking in the previous year—agricultural recovery and the German reparation settlement.

These two developments proved the starting point for a recovery from the mid-year depression and, combined with the election result, were regarded, in December, as likely to raise business to higher levels for at least the first half of 1925. Such was the interpretation drawn from the feverish stock market after the Republican victory at the polls.

The parallel between 1923 and 1924 is rather striking. There was the same early bulge in production, followed by a decline in mid-year, with recovery pretty well established in the closing months. However, the decline in 1924 was much sharper and brought general employment, in August, to a point 15 per cent. below the previous year.

In the final quarters of both years, business sentiment was under practically the same influences. The Mellon plan proposals inspired great confidence late in 1923, after business had been languishing for months. Production was speeded up last winter to record levels in many important instances, and it was only towards the middle of March that manufacturers recognized that they had been over-enthusiastic. The spring and summer was spent in liquidating the resultant surpluses, which, of course, was accompanied by corresponding price weakness and increased unemployment.

This general decline was halted by the quick reversal in the agricultural situation and to a small extent by the settlement of German reparations. Luck played the star part in the affairs of the farmer. While weather conditions in this country brought good crops, other producing countries were adversely affected, with the result that prices underwent a spectacular rise.

Estimates placed on the increase in crop returns ranged up to a billion dollars. Towards the close of the year, one authority placed the relation of farm product prices to the general commodity list at 87 per cent. of equality, which was close to the adjustment so long desired as a requirement for healthy prosperity. At first, the farmers attended rather strictly to the liquidation of their heavy indebtedness but followed this up with more liberal purchases, as was indicated by the marked expansion in mail order trade.

From the reparation settlement, results were not so quick to materialize, though foreign trade during the year showed a good expansion. The favorable trade balance for the year should approach a billion dollars. This was indicated by the significant increases which occurred in the monthly reports for the final quarter. The completed ten months' figures disclosed a gain of some $100,000,000 in exports of both raw materials and of finished manufactures over the corresponding period in 1923, while higher prices for foodstuffs shot up export totals for this group.

It would appear, from a study of foreign trade statistics, that the usual influences on the foreign business of a creditor nation had not yet become operative. Debtors to the United States continued to buy more goods, while they actually sold less than in the past year. The excess of gold imports over exports was, however, on a decreasing scale through the year, indicating a possible turn in this movement which would tend to reduce our huge gold supply and lead to a stiffening in money rates.

Particular satisfaction was taken in business circles, of course, over the election result, which was construed as the defeat of the more radical tendencies in legislation and the triumph of conservative policies. Hope was again aroused over the possible enactment of the Mellon plan for tax reduction, so favored by the big interests.

The turn of the year, therefore, sees a great gain in confidence even though the business situation, as a whole, is below the level of a year ago. The more optimistic expect this confidence to be translated into excellent results throughout the coming year, while the conservative elements in business see a good spring trade ahead but are not so hopeful of the conditions which will develop after that time. The conservative opinion on the outlook seems to rest on a firm basis. Since the major depression of 1920-21, there have been two unsuccessful attempts to force prosperity and each has come to grief on over-production. Anxiety as to the long future is based on this possibility, as well as upon the resistance which trades and consumers have learned to offer to higher prices.

Other threats are seen in the recurrence of the farm problem next year and in the competition expected from a recovering Europe.

Inflationary tendencies have undoubtedly crept into the situation and it remains to be seen whether they can be defeated by the sound common sense of the business world. On this will rest the outcome for good or ill.

MAXIMUM AND MINIMUM OUTPUT IN UNITED STATES INDUSTRIES.

The percentage of maximum possible output in 1921 in the manufacturing industries in the United States, which were operating on 75 per cent. or more of their full capacity, was as follows: Baking powders and yeast, 8 .8; bone black, carbon black, and lamp black, 82.0; cars and general shop construction and repairs by electric railroad companies, 87.6; cement, 78.6; cheese, 78.3; cotton goods. 74.9; envelopes, 75.5; felt goods, 80.2; oilcloth and linoleum, 75.1; oilcloth, enameled, 81.1; paper patterns, 96.7; petroleum refining, 76.4; photographic materials, 77.2; printing and publishing, music, 85.2; printing and publishing, newspapers and periodicals, 83.0; refrigerators, 75.4; regalia and society badges and emblems, 76.2; sugar. beet, 82.0; tobacco, cigars and cigarettes, 74.9; turpentine and rosin, 82.2; umbrellas and canes. 75.9.

The manufacturing industries which in 1921 operated on one-third capacity or less were: airplanes, 26.5; crucibles, 12.7; emery and other abrasive wheels, 31.2; engines and water wheels, 31.6; foundry supplies, 28.7; hardware, saddlery, 30.3; lapidary work, 31.8; liquors, distilled, 31.3; liquors, malt, 19.8; liquors, vinous, 32.8; machine tools, 23.2; mats and matting, from fibres, 33.9; motorcycles, bicycles and parts, 34.4; pens, steel, 34.7; screws, machine, 34.8; shipbuilding, wooden, 34.8; window and door screens, 33.2; wood distillation, 34.1.

TRADE IN FRESH FRUITS, RAISINS, POTATOES AND ONIONS.

In the ten-year period ending in 1923, United States exports of fresh fruits have recorded substantial gains, according to the Foodstuffs Division of the Department of Commerce. Apples increased in value more than 100 per cent., and about 30 per cent. in quantities exported, estimating 2¾ boxes to the barrel, thus arriving at a total of 3,100,298 barrels for 1923. Packing in boxes for export is rather a recent innovation in the apple industry, hence 1913 statistics give only barrels.

In the same ten-year period, exports of oranges have more than doubled in quantity and nearly quadrupled in value; lemons have increased more than 200 per cent. both in quantity and in value; pears have risen 316 per cent. in value, no figures for quantity in 1913 being available; raisins show the largest gains, amounting to 276 per cent. as to quantities exported, and to 504 per cent. in valuation; white potatoes slightly increased in quantity and decreased in value; while onions, exhibiting a substantial decrease in quantities, nevertheless recorded a 217 per cent. increase in value. Fresh peaches were not separately classified in 1913, but increased 2,071,357 pounds in 1923 over the 1922 export figures, showing a small loss in value at the same time. All these commodities, after considerable and abnormal fluctuation during and after the war, rest at substantially higher levels, either as to quantity or value, or both, at the end of the period 1913-1923.

With the continued rise in the standard of living in the United States, consumption of fruit has steadily climbed, this country being the world's largest consumer of fresh fruits in 1923. The United States' per capita consumption of apples during 1923 was 81.5 pounds; oranges, 23.8 pounds; lemons, 4.8 pounds, and raisins, 2.9 pounds. Canada ranked second in the consumption of apples, its per capita being 48.13 pounds. Its per capita consumption of oranges also was second to that of the United States, with figures of 17.4 pounds. The United Kingdom, with per capita consumption of lemons at 2.2 pounds, was next to the United States, while the Netherlands' per capita consumption of raisins at 5.46 pounds, was the leader.

New York City, on direct routes to the United Kingdom and Continental Europe, our most important markets, is the leading export port in the United States. The growth of the Pacific Coast fruit industry is shown by the heavy shipments cleared through Los Angeles, San Francisco, Oregon, and Washington. New Orleans leads in the shipment of onions, being readily accessible to the important onion industry in Texas, and in easy communication with Cuba, which takes about 50 per cent. of the total United States exports of this commodity.

SECRETARY OF COMMERCE HOOVER ON ECONOMIC PROGRESS.

In a review of business conditions for the year ending June 30, 1924, Secretary of Commerce Hoover said:

"The outstanding features of the fiscal year were: First, the advance in agricultural prices, which had hitherto lagged behind industry since the slump of 1920; second, the beginnings of sound policies in German reparations leading to a hopeful measure of economic recovery in Europe; and third, the complete recovery of our own industry and commerce (aside from agriculture), great stability of prices, high production, full employment, expanding foreign trade and prosperity throughout the business world. There were some moderate decreases in activity of some lines during the latter part of the fiscal year, but since its close there has again been general recovery in those lines."

A table of "Major Economic Indexes," based on the calendar year 1919 as 100, shows that the general level of business activity was decidedly higher than even in that very prosperous year. The table indicates the following changes in the volume of business (quantities, not value) in the fiscal year 1924 as compared with the fiscal year 1923: The index of manufacturing production dropped slightly, being 115 in 1924 as compared with 116 in 1923. Mineral production rose from 118 in 1923 to 131 in 1924. Forest products production rose from 111 to 117. Railroad freight (ton-miles) rose from 109 to 110; electric power production from 136 to 148; building contracts let (square feet), from 107 to 109.

Notwithstanding far lower prices than in 1919 the value of sales of retail stores was greater in 1924 than in that year. Thus the value of department store sales stood at 120 in 1923 and 128 in 1924; of five and ten-cent stores at 152 and 173, respectively. In the case of mail-order houses the indexes rose from 90 in 1923 to 100 in 1924; and of wholesale trade from 80 to 82, the lower indexes as compared with 1919 being wholly due to the decline in prices. Based upon the calendar year 1913 as 100 the general average of wholesale prices dropped from 156 in 1923 to 150 in 1924.

In September, manufacturing production stood thirteen points higher than in June, and the agricultural recovery by September had proceeded to a point where the wholesale price index of farm products was 143 on the 1913 base as compared to 149 for the price of all commodities, thus marking the re-establishment of the farmers' buying power at much more nearly the pre-war ratio.

TRANSPORTATION.

"This fiscal year marks the first occasion since long before the war when our railway facilities have been completely equal to the demand of the country." Mr. Hoover says, "There were no car shortages of any consequence. There was a speeding up of delivery of all goods. This complete reconstruction, expansion and growing efficiency in transportation facilities marks a fine accomplishment on the part of our railway management. Its economic effect is most far-reaching. Every car shortage is a strangulation in the movement of commodities which reduces price levels to the producer and increases them to the consumer. It disarranges the synchronizing of our industrial fabric and widens the margin all along the line between producer and consumer. There is still requirement for extension of terminals and readjustment of rates. There are large consolidations needed for the ultimate best service and sound finance."

The Federal Reserve member bank operations indicate "a high degree of stability."

"European stabilization, which the Dawes plan may be expected to achieve," he went on, "will bring about a revival in world trade and increased consumption of commodities, in which the United States is bound to have its share. This trade revival and increased consumption power should outweigh any increased competitive power which might be expected from the execution of the plan. It is not too much to say that this settlement of the vexed reparation problem, coming at the time it did, prevented another European collapse, with its inevitable repercussion on world trade and on the business of the United States."

Exports increased 9 per cent. in value in 1923-24 as compared with 1922-23, while imports decreased 6 per cent. The net result was an increase in the excess of exports over imports from $176,000,000 in 1922-23 to $757,000,000 in 1923-24. While in absolute amount this is a larger export balance than in any year prior to the war, the percentage by which exports exceed imports is somewhat smaller than in most pre-war years. The total imports and exports in 1912-13 amounted to $4,279,000,000 against $7,865,000,000 in 1923-24. If we correct this difference by the depreciated buying power of the dollar the increase is 18.2 per cent. This compares with decreases of 12 per cent. for the United Kingdom, 14 per cent. for France, and 51.4 per cent. for Germany.

The gain in the total trade of the United States over 1913 is largely accounted for by the marked increases in trade with Asia, Oceania, and South America. The value of trade with Asia increased 244 per cent. and that with Oceania and South America 192 and 95 per cent., respectively. Although the actual value of trade with Europe is greater than prior to the war the gain is less than the increase in prices and the actual quantity of goods is smaller.

ELIMINATION OF NATIONAL WASTE.

"A definite constructive national program has been developed by the Department of Commerce for the elimination of waste in our economic system," says Mr. Hoover. "The need is plain. Regulation and laws are of but minor effect on these fundamental things. But by well-directed economic forces, by co-operation in the community, we cannot only maintain American standards of living—we can raise them.

"There are wastes which arise from widespread unemployment during depressions, and from speculation and overproduction in booms, wastes, attributable to labor turnover and the stress of labor conflicts, wastes due to intermittent and seasonal production, as in the coal and construction industries, vast wastes from strictures in commerce due to inadequate transportation, such as the lack of sufficient terminals, wastes caused by excessive variations in products, wastes in materials arising from lack of efficient processes, wastes by fire, and wastes in human life.

"A second committee from the Unemployment Conference undertook the study of seasonal operation in the construction industries. This committee, reporting in July, showed conclusively that custom, not climate, is mainly responsible for the seasonal ups and downs in building, and that these evils are largely unnecessary and can be eliminated," says Mr. Hoover. "For most types of construction, it is now possible to build the year round in all parts of the United States. The elimination of these wastes would strengthen the entire business structure, for construction is the balance wheel of American industry. The value of yearly construction in the United States is more than $5,000,000,000. If building falls off, there is always a slackening in many other lines of industry, resulting in unemployment, decreased purchasing power of employees, and further depression.

"Through co-operation of trade associations of the principal industrial consumers, through chambers of commerce and public utilities a large amount of regular summer storage of bituminous coal has been induced. Through the fine co-operation of the railways greater equipment and terminal facilities have been provided and car shortages have been largely eliminated. Through co-operation by the department with the unionized operators and with the leaders of the United Mine Workers a long term agreement has been entered upon, which insures industrial peace in the industry.

"It is true that during the past few months the industry has been somewhat demoralized by the large stocks of coal accumulated in anticipation of a possible strike last spring, and by the lessened demand during the summer. The broad result of gained stability, however, has been that the public has received its coal during the last fiscal year at the lowest price of any year since before the war. The past year, as compared to the year 1920, shows a saving to the consumer of about one billion dollars, which must be reflected in decreasing costs of production in every avenue of industry and commerce."

The programme of the Northeastern Superpower Committee, Mr. Hoover says, is an effort in the direction of waste elimination. Revision of Federal and State purchasing specifications, under the auspices of the Bureau of Standards, is another. Industrial research work undertaken by the bureau, in co-operation with the industries concerned, and with a view to improvement in technical processes, is still another.

"It has been the department's view that the best remedy for these evils in marketing perishable produce lies in the extension of co-operative marketing and in the better organization of the distributers at the terminal markets," he continues. "The department has already proposed a definite plan which I believe will mobilize economic forces to reduce these wastes with a minimum of governmental intervention."

The department recently took the lead in an investigation of the tremendous human and physical losses due to traffic accidents; the deaths in 1923 were not less than 22,500, the number of people injured not less than 678,000, and the total economic loss not less than $600,000,000.

FINANCIAL AND ECONOMIC REVIEW OF 1924.

By S. S. Fontaine.

During 1924 there has been an impressive movement toward the economic reconstruction in Europe, and this stride has brought closer into view the rehabilitation of international trade and the restoration of world balance, so disrupted and disturbed by the war, and the evils it bequeathed to civilization. America can claim no small part of the credit for this service to its neighbors of the world. It has not only acted as counsellor and friend at the round table where the architects have worked out the plans for the liquidation of the costs and penalties of the great conflagration that raged for five years and consumed to embers the credit structure of half the world, but it has made the provisions of the Dawes plan workable by providing the funds that Germany needed as the essentials for its establishment, and by liberal advances of specie through our great international banking houses, as a matter of private, but highly patriotic enterprise, laid the foundation for the re-establishment of the gold standard on the ruins of the most debased currency system since mankind adjusted the laws of barter to mediums of exchange.

But while restoring vigor to our prostrate friends abroad through these processes of transfusion of credit fluid into their circulation system, we are through the blood letting escaping the dangers of congestion and the evils of inflation. For some years after the war many of our economists and the masters of finance viewed with very grave concern the drainage of the world's gold reserves into our depositories through the international trade and the overshadowing premium which the American dollar commanded in world markets. We are very deeply indebted to Great Britain's devotion to the great principles of international courtesy and her allegiance to her traditional standards of financial probity that the gold base still rests beneath the system of international exchange and that it is destined to endure. And this great factor in the world's reconstruction has been accomplished only by a great sacrifice and burdensome taxation that has made drastic reduction in the national debt and the balancing of the budget possible.

According to the National Debt Return recently published and transmitted to the Bankers Trust Company of New York by its English information service there was a net decrease in the national debt of Great Britain in the fiscal year ended March 31, 1924, of £95,512,000, reducing the gross debt from £842,726,000 on March 31, 1923, to £747,-114,000 on March 31, 1924. Of the reduction in indebtedness, £35,432,000 was in the floating debt, £30,340,000 in the internal debt other than floating debt, and £29,840,000 in the external debt. The principal items in the reduction of external debt consisted in the payment to the United States Government of £17,260,000 and to the Canadian Government of £14,456,000.

The net expenditure for interest and management of the debt for the fiscal year ending March 31, 1924, was £307,811,000, or about 39 per cent. of the total ordinary expenditure. In the last pre-war year the debt charge accounted for 8.6 per cent. of the total ordinary expenditure. In the year of the armistice, ending March 31, 1919, the debt charge called for £268,000,000, or 10.4 per cent. of the total ordinary expenditure. With the gradual reduction of expenditures from a maximum total ordinary expenditure of £2,696,200,000 in the year ended March 31, 1918, to £788,800,000 in the year ended March 31, 1924, notwithstanding the fact that there has been some reduction in the debt charge, say from a maximum of £328,300,000 in the year ending March 31, 1921, to £307,811,000 in the last year, there has been a steady increase in the percentage of expenditure represented by the debt charge.

As pointed out in a study made by the institution the debt charge can be reduced only as the debt is paid off or as opportunities offer for refunding at lower rates of interest. Meanwhile, as English credit improves and the paper pound sterling returns nearer and nearer to its gold equivalent, the burden of the debt charge upon the taxpayers becomes heavier. This is because of the fact that the war was financed by Great Britain with a ten-shilling pound, while to the extent that this cost is being gradually liquidated through the repayment of borrowed money, the cost is being met with a pound sterling of steadily increasing real value. For example, payments of all kinds, including those for interest and principal of the debt, made in 1920, were in a seven-shilling pound, a pound worth much less than that in which, on the average, the debt was incurred, but payments made in 1921 were on a rising scale from about a nine shilling pound in January to a twelve-shilling pound toward the close of the year, while during 1922 a thirteen-shilling pound was required to meet the nation's payments. During 1923 payments still could be made approximately on this basis, and during 1924 even on a somewhat better basis. As time goes on, and England's credit approaches still closer to a pre-war basis, she may find herself paying off a ten-shilling debt with a fifteen-shilling pound, or, more than likely, within a couple of years with a twenty-shilling pound, if the present expectation of resuming specie payments within that time is realized. However, depreciation in the purchasing power of gold itself may help to temper the burden for the taxpayer.

Fortunately for England, it is pointed out, she paid about 36 per cent. of the cost of the war from revenue raised as the expense was incurred, leaving only 64 per cent. to be financed with borrowed money. This fact, taken with the further fact that since the armistice England has maintained a high rate of taxation, and not only balanced her budget from revenue receipts but actually reduced her debt and the volume of her fiat currency, accounts for the steady rise in the value of the pound sterling and for the maintenance of the English nation's high credit at home and abroad.

THE INTER-NATION LOANS.

According to a compilation made by the Bankers Trust Company the total of the inter-nation loans on Armistice Day was $21,599,717,000. Post-armistice loans aggregate about $7,500,000,000, bringing the grand total as of to-day up to about $29,100,000,000. Of the post-armistice loans, it is estimated that upwards of $4,000,000,000 represent simply accrued unpaid interest. Of the remainder, about $1,500,000,000 were loaned in compliance with pre-armistice agreements, and to a considerable sum, represent the value of surplus war material sold on credit, while the sum of around two billion dollars is made up almost entirely for relief and reconstruction. The story of these latter loans has never been fully told. Therefore a few facts regarding them may be of interest.

When the armistice was signed, Europe faced important economic problems. Germany and Austria-Hungary were in great need of foodstuffs, especially fats, while quantities of food were still needed for Belgium and Northern France. Even victorious England, France and Italy were forced for a time to continue food rationing and for a long time food control.

On the other hand, America had a great surplus of food which had been produced under the stimulus of high prices and had been gathered into warehouses for the use of our armies and the armies and nationals of our allies. The American treasury department took the position that under the Liberty Loan Acts the Administration was powerless to continue making loans to foreign nations—former allies or recent enemies. The British took the position that if American financing were to stop immediately the European Governments might find it impossible to go on purchasing food from the United States at war-time prices. On Jan. 8, 1919, the British withdrew their monthly buying orders.

Mr. Hoover, as head of the United States Food Administration, at once wrote to President Wilson, setting forth the seriousness of the situation to the American agricultural, industrial and banking interests. "If there should be no remedy to this situation," he said, "we shall have a debacle in the American markets." Mr. Hoover also pointed out that before the peace negotiations could be opened auspiciously it was essential to have the better feeding of the liberated neutral and enemy territories of Europe in actual progress, as the foundation of stability in government antecedent to the settlement of the great problems that would come before the peace conference.

Mr. Hoover then suggested that while the large surplus of foodstuffs, many of them perishable, in this country was no longer needed in its entirety by the Allies, it should be used for the good of Europe, and particularly for the acute needs of the Balkan States, for Turkey and Austria, also for Belgium and Poland. He further said that food should be made available to neutral countries, while foodstuffs should be offered to Germany "subject to payment therefor and other conditions that the associated governments may impose."

POST-ARMISTICE RELIEF.

President Wilson acted at once and thus it was, notwithstanding evident hesitation on the part of the Treasury and doubt as to the powers of the Secretary of the Treasury in the premises, that loans to foreign governments were continued by the United States Government until late in 1920.

At the date of the armistice our loans totalled $7,077,115,000. When all loans had ceased, Sept.

28, 1920, the total had reached $9,466,288,000. Thus in a period of two years of peace, the loans had increased in the great sum of $2,389,168,000. Of this amount $295,467,000 represented accrued interest, therefore the actual increase was about two billion dollars. About one-half of this amount seems to have gone to clear up war accounts. The balance, and more than another billion dollars obtained from other sources of income, appears to have been spent by foreign governments in the United States during these two years for food and other supplies.

The total of post-armistice inter-nation loans for relief and reconstruction was $1,913,189,000. Of this amount, the United States lent directly $878,488,000 which was undoubtedly used for relief purposes. Other post-armistice lenders for relief purposes were France, $757,357,000; Italy, $114,104,000; and Great Britain, $161,240,000; although some of these loans were known to have been made indirectly by the United States, for example, loans of $62,000,000 each made by England and Italy to Austria, the funds for which are known to have come from Washington. The large post-armistice borrowers for relief were Austria, $153,424,000; Belgium, $308,244,000; Czechoslovakia, $263,246,000; Poland, $420,200,000; and the Serb-Croat-Slovene State, $418,647,000.

But that the work of putting our own household in order, and at the same time lending a helping hand to our struggling neighbors, who with the exception of notable Great Britain, France and Poland, have been less equal to the task, has gone forward splendidly under the master hand of our highly equipped, patient, painstaking and self-sacrificing Secretary of the Treasury. According to his report to Congress the Treasury closed the fiscal year 1924 with the largest surplus in the history of the government. Total ordinary receipts during the year aggregated $4,012,044,701 and total expenditures chargeable against such receipts were $3,506,677,715, showing a surplus of $505,366,986. This compares with an estimated surplus of $329,639,624 in my previous annual report, the actual surplus being about $175,000,000 in excess of the estimate.

The two accounts which varied the greatest from estimates and which were largely responsible for the additional surplus were "Railroads" and "Receipts from foreign governments." Both of these accounts were affected by changes in the money and investment markets. While total receipts from foreign governments corresponded closely with estimates, the method of payment changed.

After Liberty bonds went above par they were no longer used in payment of foreign obligations. In June $50,000,000 in payment of interest was received in cash instead of in our own securities as expected. This amount, therefore, did not appear as a corresponding expenditure on account of the cancellation of securities.

With the decline in interest rates, moreover, the railroad securities heretofore acquired by the government could be refunded at lower interest rates by the railroads, and were, therefore, paid off or purchased; and instead of a net cash outgo in the railroad account there was a net cash income, making a difference of some $120,000,000 over the earlier estimate. These two factors, therefore, are responsible for about $170,000,000 of the increase in the actual surplus over the estimate.

FOUR YEARS OF ECONOMY.

On the other hand, income taxes, which aggregated $1,842,000,000, were only $8,000,000 less than the estimate, although a 25 per cent. reduction had been made on six months of the 1924 payments of personal income taxes. This reduction amounted to something over $100,000,000, it is estimated. In spite of the reduction, income taxes were approximately $163,000,000 larger than in 1923, due mainly to the increase in business activity over the previous year and the consequent growth of profits. Customs receipts were $545,637,504, or about $24,000,000 less than estimated, and miscellaneous internal revenue was $953,012,617, or about $20,000,000 in excess of the estimate.

The extent of the reduction in government expenditures during the past four years is shown in the following table:

Fiscal Year.	Total Ordinary Receipts.	Expenditures Chargeable Against Ordinary Receipts.	Surplus.
1920..	$6,694,565,388	$6,482,090,191	$212,475,197
1921..	5,624,932,960	5,538,209,189	86,723,771
1922..	4,109,104,050	3,795,302,499	313,801,651
1923..	4,007,135,480	3,697,478,020	309,657,460
1924..	4,012,044,701	3,506,677,715	505,366,986

The gross public debt was reduced $1,098,894,375 during the fiscal year ended June 30, 1924, and stood at $21,250,812,989 on the latter date. This reduced the annual interest charge by over $45,000,000. The debt on June 30, 1919, was $25,484,000,000.

DOMESTIC RECOVERY.

While sound underpinnings have been built under the European economic structure during the last twelvemonth, our own financial and business conditions have shown a steadily increasing pace of recovery from the post-war depression and from the minor swing downward which developed in the spring of 1923 and which was due to the rather mild application of that household rod which the public has used so effectively to castigate profiteers whose exactions have gone to the limits of its patience—the buyers' strike. The stride toward enlarged public demand and the increasing rapidity of the flow through the arteries of trade are shown by the course of commodity prices, the bank clearings and the traffic record of the railways.

Comparative buoyancy in commodity prices is indicated during November by Bradstreet's Index Number for Dec. 1, which marks another rise in general price levels, the fifth successive advance from the low point of July 1. Only three of the thirteen groups of prices declined in November, these being textiles, building materials and naval stores, and these declines being slight, nine groups advanced, including breadstuffs, live stock, provisions and fruits; besides hides and leather, metals, coal and coke, oils and miscellaneous products. Bradstreet's Index Number as of Dec. 1 was $13.5289, which marks a gain of 1.3 per cent. for November and of 10.6 per cent. from the low point of this year on July 1.

Compared with a year ago advance is 6-10 of 1 per cent., while the decline from March 1, 1923, is 3 per cent. From the low point after deflation, touched on June 1, 1921, a rise of 27 per cent. is shown, while from the high point of Feb. 1, 1920, before deflation, the decrease is 35 per cent. As regards the movement of individual prices for November, 45 articles advanced, 19 declined and 42 remained unchanged.

Movement of freight over the railroads of the country, according to the records kept by the American Railway Association, were the heaviest during the fall months than ever before in the history of the carriers for this season of the year. As these compilations cannot be made public in complete form until some time after the completion of the period which they represent, the latest available before the Almanac goes to press are those of the week ending Nov. 22, but they may be regarded as typical indices. In the week referred to loading of revenue freight totalled 1,010,122 cars, the eleventh 1,000,000-car week of 1924. Due to the usual seasonal falling off in loadings, total movement was a decrease of 5,582 cars, or 4-10 of 1 per cent. under the previous week of this year, but it was 19,823 cars, or 1.9 per cent. over the corresponding week of last year, 63,480 cars, or 6.6 per cent. over 1922, 336,657 cars, or 49.9 per cent. over 1921, and 206,421 cars, or 25.6 per cent. in excess of the same 1920 week.

Coal loadings in the week of Nov. 22 amounted to 195,553 cars, the greatest number loaded during any one week since Feb. 9 of this year, 7,324 cars over the week before and 13,301 cars over last year, but 3,211 under two years ago. Loadings of coke were 10,177 cars, 138 over the previous week, but 1,544 under 1923 and 2,945 under 1922. Ore loadings amounted to 15,316 cars, 5,520 cars under the preceding week and 9,553 under last year, but 75 over 1922.

Loadings of grain and grain products totaled 59,697 cars, 4,384 cars above the week before, 7,615 over 1923 and 4,791 above two years ago. Livestock loadings were 44,051 cars, 1,334 under the previous week, but 4,616 over 1923 and 3,655 over 1922.

Merchandise and less than carload lot loadings totaled 252,716 cars, 1,052 under the week before, but 2,020 over 1923 and 25,191 over 1922. Miscellaneous freight loadings amounted to 360,594 cars, 11,910 below the preceding week, but 5,524 over last year and 29,597 in excess of 1922. Loadings of forest products totaled 72,018 cars, 2,388 over the previous week, but 2,156 below 1923 while 6,327 over 1922.

Compared by districts, increases in the total loading of all commodities over the previous week were reported in all districts, except the eastern, Allegheny, Pocahontas and northwestern. All districts showed gains over the same 1923 week except the eastern and Allegheny, which were the only ones below the corresponding 1922 period.

BUSINESS CASUALTIES IN 1924.

Business casualties must be taken into account when tracing business tendencies and the record during the twelvemonth is scarcely as satisfactory as the others. Failures in the United States for ten months totaled 17,790, according to Bradstreets, an increase of slightly less than 3 per cent. from the like period of 1923, but liabilities, swelled by many bank failures in the first half of the year, totaled $636,588,772, a sum 15 per cent. larger than a year ago and 5.6 per cent. larger than in 1922, but 7 per cent less than in the like period of 1921, which

year saw the peak of liabilities for all time, consequent upon the after-war deflation

But this shadow on the business background has thrown a brighter silhouette as the year progresses toward the close. November, a short month with two holidays in most areas, turned in a light total of failures and of liabilities, 1,460 suspensions with liabilities of $29,014,244. There is here shown a decrease of 7.4 per cent. in number from the October total, but there is also shown a decrease of 11.6 per cent. from November last year, of 17 per cent. from November, 1922, and of 26 per cent. from November, 1921. The November total, however, exceeds that for November, 1920, by 36 per cent. Liabilities for November were 37 per cent. below those for October, 57 per cent. below the total for October a year ago, and the lightest liabilities reported in any month but September since August of 1920. The South is the only section showing an increase in number over November a year ago, and liabilities are smaller in every group than a year ago, with an especially marked falling off noted in this respect in the Northwestern group, where, it may be recalled, liabilities a year ago were very large, owing to the large number of bank suspensions occurring.

Prosperity in this country is very largely dug out of the earth, as the American farmer furnishes over 60 per cent. of the purchasing power of the Nation. The enormous increase in the price of farm products measures an increased length for his purse strings, and a corresponding incentive to the manufacturers and the merchants to enlarge their production and increase their stocks.

American farmers increased wealth of United States by $12,816,000,000 this year, a gain of $612,000,000 over 1923, says the Sears-Roebuck Agricultural Foundation. Production of 6,400,000 farmers averaged $2,000, an increase of $95 a farmer. In 1921 agricultural production was valued at $9,922,000,000. Gain by wheat and small grain farmers was 30 per cent. The corn farmers gained little owing to decrease in production. The farmer's dollar is worth at least 10 cents more than in 1923.

Sales of farms this year have been 42 per cent. more numerous than during 1923, according to a national-wide survey just completed by the National Association of Real Estate Boards. Furthermore, there has been an increase of 44 per cent. in the actual number of acres sold, while the total consideration paid for these acres has jumped 65 per cent.

There is an ancient theory in Wall Street that the most reliable indices of the upward and downward swing of the industrial pendulum are—Pigs and Pig Iron. The former is a mere figure of speech designating the farming industry to whose increased prosperity attention has been called. The records of the iron trade which trace a steady recovery from the depression of last year are equally impressive and encouraging. The condition of the trade is very accurately reflected in the operations of the United States Steel Corporation whose mills are now operating at 75 per cent. of capacity as compared with 44 per cent. in July when the low point of the depression was reached.

Entirely apart from their partisan predeliction, business men in this country have come to adopt a course of caution and conservatism during Presidential years, and this year their unwillingness to assume the hazards of enterprise on an enlarged scope was due to the interjection of the third party into the contest and the fear that the election might be thrown into Congress where radicalism and the unknown dangers conservatism dreads might have prevailed. The relief that American captains of industry and a very great part of the business public felt at the results of the election found expression not only in an immediate revival in business courage and enterprise but in a tremendous expansion in activities of the market for securities.

THE BULL MARKETS.

The outburst apparently has gone into such solid ground that it not only represents a feel of temporary elation but foreshadows an epochal business and financial expansion. Between Election Day until December 3 there have been twenty-one million-share days, whereas during the entire 1921 there were only seventeen, and in 1923 only eighty-six. The following compilation made by Dow, Jones & Co. gives the record of the great bull market from November 5 to and including December 4. The table gives the total trading each day since the Election, in rails and industrials, and percentage of total of each. It also gives the total number of both common and preferred stocks traded in daily:

1924 Dec.	Total All Stocks.	Railroads. Shares Sold.	Railroads. % of Tot.	Industrials. Shares Sold.	Industrials. % of Tot
4	2,360,400	992,800	42.06	1,367,600	57.93
3	2,030,800	727,500	35.82	1,303,300	64.17
2	1,653,400	511,400	30.93	1,142,000	69 06
1	2,229,100	660,600	29.63	1,568,500	70.36
Nov.					
29	‡1,186,100	228,100	19.23	958,000	80.76
28	2,477,800	465,300	18.77	2,012,500	81.22
26	2,133,500	440,800	20.66	1,692,700	79.33
25	1,907,500	431,100	22.60	1,476 400	77 39

5	1,745,700	591,000	33.85	1,154,700	66.14

‡ Saturday.

The number of issues traded in was 498 on Nov. 5, up to 574 on Dec. 1.

The record number of one, two and three million-share days on the New York Stock Exchange since 1897 follows:

Yr.	One Mil.	Two Mil.	Three Mil.	Yr.	One Mil.	Two Mil.	Three Mil.
1924.	61	12	0	1909.	51	0	0
1923.	86	0	0	1908.	41	0	0
1922.	116	1	0	1907.	41	3	0
1921.	17	0	0	1906.	114	4	0
1920.	85	1	0	1905.	105	0	0
1919.	152	7	0	1904.	52	4	0
1918.	19	0	0	1903.	12	0	0
1917.	37	1	0	1902.	41	0	0
1916.	68	10	1	1901.	83	11	2
1915.	47	0	0	1900.	23	0	0
1914.	2	0	0	1899.	28	0	0
1913.	0	0	0	1898.	0	0	0
1912.	5	0	0	1897.	0	0	0
1911.	12	0	0				
1910.	24	0	0	Tot.	1.322	54	3

The highest daily average of sales for one month was November, 1924, daily average trading being 1,851,452 shares (Saturdays included).

But the most impressive and reassuring feature of the current rise in securities and the great volume of transactions is that their financial requirements have imposed no burdens on the banks through loan expansion. According to the leading wire and commission houses their loans have not increased more than 10 to 15 per cent., which is remarkable in view of the fact that the averages of twenty industrial stocks, compiled by the same authority, have increased from 99.18 on Oct. 14, 1924, to 111.38 on November last and the averages of twenty rails have risen from 86.12 on Oct. 14 last to 97.21 on Dec. 3 last. This increased margin of borrowing power has not been proportionally recorded in the expansion of Stock Exchange loans—the total of which is estimated at $1,400,000,000 as compared with a total of $2,000,000,000 in the record. The conclusion, or at least the very strong impression, is that the great American public and the banking mentors have been buying securities for the strong boxes and paying for them in cash and its equivalent. Before sounding an alarm, therefore, even the more cautious commentators may safely await the hoisting of the danger signal "Watch your step" when bank loans raise the red semaphore.

FEDERAL FARM LOAN BOARD.

(The Farm Loan Board and Bureau are at the Treasury Department, Washington, D. C.)

The members of the Federal Farm Loan Board as of Nov. 15, 1924, were: *Chairman (ex-officio)*—Andrew W. Mellon; *Farm Loan Commissioner*—Robert A. Cooper.

Other members—John H. Guill jr., Elmer S. Landes, Lewis J. Pettijohn, Edward E. Jones, Merton L. Corey.

Secretary—C. R. Heflin.

THE FEDERAL POWER COMMISSION.

Commissioners—Chairman, Sec. of War—John W. Weeks; *Sec. of the Interior*—Hubert Work; *Sec. of Agr.*—H. M. Gore; *Exec. Sec.*—O. C. Merrill; *Chief Eng.*—Col. Wm. Kelly, U. S. Army; *Chief Counsel*—Major Lewis W. Call, U. S. Army, ret.; *Chief Accountant*—Wm. V. King; *Chief Clerk*—F. W. Griffith.

BOND MARKET REVIEW FOR 1924.

By Harold W. Belcher.

The 1924 bond market was the most remarkable in the history of Wall Street. All records were broken for new financing, foreign loans leading the way. Money was available in unlimited quantities at exceedingly low rates. The upward trend was consistent.

Each month brought favorable developments. Tax reduction was received with enthusiasm. The soldier bonus was put through without Government funding. Money rates dropped to the lowest point since 1916 and remained there. Approval of the Dawes plan promised to settle the troublesome Ruhr problem. The Federal Reserve Bank of New York cut its rediscount rate to 3 per cent. The German loan was the greatest success of all time. The Republican landslide in November, following defeat of the Labor Government in Great Britain, dispelled all fears of radical control. Finally, the French loan, which had been hanging over the market, was subscribed far beyond expectations. Not a cloud remained on the financial horizon. Consensus of opinion in mid-December was that the bull market would continue well into 1925.

The $200,000,000 German loan, of which $110,000,000 was floated in this country, was the outstanding event of the year. Strides that had been taken toward genuine peace since the armistice had no better measure than the huge oversubscription of the issue. Preliminary indications pointed to a sizable demand for the bonds, but the manner in which the public scrambled for them surprised even the bankers. Close to $1,000,000,000 worth of bonds could have been sold, it developed. Offered by J. P. Morgan & Co. and a Nation-wide syndicate at 92, the scramble of investors pushed the price to 95⅝ before demand was satisfied. Professional speculators naturally realized large profits on the upturn, but a week later the bonds still were selling at a premium of 1⅛ points. Early in December they had achieved 95 and gave promise of eventually attaining par. In Europe much the same conditions existed. London's reception of the loan was so spontaneous that police reserves were called out to protect the Bank of England from hordes of would-be investors. Even France subscribed heavily, while Holland, Switzerland and other Continental countries reported inquiry far beyond ability to fill.

The $100,000,000 French loan, also subscribed ten times over, came some weeks later in November. This financing was the direct result of the success of the German business and certainty that the Dawes plan was in a fair way to complete accord. Like the German loan, the French issue sold immediately at a premium. It was placed on the market by the same syndicate which had backed the German funding and was well distributed in the hands of comparatively small investors. Foreign bonds, wavering a trifle until the financing was out of the way, then leaped to new activity.

FOREIGN FINANCING EXCEEDS $1,000,000,000.

Immediately after the German loan, and while the French business was under discussion, American banking houses began extending credits to German industrial companies. Late in November it was estimated that these credits, mostly of a private nature, had exceeded $200,000,000, and it was estimated that $300,000,000 would be the proper figure by the end of December. Several good sized German industrial bond issues appeared on the market in the last two months of the year, and it was apparent that a great mass of this kind of financing would be experienced in 1925. Incidentally, Charles E. Mitchell, President of the National City Bank, sounded a warning to buyers of such bonds He cautioned that it would be wise to scrutinize carefully not only security offered for such loans but the credentials of the negotiators.

Besides the French and German loans the market quickly assimilated a $150,000,000 Japanese Government bond issue in February, the direct result of the earthquake disaster Again, in September J. P Morgan & Co. rapidly marketed $30,000,000 Kingdom of Belgium bonds. In July, Speyer & Co. sold $7,500 000 Kingdom of Hungary 7½s part of a $50,000,000 loan offered by London bankers, and that same month a $12.000,000 Finland industrial issue was placed by Lee Higginson & Co.

An interesting September flotation was that of $10,000,000 Paris-Orleans Railroad Co. 7s, put out by a syndicate headed by A Iselin & Co. The French Government guaranteed funds sufficient to pay interest. This was the largest offering of French railroad dollar bonds placed in the American market with the exception of the Paris-Lyons-Mediterranean financing, which totaled $50,000,000.

At the close of November, with all of December to be accounted for, it was apparent that foreign financing in this market, including private credits to German industrial firms, would exceed $1,000,000,000 for 1924. Added to that, up to December, domestic corporations had issued securities in amount of $3,771,343,000, against $3,396,877,350 in the corresponding eleven months of 1923. This indicated a grand total of all financing for 1924 of somewhere in the neighborhood of $5,000,000,000.

The year in United States Government bonds was most active, with all listed issues reaching new high levels. Satisfaction over the tax reduction plan stimulated Liberty loans early in the year, while news that no new financing would be necessary to pay the soldier bonus had an immediate bullish effect.

Ease of money was an ever-present factor, while reduction of the Federal Reserve rate was a powerful advantage. Sinking fund buying by the United States Government stimulated Third 4¼s well into the summer, and the Federal Reserve Banks led private institutions in steady accumulation of these loans. By early fall it was evident that peak prices in both Liberty bonds and high grade domestics had been reached. While strong demand continued for gilt edged securities of all kinds, so much capital was idle that an overflow developed into speculative issues. Second grade railroad bonds particularly profited and had established substantial gains by the close of November.

The speculative rails, active early in the summer and a trifle slow later on, burst into new enthusiasm just before election. Here fears had existed that La Follette might carry the country and that Government control of the railroads might result. Wall Street decided early, however, that Coolidge would win and acted accordingly. Quiet accumulation of the cheap rails was apparent as early as September, and by late October was in full force. Then, the election over, a strong sweep forward began. The whole railroad list soared, carrying the general market with it.

General opinion existed early in December that speculative rails were due for a sustained advance. President Coolidge's message advocating railroad consolidations had a decided bullish effect and it was easy to see that all sorts of comparatively inactive issues were coming to life. Investors and speculators alike were buying heavily on the theory that junior railroad liens would be strengthened by consolidations with powerful roads. Buyers also had the comforting assurance that with Coolidge in the White House the Esch-Cummins bill would be unmolested and that the railroads would be free to work out their future along the lines initiated in the previous Administration.

Foreign bonds, including those of European and South American nations, experienced a good year. New high levels were scored repeatedly, and possibly because of the ease of money strong buying saved the day at critical times. Approval of the Dawes plan was of course an outstanding bullish impulse, while the success of the German loan did more than anything else to convince investors that foreign mortgages were safe. Even Japanese loans held up quite well in the face of the earthquake disaster and the exclusion of Japanese nationals from the immigration list. Early losses as the result of Japanese exclusion rapidly were being made up in December.

Traction bonds rallied after election when it was certain that the New York State Transit Commission would not be disturbed. Gov. Smith's determination to drag the whole traction snarl into the spotlight also helped considerably.

Municipal bonds, because of their tax exempt provisions, maintained great strength all of the year. The Daily Bond Buyer, market authority on these loans, said early in 1924 that all records for municipal financing would be broken, and this prediction was established in a short time. The November election proved that 1925 activity probably would be even greater. Municipal and State bond issues in excess of $200,000,000 were authorized Nov. 4, and it was indicated that the amount might reach $300,000,000. The largest single issue authorized was $100,000,000 Illinois road bonds. New York State voted flotation of $15,000,000 park bonds.

PUBLIC UTILITY BONDS.

The market for public utilities exceeded all records. Early in October it was evident that $500,000,000 long-term bond issues would be ex-

ceeded. Short-term bonds totaled approximately $100,000,000 and utility stock issues had reached $400,000,000. Public confidence in utility bonds was marked. Experts agreed that utility companies were on the threshold of a new era of prosperity.

Industrial bonds were inactive for several months, reviving late in the fall. This trend was due to the strong demand for high grade railroad, utility and municipal bonds during the summer, causing industrials largely to be neglected. As time went on, however, reports of reviving business stimulated fresh demand. Bonds of companies likely to profit by European rehabilitation naturally started the ball rolling, but the inquiry rapidly spread through the list.

The future of Mexican Government loans excited considerable anxiety several times during the year. The Government of Mexico, harassed by lack of funds and confronted with a revolution, finally was obliged to default on the $500,000,000 Mexican debt agreement. Bankers suspended the debt pact and hoped for the best. As the year neared its close the situation appeared as muddled as ever, except that assurances had been received that payments of interest and principal would be renewed as quickly as possible. In this connection Mexico was hoping for the success of a mysterious $50,000,000 loan promulgated by J. L. Arlitt, an obscure Texan banker. Early in December the success of the financing was nebulous, although Arlitt had assured Mexico an initial payment of $10,000,000 cash would be forthcoming in the near future. The Texan maintained discreet silence as to the backers of the loan and refused information as to how the bonds had been marketed. The loan, backed by oil production, was needed by Mexico to pay domestic obligations and resume payments on the debt agreement.

Amounts of bonds, notes and stock issues by railroad, industrial and public utility corporations in the eleven months ending with November, 1924, were as follows:

	Bonds.	Notes.	Stock.	Total.
Railroad	$614,419,000	$347,486,200	$11,000,000	$972,905,200
Industrial and miscellaneous	816,245,680	170,247,000	297,455,490	1,283,948,170
Public utility	833,654,400	112,778,950	568,056,880	1.514,490,230
Total	$2,264,319,080	$630,512,150	$876,512,370	$3,771.342,600

Following is a compilation of foreign Government loans assumed by American bankers, in the order of presentation in 1924:

Government of:	*Amount.*
Argentine 6s, '57	$40,000,000
Buenos Ayres 6½s, '55	8,490,000
Newfoundland 5½s, '44	3,500,000

United States Government financing met with the same quick response as in 1923. In June $150,000,000 Treasury 2¾ per cent. certificates experienced a large oversubscription, and in September $350,000,000 one-year 2¾ per cent. notes were taken up in a few hours. Early in December the Treasury offered $200,000,000 thirty-year 4 per cent. bonds in exchange for cash, March notes and Liberty third 4¼s. This issue resulted in the largest demand since the war, Secretary Mellon announcing December 6 that cash subscriptions alone had totaled $500,000,000, and offers of cash and bond exchanges better than $1,000,000,000.

The heavy inquiry for the new 4s, while something of a mystery to the layman, was due to the basis on which the new issue was sold. Offered at par, the new bonds were worth 100⅝ in the open market, compared with other listed Federal securities, and first sales on the Stock Exchange were at that price. The First National Bank of New York willingly would have taken the entire issue, and with reason.

UNITED STATES RAILROAD LABOR BOARD.

For the Public Group—Ben W. Hooper (Chairman), ex-Governor of Tennessee; Edwin P. Morrow, former Governor of Kentucky; G. Wallace W. Hanger (Vice Chairman), of the District of Columbia, formerly Chief Clerk of what is now the United States Bureau of Labor Statistics, and since 1913 Assistant Commissioner of the United States Board of Mediation and Conciliation.

For the Labor Group—E. F. Grable, of Michigan, ex-President United Brotherhood of Maintenance of Way Employees and Railroad Shopmen; A. O. Wharton, of Missouri, of the Railway Employees Department of the American Federation of Labor, and Walter L. McMeniman, of Massachusetts, ex-Legislative Representative Brotherhood of Railroad Trainmen.

For the Management—Horace Baker, of Ohio, formerly General Manager of the Cincinnati, New Orleans & Texas Pacific Railway Co.; J. H. Elliott, formerly General Manager of the Texas & Pacific Railway Co.; and Samuel Higgins of New York, ex-General Manager New Haven Road.

Secretary—L. M. Parker. Headquarters, Chicago.

Labor Review for 1924.

By John J. Leary Jr.

THE WORLD ALMANAC in its forecast of labor for 1924 saw but one cloud on the industrial horizon —the possibility of a general strike of bituminous miners on April 1. Otherwise all seemed serene.

Now that the year is closing, it is possible to say that the forecast proved 100 per cent. accurate. Settlement of the coal dispute by the extension of the old scale for two years averted any general disturbance; the year ended without any strike of national scope, any great teamsters' or building trades' strike, or any great street car strike

There have, however, been important strikes that attracted local or trade attention, such as have ruled in the soft coal regions of Tennessee and Kentucky, in Oklahoma and to a greater extent in the thinly organized fields of West Virginia, and "outlaw" strikes in the anthracite district adjacent to Scranton, Pa.

The nearest approach to serious trouble in New York City was in the ladies' garment trade, where a general strike was aborted by the agreement of manufacturers to curb and seek a cure for evils peculiar to the contract system of making garments. The cure has not been effected, but a serious effort to find one is being made

Nor was the year marked by any serious attempt to lower wages or change working conditions Where wage scales have expired by limitation they have generally been renewed without change, the action of the bituminous operators and United Mine Workers providing a precedent that was generally followed. The exception to this general statement is found in the cotton mills, wages having been cut in the South, and in the closing months of the year in the Blackstone Valley of Rhode Island, and by the Amoskeag Company, whose mills in Manchester, N. H., are the largest in America. Conversely, increases in wages have been few and far between.

The year, however, saw a great deal of unemployment. Beginning in the spring, industry gradually damped down until August, when reports from practically every industry showed more unemployment than at any time since the depth of the 1921 depression. In New York City the unemployed as of August totaled approximately 300,000, or double the normal margin. Other cities were in much the same condition. The greatest unemployment was in coal, iron and steel, and the textile trades. A revival in business, beginning with a spurt in iron and steel late in July, began to take up the slack in August, and by Oct. 1 conditions were much improved, the production of steel jumping from 40 to 65 per cent. of capacity with a corresponding reduction of unemployment of steel workers.

The bituminous coal trade benefited by the increased demands of the steel industry—it requires two tons of coal to make one ton of steel—and by seasonal demands for fuel, but not sufficiently to give employment to the tens of thousands wholly idle, or full time work to those engaged but part time, a condition due to the enormous overdevelopment of the industry during the war and since.

The metal trades workers, likewise overexpanders also suffered, with the railroads, large employee, of their class of labor closing down or otherwise restricting the output of their repair shops, contributing largely to the volume of unemployed during the early summer months.

What was true of coal and the metal trades was also true of the textile industry. Those who spin and weave experienced the worst year since 1914, with the older sections of New England suffering more perhaps than the newer mill towns of the South. High prices for raw cotton, with consequent high prices for cloth and the diminishing demand usually the accompaniment of high prices, were the main factors in creating this condition.

The building trades, as for several years past, enjoyed general good times with little unemployment, though the intense demand for artisans that in preceding years led to unheard of wages abated, and a tendency to slack off was noted in the closing months of the year.

Organization proceeded slowly during the year. The special committee in charge of organizing the steel workers operated during the year from headquarters in Chicago. So far as the records show, it made little headway, owing to the large volume of unemployment in the industry. The railroad unions, hard hit by the strike of 1922, succeeded in checking the falling off in membership due to the loss of the strike. Some few unions made gains in membership, but generally the figures, where not stationary, showed declines in the number of dues-paying members.

Indorsement of La Follette and Wheeler by the Executive Council of the American Federation of Labor on Aug. 4 marked a practical if not exactly technical abandonment of the Gompers non-partisan political policy. The action of the council was indorsed by many unions, rejected by a few and ignored by others. This reception by the unions and the failure of La Follette to make the showing expected unquestionably served to strengthen the opposition within the federation to the formation of an official labor party.

AMERICAN FEDERATION OF LABOR.

The American Federation of Labor has its headquarters in the A. F. of L. Building, Washington, D. C. The national officers, re-elected Nov. 25, 1924, at El Paso, Texas, are.

Executive Council—President, Samuel Gompers, Secretary, Frank Morrison; Treasurer, Daniel J. Tobin, 222 E. Michigan St., Indianapolis, Ind ; First Vice-President, James Duncan, 25 Gilmore St., Wollaston, Mass.; Second Vice-President, Frank Duffy, Carpenters' Building, Indianapolis, Ind · Third Vice-President, William Green, 1102 Merchants Bank Bldg., Indianapolis, Ind., Fourth Vice-President, T. A. Rickert, Room 506, 175 W. Washington St., Chicago, Ill , Fifth Vice-President, Jacob Fischer, 222 East Michigan St , Indianapolis, Ind.; Sixth Vice-President, Matthew Woll, Room 701, 166 W. Washington St Chicago, Ill ; Seventh Vice-President, Martin F Ryan, 503 Hall Bldg , Kansas City, Mo , Eighth Vice-President, James Wilson, Second Nat Bk Bldg , Cincinnati, Ohio.

In the federation are 107 national and international unions representing 35,000 local unions. four departments. 49 State branches and 855 city centrals, and 2,900,000 paid-up members, with a total membership of 3,365,979

The receipts for the last fiscal year were $512 · 398; and the expenditures, $500,028 The Defense Fund on Aug 31, 1924, was $201,132

Departments—Building Trades, George F. Hedrick A. F. of L Bldg., Washington; Metal Trades, James O'Connell, A. F. of L. Bldg , Washington Railway Employees, B. M. Jewell, 4750 Broadway, Chicago; Union Label Trades, J. W. Hays, Bankers' Trust Bldg., Indianapolis, Ind.

The national and international unions affiliated with the American Federation of Labor, with the names of the several Presidents and the addresses of the headquarters are as follows:

Actors and Artists. John Emerson, 115 W. 42d St., New York, N. Y.

Asbestos Workers. J. A. Mullaney, 15 Benham Street, Elmhurst, L. I., N. Y.

Bakery and Confectionery Workers. No President.

Barbers. J. C. Shanessy, 222 East Michigan Street, Indianapolis, Ind.

Bill Posters. John Jilson, 607 Garrick Theatre Bldg , 64 West Randolph Street, Chicago, Ill.

Blacksmiths. J. W. Kline, 2922 Washington Boulevard, Chicago, Ill.*

Boilermakers J. A Franklin, Brotherhood Block, Kansas City, Kan.*

Bookbinders. Walter N. Reddick, A. F. of L. Building, Washington, D. C.

Boot and Shoe Workers. Collis Lovely, 246 Summer Street, Boston, Mass.

Brewery Workers No President.

Bricklayers Masons and Plasterers. William Bowen, University Park Building, Indianapolis, Ind.

Brick and Clay Workers Frank Kasten, 327 South La Salle Street Chicago, Ill

Bridge and Structural Iron Workers. P. J. Morrin, 1615-20 Syndicate Trust Building, St. Louis, Mo.

Broom Makers J. M. Bargin, 1503 Federal St., Pittsburgh, Pa

Building Service Employees. Wm. F. Quesse, 166 West Washington Street, Chicago, Ill.

Carmen. M F. Ryan, 503 Hall Building, Kansas City, Mo.*

Carpenters and Joiners. William L. Hutcheson, Carpenters' Building, Indianapolis, Ind.

Carvers Wood. August Schrempf, 446 East 89th Street, New York. N. Y.

Cigarmakers. George W. Perkins, 508 South Dearborn Street, Chicago, Ill.

Clerks. Post Office. Leo E. George, A. F. of L. Building, Washington, D. C.

Clerks, Railway. E. H. Fitzgerald, Cincinnati, O.*

Clerks, Retail. W. G. Desepte, Drawer 248, Lafayette, Ind.

Conductors, Sleeping Car. M. S. Warfield, 360-61 Union Station, Kansas City, Mo.
Coopers. Jacob P. Maurer, 6223 South Paulina St., Chicago, Ill.
Diamond Workers. Andries Meyer, 132 Joralemon Street, Brooklyn, N. Y.
Draftsmen, Technical Engineers, Architects. C. L. Rosemund, A. F. of L. Building, Washington, D. C.
Electrical Workers. J. P. Noonan, I. A. of M. Building, Washington, D. C.
Elevator Constructors. Frank Feeney, 14-15 Borough Hall Building, 391 Fulton Street, Brooklyn, N. Y.
Engineers, Operating. Arthur M. Huddell, 6334 Yale Avenue, Chicago, Ill.
Engravers, Metal. Norman H. Beach, 1334 Norton Street, Rochester, N. Y.
Engravers, Photo. Matthew Woll, 166 West Washington Street, Chicago, Ill
Engravers, Steel and Copper Plate. William A. Barnes, 121 East 31st Street, New York. N. Y.
Federal Employees. Luther C. Steward, 10 B. Street S. W., Washington, D. C.
Fire Fighters. Fred W. Baer, A. F. of L. Building, Washington, D. C.
Firemen and Oilers. Timothy Healy, 229 East 47th Street, New York, N. Y.*
Foundry Employees. Leonard Holtschult, Seventh and Chestnut Streets, St. Louis, Mo.
Fur Workers. Morris Kaufman, 9 Jackson Avenue, Long Island City, N. Y.
Garment Workers (Men's). T. A. Rickert, 175 West Washington Street, Chicago, Ill.
Garment Workers (Ladies'). Morris Sigman, 3 West 16th Street, New York, N. Y.
Glass Bottle Blowers. James Maloney, 1006 Colonial Trust Bldg., Philadelphia, Pa.
Glass Workers, Flint. William P. Clarke, Ohio Building, Toledo, Ohio.
Glass Workers, Window. Fred Vandegrift, 712 Park Bldg., Cleveland, Ohio.
Glove Workers. Thomas J. Mahoney, 4173 26th Street, San Francisco, Cal.
Granite Cutters. Sam Squibb, 25 Gilmore Street, Quincy, Mass.
Hatters. Michael F. Green, 418 Bible House, New York, N. Y.
Hod Carriers. D. D'Alessandro, 25 School Street, Quincy, Mass.
Horseshoers. Bernard Flatley, 92 Brill Street, Newark, N. J.
Hotel and Restaurant Employees. Edward Flore, 426 Woodbridge Avenue, Buffalo, N. Y.
Iron, Steel and Tin Workers. M. F. Tighe, 510 Fourth Avenue, Pittsburgh, Pa.
Jewelry Workers. John O'Hanly, 84 Gladstone Ave., Toronto, Ont., Canada.
Lathers. W. J. McSorley, Lathers' Bldg., Cleveland, Ohio.
Laundry Workers. J. F. Brock, 799 Second Avenue, Troy, N. Y.
Leather Workers. W. E. Bryan, Walsix Building, Sixth and Walnut Streets, Kansas City, Mo.
Letter Carriers. Edward J. Gainor, A. F. of L. Building, Washington, D. C.
Letter Carriers, Rural. Judd Austin, Independence, Kan.
Lithographers. Philip Bock, 205 West 14th Street, New York, N. Y.
Longshoremen. Anthony J. Chlopek, 704 Brisbane Building, Buffalo, N. Y.
Machinists. W. H. Johnson, I. A. of M. Building, Washington D. C.*
Maintenance of Way Employees. F. H. Fljozdal, 61 Putnam Avenue, Detroit, Mich.*
Marble Polishers, Sawyers, Tile and Marble Setters' Helpers. S. C. Hogan, 406 East 149th Street, New York, N. Y.
Masters, Mates and Pilots. John H. Pruett, 423 49th Street, Brooklyn, N. Y.
Meat Cutters and Butcher Workmen. P. E. Gorman, 166 West Washington Street, Chicago, Ill.
Metal Workers, Sheet. J. J. Hynes, Rooms 63-642 Transportation Building, Washington, D. C.*
Mine, Mill and Smelter Workers. C. H. Moyer, 502 Mercantile Building, 15th and Arapahoe Streets, Denver, Col.
Mine Workers of America, United. John L. Lewis, 1102-09 Merchants' Bank Building, Indianapolis, Ind.
Moulders. M. J. Keough, 528 Walnut Street, Cincinnati, Ohio.
Musicians. Joseph N. Weber, 110-112 West 40th Street, New York, N. Y.
Oil Field and Refinery Workers. R. H. Stickel, 208½ West 12th Street, Fort Worth, Texas.
Painters. G. F. Hedrick, Painters' and Decorators' Building, Lafayette, Ind.
Paper Makers. F. P. Barry, 25 South Hawk Street, Albany, N. Y.
Pattern Makers. James Wilson, 1007-09 Second National Bank Building, Cincinnati, Ohio.
Pavers. T. M. Doherty, 2430 Highland Avenue, Cincinnati, Ohio.
Paving Cutters. Carl Bergstrom, Box 130, Rockport, Mass.
Piano and Organ Workers. Jacob Fischer, 260 East 138th Street, New York, N. Y.
Plasterers. E. J. McGivern, 17 Robbins Road, Arlington Heights, Mass.
Plumbers and Steam Fitters. John Coefield, 1138 North Dearborn Street, Chicago, Ill.
Polishers, Metal. W. W. Britton, Neave Building, Cincinnati, Ohio.
Potters. John T. Wood, Box 6, East Liverpool, Ohio.
Powder and High Explosive Workers. Paul Bennett, Coalmont, Ind.
Printers and Die Stampers. Walter A. Burke, 162 Eustis Street, Roxbury, Mass.
Printing Pressmen. George L. Berry, Pressmen's Home, Tennessee.
Pulp and Paper Mill Workers. John P. Burke, P. O. Drawer "K," Fort Edward, N. Y.
Quarryworkers. No President.
Railway Employees, Street. W. D. Mahon, 260 East High Street, Detroit, Mich.
Railway Mail Association. William Collins, A. F. of L. Building, Washington, D. C.
Roofers. George W. Jones, 24 South Lincoln Street, Chicago, Ill.
Seamen. Andrew Furuseth, A. F. of L. Building, Washington, D. C.
Siderographers. Robert Nicholl, 402 Union Avenue, Mt. Vernon, N. Y.
Signalmen. D. W. Helt, 4750-54 North Kimball Avenue, Chicago, Ill.*
Stage Employees. W. A. Canavan, 110 West 40th Street, New York, N. Y.
Stereotypers. Thomas P. Reynolds, 3822 Sherman Avenue, Omaha, Neb.
Stonecutters. M. W. Mitchell, 324 American Central Life Building, Indianapolis, Ind.
Stove Mounters. W. L. Funderburk, 6466 Jefferson Avenue East, Detroit, Mich.
Switchmen. T. C. Cashen, 39 North Street, Buffalo, N. Y.*
Tailors. No President.
Teachers, American Federation of. Miss Florence Rood, 328 Cedar Street, St. Paul, Minn.
Teamsters. D. J. Tobin, 222 East Michigan Street, Indianapolis, Ind.
Telegraphers, Railroad. E. J. Manion, 3673 West Pine Street, St. Louis, Mo.*
Telegraphers, Commercial. Roscoe H. Johnson, 113 South Ashland Boulevard, Chicago, Ill.
Textile Workers. Thomas F. McMahon, Rooms 108-112 Bible House, New York, N. Y.
Tobacco Workers. W. R. Walden, Our Home Life Insurance Building, Louisville, Ky.
Tunnel and Subway Constructors. T. J. Curtis, 324 East 116th Street, New York, N. Y.
Typographical. James M. Lynch, Bankers' Trust Building, Indianapolis, Ind.
Upholsterers. William Kohn, 230 East 58th Street, New York, N. Y.
Wall Paper Crafts. Rudolph Heinl, 124 North Street, Jersey City, N. J.
Weavers, Elastic Goring. Charles Hunter, 19 West Ashland Street, Brockton, Mass.
Weavers, American Wire. John F. Curley, 203 Beech Street, Holyoke, Mass.

* Railway shop craft unions, which with "Big Four" brotherhoods make up so-called "standard railroad unions."

UNAFFILIATED LABOR ORGANIZATIONS.

The Railway Brotherhoods.

Brotherhood of Locomotive Engineers, President, L. G. Griffing, B. of L. E. Building, Cleveland, Ohio. 88,000 members.

Brotherhood of Locomotive Firemen and Enginemen, President, D. B. Robertson, 901 Guardian Building, Cleveland, Ohio. 108,401 members.

Brotherhood of Railroad Trainmen, President, W. G. Lee, American Trust Building, Cleveland, Ohio. 200,000 members.

Order of Railway Conductors of America, President, L. E. Sheppard, O. R. C. Building, Cedar Rapids, Iowa. 60,000 members.

Amalgamated Clothing Workers.

Amalgamated Clothing Workers, 31 Union Square, New York, N. Y., President, Sidney Hillman. 140,000 members.

Industrial Workers of the World.

The Industrial Workers of the World (1905) with headquarters in Chicago, Ill., have a membership of about 30,000. Ch. Gen. Exec. Bd., R. E. Daly. Gen. Sec-Treas., J. Grady.

TRADE UNION MEMBERSHIP OF THE WORLD.

According to the annual report of the Executive Council of the American Federation of Labor, dues paying membership in the unions affiliated with it during the sixteen months ending Aug. 31, 1923, averaged 2,926,468. This number does not represent the actual membership, in that members out of work or on strike do not as a rule pay dues, though they continue to hold membership cards. Indeed so well informed a person as Samuel Gompers, speaking at the Portland convention, declared he did not know, and did not know where he could learn, the actual membership at any given time. The actual membership was approximately 3,350,000.

The average membership on which dues were paid to the Federation for twenty-eight years beginning in 1897 follows:

Year.	Membership.	Year.	Membership.
1897	264,825	1911	1,761,835
1898	278,016	1912	1,770,145
1899	349,422	1913	1,996,004
1900	548,321	1914	2,020,671
1901	787,537	1915	1,946,347
1902	1,024,399	1916	2,072,702
1903	1,465,800	1917	2,371,434
1904	1,676,200	1918	2,726,478
1905	1,494,300	1919	3,260,068
1906	1,454,200	1920	4,078,740
1907	1,538,970	1921	3,906,528
1908	1,586,885	1922	3,195,635
1909	1,482,872	1923	2,926,468
1910	1,562,112	1924	2,900,000

Outside of the American Federation of Labor there are organizations of workers with an estimated total membership of 600,000, of which number some 500,000 are credited to the "Big Four" Railroad Brotherhoods. This makes a total membership of approximately 4,000,000, or substantially the membership reported by the federation in 1920, when all organizations were at their peak in membership.

The Labour International Year Book for 1923, prepared by the Labour Research Department and published by the Labour Publishing Company, Ltd., 38 Great Ormond Street, London, gives the total membership claimed by the International Federation of Trade Unions (Amsterdam) as of August, 1922, as 21,991,615.

It is stated that no account is taken in the figures of minority affiliations of the R. I. L. U. (Red International Labor Unions).

The statistical department of the Federation also lists the trade union membership of Mexico at 800,000; of Australia as 684,000; and of New Zealand as 83,000; which with the 4,000,000 in the United States makes a grand total of 27,558,615.

The officials of the International Federation of Trade Unions, submitted the membership figures and their report to the Third Ordinary Congress, which was held at Vienna, Austria, in June, 1924. The figures are as of December 31, 1923.

Europe: Austria	1,049,949	(a)
Belgium	618,871	
Bulgaria	14,803	
Czechoslovakia	388,294	(a)
Denmark	233,116	
France	757,847	(a)
Germany	7,187,251	
Great Britain	4,360,268	
Holland	182,893	
Hungary	167,242	
Italy	212,016	
Jugo-Slavia	66,166	
Latvia	12,658	
Luxemburg	12,100	(a)
Poland	369,991	
Roumania	36,000	
Spain	211,085	
Sweden	313,022	
Switzerland	155,000	
Asia: Palestine	8,000	
North America: Canada	152,500	
Africa: South Africa	10,000	
Total	16,528,072	

(a) December 31, 1922.

The report of the International Federation of Trade Unions states that the Trade Union Federations of Norway, (96,000); Greece, (170,000) Argentina, (75,000) and Peru, (25,000), are no longer affiliated with the Federation. To offset these losses, however, the International Trade Federation of Jugo-Slavia, Palestine and Roumania have affiliated.

The membership of organizations throughout the world not affiliated with the International Federation of Trade Unions, including all organizations in the United States and in Russia, is as follows:

Christian Unions	3,025,525
Unions with extremist tendencies	825,758
Communist Unions	5,358,064
Neutral Unions	3,965,148
Fascist in Italy	2,000,000
Miscellaneous	7,179,785
Total	22,354,280

The total number of organized workers therefore is 40,928,610.

CONSUMERS' CO-OPERATIVE SOCIETIES IN THE UNITED STATES.

(By the Bureau of Labor Statistics, U. S. Dept. of Labor.)

It is now generally acknowledged that the co-operative movement as we know it to-day was inaugurated in 1844 by twenty-eight flannel weavers of Rochdale, England, as a means of relief from the existing poverty, unemployment, adulterated food, and exorbitant prices. The movement has remained pre-eminently a working-class movement and as such has spread to every continent.

The United States was one of the first countries to follow the lead of the "Rochdale pioneers," as they are called. The first consumers' co-operative organization in this country is said to have been a buying club established in Boston in 1844.

Out of this club grew the powerful New England Protective Union, which flourished for a while but was disrupted by internal quarrels and was finally superseded by the American Protective Union. Through the efforts of the latter some seven hundred stores are said to have been established in New England.

During the early seventies the Patrons of Husbandry, a farmers' order, established a number of co-operative stores, some of which still exist.

Not all of the early co-operative ventures were strictly co-operative in principle. In many cases the co-operative idea was subordinated to some other economic, political, or social theory which caused the failure of the co-operative scheme. This was true of the movement supported by the Knights of Labor about 1884, in which the co-operative feature was incidental to their political program, the failure of which destroyed the stores.

In 1874 a purely co-operative organization, the Sovereigns of Industry was established. This association opened stores all through the North Atlantic Coast States, but failed in 1879 through poor business management.

From that time until the end of the century the co-operative movement in the United States languished, only a few isolated stores surviving. Of late, however, and especially during and since the war, interest in all lines of co-operative activity has revived.

With the beginning of the war prices began to rise. Wages rose also but less rapidly and not for all workers. Feeling the economic pinch, people began to cast around for some means of relieving it. Co-operation seemed to promise one. Accordingly interest in the subject awoke and information began to be sought.

Learning of the wonderful results obtained in Great Britain and on the Continent, Americans set out to obtain these results for themselves. Co-operative societies sprang up everywhere, and a high point of co-operative interest and organization was reached in the latter part of 1919 and the first half of 1920.

TYPES OF CO-OPERATIVE SOCIETIES.

It is difficult to make a clear-cut classification of the different forms of co-operation. Roughly, there are three branches of the movement: 1, co-operative credit; 2, co-operation for production, which in turn may be subdivided into (*a*) associations of producers to produce raw materials or finished products, and (*b*) associations of producers to sell co-operatively either raw materials or finished products; and 3, co-operation for consumption.

These classes may and do overlap in practice. Thus a credit institution may also function for producers in selling their product and for consumers in buying supplies; the consumers' society may also have banking and insurance departments and may undertake co-operative production of supplies; or the farmers' society may, in addition to its primary function of a marketing agency for its members, undertake to supply them with the necessaries of home and farm.

The term "agricultural societies" is used to designate combined purchasing (consumers') and marketing societies. The figures for paid-in share capital necessarily include that used in the marketing activities of the associations.

The average amount of business done in 1920 per society was $99,406; per member, $378. These figures are for the two types of societies combined. The average for each type was: Consumers'—per society, $100,354; per member, $353. Agricultural—per society, $95,618; per member, $530.

The average business per society, both types combined, was highest in California (all consumers'), $226,292; in Massachusetts, $160,331; in Wisconsin, $159,549; in Florida (all consumers'), $142,000; in Tennessee (all consumers'), $134,500; in New Mexico, $131,667; and so on down to New Hampshire, $8,500. In New York the average was (all consumers') $72,252; in New Jersey, $52,789; in Pennsylvania (all consumers'), $39,924.

The percentage of both types of societies combined per 10,000 population was 24.7 for the United States, being highest in Wisconsin (188.1) and lowest in Mississippi (0.6).

CO-OPERATIVES IN GREAT BRITAIN.

Co-operative societies abroad are on the same lines as those in the United States, namely, lending (credit, or banking), producing and marketing, selling and buying, and manufacturing. The last named type is more developed in foreign countries than on this side of the Atlantic.

There are, outside the United States, over 60,000 co-operative societies, with a membership of more than 25,000,000 persons, according to the 1923 edition of The People's Year Book, published by the English and Scottish Co-operative Wholesale Societies.

The Co-operative Union of the United Kingdom consists of 1,445 societies, of whith 1,321 are distributive societies, 6 in distributive federations, 105 are productive societies, 4 are supply associations, 6 are special societies, and 3 are wholesale societies.

The total membership of the union comprises 4,569,089 persons; share and loan capital, £120,408,650; sales in 1922, £262,220,810; net surplus, £15,199,008; number of employees, 183,195; salaries and wages in 1922, £25,586,278.

Of the membership of the distributive societies, 3,819,881 are in England and Wales, 654,384 in Scotland, and 44,897 in Ireland. The sales of the distributive societies in 1922 were £169,582,357; those of the distributive federations, £133,434.

There are two classes of the productive societies, one including consumers, the other mainly workers. Together, the productive societies in 1922 did a trade of £5,318,077.

The English Wholesale Society in 1923 did a trade of £105,101,558, of which £66,120,000 was distributive; the Scottish Wholesale did a distributive trade of £17,259,900; the Irish Agricultural Wholesale in 1922 showed a loss on its distributive trade of £1,118,718—amount of loss not stated.

Of the co-operative employees, 78,571 were engaged in 1921 in production and 109,408 in distribution.

The productive activities of the union's wholesale societies included crackers, preserves, soap, flour, tobacco, lard, margarine, printing, rope and twine, coal mining, flannel blankets, hosiery, corsets, skirts, underclothing, woolen goods, weaving, clothing, creameries, boots and shoes, furniture, brushes, buckets, iron mills, tinplate, paint and varnish, and pottery. Profit was shown in the manufacture of crackers, soap, flour, lard, margarine, coal mining, iron, paint and varnish, and pottery. All the rest showed losses.

The English and Scottish Co-operative Wholesale Societies own 29,109 acres of tea plantations in Ceylon and India.

IN OTHER FOREIGN COUNTRIES.

The following is a brief summary from the latest available reports of the co-operative activities in other foreign countries:

Australia—There are 137 distributive societies of co-operatives of the Rochdale type. The sales of these societies in 1923 amounted to £6,563,598. In South Australia there is a Co-operative Union. New South Wales has a union, and also a Co-operative Wholesale Society.

Austria—The Union of German-Austrian Consumers' Societies has, in Austria, 113 retail societies, with 574,000 members; 81 of the societies, in 1923, reported a sales turnover of the value of 848,996,469,000 crowns, with savings deposits of 34,330,455 crowns. The Austrian Co-operative Wholesale Society in 1923 sold goods to the value of 466,564,209 crowns. and had savings deposits of 6,348,294,400 crowns.

Belgium—The Federation of Co-operative Societies (allied with the Socialist labor movement) has over 231,000 members, with a sales turnover in 1923 of the value of 88,903,220 francs. It has a hosiery factory and a creamery.

Canada—The Co-operative Union has over 7,000 members, with 1921 sales valued at $2,465,253. The United Grain Growers, Limited (Manitoba), has 36,000 members, with 1921 sales valued at $6,908,890.

Czechoslovakia—The Central Union of Czech Co-operative Societies has 1,371 member societies, of which 477 are consumers' societies; total membership of consumers' societies 498,979; 1923 sales turnover was valued at 1,136,588,719 crowns. The Co-operative Wholesale Society in 1921 sold articles valued at 980,355,322 crowns. It manufactures spices, underclothing, foodstuffs, malt, breadstuffs and brick, and has printing works. The Union of German Economic Societies in 1921 had 303,000 members, with sales valued at 712,625,447 crowns; and with savings deposits of 48,211,352 crowns. The union makes foodstuffs, ribbon, knit goods and linen goods.

Denmark—The Co-operative Wholesale Society has 1,806 member societies with 337,700 members, and a 1923 sales turnover valued at 146,958,840 crowns. It produced in 1923 goods valued at 40,555,914 crowns, comprising hosiery, clothing, bicycles, soap, rope, margarine, mustard, chocolate and candy. It has seed growing and testing ground.

Finland—The General Co-operative Union in 1921 had 485 societies, with 477,584 members, and sales totaling in value 1,025,963,975 marks, of which the wholesale turnover was 359,143,294 marks. The wholesale turnover in 1923 was 517,308,204 marks. The Central Union of Consumers' Societies (Socialist) had 157,800 members, with savings totaling 26,900,000 marks, and a

sales turnover in 1921 valued at 672,965,598 marks, and in 1922 a sales turnover valued at 464,606,725 marks.

France—The National Federation of Consumers' Societies, which is said to comprise nearly half (1,562) of the distributive co-operative organizations in that country, has 1,340,000 members; total sales in 1922 were valued at 1,116,270,256 francs. The co-operatives make boots and shoes, chocolate, canned food, roasted coffee, underclothing and lumber. They have a bank. Sales of the French Wholesale Society in 1923 amounted to 270,000,000 francs.

Germany—The Central Union of Consumers' Societies had a membership in 1923 of 1,300 societies with 3,375,370 members; the sales turnover in 1921 was 5,197,286,852 marks. mostly from bakery and butchering The German Co-operative Wholesale Society produced in 1921 goods (cigars and tobacco, matches, soap, edible paste, mustard, spices, sweetmeats, chocolate, boxes, brushes, weaving, fish curing) valued at 234,784.773 marks; the total turnover on sales in 1923 was 13,799,071,-745,000,000,000 marks. They also have a bank and do printing and publishing.

Holland—The Central Union of Distributive Co-operative Societies has 135 affiliated societies with 126,725 members, with sales in 1921 valued at 45,000,000 florins. The Roman Catholics, as well as the Protestants, also have co-operative societies, which together have about 100,000 members.

The Co-operative Wholesale Society grinds grain, makes soap and clothing. and in 1921 had sales valued at 14,215,538 gulden.

Hungary—The Farmers' Co-operative Wholesale Society (the *Hangya*) has 900,000 members, in 1,945 branches, with a 1921 sales turnover valued at 3,000,000,000 crowns.

The Hangya makes soap, chemicals, rope, matches, brushes, cutlery and liquor, all of which brought 200,000,000 crowns in 1921.

The Central Union of Labor Co-operative Societies has 180,000 members, with wholesale sales in 1920 valued at 400,000,000 crowns.

India, British—There are 42,000 agricultural credit societies with 1,400.000 members.

Italy—The National League of Co-operative Societies has 3,600 distributing branches, 2,700 producing bodies, 700 farm organizations, and 1,000 miscellaneous societies; total membership, 2,000,000; in 1920, 770 distributive societies sold articles valued at 661,800,000 lire: in 1921, the output of 33 producing bodies totaled 331,582,000 lire; 243 agricultural branches in 1921 farmed 128,571 acres. There are several co-operative banks.

Japan—There are 13,770 co-operative societies, with 2,850,000 members, of which 40,000 belong to consumers co-operatives.

Jugo-Slavia—The General Federation of Co-operative Unions comprises 4,131 societies—credit, agricultural and handicraft.

Latvia, Lithuania and Esthonia (the Baltic States)—In Esthonia the co-operatives have 90,000 members, with sales in 1923 valued at 2,000,000,000 marks; in Latvia 50.000 members, with year's sales valued at 349,690,472 rubles (also operating a saw-mill and a factory); in Lithuania, 45,000 members, with year's sales values at 50,000.000 marks. There the union does pig slaughtering and preserves meat.

New Zealand—There are twenty distributive co-operative societies, united in the Co-operative Union and Wholesale.

Norway—The Co-operative Wholesale Society has over 96,401 members, in 416 member societies. which in 1923 had total sales valued at 108,971,000 crowns. It has an insurance branch, and a bank, and it makes tobacco products and margarine.

Poland—The Union of Consumers' Societies has 149 member societies with a membership of 171,247, with sales in 1923 valued at 7,400,000 francs. The union makes soap, lumber, and exports farm products. The Union of Working and Co-operative Societies has 170,000 members, and sold in 1921, at wholesale, goods valued at 531,000,000 marks.

Portugal—The National Federation of Co-operative Societies has 95,000 members, with sales in 1921 valued at 1,312,313 escudos.

Roumania—The town societies of co-operatives are under the patronage of the Government Ministry of Labor and Social Welfare, and number 107,000. with 1921 sales valued at 322,374,058 lei. The rural joint supply and sale societies have 210,000 members, and sold in 1921 goods valued at over 250,000,-000 lei. The rural credit societies have 753 000 members and operate banks, which loaned, in 1920, over 476,000,000 lei, mostly for the increase of farm production.

Russia—At the beginning of 1923 there were 26,006 consumers' societies of various types. 16,647 agricultural societies, and 4,818 workers' co-operative productive societies. The All-Russian Central Union of Consumers' Societies (the Centrosoyus) operates as a wholesale trading organization, as well as an organizing, an educational and a propagandist institution for the benefit of the Russian distributive co-operative movement. In 1923 the Centrosoyus comprised 87 federations, with 26,000 societies, and total sales in 1922 amounting in value to 66,500,000 gold rubles, it is asserted. The Centrosoyus publishes a daily paper and a weekly paper. They did operate a bank, but the bank is now independent.

Spain—The Catalonian co-operatives have 50,000 members, with 1921 sales over 50,000,000 pesetas in value. The North-of-Spain co-operatives have 15,000 members, and 1921 sales valued at 15,519,904 pesetas. There also are 8,000 co-operatives at Valencia. In addition, there are workers' co-operatives, as well as the Roman Catholic Union.

Sweden—The Co-operative Union has 886 affiliated societies with 274,269 members, with sales in 1923 valued at 72,300,000 crowns. It has a bank, a margarine factory and a corn mill.

Switzerland—The Union of Consumers Societies has 516 affiliated societies with 363,000 members, its sales were valued at 119,519,480 francs, and savings deposits of 7,551.291 francs. It makes boots and shoes, prints, binds books, roasts coffee, grinds spices, grinds corn, refines fat, makes yeast, makes sauerkraut and charcoal, furniture and barrels; has a dairy, a "garden village" and an insurance company.

GROWTH OF THE LABOR BANKS.

The largest group of labor banks is that controlled by the Brotherhood of Locomotive Engineers, either through stock membership or the holdings of its members. This group, which is being enlarged almost monthly, consists of·

The Brotherhood of Locomotive Engineers Co-operative National Bank Cleveland, O., the first of the so-called labor banks.

The Peoples Co-operative Bank, Hammond, Ind

The Transportation Brotherhoods Bank, Minneapolis, Ind

Brotherhoods Co-operative Bank, Spokane, Wash.

Nottingham Savings & Banking Co., Nottingham, Ohio.

Federated Bank & Trust Co. Birmingham, Ala.

Brotherhood of Locomotive Engineers Co-operative Trust Co., New York.

Brotherhood of Locomotive Engineers Co-operative National Bank, Boston.

The Brotherhood of Locomotive Engineers and its officers also have a large interest, said to be the control. in the Empire Trust Co. of New York

Through its members it is largely interested in these labor banks:

The Brotherhood Trust & Savings Co., San Bernardino, Cal.

The Labor National Bank, Three Rivers, Mont

The Potomac Trust Co , Potomac, Va

The Fraternity Trust Co , San Bernardino, Cal

The Brotherhood Co-operative Bank, Portland, Ore.

The Brotherhood State Bank, Kansas City, Mo.

Brotherhood officials have also set up and are directing the operations of the Brotherhood Investment Co. of Cleveland, O., a corporation formed for dealing in securities, the Brotherhood of Locomotive Engineers Securities Corporation of New York, and the Pacific Brotherhoods Investment Co. of Spokane, Wash

Largest of the labor banks not of the brotherhood or allied group. is the Federated Bank of New York, owned by unions affiliated with the Central Trades and Labor Council, and their members.

Others which union interests own or dominate are:

Mt. Vernon Savings Bank, Washington, D. C.

Brotherhood of Railway Clerks National Bank, Cincinnati, O.

Amalgamated Bank of New York.

Amalgamated Savings & Trust Co., Chicago.

Co-operative Banking & Trust Co. Tucson, Ariz.

Producers' & Consumers Bank Philadelphia.

Order Railway Telegraphers National Bank, St Louis

International Union Bank, New York.

Labor Co-operative Bank, Paterson, N. J.

Farmers' & Workingmen's Savings Bank, Jackson, Mich.

Peoples' Bank & Trust Co., Los Angeles, Cal.

Eagle Rock State Bank, Los Angelcs, Cal.

Co-operative National Bank, Tacoma, Wash.

Brotherhood Savings & Trust Co , Pittsburg, Pa.

Fraternity Trust Co., Harrisburgh, Pa.

United Labor Bank & Trust Co., Indianapolis, Ind.

Strikes and lockouts in the United States in 1923 cost $703,839,575, and represented 20,551,140 lost days in industry, according to Noel Sargent of the National Association of Manufacturers.

Of the money loss, wages not received, totaled $97,823,427; loss in production, sustained by employees, $26,901,443; loss to the public, $579,114,705.

The total estimated money loss, 1916-1923, by strikes and lockouts, was put by Sargent at $12,522,203,356.

Big Problems of 1924-1925.

BALANCE SHEET OF AMERICAN FARMERS FOR FIVE YEARS.

The United States Department of Agriculture gave out on Aug. 24, 1924, the result of an investigation covering the last five fiscal years into the condition of the American farmer. The department says that its studies "bear out the popular impression that American agriculture since the slump of 1920 has not yielded a commercial interest return on its invested capital or a fair wage for the average farm operator and his family." Its official summary is as follows:

Interest paid on total farm indebtedness consumed all capital earnings in the crop years 1920-21 and 1921-22. In the next two years there was a return of 3.1 per cent. on the total capital invested in agriculture, including rewards of management. This investment, however, was written down from $79,607,000,000 in 1920 to $59,409,000,000. Land and buildings by themselves were written down from $66,316,000,000 to $48,300,000,000.

This is the department's estimate of the extent to which the value of property used in agriculture declined from 1919 to 1923-24. Land and buildings, machinery, livestock and working capital make up the total agricultural investment. To arrive at its present estimate of this capital, the department wrote down the census figure of 1920 for land and buildings on the basis of the reported decline in improved farm land values in all parts of the country.

It figured the decline in value of equipment on the basis of current prices and estimated purchases of equipment by farmers. The livestock estimate rests on the department's inventory as of Jan. 1. Working capital is estimated at 1 per cent. of the total inventory. While the decline in the current value of the country's agricultural property represents to a large degree a paper loss rather than an actual loss, it is nevertheless important to the large number of farmers who bought land and equipment when prices were at their peak.

The department has estimated for the five-year period the return on all the capital invested in agriculture. It puts this rate at 6.2 per cent. for 1919-20; 0.6 per cent. for 1920-21; 1.4 per cent. for 1921-22; 3.1 per cent. for 1922-23; and 3.1 per cent. for 1923-24. Even this meagre showing was only made by valuing the labor of farm operators and their families at no more than the current rate for common labor. While agricultural capital as a whole had only the small returns above mentioned, it was paying an average of more than 6.7 on mortgage and other indebtedness.

Some other figures compiled by the department in its study are interesting. It puts the gross income of American agriculture (that is the value of its production less feed and seed) at $15,830,000,000 for 1919-20: at $12,782,000,000 for 1920-21; at $9,552,000,000 for 1921-22; at $10,592,000,000 for 1922-23; and at $11,467,000,000 for 1923-24.

Net income to agriculture was these amounts less operating expenses, taxes and depreciation. With these deductions made, the department figures out the net income of the different years to have been as follows: $4,954,000,000 for 1919-20, $438,000,000 for 1920-21, $865,000,000 for 1921-22, $1,916,000,000 for 1922-23, and $1,863,000,000 for 1923-24.

After the farmers had paid interest on their total farm debt the income left to them on their unemcumbered capital is estimated to have been $4,057,000,000 for 1919-20, a loss of $468,000,000 for 1920-21, a loss of $73,000,000 for 1921-22, a net balance of $964,000,000 for 1922-23, and of $921,000,000 for 1923-24.

That is the agricultural position as it looked from the standpoint of the earnings on all the capital invested in the business. When it is looked at from the standpoint of the return on the farmer's own capital and the reward for his labor, the picture is equally unsatisfactory. On the capital owned by farm operators themselves, the rate earned is figured at 5.8 per cent. for 1919-20, minus 3.1 per cent. for 1920-21, minus 1.4 per cent. for 1921-22, 1.5 per cent. for 1922-23, and 1.4 per cent. for 1923-24. Thus in two out of the five years farmer-owned capital earned nothing and had to be drawn on to meet interest charges on borrowed capital.

The estimates of the net return on farmer-owned capital in the last two years are more liberal than those given in a recent survey made by the department upon returns for 1923. In that survey 16,000 owner-operated farms were covered. Allowing $870 for the value of the labor of the operator and that of his family, it was figured that the farms studied showed a net balance for the year of $270, or 1.5 per cent. on the average value of the farm real estate and its improvements. That return barely sufficed to pay interest charges. It left practically nothing as a return on the farmer's capital.

The new study, which covers the entire country and includes tenants as well as owners, indicates that farm operations in 1922-23 yielded 1.5 per cent. on farmer-owned capital and 1.4 per cent. for 1923-24, after deducting wages for the farmer's labor but nothing for his management. But this showing, it is pointed out, is due to the fact that the later study makes a more conservative valuation of the farmer's own labor and that of his family than the former one.

Considered from the standpoint of the return for the farmer's own labor after deducting a commercial interest return on his capital, the average farm operator, says the department, in the five-year period actually earned less than was paid to common hired hands.

If, out of the total agricultural income, farmer-owned capital were credited with earnings at a rate equal to that which investments in farm loan bonds receive, the reward left for management and labor contributed by operators was $932 per operator and family in 1919-20, $399 in 1920-21, $292 in 1921-22, $454 in 1922-23 and $520 in 1923-24. These wages may be compared with the averages wages (without board) paid to hired labor in the same years. These were $675 in 1919-20, $779 in 1920-21, $520 in 1921-22, $501 in 1922-23, $563 in 1923-24.

SECRETARY OF AGRICULTURE'S REPORT ON CROPS IN 1924.

The annual report of the Department of Agriculture prepared by the late Secretary Henry M. Wallace and made public by his successor Secretary Gore on Dec. 7, 1924, says:

"The showing of 1924 brings agricultural prosperity nearer, although the improvement it represents has not yet lasted quite long enough to produce any marked betterment in the finances of the farmer."

The total area in all crops in 1924 is estimated at about 370,000,000 acres, a decline of about 3,000,000 acres from 1923 and a decline of 6,000,000 acres from 1919.

The report asserts that the gross income from the agricultural production in the United States for the crop year 1924-25 may be $500,000,000 more than that of last year.

Improvement in the wheat situation, the report says, was the outstanding event in 1924. "Nature has been good to most of the wheat farmers of the United States this year. She has given them large yields per acre and a total crop larger than that of last year on a reduced acreage. Reduced yields in foreign countries have brought about a market situation in which the American farmers are receiving higher prices for a larger crop. It seems reasonable to expect that the price farmers will receive for this year's crop will average about $1.15 or better for the year. At this price the cash income from the wheat crop, as estimated Oct. 1, would amount to about $800,000,000, compared with approximately $570,000,000 last year.

"Grain producers who had a cash income from sales in 1923 of about $920,000,000, may earn this year approximately $1,210,000,000.

"Corn in October was bringing 30 to 35 cents a bushel more than in October, 1923, but corn growers will have less corn to sell this year owing to a reduction both in the yield and the quality of the corn crop.

"Hogs at the farm are now selling at $8.50 a hundred pounds. This is about $2 over the price of a year ago. At this price level the cash income of hog producers during the 1924-25 hog marketing season should be equal to that of last year, notwithstanding a prospective reduction in marketing of not less than 20 per cent.

"The relationship of the Government to co-operation should be one of service. It should help the farmers market their crop just as it helps them to produce crops, not by doing the work but by supplying information which the farmers cannot get for themselves. To go further would be to injure rather than to aid the co-operative movement. The need for strong co-operative marketing associations cannot be overemphasized. They are absolutely necessary to bring about efficient and economical marketing and standardization of crops, but the movement should be truly co-operative and should be controlled by its membership. Success in co-operation depends on finding men capable of running co-operative associations, on the loyal support of the membership and on getting a sufficient volume of business."

RAILROAD OPERATION AFTER FEDERAL CONTROL.

Business slackened in 1924 to such an extent that the gross earnings of Class 1 railroads (those having an annual operating revenue exceeding $1,000,000) fell off $338,000,000 in the first eight months, about 8 per cent. below the figures for the same period of 1923, according to the 1924 annual report of the Interstate Commerce Commission.

These railroads on Jan. 1, 1923, had a total capitalization of $17,015,346,711 (stock, $7,242,119,434; funded debt, $9,773,227,277), and operated a total of 234,976 miles of road and a total of 382,143 miles of track (see pages 318-322). The commission says:

"As a result of a reduction in expenses the net railway operating income does not reflect the full decline in revenues, the decrease in the eight months' period having been only $69,656,191. For the period of twelve months closed with Aug. 31, 1924, the net railway operating income was $912,056,948, as compared with $936,790,371 for the twelve months closed with Aug. 31, 1923. The corresponding figure for the calendar year 1923 was $977,657,368; for 1922, $776,880,593, and for 1921, $615,945,614. In short, the net earning from railway operations have recently been better than in 1921 and 1922, but not so good as in 1923, which, except for the year 1916, was the best year in the absolute amount of net earnings.

"However, in the calendar year 1916 the revenues were less than 60 per cent. of those of 1923, indicating a decided reduction since 1916 in the ratio of net railway operating income to operating revenues, which was over 28 per cent. in 1916 and under 16 per cent. in 1923. This corresponds with the fact that the operating ratio was 65.73 per cent. in 1916 and 77.83 per cent. in 1923. For the first eight months of 1924 it was 78.13 per cent.

5 x 75 PER CENT NOT EARNED.

"As the annual net railway operating income has been recently less than $1,000,000,000 it is safe to say that the return of five and three-quarter per cent. upon fair value is not being received by the carriers. We are unable to say precisely what the return is, as a fair value for the carriers in groups or as a whole is not being determined by us except in so far as necessary for the purpose of a general rate case. It is well to note in this connection that net railway operating income takes no account of non-operating income or of interest charges. When these and related items are taken into account the result is called, in our official reports, net income. From roads of Classes I., II. and III., excluding switching and terminal companies, the net income in 1923 was $642,242,713. This was 7.06 per cent. of the capital stock.

"The corresponding figure in the peak year 1916 was 8.40 per cent. That the net income in relation to stock could be nearly as good in 1923 as in 1916 in spite of a greatly increased operating ratio is explained by the fact that the railway securities outstanding have not for the most part been inflated by the present high cost of construction, so that it takes a smaller per cent. of revenues to pay the interest charges and yield a fairly good return on stock."

After reporting progress in the installation of automatic train control work the commission says that for the year ended June 20, 100 collisions and derailments were investigated, in which 245 persons were killed and 1,501 injured. Of these it finds that under adequate automatic train control fifty might have been prevented and that those fifty were responsible for the deaths of 113 persons and the injury of 780.

When railroads earn more than the fair return, the report pointed out, the Government is entitled to recapture half of the excess. To date since 1920, when the Transportation act first inaugurated such a provision, $10,845,000 has been reported as due the Government from the more profitable lines. Much of the amount is still in controversy, but the tendency of the Government's share to increase was shown by the figures for 1922, in which year $1,702,000 became due the Government as excess earnings, while in 1923 the amount was $6,623,000.

The Commission in the last fiscal year approved the issuance of stocks, bonds, notes, and like evidences of investment in railroads to a total of $1,795,027,000.

In reviewing the work of fixing rates for railroad service, the Commission remarked that "far greater uniformity than now exists (in railroad rates) can be attained without undue sacrifice of practical considerations." This principle was guiding it in its general investigations and rate decisions, the report explained.

NICKEL PLATE MERGER.

The Interstate Commerce Commission continued in 1924 hearings on its tentative plans for consolidating the railroads into nineteen great systems (as printed in THE WORLD ALMANAC for 1923, pages 112-113.) On Oct. 11, a substitute plan was placed before the Commission for four great Eastern systems, built about the New York Central, Pennsylvania, Baltimore & Ohio, and Nickel Plate systems; the New England roads either to be grouped together as a separate system or to be distributed to the four mentioned. These tentative plans which were not agreed to and therefore not given out, were made necessary by the formation of the Nickel Plate merger by O. V. and M. J. Van Sweringen of Cleveland, O.

The Van Sweringen brothers had arranged terms with the several boards of directors and on Sept. 12 sent for approval their formal proposals to the stockholders of these railroads to be merged: New York, Chicago & St. Louis (the Nickel Plate); Chesapeake & Ohio; Hocking Valley; Erie; and Pere Marquette. The new company, if organization is completed, will have 9,145 miles of main tracks with a total trackage of 14,357 miles; capital stock, $282,468,643; and assets, $1,406,763,793.

TRANSPORTATION ACT OF 1920.

The railroads of the United States are now operated under the Transportation Act of 1920. On March 1, 1920 these railroads, which had on Jan. 1, 1918, as a war measure, been taken over for operation as one system by the United States Railroad Administration, were, in so far as still under its control (the short lines having previously been surrendered), restored to their owners.

On Sept. 1, 1920 the Government guaranty of income, which had been granted to assenting roads for the six months following the end of Federal control, expired by limitation.

On March 1, 1922, two further provisions of the Transportation Act expired by limitation, namely: (1) The provision of Section 15 (*a*) making it incumbent on the Interstate Commerce Commission when adjusting freight and passenger rates during the two years beginning March 1, to aim at establishing such rates for the railroads of the country as a whole or in districts as should afford "a fair return" on the tentative valuation which was fixed by the Commission in July, 1920, at $18,900,000,000 (against a book value of $20,040,572,611), a sum equal to 5½ per cent. per annum and in addition at the discretion of the Commission an additional ½ of 1 per cent. to make provision for improvements, betterments or equipment; (2) The provision in Section 210 (*a*) permitting the carriers to apply for loans from the Federal Revolving Fund of $300,000,000, within two years from the termination of Federal control.

During the period of Government control operating costs had been so enormously increased that the roads fell far short of meeting their expenses and charges, leaving a heavy deficit for the Government to make good. With the return of the roads to private control, therefore, it became necessary to arrange for increasing rates for the transportation of both passengers and freight. The extension of the guaranty period for six months after the roads had been turned back to their owners was for the purpose of allowing time in which to make adjustment. Just as the Interstate Commerce Commission was ready to announce its decision, there came the decision of the Railroad Labor Board on July 20, 1920 awarding increases in wages aggregating $625,000,000 or more per year. The roads had asked for increases in rates to yield additional revenue of $1,017,766,000 per annum. Following the award of the Railroad Labor Board the roads petitioned the commission for further additions to revenue in the amount of the increase. On July 31, 1920 the commission having placed a valuation of $18,900,000,000 upon the railroad properties, against a book value of $20,040,572,611, undertook to allow them 6 per cent. upon the property investment, which would mean a total of $1,134,000,000 with which to cover the increased cost of wages and supplies and to pay for improvements, etc. The decision of July, 1920, increased: *Freight rates*—40 per cent. in the East, 25 per cent. in the South, 35 per cent in the West and 25 per cent in Mountain-Pacific territory; *Passenger rates*—20 per cent, the amount asked by the railroads, or about ½ of 1 cent additional per mile; *Pullman rates*—A surcharge to the roads of 50 per cent on rates; *Excess Baggage rates*—20 per cent. advance; *Milk tariffs*—20 per cent. advance; coastwise and inland steamship lines and electric railway companies were permitted to increase their freight rates in proportion to the increases of the railroads in the same territory.

These increases in rates were expected to add $1,500,000,000 to the yearly revenues of the roads. But, unfortunately, a sudden decline in traffic caused an alarming falling off in railway operating income, notwithstanding the higher rates received. It then became necessary to reduce both rates and wages. The commission made a horizontal cut of 10 per cent. in freight rates on May 24, 1922.

The Interstate Commerce Commission on July 17, 1924, definitely refused further rate reductions on grain, grain products and hay, sought by ten

States of the Mississippi and Missouri Valley cereal growing region under the leadership of the State of Kansas. The commission held that the financial status of the carriers did not justify the step, while, in general, it held that the financial situation of the Western grain farmers was showing a slow improvement, relieving them of the necessity for the reduction.

SMALL WAGE INCREASES.

Since March 1, 1923, wage increases of one kind or another have been made by many individual roads to their employees. The Pennsylvania Railroad on March 12, 1924, increased wages of about 22,000 engineers, firemen, hostlers and hostler helpers by 5 per cent., retroactive to Jan. 16, 1924; the Pennsylvania Railroad also granted a wage increase of about 6 per cent to 32,000 conductors, baggagemen, brakemen and switch tenders. Early this year an increase of about 5 per cent. was granted to engineers and firemen of the following roads: Pittsburgh & West Virginia; New York, Chicago & St. Louis; Erie; Chesapeake & Ohio, and New York, New Haven & Hartford; this increase followed close upon the announcement of the New York Central of similar wage adjustments. Increases of 5 per cent. have also been granted during 1924 to conductors and motormen of a number of roads, including the New York, New Haven & Hartford; Louisville & Nashville Railroad; Lehigh Valley, and Southern. A wage increase, ranging from thirty to thirty-six cents a day to conductors, switchmen and brakemen, was granted on June 2, 1924, by the Chesapeake & Ohio retroactive to May 1. This action was in line with an increase given to engineers and firemen. Wage increases amounting to 6½ per cent. for all yardmen and trainmen, retroactive to May 1, 1924, were granted by the Texas & Pacific Railway. These illustrations might be multiplied almost indefinitely.

The United States Railroad Labor Board asserted in an opinion on June 27, 1923, that the Pennsylvania system "has persisted in such violation in contempt of the unanimous decision of the United States Supreme Court," which sustained the board's jurisdiction. The excoriation of the Pennsylvania system resulted when the railroad refused to deal with the elected representatives of the clerks' organization as officials representing employees' organization, although the railroad was ready to consider them as individuals. Judge Dickinson in the Federal District Court at Philadelphia, on Dec. 21, 1923, dismissed the suit of the Brotherhood of Railway Clerks, Freight Handlers and Station Employees of the Pennsylvania to compel the company to recognize their delegates in conferences on wages and conditions, on the ground that the Federal Court had no power to enforce the decisions of the United States Railroad Labor Board and that the only way the board's mandates could be carried out was in the "court of public opinion." The board itself, Judge Dickinson declared, had no power to execute its own orders, "and no power has been delegated to the courts to have the decrees carried out." In conclusion the opinion said:

The judgment it (the Labor Board) may render may be acceptable to neither party, but each has the legal right to accept it or refuse to follow it. If the parties refuse acquiescence all that the board can then do is to give publicity to its ruling, leaving the parties to their willingness to adjust the dispute under the guidance and perhaps the stress of public opinion, influenced, or it may be aroused, by the opinion of the board."

On the same grounds, Judge Dickinson in the Federal District Court at Philadelphia on Feb. 5, 1924, dismissed the $15,000,000 suit brought by the shopmen's organization against the Pennsylvania Railroad system.

On Jan. 7, 1924, the United States Supreme Court upheld the constitutionality of the "recapture" clause. The proceedings attacking the constitutionality of this clause were brought by the Dayton-Goose Creek Railway of Texas, but when the action reached the United States Supreme Court, nineteen trunk lines had become parties to the brief filed in behalf of the road.

The Interstate Commerce Commission on April 4, 1924, issued an order requiring all railroads whose net railway operating income exceeds 6 per cent. of the value of the property for the calendar year 1923 to file with the commission, before May 1, 1924, a report in the matter. The commission also announced that pursuant to a ruling of the Comptroller-General of the United States, interest on amounts of excess railway operating income payable to the United States under the Transportation Act will be required at the rate of 6 per cent. beginning four months after the termination of the period for which the excess income is computed. The newspapers, however, at the time stated that few, if any, of the railroads would pay any of this income for 1923 into the Treasury of the United States, since in almost every instance the railroads would use their own valuations of their property, which are sufficiently higher than any tentative valuations which have been made to date, to save them from making any payment of excess earnings.

DEBTS OF RAILROADS TO TREASURY.

During the Federal control period, from Jan. 1, 1918, to Feb. 29, 1920, with the guaranty of six months from then to Aug. 31, 1920, large advances were made to railroads bythe United States Treasury the Director General and the War Finance Corporation. The securities acquired on account of such advances, and still held by the United States Treasury on Nov. 1, 1924, were: Obligations of the Boston & Maine Railway for reorganization purposes, $25,950,000, and the Washington, Brandywine & Point Lookout Railway, $50,000; Indebtedness of 21 railroads incurred for additions and betterments, etc., made during Federal control, $149,804,000; unpaid obligations for loans from the $300,000,000 revolving fund, $192,275,245; excess earnings during the guaranty period paid in by 13 railroads, $205,435.

In addition the Director-General of the Railroads, James C. Davis, on that date, still held $9,081,200 equipment trust notes unsold out of a total issue of $346,556,750, which had been issued by 78 railroads; these notes covered approximately $323,000,000 worth of new rolling stock ordered by the United States Railroad Administration during the period of Federal control and allocated to the several railroad companies concerned.

In a report submitted by Director-General of Railroads James C. Davis, it is shown that of the claims arising out of Government war-time control of railroads, settlements covering 99 per cent. of all the mileage (241,194) taken over had been effected. The total cost to the Government of the 26 months of Federal control and the six months guaranty period is shown to have been **$1,696,000,000.** Claims amounting to $1,014,397,447 were filed by the carriers against the Railroad Administrztion; during the investigation of these claims sundry voluntary reductions were made and the Administration paid to carriers sums on account; this reduced the aggregate amount of claims as finally presented for adjustment to $769,974,785. Up to Nov. 1, 1924, according to the report, $766,124,023 of these claims had been finally adjusted, for a net amount paid by the United States of $50,200,987.

BILLION TO BE SPENT IN 1925.

At the annual meeting in this city on Nov. 19 of the Association of Railway Executives the position of the carriers was enunciated, this among other things, declaring that "there is no condition existing to-day which calls for any urgent legislative action by Congress with respect to the railroads, either as to rates, labor relationship or valuation." It was further declared that "the railroads are determined to continue their policy of expansion to provide adequate transportation for the increasing commerce of the country and to strive in every way to bring about greater efficiency in operation and a progressive reduction in cost."

The Board of Directors of the American Railway Association gave out this statement of expenditures for capital outlays for 1923 and authorized for 1924:

	1923	1924	Total.
	Dollars.	*Dollars.*	*Dollars.*
Locomotives.....	208,966,280	101,233,000	310,199,280
Cars.....	472,757,711	412,26 ,000	885,021,711
Other improvem'ts	377,425,435	563,800,000	941,225,435
Total.	1,059,149,426	1,077,297,000	2,136,446,426

It is estimated that during 1925 the expenditures will exceed $1,100,000,000.

In 1923 the railroads handled 29,432,609,000 car-miles of traffic as against 27,065,426,000 car-miles in 1920, the latter being the largest year's traffic prior to 1923, and total operating expenses in 1923 were $4,895,000,000, against $5,827,591,146, for the smaller amount of traffic in 1920.

All records for freight handling were broken in 1923, according to the Bureau of Railway Economics, when the railroads of the United States handled a total of 457,589,846,000 net ton-miles, an increase of 10,311,636,000 net ton-miles, or 2.3 per cent over 1920, the previous record year, and 21.7 per cent. greater than in 1922. The highest loading was 1,097 493 cars in the last week of September, 1923. The highest loading in 1924 was 1,112,345 cars in the week of Oct. 25.

INTERSTATE COMMERCE COMMISSION.

The Interstate Commerce Commission is as follows: Henry C. Hall of Col., Chairman; Charles C. McChord of Ky.; Balthasar H. Meyer of Wis.; Frank McManamy of the Dist. of Col.; Clyde B. Aitchison of Ore.; Joseph B. Eastman of Mass.; Mark W. Potter of N. Y.; John J. Esch of Wis.; E. I. Lewis of Ind.; Johnston B. Campbell of Wash.; Frederick I. Cox of N. J.; with George B. McGinty of Ga., Secretary; Alfred Holmead of Dist. of Col., Assistant Secretary; Thomas A. Gillis of Pa., Chief Clerk and Purchasing Agent.

THE UNITED STATES SHIPPING BOARD.

GENERAL ADMINISTRATION
(As of September 1, 1924)

Chairman—T. V. O'Connor; *Vice Chairman*—E. C. Plummer; *Commissioners*—T. V. O'Connor, E. C. Plummer, Meyer Lissner, W. S. Benson, Bert E. Haney, Frederick I. Thompson, W. S. Hill.

Assistant to the Chairman—J. C. Jenkins; *Secretary*—Carl P. Kremer; *Chief Clerk*—M. J. Pierce; *Disbursing Officer*— E. H. Schmidt; *General Counsel*—Chauncey G. Parker.

UNITED STATES SHIPPING BOARD EMERGENCY FLEET CORPORATION.

President—L. C. Palmer.

Vice Presidents—Sidney Henry, W. B. Keene, H. I. Cone; *Trustees*— L. C. Palmer, H. I. Cone, Sidney Henry, W. B. Keene, J. Harry Philbin, David A. Barke, E. H. Schmidt; *Secretary*—Carl P. Kremer; *Treasurer*—E. H. Schmidt: *General Counsel*—Chauncey G. Parker; *General Comptroller*—David A. Burke; *Department of Ship Sales*—J. Harry Philbin, Mgr.; *Operating Department*—W. E. Griffith, Mgr.; *Traffic Department*—F. G. Frieser, Mgr.; *Department of Maintenance and Repair*—Commander R. D. Gatewood, U. S. N., Mgr. *Marine Insurance Department*—B. K. Ogden, Mgr.

APPROPRIATIONS AND ALLOTMENTS.

(Years are fiscal ending June 30. Cents omitted).

Fiscal Year.	Dollars.	Dollars.
For the activities of the United States Shipping Board:		
1917	75,820	
1918	359,786	
1919	828,716

Inactive vessels, as of Sept. 1, 1924.

Total cargo ships inactive, 898, of 5,813,732 dead weight tons; 6 cargo and passenger, of 60,480 deadweight tons; 13 refrigerator vessels, of 91,183 deadweight tons; 26 tankers, of 204,431 deadweight tons; and 10 tugs.

The total cargo tonnage carried by United States Shipping Board vessels for the fiscal year ending June 30, 1924, was approximately: Exports, 6,710,000 tons; Imports, 2,775,000 tons.

The total number of vessels owned, as of September 1, 1924:

	No.	D. W. T.
Steel	1270	8,854,362
Other than steel	29	55,653
	1299	8,910,015

OTHER INTERESTS

Docks and Wharves:

Hoboken Terminal—The United States Shipping Board owns and operates this terminal, which was transferred from the War Department by Executive Order of Sept. 19 and Nov. 2, 1921. The terminal consists of four piers with two-story sheds on each, bulkhead building, and one pier with a one-story structure, having berthage capacity for working 16 vessels. Freight and passenger business handled.

Brooklyn Army Base—The operation of Piers 3 and 4, Brooklyn Army Base, was transferred to the Shipping Board by the War Department under permit dated April 13, 1921, and supplement thereto dated Oct. 15, 1923. These piers were leased to the Atlantic Tidewater Terminals effective Dec. 1, 1923, and have berthage capacity for working 12 vessels. Freight and passenger business handled.

Boston Army Base—The operation of a portion of the Boston Army Base, consisting of wharf, two-story wharfshed, pier and two three-story piersheds was transferred to the Shipping Board by the War Department under permit dated May 2, 1921. This terminal was leased to the Boston Tidewater Terminal, Inc., effective Dec. 1, 1923 and has berthage capacity for working 8 vessels. Freight and passenger business handled.

Philadelphia Army Base—The operation of the Army Base property at the foot of Oregon Ave., Philadelphia, consisting of one covered pier with three-story warehouse, and two open piers, was transferred to the Shipping Board by the War Department under permit dated April 13, 1921. This property was leased to the Merchants' Warehouse Company, effective Aug. 15, 1922, and has berthage for working 15 ships.

Norfolk Army Base—The Norfolk Army Base was transferred to the United States Shipping Board by Executive Order of the President, June 27, 1924, effective Sept. 1, 1924. This property consists of two covered piers with two two-story warehouses and eight large one-story warehouses. This property is being operated by the United States Shipping Board. A portion of it is leased to the City of Norfolk. There is berthage capacity for 14 ships.

Charleston Army Base—The Charleston Army Base, located on the Cooper River, north of the city of Charleston, was transferred to the Shipping Board by Executive Order of Nov. 3, 1923, effective Dec. 15, 1923. Lease for operation has been made with the Port Utilities Commission of Charleston, S. C., effective July 10, 1924. This property consists of wharf one-story wharfshed and six adjacent one-story warehouses, and has berthage capacity for 5 ships.

Drydocks—The United States Shipping Board owns four wooden floating drydocks, three of which are under lease and one available for lease. Those under lease are: Robbins Drydock Company, Brooklyn; Sun Shipbuilding Company, Chester, Pa.; and Alderton Drydock and Repair Co., Brooklyn. The one available for lease is tied up at Mill Basin, N. Y.

Bunker Stations—The United States Shipping Board owns bunker stations at Honolulu, T. H., of 110,000 bbls. capacity; Manila, P. I., of 165,000 bbls. capacity; St. Thomas, Virgin Islands, 220,000 bbls.; Mobile, Ala., 110,000 bbls.; Norfolk, Va., 1,100,000 bbls.; Pago Pago, American Samoa, 110,000 bbls.

SALE OF SHIPS.

Terms of sale during previous years specified that half of the purchase price was to be paid in cash and the balance in not to exceed five years, covered by satisfactory security. In June, 1924, the Board modified this policy to the following terms: 25 per cent. of the purchase price in cash, balance in ten equal annual payments with 5 per cent. interest payable semi-annually, secured by first preferred mortgage. Deferred payments for lake-built vessels are to extend not over a five-year period. Interest on deferred payments on sales for guaranteed operation on specified trade routes to be at the rate of 4½ per cent. per annum. Actual sales made during the year include fifty steel ships of a total of 358,960 deadweight tons. This includes two cargo vessels sold for restricted operation in designated trade routes to the W. R. Grace & Co., seven passenger vessels sold for operation in a round-the-world service to the Dollar Steamship Line and a passenger vessel under similar conditions to the Los Angeles Steamship Co. Four vessels were sold at hull prices for conversion to internal combustion machinery.

The United States Shipping Board, on Nov. 9, decided to put Diesel internal combustion engines in eighteen cargo ships, totaling 1,600,000 deadweight tons, at a cost of about $4,359,000, thirteen will have single acting engines and five double acting. Congress authorized an expenditure of $25,000,000 of the construction loan fund for this purpose, and approximately fifty cargo vessels in all will be so converted, giving the American merchant marine the largest fleet of Dieselized vessels under one control.

CONSOLIDATION OF LINES.

The most important of undertakings from the viewpoint of practical shipping operations during the fiscal year of 1924 was the consolidation of overlapping and more or less competitive lines on various trade routes, which undertaking was nearing completion at the close of the fiscal year. Apart from the economies made necessary by a reduced budget, these consolidations may be expected to effect a general improvement in operating conditions, especially in increased flexibility of the service, reduction of vessels' turn-around, more efficient organization for securing cargo, and a closer supervision over the many details of day-by-day expenses of vessel operation.

The following is a list of the consolidations completed by the Emergency Fleet Corporation, ratification in all cases having been made in the calendar year of 1924. The operators and the routes are:

EUROPEAN SERVICES.

Oriole Lines (Consolidation Navigation Co.). 1. From Baltimore, Norfolk, Philadelphia to Glasgow (Avonmouth, Cardiff). 2. From Baltimore, New York to Cork, Dublin, Belfast (Londonderry). 3. From Baltimore, Norfolk, Boston to Liverpool. 4. From Baltimore, Norfolk, New York to Manchester (Avonmouth, Cardiff).

American Merchant Line (J. H. Winchester & Co.). 1. From New York to London. 2. From Baltimore, Norfolk to London, Hull, Leith. 3. From Philadelphia, Boston to London, Hull, Leith.

American Scantic Line (Moore & McCormack). From North Atlantic ports to Scandinavian and Baltic ports.

Black Diamond SS. Co. 1. From Philadelphia, New York to Rotterdam. 2. From New York to Rotterdam. 3. From Philadelphia, New York to Antwerp. 4. From Boston, Baltimore, Norfolk to Antwerp, Rotterdam.

Cosmopolitan Shipping Co. 1. From Baltimore, Philadelphia, New York to Havre, Dunkirk. 2. From Philadelphia, New York to Bordeaux, St. Nazaire.

Carolina Co. 1. From Jacksonville, Charleston, Savannah to Liverpool, Manchester. 2. From Jacksonville, Savannah, Charleston to Bremen, Hamburg. 3. From Tampa, Jacksonville, Savannah, Charleston to London, Rotterdam, Antwerp.

American Dixie Line (United Gulf SS. Co., Inc.). 1. From New Orleans, Galveston to London, Liverpool, Manchester. 2. From New Orleans to Liverpool, Manchester. 3. From New Orleans to Glasgow, Belfast, Avonmouth.

Mobile Oceanic Line (Waterman SS. Corp.). 1. From Mobile, Pensacola, Gulfport to London. 2. Ditto to Liverpool, Manchester.

Southern States Line (Lykes Bros. SS. Co.). 1. From New Orleans to Rotterdam. 2. From New Orleans to Bremen, Hamburg. 3. From Galveston, Houston to Bremen, Hamburg, Rotterdam.

Mississippi Valley European Line (Mississippi Shipping Co.). From New Orleans to Havre, Antwerp.

Texas Star Line (Daniel Ripley & Co.). From Houston, Galveston to Havre, Antwerp.

Mobile Oceanic Line (Waterman SS. Corp.). 1. From Mobile, Pensacola, Gulfport to Hamburg Bremen. 2. Ditto to Havre, Antwerp, Rotterdam

MEDITERRANEAN SERVICES.

Export SS. Corp. 1. From North Atlantic Range Norfolk to Portland to Greek Constantinople, Black Sea and Levant. 2. Ditto to Malta, Alexandria Surian Coastland, Greece. 3. Ditto to West Coast Italy and French Mediterranean. 4. Ditto to North Africa and other Mediterranean and Adriatic ports as cargo offers.

Gulf-West Mediterranean Line (Tampa Inter-Ocean SS. Co.). 1. From Gulf and South Atlantic, Galveston to Wilmington to Portuguese and Spanish Atlantic. 2. Ditto to Wilmington to Spanish Mediterranean, North Africa (west of Bizerta).

American Premier Line (United Gulf SS. Co., Inc.). 1. From Gulf and South Atlantic, Galveston to Wilmington to French Mediterranean, West Coast Italy. 2. Ditto to Adriatic, Greek Levant Constantinople, Malta, North Africa (east of Bizerta).

SOUTH AMERICAN SERVICES

American Delta Line (Mississippi Shipping Co.). From New Orleans and other Gulf ports (excluding Mobile) to Brazil and River Plate ports.

American Dispatch Line (Munson SS. Line). From Mobile and other Gulf ports (excluding New Orleans) to River Plate ports.

FAR EAST AND LONG VOYAGE SERVICES.

Atlantic Gulf & Oriental SS. Co (American Pioneer Line). 1. From North Atlantic ports to China and Japan 2. Ditto to Philippines and Dutch East Indies 3. From Gulf ports to Far East (China, Japan and Philippines)

A. H. Bull & Co 1. From Port Arthur and New York to South and East African ports 2 From New York (Gulf via New York when inducements offer) to Azores Canary Islands. Madeira and West Africa.

SALE OF SURPLUS ARMY WAR MATERIAL.

Assistant Secretary of War Dwight W. Davis, in his annual report in giving the details of the disposition of surplus property since the close of the World War, announced that the War Department has received and turned into the United States Treasury about 36 per cent. of the cost value of the stocks sold. The total amount received from surplus property sales to June 30, 1924 was $1,095,661,186. The original cost value of this property was $3,166,373,933.

The original cost value of property disposed of du ing the fiscal year 1924 was $187,733,437, and fo. this the Government was able to receive only $27,836,625. The cost value of the surplus property disposed of was as follows:

	During Past Year.	Total to June 30, 1924.
Sold	$128,246,854.86	$2,645,451,909.61
Transferred to other Gov't Departments	27,501,528.81	363,229,186.55
Withdrawals and transfers within War Dept.	31,985,054.22	157,692,037.53
Totals	$187,733,437.89	$3,166,373,933.69

Considerably more than half of the surplus disposed of during the year consisted of used materials and broken up ammunition. The average percentage of recovery on sales plus transfers the value of the transfers being estimated on the basis of replacement at 75 per cent of their original cost. was approximately 41 per cent.

The cost value of surplus property on hand for disposition at the beginning of the current fiscal year was $68,127,086, for which $27,304,439 represented the cost value of land and buildings and $40,822,647 the cost value of other surplus to be liquidated.

Properties whose usefulness is in abeyance during times of peace, but whose military value for future use is considered undoubted, have been leased to municipalities or private individuals at the current market rate, or, in certain cases turned over to other departments of the Government by permit revocable at the will of the Secretary of War. The income from leases for the past two fiscal years is shown below:

	Number	Amount.
1924	366	$960 603 08
1923	209	949 648.36
Increase	157	10 954 72

GOVERNMENT MARINE INSURANCE PROVED PROFITABLE

The Division of Marine and Seamen's Insurance of the Veterans' Bureau, created by Congress Sept 2, 1914, went out of existence by limitation of the law on Sept. 2, 1924. Congress authorized the Treasury Department to insure American merchant vessels and their cargoes against the hazard of war, amending the act in 1917 to provide insurance also for masters, officers and crews of the vessels against loss of life and injury from risks of war and detention following capture by enemies. Congress appropriated $50,000,000 for the payment of losses. This remains intact. Claims amounting to $29.-497,331.33 were paid and the books show a net profit of over $17,000.000. Outstanding insurance at the maximum exceeded $2,000.000.000

The largest policy written was $8,274,023 on the Kermanshaw, from New Orleans to Havre the largest loss was $4,467,336 by the sinking of the Argonaut. The Mixed Claims Commission established by the United States and Germany by the agreement of Aug. 12, 1921, awarded the United States on claims filed by the Veterans Bureau $24,032,586 86, with interest at 5 per cent. from Nov. 11, 1918, to date of payment.

PROGRESS OF MUSCLE SHOALS PLANT.

The Muscle Shoals electrical power and nitrate plants will be ready to operate by July 1, 1925, should Congress so desire, Major Gen. Taylor, chief of engineers of the army, said on Dec. 1, 1924 in his annual report.

Expenditures of $800,000 a month are being made. Beginning April, 1925, it is expected that the working force, which totaled 4,491 on June 30, 1924, will be greatly reduced and expenditures will average less than $500,000 a month, indicating full completion of the work by Oct. 1, 1925.

The cost of the Muscle Shoals project, including all funds expended from the inception of the work, as revised Dec. 4, 1923, was placed at $51,123,611. There had been appropriated and allotted to June 30, 1924, $39,258,410.

In addition Congress has authorized contracts for delivery of $6,541,590 worth of machinery and materials. That amount, it is estimated, will complete the project as far as the locks and dam are concerned and finish the power house to allow installation for operating eight main power units, four of 25,000 kilovolt amperes and four of 32,500 kilovolt amperes.

This work will put the structure in such a condition that the ten remaining main units may be conveniently installed as the market for power demands.

President Coolidge in his annual message to Congress, Dec. 3, 1924, said of Muscle Shoals:

"The production of nitrogen for plant food in peace and explosives in war is more and more important. It is one of the chief sustaining elements of life. It is estimated that soil exhaustion each year is represented by about 9,000.000 tons and replenishment by 5.450 000 tons. The deficit of 3,550,000 tons is reported to represent the impairment of 118 000,000 acres of farm lands each year.

"To meet these necessities the Government has been developing a water power project at Muscle Shoals to be equipped to produce nitrogen for explosives and fertilizer It is my opinion that the support of agriculture is the chief problem to consider in connection with this property It could by no means supply the present needs for nitrogen, but it would help, and its development would encourage bringing other water powers into like use

"Several offers have been made for the purchase of this property. Probably none of them represents final terms. Much costly experimentation is necessary to produce commercial nitrogen.

"For that reason it is a field better suited to private enterprise than to Government operation I should favor a sale of this property, or long-time lease, under rigid guarantees of commercial nitrogen production at reasonable prices for agricultural use

"There would be a surplus of power for many years over any possibility of its application to a developing manufacture of nitrogen. It may be found advantageous to dispose of the right to surplus power separately, with such reservations as will allow its gradual withdrawal and application to nitrogen manufacture.

"A subcommittee of the committees on agriculture should investigate this field and negotiate with prospective purchasers. If no advantageous offer be made, the development should cont nue and the plant should be dedicated primarily to the production of materials for the fertilization of the soil."

THE UNITED STATES BUDGET FOR 1925-26.

COMPARATIVE SUMMARY OF RECEIPTS AND EXPENDITURES.

	Estimated, 1926	Estimated, 1925	Actual, 1924
Total receipts	$3,641,295,092	$3,601,968,297	$4,012,044,701
Total expenditures (including service of the public debt from ordinary receipts)	3,267,551,378	3,534,083.808	3,506.677,715
Surplus	$373,743,714	$67,884,489	$505,366,986

ESTIMATES FOR 1925-26 COMPARED WITH 1924-25.

Estimates of appropriations for 1926 compared with appropriations for 1925, plus supplemental estimates for 1925 which are awaiting final legislative consideration:

	Estimates of Appropriations, 1926.	Appropriations, 1925.	Supplemental of Est. Submitted for 1925.	Total Appropriations, for 1925.
Legislative establishment	$15,094,545	$14,229,816	$50.000	$14,279,816
Executive office	439,960	397,847	43,520	441,367
Independent offices: Civil Service Commission	997,375	947,115	64,920	1,012,035

Ordinary	$1,777,377,711	$1,636,202,788	$202,091,393	$1,838,294,181
Reduction in principal of the public debt:				
Sinking fund	$323,175,000	$310,000,000	.....	$310,000,000
Purchase of Liberty bonds from foreign repayments	.....	208,600	.....	208,600
Redemption of bonds and notes from estate taxes	.....	100,000	.....	100,000
Redemption of securities from Federal reserve bank, etc	950,000	1,152,200	.....	1,152,200
Redemption of bonds, etc., received on account of foreign debts	160,641,130	160,345,601	.....	160,345,601
Principal of the public debt	$484,766,130	$471,806,401	.....	$471,806,401
Interest on the public debt	830,000,000	865,000,000	.....	865,000,000
Total payable from the Treasury	$3,092,143,841	$2,973,009,189	$202,091,393	$3,175,100,582
Post Office Department and postal service, payable from postal revenues	637,376,005	613,645,195	.....	613,645,195
Grand Total	$3,729,519,846	$3,586,654,385	$202,091,393	$3,788,745,778

The budget of the United States for the fiscal year 1925-26, given above, was presented to Congress by President Coolidge on Dec. 2. 1924. The Director of the Budget estimates the revenues for the Post Office Department will amount to $67,410,000 forecasting a surplus in postal revenue of $10,033,995, which amount is included in the estimate surplus of $373,743,714.

The reduction of the appropriation of the Interior Department, amounting to $25,500,000, is due to the decreasing pension roll resulting from the death of pensioners.

A net reduction was made in the Veterans' Bureau of $79,000,000, which included a drop from $89,000,000 to $38,000,000 for vocational rehabilitation, due to decreasing necessity for giving vocational training for men wounded in the war, a reduction of $7,000,000 for hospital construction, and a reduction from $127,800,000 set aside a year ago for possible bonus payments to $62,000,000, as estimated will be sufficient for the year.

The estimates for rivers and harbors is $56,237 600. It is estimated that $6,541,590 will be needed to complete Dam No. 2 at Muscle Shoals. Of this amount $3,501,200 will be required this year and will be covered by a supplemental estimate for 1925. The balance, $3,040,390, is provided for in the new budget. For reclamation purposes the estimate of $9,777,257; and the President earnestly recommended the enactment by Congress of the bill introduced during the last session authorizing a yearly appropriation of not exceeding $10,000.000 for a progressive building program in the District of Columbia.

The reduction in the Treasury Department estimate of $16,810,000 is accounted for by the fact that tax refunds amounting to $16,140,000, resulting from the 25 per cent. reduction in the income taxes, were included in the expenses for the current year, and no like item was necessary in the new budget. More than half of the $2,288,000 increase for the Department of Justice was accounted for by the amount set aside for the "investigation and prosecution of war frauds." The net increase of $62,000,000 in the amount set aside for the Department of Agriculture is "due primarily to an increase from $13,000.000 to $80,000.000 for the construction of rural post roads."

FOR THE NATIONAL DEFENSE.

The cut of $23,000.000 in the appropriation for the Navy Department is scattered over many items of expenditure, but a large part was due to the reduction of a fund set aside under the heading of "increase of the navy. For this $7,444 000 is the estimate which will provide for continuing work on the fleet submarines under construction and for beginning work on two of the four remaining fleet submarines authorized in the 1916 program The increased cost of the two airplane carriers now under construction has not yet been voted by Congress and is therefore not carried in this budget

The appropriation allows the Navy to continue at its present enlisted strength of 86.000 men, the Marine Corps at 18.000 instead of 19 500 and the Naval Reserve Force to continue on its present basis The reduction in the War Department appropriation of $8,600.000 is also scattered but the regular army can continue on its present basis of 12.000 officers, and 118.000 men. the number of reserve officers who can be trained will remain about the same attendance at the citizens' training camps must be limited to 29,000 instead of 33,900 as during the current year;

and the Militia Bureau will maintain an average strength of 173,500, a reduction of 3,500 from the present authorization.

President Coolidge, in transmitting the budget, said:

"For the national defense the estimates amount to $549,000,000, which is $29,000,000 less than the amount available this current fiscal year. These figures do not include non-military items of the War and Navy Departments. This reduction is made in accordance with my belief that we can have adequate national defense with a more modest outlay of the taxpayers' money. Further study may point the way to additional reduction without weakening our national defense, but rather perfecting it. This nation is at peace with the world. We no longer have international competition in naval construction of major units. We are concerned primarily with the maintaining adequate preparedness. We should have adequate preparedness in 1926 within the limits of the amount recommended.

"Aside from the important factor of training personnel, our national defense is largely an industrial problem. To-day the outstanding weakness in the industrial situation as it affects national defense is the inadequacy of facilities to supply Air Service needs. The airplane industry in this country at the present time is dependent almost entirely upon government business. To strengthen this industry is to strengthen our national defense. For the Air Service of the army and navy, and the Air Mail Service, the estimates, including contract authorizations, amount to $38,945,000. This contemplates an expenditure with the industries of $18,287,000 for the procurement of airplanes, engines and accessories. The remaining $20,658,000 is for maintenance, operation, experimentation and research.

"The amount of $38,945,000, however, does not include all that will be available for this service in 1926. Amounts contributing to the Air Service carried in other estimates, and usable war supplies, will make a total availability conservatively estimated at $55,000,000."

President Coolidge, speaking on Federal aid to the States and on economy, said:

"For Federal aid to States the estimates provide in excess of $109,000,000. These subsidies are prescribed by law. I am convinced that the broadening of this field of activity is detrimental both to Federal and State Governments. Efficiency of Federal operations is impaired as their scope is unduly enlarged. Efficiency of State Governments is impaired as they relinquish and turn over to the Federal Government responsibilities which are rightfully theirs. I am opposed to any expansion of these subsidies. My conviction is they can be curtailed with benefit to both the Federal and State Governments."

PRESIDENT COOLIDGE'S SECOND ANNUAL MESSAGE.

President Coolidge sent his second annual message to Congress on Dec. 3, 1924. He did not read it in person. The main points were:

"Our domestic problems are for the most part economic," he said.

"In my opinion the Government can do more to remedy the economic ills of the people by a system of rigid economy in public expenditure than can be accomplished through any other action. The costs of our national and local Governments combined now stand at a sum close to $100 for each inhabitant of the land. A little less than one-third of this is represented by national expenditure, and a little more than two-thirds by local expenditure. It is an ominous fact that only the National Government is reducing its debt. Others are increasing theirs at about $1,000,000,000 each year. The establishment of a system of drastic economy in public expenditure, which has enabled us to pay off about one-fifth of the national debt since 1919 and almost cut in two the national tax burden since 1921, has been one of the main causes in re-establishing prosperity. If at the close of the present session the Congress has kept within the budget, it will then be possible to have a moderate amount of tax reduction and all the tax reform that the Congress may wish for during the next fiscal year."

The President urged the repeal of the new publicity provision of the Income Tax Law; a scientific revision downward of the surtaxes; and opposed excess profits taxation.

He favored the sale of the Muscle Shoals hydro-electric plant or long-time lease under rigid guaranties of commercial nitrogen production at reasonable prices for agricultural use.

Noting the "beginning of the restoration of agriculture to a prosperous condition," and the great need of the farmer for markets and improved methods of distribution, the President deferred recommendations until the Agricultural Conference he had called should make its report.

Noting also the progress in recuperation made by the railways and their gain in efficiency, the President emphasized the necessity of expediting the consolidation of the railroads in larger systems, speeding up the valuations, and amending the labor sections of the Transportation Act, but recognizing that "the public has a right to the uninterrupted service of transportation."

On national elections the President said: "I am of the opinion that the national laws governing the choice of members of the Congress should be extended to include appropriate representation of the respective parties at the ballot box and equality of representation on the various Registration Boards, wherever they exist."

While believing thoroughly in the army and navy, in adequate defense and preparation, in the policy of working toward the full treaty strength of the navy, the President is opposed to any policy of competition in building and maintaining land or sea armaments.

Of foreign relations the President said:

"At no period in the past 12 years have our foreign relations been in such a satisfactory condition as they are at the present time. Our actions in the recent months have greatly strengthened the American policy of permanent peace with independence. The attitude which our Government took and maintained toward an adjustment of European reparations, by pointing out that it was not a political but a business problem, has demonstrated its wisdom by its actual results. We desire to see Europe restored that it may resume its productivity in the increase of industry and its support in the advance of civilization.

"We look with great gratification at the hopeful prospect of recuperation in Europe through the Dawes plan. Such assistance as can be given through the action of the public authorities and of our private citizens, through friendly counsel and co-operation and through economic and financial support, not for any warlike effort but for reproductive enterprise, not to provide means for unsound Government financing but to establish sound business administration, should be unhesitatingly provided.

"While we desire always to co-operate and to help, we are equally determined to be independent and free. We do not wish to become involved in the political controversies of others. Nor is the country disposed to become a member of the League of Nations or to assume the obligations imposed by its covenant.

Our representatives took a leading part in those conferences which resulted in the establishment of The Hague Tribunal, and later in providing for a Permanent Court of International Justice. I believe it would be for the advantage of this country and helpful to the stability of other nations for us to adhere to the protocol establishing that court upon the conditions stated in the recommendation which is now before the Senate, and further that our country shall not be bound by advisory opinions which may be rendered by the court upon questions which we have not voluntarily submitted for its judgment. This court would provide a practical and convenient tribunal before which we could go voluntarily, but to which we could not be summoned, for a determination of justiciable questions when they fail to be resolved by diplomatic negotiations."

He expressed sympathetic interest in proposals to outlaw war, but on account of proposals already made by other Governments for a European Conference deferred a hope of a supplemental Washington Conference on the Limitation of Armaments until the outcome of that action is known.

The President is opposed to the cancellation of the foreign debts, of which 42 per cent. has now been refunded, and believes they should be liquidated and paid as fast as possible under terms and conditions that "may have to conform to differences in the financial abilities of the countries concerned." He recommended that the life of the Foreign Debt Commission be extended.

The President advocated flood control of the Mississippi and the Colorado, the St. Lawrence Waterway purchase of the Cape Cod Canal; separate reformatories for men and women; a national police bureau for gathering and distributing information; payment of the last of the French Spoliation claims; administrative features of the Restrictive Immigration Law made more humane; passage of the Anti-Lynching Bill; extension of the civil service to include First, Second and Third Class Postmasters and the field force of the Prohibition Enforcement Unit; reorganization of the administrative departments of the Government; improvement in care for disabled veterans; a self-sustaining reclamation policy; reform of procedure in the Federal Courts to provide relief for congested dockets, and expedition of court procedure in criminal cases; and a readjustment of the duties of the United States Shipping Board.

SECRETARY OF THE TREASURY MELLON ON TAXATION.

Secretary of the Treasury Mellon, in his annual report made public Dec. 4, 1924, in discussing taxation, said:

"The President on signing the Revenue Act of 1924 issued a statement in which he pointed out its defects and indicated that he viewed the bill as a measure of temporary relief but not a genuine tax reform. I am in hearty accord with those views. This act, while granting many desirable reductions in taxes, failed to provide changes in the tax system for which there is a pressing need. The problem, therefore, before us now is not so much one of tax reduction as of tax reform. The attention of the Congress should be directed principally to the excessive surtax rates and the confiscatory estate tax rates. The gift tax is unworkable and unduly hampers legitimate business. The publicity provision in the Revenue Law, in my opinion, is a mistake of policy and will be detrimental to the revenue.

"Taxation should not be used as a field for socialistic experiment, or as a club to punish success, but as a means of raising revenue to support the Government. The controlling elements are not political. The last two preceding Secretaries of the Treasury, both under another political administration, presented to the Congress the same economic viewpoint with respect to high surtaxes as that which was advanced by the Treasury and raised the greatest controversy during the recent tax legislation.

"The purpose of taxation is to raise money, not only in the particular year in which the tax is assessed, but to leave the source from which the revenue is to be derived permanently unharmed, so that in the next year and in the years following, similar taxes will produce adequate revenue from this source. The power to tax has been well called the power to destroy. But the continued existence, not the destruction, of its source of revenue is the object of the Treasury.

WHERE WEALTH ESCAPES.

"The argument is made that the wealthy should bear substantially the whole burden. It is quite obvious that we could not collect solely from those having incomes in excess of $300,000 a year, the $861,000,000 of personal income tax which we received from all classes in 1922, because the total income of the $300,000 class, reported for taxation, was but $365,000,000, and even a 100 per cent. tax would be ineffective to produce the revenue required. The income is not there. We must also tax smaller incomes if the Government's requirements are to be met.

"Again, if we attempt to levy taxes inherently too high, those whom we seek to tax will find some of the many ways of avoiding the realization of an income which can be reached by taxation, and the source of the revenue will decline. Those having incomes in excess of $300,000, had in 1916, aggregate incomes of nearly $1,000,000,000 under a 15 per cent. maximum tax. This would have been more than sufficient to provide for the total income tax collected in 1922 from all classes, but by 1922, the aggregate income of this wealthy class, with the maximum rate of tax at 58 per cent., had dropped to $365,000,000. There was less income upon which taxes could be levied. As a matter of fact, about as much tax was collected from this class in 1916 with the 15 per cent. maximum tax as in 1921 with the maximum rate of 73 per cent.

"Taxation in America is not the simple question of garnering a tithe of the product of a purely agricultural people. We are a nation of 48 States, each with its own laws of property and corporate organization, none of which is subject to the Federal Government. We have the anomaly of a Government seeking to collect income taxes and at the same time providing legally authorized means of avoiding payment of the tax by the issuance of fully tax-exempt securities through its own agencies and a refusal to tax the income from the enormous mass of securities being issued by State and municipal governments. With so many doors to the house, the effort to close them all has given us the most intricate tax law in history. At the apex of this structure, we have maximum rates of tax and a publicity provision which not only encourage tax avoidance but make its avoidance, unless human nature be changed, inevitable.

"Ways will always be found to avoid a tax so inherently excessive. The solution of the problem lies not in passing more laws but in adopting laws with more reason. A reasonable rate of tax will make elaborate, expensive methods of avoidance unprofitable. A reasonable rate of tax will make the administration of the tax laws more simple of accomplishment.

"There is, in addition to the intricacies of our income tax and the impossibility of a strict enforcement, a much more serious effect of excessive taxation, both income and estate, on our industry and initiative. To make a new venture, to start a new business, to build a new building, to construct and not just sit passive, means risk. Where that risk involves capital, the probable rate of return must compensate for the risk taken. Yet the law now says to the man of large income: 'If you lose on your venture, you will pay 100 per cent. of the loss; if you win, the law will take 50 per cent. of your profit.' These are not the odds which encourage adventure or the production of income which will yield its revenue to the Government.

"We have, then, the blighting effect of excessive rates, which compel avoidance and destroy initiative, and by both means diminish the returns from the upper brackets, from which the Government has been taking a large part of its revenue. If these brackets become unproductive, the revenue can be made up only by higher taxes in the lower brackets and by decreasing the present exemptions so that the tax will apply upon smaller incomes.

REVENUE DECREASING.

"While it is true that income and estate taxes will always yield revenue, it is not true that they will yield sufficient revenue to contribute their share to the support of the Government, unless adjusted economically. In the seven-year period from 1916 to 1922, as to which we now have income-tax statistics, the reported income of those having incomes in excess of $300,000 dropped from $992,000,000 to $365,000,000, and the percentage of income of this class to all income reported dropped from 15.77 to 1.71 per cent. During the four years in which the 25 per cent. maximum tax on estates has been felt in revenue, receipts from this source have dropped from $154,000,000 in 1921 to $102,000,000 in 1924. Should this tendency continue, and the evidence is that it will and be accelerated in the estate tax, where the maximum has been raised from 25 to 40 per cent., then both taxes will be indeed unproductive.

"It may be truly said, therefore, that the man with small income is more interested than are the wealthy themselves in seeing that the tax upon high incomes and large estates is economically sound. With all the world opening to investment, with new tax-exempt securities being issued at the rate of more than $1,000,000,000 a year, and with other means of escaping, the wealthy need no guardian but to the extent that they are encouraged and do avoid taxation, the burden will incvitably be shifted to those with small or moderate incomes. The Government must live. The inevitable result of uneconomic taxation is to raise the price level, so that 97 per cent. of the people in the country, who pay no income tax directly, must make their payments indirectly in what they buy. They, too, are vitally interested.

"In all probability the recommendation of the Treasury of 25 per cent. maximum surtax plus a 6 per cent. normal tax, a total of 31 per cent., is above the belt of maximum profit. A total maximum tax of 15 per cent. might be on the lower side of this belt of profit. But at least the maximum rate should be brought within the limits of the belt. It would be more profitable to collect 30 per cent. of the $1,856,000,000 of aggregate net income of those having incomes above $100,000 in 1916 (a year of 15 per cent. maximum tax) than to collect 50 per cent. from similar incomes aggregating $892,000,000 in 1922 (a year of 58 per cent. maximum tax).

"It has been the belief of the Treasury, and it is borne out by experience, that, if taxes are too high, the source of revenue diminishes and the tax becomes less and less productive. During the period covered by available statistics, the percentage of aggregate income reported by those with incomes of $100,000 or more to the total income of all classes reporting dropped from 29.47 to 4.18 per cent., and in the $300,000 or more class from 15.77 to 1.71 per cent. In 1922, however, the maximum rate was reduced from 73 to 58 per cent., and the higher brackets recovered somewhat, the $100,000 class increasing its percentage from 2.37 to 4.18 per cent., and the $300,000 class from .78 to 1.71 per cent. This illustrates clearly the advisability of reducing the rates on the higher incomes so that more income proportionately may be available for taxation and the burden not have to be borne by the smaller incomes.

"An even more striking example is the case of capital gains. Prior to 1922 these were taxed at the regular surtax rates. In 1922, for the first time, a flat rate of 12½ per cent. was levied. Between these two years the number of taxpayers with incomes in excess of $300,000 increased from 246 to 537, and of this number, 165 would not have been in that class except for the realization of capital

gains. Prior to the insertion of the capital gains section in the law, investments did not change hands, property was tied up, and the Government collected little revenue from this source. When the rate of tax was reduced to 12½ per cent., however, the Government opened up a vein of revenue which in that one year yielded over $31,000,000 in taxes. It is quite obviously of as much advantage to the Government that the tax on capital gains be reduced as to the taxpayer and the business. Most of all is the moderate taxpayer benefited by removing some of the load from him. The rate was such as permitted the traffic to move, and it did move, to everybody's advantage.

TAX-EXEMPT SECURITIES.

"One of the most difficult problems the income tax presents is the tax-exempt security question. There are two solutions: First, eliminate the tax-exemption privilege; second, adjust the income-tax rates, so that the value of tax exemption as a means of tax avoidance shall be lessened. The first solution requires a constitutional amendment, and its adoption has met with serious political opposition. Also, in the last session of the Congress there was defeated a recommendation of the Secretary of the Treasury that a taxpayer should not be permitted to take as a deduction, in figuring his net income, interest paid by him except to the extent it exceeded the tax-exempt interest received by him and which he did not include in his gross income. While the Treasury renews the recommendation made heretofore that a constitutional amendment to reach tax-exemption be proposed by the Congress, it feels that the recognition of the necessity for this action by Congress may be delayed and that an immediate remedy should be adopted.

"Fully tax-exempt securities outstanding in the hands of the public now amount to $13,284,000,000, and are increasing at the rate of about $1,000,000,000 a year. The value of a tax-exempt security to a man of large income lies wholly in the fact that the tax-exemption feature gives him more free income than another equally safe investment, part of the return from which the Government takes. Under the present law, if a man has an income of $100,000 and is asked to invest money in some constructive project, the new project must return to him $1.75 for every $1 he would receive from investing the same money in tax-exempt securities. To express this another way, it takes about an 8 per cent. return on a taxable investment to be equivalent to a 4½ per cent. return on one that is tax-exempt. With higher incomes, the disparity is even greater. If the Treasury's recommendation for a maximum aggregate tax of 31 per cent. should be adopted the relative values would be $1.44 to $1, or 6½ per cent. taxable as compared with 4½ per cent. exempt. The difference between an investment in ordinary productive business returning 8 per cent., the requirement under the present law, and 6½ per cent., the requirement under the Treasury rates, to equal a 4½ per cent. tax exempt, is the difference between a sound investment and a speculative investment. One will be accepted. the other not.

"If the income-tax rates are reduced to a reasonable figure, the lure of tax-exempt securities to the wealthy becomes less appealing and many will put their money into business or new projects and be content with less return because it will give them as much free income as would a tax-exempt security. From such investments the Government gets revenue; from tax-exempt securities it gets none. By such investments capital is provided for industry at lower rates and the appalling increase of State and municipal indebtedness, with its inevitable taxation of the people to pay this indebtedness, is not encouraged.

ESTATE TAXES.

"Estate taxes offer a field of taxation which has been occupied by the Federal Government four times in its history, and each time until the present was promptly relinquished to the States when the particular emergency for which additional taxation was then required had passed. The first time was immediately after the Revolution; the second, during the Civil War; the third, during the Spanish War; and the present tax was inaugurated during the World War. The present tax is duplicated by similar taxes of every State in the Union except one or two. There arises, then, on this feature of our taxing law the question whether or not this particular field is one for Federal or State taxation, or whether the field is open to both. This is a political phase of the subject. Discussing the economic feature, it is necessary to consider the effect of both Federal and State taxes. The greater burden is, of course, the Federal tax.

"It is true that the present law gives a credit of any tax paid to the States up to 25 per cent. of the Federal tax, but the effect of this will only be for all States to raise their taxes to a point which will equal this 25 per cent. If a State imposes no inheritance tax, then the Federal Government takes its full Federal tax. If a State imposes a small tax, then the State tax plus the Federal tax is equivalent to the full Federal tax. It is not until the State tax exceeds 25 per cent. of the Federal tax that additional burdens are laid upon the estates of decedents domiciled in the particular State imposing such a tax. The incentive is for each State to adopt rates which will be equivalent to 25 per cent. of the Federal tax. The credit, therefore, is not necessarily a material decrease in the total tax of both jurisdictions.

"There is conflict between the States themselves. It is quite possible under our complex system of property ownership in America for the various States and the Federal Government to take, by death, taxes more than 100 per cent. of a particular estate. The elimination of this manifest injustice will require the working out of some reciprocal exercise of the taxing power by the States and the Federal Government in the interest of the good of the whole. A consideration of this feature might well have the attention of the Congress.

"In addition, there seems to be a well-defined view on the part of State authorities that the occupation of the field of death taxes by the Federal Government when the war emergency has ceased, is unfair to the States, since the Federal tax cuts very materially into the revenue which the State can obtain through this type of taxation. In many States, Federal taxes are a deduction from the gross estate before the State's death duty is levied. The direct effect of the Federal tax, therefore, is to decrease the amount of the estate subject to the State tax. A $10,000,000 estate is reduced to less than $7,500,000 if the Federal tax is first deducted. Indirectly the Federal tax is so high that it has a strong tendency to decrease both the size of the estate, which is the usual result of avoidance of excessive taxes, and the value of the property in the estate, which is the economic effect of a capital tax, so that graduated death duties of the States are much less productive.

"In 1921 the 25 per cent. maximum estate tax was first fully reflected in revenue. The return from Federal estate taxes for that and subsequent years has been as follows:

1921	$154,000,000
1922	139,000,000
1923	126,000,000
1924	102,000,000

"For the first three months of the current fiscal year, estate taxes have aggregated $19,703,126, as against $23,357,400 for the first three months of the previous fiscal year. This is a clear showing of the progressive failure of a tax inherently excessive. With a 40 per cent. maximum rate in the Revenue Act of 1924 we may expect an acceleration of this tendency.

"Death taxes are taxes upon capital. It is obvious that if the Government, to maintain itself, were to take 50 per cent. of every estate, small or large, and if, on the average, in the course of a generation, a man could not double his inheritance, there would be an actual depletion of capital within the country and ultimately nothing would be left to tax.

"Inheritance taxes are based upon capital values. Since an executor must obtain cash to pay his tax, he usually must dispose of the assets of the estate at what is essentially a forced sale. If an estate must realize upon some stock not generally dealt in, or a piece of real estate, for example, it can do so only by reducing the price until a bargain figure is reached which will attract purchasers. When the next estate comes along for taxation with similar stock or a like kind of property, its tax will be based upon the lower price fixed by the sale of the assets of the first estate. Thus we have a permanent lessening of values and a continuous exhaustion of the source for death taxes. Any tax which thus materially lowers values destroys itself. A man will not seek to build up a large fortune just to have it taken away from his family at his death.

THE GIFT TAX.

"The gift-tax provision was adopted upon the floor of Congress without reference to committee. In consequence it was never thoroughly studied and not tied up with the other provisions of the law. As an example, if a donor should give away a piece of property which cost him $50,000 and which, at the time of the gift, was worth $100,000, he is taxed on the basis of $100,000. If the donee should then sell this property for $100,000, he would be taxed on the basis of what the property cost the donor and be obliged to report $50,000 profit for income tax purposes, although the property was sold at the same price which fixed its value for taxation, as a gift.

"Aside from the grave constitutional question of the right of Congress to tax gifts at all, the gift tax is an excellent illustration of the futility of trying

to prevent avoidance of excessive taxes and still not penalize legitimate transactions. Under the statute, if property is sold or exchanged, the difference between the value of the property and what it received is considered a gift. So, if a seller makes a bad bargain, he suffers not only his loss on the bargain but he must pay a gift tax on his loss. The more he has lost the more tax he has to pay. The duty devolves upon the taxpayer to report every transaction where he received less in value than he gave, and upon the Bureau of Internal Revenue, therefore, to pass upon innumerable straight business transactions.

"The tax applies to corporations, and must necessarily do so or its avoidance would be too simple. A corporation would be reluctant to give pensions to its injured or superannuated employees, or to pay bonuses, if its gifts to these employees are taxed; and, of course, the larger the number of employees it wishes to benefit the more the corporation would be taxed for each employee. Although the tax is a tax on capital, it is on an annual basis. If a man should give $50,000 a year for 10 years there would be no tax, but if he gave $500,000 in one year the tax would be $19,000. It is better to adopt reasonable rates of taxation which do not compel avoidance, and to avoid indirect and artificial restraints upon usual and proper transactions.

PUBLICITY.

"The Revenue Act of 1924 added to the requirement that the names and addresses of all taxpayers be open to public inspection, the additional requirement that the amount of tax paid by each be also open to inspection. At the same time Congress specifically re-enacted Section 3167, which penalizes the printing and publication of any part of a return. No attempt was made to reconcile these two sections. Whatever the law may be, the printing has been done, and we can now view, in the light of actual experience, the undesirability of the publicity provision.

"Aside from the question of the unnecessary violation of the right of privacy which should be insured to all citizens in the spirit of the Fifth Amendment to the Constitution, it would be interesting to know what good will be accomplished by the provision. The Treasury has every means of access to the complete returns and all books and papers of each of these taxpayers. Publicity is wholly unnecessary from an administrative standpoint. Publicity serves one purpose, however. It gives to business rivals and to those having some ulterior motive, information which is of value to them solely to the extent it is detrimental to the taxpayer. They gain by the taxpayer being hurt. It is difficult to imagine any one thing which would be a greater spur to the efforts of all taxpayers to avoid a taxable income than the threat that the amount they pay will be pilloried. We may promptly expect renewed use of the many means of tax avoidance, with the consequent decrease in the productivity of the income tax. The provision should be repealed.

"In June, 1924, the President appointed 12 members of the Board of Tax Appeals, and the nucleus of the board thus appointed promptly undertook the preparation of rules of practice and methods of procedure. The board is functioning satisfactorily, and at present is keeping up to date with its calendar, and should be permitted to continue along the lines indicated by the Congress without further amendment to the law."

From the Internal Revenue Collectors' offices, in October and November, 1924, the newspapers of the country obtained and printed, under the publicity clause of the act of 1924, the amount of income taxes paid by many individuals and corporations. Four newspapers were indicted for this by the Attorney General as test cases to determine the law, and in the three first cases presented, their pleas were upheld by the courts.

SUPERPOWER IN THE NORTHEASTERN STATES.

NORTHEASTERN SUPERPOWER COMMITTEE.
Chairman—Herbert Hoover, Secretary of Commerce.

State Members—Maine—Charles E. Gurney, Chairman, Public Utilities Commission. New Hampshire—William T. Gunnison, Chairman, Public Service Commission. Vermont—Ernest H. West, Public Service Commission. Massachusetts—Henry C. Attwill, Chairman, Department of Public Utilities. Rhode Island—William C. Bliss, Chairman, Public Utilities Commission. Connecticut—Richard T. Higgins, Chairman, Public Utilities Commission. New York—Alexander MacDonald, Conservation Commissioner; Dwight B. LaDu, State Engineer and Surveyor; George E. Van Kennen, Deputy Attorney General. New Jersey—Col. William A. Starrett; Frederick C. Schneider. Pennsylvania—William D. B. Ainey, Chairman, Public Service Commission; Morris L. Cooke, Director, Giant Power Survey Board; Philip P. Wells, Deputy Attorney General. Maryland—Ezra B. Whitman, Public Service Commission.

Federal Members—Dr. George Otis Smith, Director, U. S. Geological Survey; O. C. Merrill, Executive Secretary, Federal Power Commission; Major G. R. Young, Corps of Engineers, U. S., and Paul S. Clapp, Secretary.

The Northeastern Superpower Committee is an outgrowth of a conference held in New York City in October, 1923, with the consent of President Coolidge, between Secretary Hoover and the Chairman of the State Utilities Commissions of the eleven Northeastern States.

The survey of power facilities and power needs made by the engineer sub-committee covers the States of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland and the District of Columbia. This region comprises one of several power areas into which the United States naturally divides itself, according to the engineers. Forty per cent. of the country's population, consuming 50 per cent. of the Nation's electrical power production and operating sixty per cent. of the primary power of the whole country, is concentrated in this particular area. The use of electrical power therein has been increasing at the rate of 10 per cent. per annum, and in the committee's opinion the demand will reach 30.8 billion kilowatt hours in 1930.

"The demand for electrical power within this area is supplied from water and from coal", the report says. "The present developed water power is about 3,030,000 horse power; the total potential water power available 90 per cent. of the time is 5,426,000 horse power. This is increased to 7,914,000 horse power available 50 per cent. of the time.

"At present, we have developed about 38 per cent. of the total water power ultimately available in this area. But practical development of water power will probably be such that not over 25 per cent. of the total power demand in any year can be met from this source. Principal dependence, therefore, must be placed upon generation of power from coal.

"There are in this area nearly two hundred different utility companies engaged in power production and distribution, many under common ownership. Of these, about 45 per cent. are technically interconnected, but only about 8 per cent. of the interconnections have capacity large enough for effective interchange of power. Great economies in cost of production can be secured from the early effective interconnection of these utility systems, in some cases involving larger and systematic high voltage transmission."

Such interconnection, according to the engineers, will lead to the reduction of the amount of reserve equipment, "better average load factor through pooling of daily and seasonal load variation, and wide diversification of use through increased industrial consumption," and more security in power supply against interruption by many causes. It will also mean that available water power in the area can be much more advantageously applied to carry base or peak load as local conditions may require It should make possible the use of secondary water power which arises from the seasonal flow of streams, and thus bring into practical use a larger quantity of water power than would otherwise be possible Finally, power would be available more quickly to meet growing demands.

The report points out that the economic generation and distribution of power vitally requires that it be produced in large plants. Present practice indicates that such plants should be constructed with total capacities of from 200,000 to 500,000 kilowatts, using generators of not less than 20,000 kilowatts each. Because great plants of this character require immense quantities of water for condensation purposes, their location will be controlled by considerations of water supply. A study of available water supply has led the engineers to the conclusion that the location of such plants will accordingly be restricted to the seaboard, the Great Lakes, the Ohio River and its tributaries, and the Susquehanna River.

The engineers declare that the large demand affords an immediate market for the cheaper water power from the larger projects and renders their development both urgent and necessary. At the same time the large use of steam in the area makes possible the use of the seasonal flow of rivers for relief of steam, and thus enables more complete utilization of the rivers than in any other part of the United States.

SECRETARY OF THE TREASURY MELLON ON THE PUBLIC DEBT.

Secretary of the Treasury Mellon in his annual report for the fiscal year ending June 30, 1924, said:

"The gross public debt was reduced $1,098,894,375 during the fiscal year ended June 30, 1924, and stood at $21,250,812,989 on the latter date. This reduction was accomplished through the application of the sinking fund and other public debt charges against ordinary receipts, aggregating $457,999,750; a reduction in the general fund balance of $135,527,-639.56; and the use of the entire surplus of $505,-366,986.31. The annual interest charges on the debt represented by this reduction are equivalent to over $45,000,000.

"The total reduction in the debt since the high point of $26,594,000,000 on Aug. 31, 1919, amounted to $5,343,000,000 at the close of the last fiscal year. At the peak of the debt, however, there was an unusually large amount of temporary borrowing in anticipation of the next tax payment date and the debt figures on that date give a somewhat exaggerated impression of the true situation. The debt on June 30, 1919, a more representative date, was $25,484,000,000, and the reductions by fiscal years since that time are shown in the followingt able, in millions of dollars:

Fiscal Year.	From Ordinary Receipts.	From Surplus.	From Net Balance in Gen'l Fuud.	Total Debt Reductions.
1920.....	79	212	894	1,185
1921.....	422	87	187	322
1922.....	423	314	277	1,014
1923.....	403	310	99	614
1924.....	458	505	136	1,099
Total.....	1,785	1,428	1,021	4,234

"Three-fourths of the debt reduction during the fiscal year 1920 was due to the decrease in the net balance in the general fund of the Treasury. During the war financial operations were on such a large scale that it was necessary for the Treasury to have always available a working cash balance of a billion dollars or more. This balance was obviously much too large for peace-time operations, and consequently it was reduced $894,000,000 during the fiscal year 1920, effecting a corresponding reduction in the debt. During the years 1921-1924, however, the reductions have been effected almost entirely, taking the four-year period as a whole, through fixed-debt retirements chargeable against ordinary receipts and through the use of the surplus.

"The fixed-debt charges are included in the regular budget of the Government under a definite plan worked out soon after the close of the war for the gradual retirement of the public debt, and must be met before the budget can balance. The most important of these fixed-debt charges is the cumulative sinking fund provided in the Victory Liberty Loan Act. Retirements through this fund during the past fiscal year were about $296,000,000. The next items in size among the fixed charges are the retirements of securities received from foreign Governments under debt settlements and the purchases from foreign repayments These two accounts amounted to about $150,000,000 during the fiscal year 1924.

"Retirements through the sinking fund increase each year, but this means no increase in the total amount devoted to the debt service, because the increase in the sinking fund each year represents interest saved on previous retirements from the fund. There can be little or no further reduction in the general-fund balance for some years to come, because it is as low now as the Treasury's activities will safely permit The total balance, moreover, fluctuates around $200,000,000. a small figure when compared with the public debt. It is not contemplated, furthermore, that there will be further surpluses of any significance. The Revenue Act of 1924 will reduce tax receipts over $450,000,000 annually, it is estimated, and in addition some of the sources of revenue during the past few years such as realizations on war assets and back taxes, are rapidly becoming exhausted.

"The total debt retirements from the peak have effected a saving in interest amounting to approximately $225,000,000 annually, a saving which equals nearly one-third of the total annual pre-war expenditures of the Government. This strict adherence to a rigorous debt-paying program has not only strengthened the public credit and put the Government's finances in a more manageable shape but has greatly added to the strength of the general investment and money markets. Retrenchment in current Government expenditures which does not impair governmental efficiency and the application of the surplus thus created to debt retirements increase the country's capital supply by that amount, the funds being released for private enterprise. Sound Government finance, including a rigid debt-paying policy, is absolutely indispensable to the best interests of business and private finance. Private credit cannot continue to flourish if the public credit is in a state of chaos. Therefore, a debt-paying program has been the only consistent policy to follow.

"The necessity for such a policy is obvious when it is realized that this country came out of the war with a debt at its peak in 1919 equal approximately to the total expenditures of the Government during its entire existence prior to 1917. The debt per capita had risen from $12 at the beginning of the war to about $250 at the middle of 1919 Interest alone on this debt has been about a quarter of a billion dollars more each year since 1920 than the total Government expenditures during the fiscal year 1916, the last pre-war year.

'Debt reduction, in fact, is the best method of bringing about tax reduction. From the viewpoint of the country as a whole. the war was paid for when it was fought. The equipment. munitions, ships. food, clothing, and all other matcrials and supplies necessary for carrying on the war had to be produced before they could be utilized

"The present program calls for fixed-debt retirements chargeable against ordinary receipts aggregating about $500,000,000 annually. This constitutes at present about 14 per cent of the Government s expenditures. but the amount will increase progressively each year by the amount of the reduction in interest charges due to debt retirements through the sinking fund. The Treasury believes that this program, while providing for substantial retirements. is not unduly burdensome and should not be interfered with by additional or extraordinary governmental expenditures. '

The Secretary of the Treasury in his 1923 report pointed out that the entire short-dated debt of $7,500,000,000 outstanding at the beginning of his administration had either been retired or refunded into more manageable maturities "The effectiveness of that refunding program is illustrated in the operations of the past year," he said. "Maturities have fallen only on quarterly tax payment dates and, due to the heavy retirements from ordinary receipts, only comparatively small new issues have been necessary. All new issues since the previous annual report have been certificates of indebtedness."

On Nov. 1, 1924, the Secretary of the Treasury called for redemption and payment on Feb. 2, 1925, the 4 per cent. loan of 1925, and this issue is therefore included now in the short-dated debt. Treasury saving certificates were withdrawn from sale at the close of business July 15, 1924. The maturities of the short-term debt to Nov. 1, 1929, are as follows:

MATURITIES OF THE SHORT-TERM DEBT.

(Amounts as of Oct. 31, 1924.)

Date of Maturity.	*Total.*	*Cumulative Total.*
Dec. 15, 1924.....*a*	$407.197,500	$407,197,500
Jan. 1, 1925.....*b*	25,144.494	432,341,994
Feb. 1, 1925.....*c*	118,489,900	550.831,894
March 15, 1925.....*a*	400,299.000	951,130,894
March 15, 1925.....*c*	597.325.900	1,548,456,794
June 15, 1925.....*c*	406,031,000	1.954.487,794
Sept. 15, 1925.....*a*	388,869,500	2.343,357,294
Dec. 15, 1925.....*c*	299,659,900	2,643,017,194
Jan. 1, 1926.....*b*	13,715.592	2.656,732,786

March 15, 1927.....*c*	668,201,400	4,456,109,782
Oct.-Dec., 1927.....*b*	15,548,160	4,471,657,942
Dec. 15, 1927.....*c*	355,779,900	4,827,437,842
Jan. 1, '28-Nov. 1, '29.*b*	265,179,538	5,092,617,380
Sept. 15, 1928.....*c*2	978,776,300	8,071,393,680

a—Certificates of indebtedness: *b*—Treasury (war) saving certificates (including interest); *c*—Notes and bonds; the first item, Feb 1, 1925, being the 4 per cent. loan of 1925 called for redemption the last item of Sept. 15, 1928, being the maturity of the Third Liberty Loan.

The Treasury Department announced on Dec. 2 an issue of 4 per cent. 30-year bonds, dated Dec 15, 1924, and due Dec. 15, 1954, the first long-term bond offering since October, 1922. The offering was for about $200,000,000, the Secretary reserving the right to allot additional bonds to the extent that Third Liberty Loan 4¼ per cent. bonds maturing Sept. 15, 1928, and Treasury notes maturing March 15, 1925. are tendered in payment The bonds are redeemable at option of the Treasury after twenty years on four months' notice.

FOREIGN DEBTS OWED TO THE UNITED STATES.

Secretary of the Treasury Andrew W. Mellon, in his annual report to Congress, made public December, 1924, in regard to the foreign debts due to the United States said:

"The obligations of foreign Governments held by the Treasury on Nov. 15, 1924, aggregated $10,559,929,727.59, in principal amount, and may be classified as follows:

"(1) $5,242,247,155.14 representing cash advances made by the Secretary of the Treasury, with the approval of the President, under the Liberty bond acts ($9,598,236,575.45 originally held).

"(2) $595,052,397.27 received from the Secretary of War and the Secretary of the Navy on account of sales of surplus war material under the act of July 9, 1918 ($595,141,368.43 originally held).

"(3) $75,812,037.38 received from the American Relief Administration on account of relief supplies furnished under the act of Feb. 25, 1919 ($84,093,963.55 originally held).

"(4) $55,172,966.88 received from the United States Grain Corporation on account of sales of flour for relief purposes under the act of March 30, 1920. ($56,858,802.49 originally held).

"(5) $3,736,628.42 received from the United States Shipping Board on account of services rendered to the Government of Poland.

"(6) $4,587,908,542.50 received from the Governments of Finland, Great Britain, and Hungary under the terms of the respective funding agreements ($4,610,939,000 originally held)."

The obligations of foreign governments held by the United States Treasury as to principal and unpaid interest by countries are:

Country.	*Principal.*	*Interest.*
Armenia	$11,959,917	$2,901,274
Austria	24,055,708	5,773,370
Belgium	377,029,570	94,794,143
Czechoslovakia	91,879,671	23,648,768
Esthonia	13,999,145	3,489,540
Finland	(*a*)8,955,000	.....
France	3,340,512,817	796,711,537
Great Britain	(*a*)4,577,000,000	.....
Greece	15,000,000	2,250,000
Hungary	(*a*)1,953,542	.....
Italy	1,647,869,197	449,477,924
Latvia	5,132,287	1,156,805
Liberia	26,000	6,118
Lithuania	(*b*)4,981,628	1,048,371
Nicaragua	140,590	.....
Poland	(*b*)159,666,972	18,893,027
Roumania	36,128,494	9,476,953
Russia	192,601,297	58,782,192
Jugoslavia	51,037,886	13,101,164
Total	$10,559,929,727	$1,481,511,194

(NOTE—(*a*) Debt funded. (*b*) Agreement signed to fund both principal and interest awaits approval by Congress, under which bonds of Lithuania amounting to $6,030,000 and of Poland amounting to $178,560,000 will be delivered to the Treasury).

The present members of the World War Foreign Debt Commission are: Secretary Andrew W. Mellon, Chairman; Secretary Charles E. Hughes, Secretary Herbert C. Hoover; Senator Reed Smoot; Representative Theodore E. Burton; Representative Charles R. Crisp; Richard Olney; and Edward N. Hurley; Assistant Secretary of the Treasury Eliot Wadsworth, Secretary.

At the time of the creation of the commission, Feb. 9, 1922, the United States held obligations of foreign Governments representing indebtedness incurred in connection with the World War aggregating in principal amount approximately $10,102,000,000. The commission has negotiated agreements for the funding of the principal of such indebtedness (including the indebtedness of Lithuania and Poland, respectively, referred to below), amounting to $1,249,434,720.64, or more than 12 per cent. of the total indebtedness to the United States at that time.

The terms of the settlement with Great Britain approved by Congress Feb. 28, 1923, were in substance:

Principal of notes to be refunded	$4,074,818,358.44
Interest accrued to Dec. 15, 1922, at 4¼%	629,836,106 99
Total	$4,704,654.465.43
Deduct payments made in 1922, with interest at 4¼%	100,526.379.69
Total	$4.604,128.085.74
Paid in cash	4,128 085.74
Total principal of indebtedness	$4,600,000,000.00

The principal of the bonds shall be paid in annual instalments on a fixed schedule, subject to the right of the British Government to make these payments in three-year periods. The amount of the first year's instalment will be $23,000,000 and these annual instalments will increase with due regularity during the life of the bonds until, in the sixty-second year, the amount of the instalment will be $175,000,000, the aggregate instalments being equal to the total principal of the debt.

The British will have the right to pay off additional amounts of the principal of the bonds on any interest date upon ninety days previous notice.

Interest is to be payable upon the unpaid balances at the following rates on Dec. 15 and June 15, of each year:

3 per cent. semi-annually, June 15, 1923, to Dec. 15, 1932, inclusive.

3½ per cent. semi-annually, June 15, 1933, until final payment.

For the first five years one-half the interest may be deferred and added to the principal, bonds to be issued therefor similar to those of the original issue.

Any payment of interest and of principal may be made in any United States Government bonds issued since April 6, 1917, such bonds to be taken at par and accrued interest.

Settlement of the indebtedness of Finland was effected on May 1, 1923, and approved by Congress on March 12, 1924; and on March 22 the Treasury received bonds of Finland amounting to $9,000,000 and canceled obligations of that country of a principal value of $8,281,926.17 with accrued interest. Payment will extend over a period of sixty-two years with interest at 4½ per cent. from the date of the loan, about four years before, to Dec. 15, 1923, and 3½ per cent. from then to Dec. 15, 1932, and at 3 per cent. thereafter to maturity.

A formal agreement substantially the same as that reached with Finland was signed with Hungary on April 25, 1924, and approved by Congress on May 23, 1924. Agreement with all other creidtor nations and the Reparation Commission whereby all liens upon the assets and revenues of Hungary were subordinated to the reconstruction of $50,000,000 made under the plan approved by the Reparation Commission Feb. 21, 1924. The Treasury received bonds of Hungary to the amount of $1,939,000 on May 29, canceling obligations to the aggregate principal amount of $1,685,835.61.

An agreement substantially the same as with Finland was signed with Lithuania on Sept. 22, 1924, covering an indebtedness of $6.030,000, which on Dec. 1 awaited the approval of Congress.

An agreement substantially the same as with Great Britain was reached with Poland on Nov. 14, 1924. which also on Dec. 1 awaited the approval of Congress. Poland's indebtedness represents money due from the sale of surplus war supplies, relief supplies of the American Relief Administration, the sale of flour by the United States Grain Corporation and services by the United States Shipping Board. The principal amount was $156,666,972.39; accrued interest to Dec. 15, $18,893.053.60. Polish bonds amounting to $178,560,000 to be accepted, and the balance, $5,025.99 paid in cash.

Informal representations looking to a settlement of the indebtedness of France were begun by Ambassador Jusserand with Secretary Mellon in Nov. 1924. The status of the French debt was then summarized by Mr. Mellon in a letter to Senator Borah on Dec. 11, 1923.

"The amount of the debt due by the Government of France to the Government of the United States, under two different categories, is as follows:

"(1) Total advances to the Government of France under authority of the Liberty Loan acts, $2,997,477,800; less amounts repaid (ten payments from Jan. 8, 1919, to Feb. 23, 1923), $64,212,568.04; principal amount of obligations now held, $2,933,265,231.96.

"Total interest on obligations evidencing above advances, $779,621,604.80.

"Payments made on account of interest, $129,570,376.13.

"Accrued and unpaid interest as of Nov. 15, 1923, $650,051,228.67.

"(2) Obligations of the Government of France, by their terms payable in 1929-1930, received from the Secretary of War on account of sales of surplus war materials under the act of July 9, 1918—$407,341,145.01.

"Interest has been paid as it came due upon these obligations. Total, $3,990,657,605.64."

Representations regarding their debts have been made during 1924 by Czechoslovakia, Esthonia, Latvia, and Jugo-Slavia, but no formal proposals had been put before the commission up to Dec. 1, 1924. No representations had been made up to that date by Belgium, Greece, Italy or Roumania.

REPARATIONS AND THE DAWES PLAN.

The preparation, acceptance and execution of the Dawes plan as contained in a report to the Reparation Commission, to give practical effect to the reparation clauses imposed upon Germany by the Versailles Treaty, has been the outstanding feature of the European situation in 1924.

The German Government, having reached the point of economic exhaustion after eight months of resistance to the French and Belgian occupation of the Ruhr, which began Jan. 11, 1923 (see THE WORLD ALMANAC for 1924, pages 154, 155), President Ebert on Sept. 26, 1923, called upon the population to give up "passive resistance" and the German ordinances on the subject were annuled. The Government informed the Reparation Commission on Oct. 24, 1923, that it was prepared to resume the deliveries provided by the Treaty of Versailles, default in which had caused the occupation, but that the economic situation in Germany made it impossible; it therefore requested the commission to examine the resources and capacity of Germany under Article 234 of the Treaty of Versailles.

The commission on Nov. 30, 1923, voted to do so, and as the United States had renewed the offer contained in Secretary Hughes's address of Dec. 29, 1922, "to take part in an economic conference in which all the European Allies chiefly concerned in German reparations participate for the purpose of considering the questions of the capacity of Germany, to make reparation payments, and an appropriate financial plan for securing such payments," with the expressed approval of the State Department, Gen. Charles G. Dawes, Owen D. Young and Henry M. Robinson, Americans, were appointed to the two committees of experts set up by the commission.

The first committee, charged with inquiry into the balancing the budget and stabilizing the currency, consisted of Charles G. Dawes, Chairman, and Owen D. Young of the United States; Robert M. Kindersley and J. C. Stamp of Great Britain; J. Parmentier and Edgard Allix of France; Alberto Pirelli and Federico Flora of Italy; and E. Francqui and Maurice Houtart of Belgium.

On the second committee, charged with bringing about the return of capital which had left Germany were: Reginald McKenna of Great Britain; Chairman; Henry M. Robinson of the United States; Andre Laurent-Atthalin of France; Mario Alberti of Italy; and Albert-Edouard Janssen of Belgium.

The two committees met in Paris on Jan. 14, 1924, and under the chairmanship of Gen. Dawes made a thorough, exhaustive and expeditious investigation, transmitting their full reports to the Reparation Commission on April 19, 1924. Chairman Dawes in his letter transmitting the reports of the committees, said:

"The committee has carefully and laboriously covered the broad field of investigation. It has had the constant cooperation of able staffs of experts, gathering information, digesting it and presenting it. It conducted, on the ground, an examination of the officials of the German Government and representatives of its labor, agriculture and industry. It received from the German Government and its representatives voluminous and satisfactory answers in response to its written inquiries. It has called to its assistance outside experts of international reputation, and has had the benefit of the accumulated information heretofore gathered by your commission."

The report stated that the committee approached its task "as business men anxious to obtain effective results." The problem presented was the practical means of recovering the debt of Germany to the Allies under the Treaty of Versailles, not "the imposition of penalties, and the guarantees which we propose are economic and not political."

THE DAWES PLAN.

As an essential agency for creating in Germany a unified and stable currency the committee proposed the establishment of a new bank of issue, with the exclusive right to issue paper money for a period of fifty years and to act as the depository and fiscal agent of the German Government. Treaty funds collected in Germany are all to be deposited in the new bank to the credit of a special account and are only to be withdrawable by the creditor nations under conditions and safeguards which will adequately protect the German exchange market and the interest of the creditor nations and the German economy.

The bank will be directed by a German president and managing board but, in order to safeguard the observance of its statutes, the bank will have a further governing body known as a General Board which will consist of seven Germans and seven foreigners, one each of British, French, Italian, Belgian, American, Dutch and Swiss nationality. One of the foreign members will be known as the "commissioner" who "will be responsible for seeing that there is no infringement of the provisions relative to the issuance of notes and the maintenance of the bank's reserves. Decisions of the General Board will require a majority vote of ten of the fourteen members unless both the President and the commissioner are included in the majority, in which case a simple majority will be sufficient." The new bank will have a capital of 400,000,000 gold marks, part to be subscribed in Germany and part abroad. The total amount of the foreign loan proposed was 800,000,000 gold marks to be deposited in the new bank as a contribution to its gold reserves and for financing essential deliveries in kind during the preliminary period of economic rehabilitation.

As normal resources from which Germany is to make payments to meet her treaty obligations, the committee recommended the following sources: (a) From her ordinary budget; (b) from railway bonds and transport tax; (c) from industrial debentures.

The committee stated that "it is not open to dispute, as a simple principle of justice, and it is contemplated by the treaty that the German people should be placed under a burden of taxation at least as heavy as that borne by the people of the Allied countries."

The committee fully recognized "both the necessity and the justice of maintaining the principle embodied in the treaty that Germany's payments should increase with what may prove to be the increase on her future capacity," and that "an estimate now made once for all might well underestimate this." To meet this situation, the committee provided for a fixed annual payment and a variable addition thereto dependent upon a composite index figure designed to reflect Germany's increasing capacity. The index is to be ascertained from the following six sets of representative statistics: railway traffic, population, foreign trade, consumption of tobacco, etc., budget expenditure and consumption of coal. An average of years (chiefly 1926, 1927, 1928, and 1929) is to be taken as the base, and the average of these six percentages will be taken as indicating the proportionate increase to be added to the treaty sums demanded in a given future year.

The committee believed that:

"Under this system Germany will retain her incentive to develop, as she retains the major part of the advantage of any increase in prosperity, while the Allies obtain a reasonable share in this increase and avoid the risk of losing through a premature estimate of future capacity.

"At the same time, the adoption of a method involving not discretionary but automatic application, gives the necessary assurance from the commencement both to Germany and the world that treaty demands will not, in the period to which the settlement relates, be again the subject of negotiation and dispute."

THE GERMAN RAILWAYS.

The second source recommended by the committee for deriving treaty payments was the issuance of 11,000,000,000 gold marks first mortgage bonds on the German railways, bearing 5 per cent. interest and 1 per cent. sinking fund per annum; the bonds to be received and administered by a trustee appointed by the Reparation Commission. The committee reported that, while it is true that the German railway systems have passed through a period of great difficulty since the war from causes which were largely beyond their control, they have been enormously overstaffed and extravagant capital expenditures have been made. The situation had been improved by the separation of the railways from the ordinary administration and assimilation to a business concern, by the slackening of capital construction, and the raising of fares to a point where some profit is provided, but the committee regard these measures as insufficient. Railway experts consulted by the committee estimated the capital value of the railways on a conservative basis at 26,000,000,000 gold marks, unincumbered with old debts which were extinguished by the depreciation of the mark, and the committee was convinced that "under proper management, under unified control, and with a proper tariff policy, the railways can without difficulty earn a fair return upon their present capital value."

The committee recommended the conversion of the railways into a joint stock company to be managed by a board of eighteen directors, nine to be chosen by the German Government and private holders of preference shares, and nine to be named by the trustee of the bonds, five of whom may be German. The Chairman of the Board and the General Manager will be German, and the Railway Commissioner

will represent the interests of the bond holders. In addition to the 11,000,000,000 gold marks bonds issued for reparation account, the new railway company is to have a capital of 2,000,000,000 gold marks of preference shares and 13,000,000,000 gold marks of common stock. One and one-half billion gold marks of the preference shares are to be set aside in the treasury of the company for sale to private persons and the proceeds of the sale of the other 500,000,000 gold marks of preference shares and all of the common shares are to go to the German Government.

Finally, the committee recommended a contribution to reparation payments from German industry in a sum of not less than 5,000,000,000 gold marks to be represented by first mortgage bonds bearing 5 per cent. interest and 1 per cent. sinking fund. These industrial debentures will be received and administered by a trustee appointed by the Reparation Commission. In justification of this recommendation the committee reports:

"This amount of bonds is less than the total debt of industrial undertakings in Germany before the war. Such indebtedness has for the most part been discharged by nominal payments in depreciated currency, or practically extinguished.

"The committee is satisfied that a burden of mortgage debt of the amount of 5,000,000,000 gold marks on the industries of Germany, fairly apportioned, bearing a moderate rate of interest and payable on long maturity, does not create a burden greater than that which would have existed had there been no depreciation of currency."

The committee found that Germany must be given a certain period within which to recover her economic equilibrium, and made provision for minimum reparation payments for a two-year "budget moratorium period," and a second two-year "transition period," the payments not becoming standard until the fifth year. The payments contemplated were: First year, 1,000 million gold marks (from the foreign loan and 200 millions from interest on railway bonds); second year, 1,220 million gold marks (from interest on railway bonds, industrial debentures and budget contributions); third year, 1,200 million gold marks; fourth year, 1,7350 million gold marks; and fifth year (standard year), 2,500 million gold marks (from interest in railway bonds and industrial debentures, from transportation tax and from budget).

The report states clearly that the above payments "comprise all amounts for which Germany may be liable to the Allied and associated powers for the costs arising out of the war, including reparation, restitution, all costs of all armies of occupation, clearing house operations, commissions of control and supervision, etc."

NO TIME LIMIT FIXED.

The committee considered it to be outside its competence "to establish a limit of years or of amount for the working of the index, nor is it within their competence to fix the number of annuities which Germany will have to pay, as this would practically mean the fixation of a new German capital debt." A communique of the French Foreign Office, dated Oct. 28, 1923, two days before the appointment of the Dawes committee, stated that "France will not accept that a committee of experts make any changes in the amount of the debt as fixed May 1, 1921, and will give its consent to no reduction whatsoever in the amount of the obligations of Germany as determined by the Reparation Commission in May, 1921."

Concerning the economic potentialities of Germany for carrying out the plan, the committee said:

"The task would be hopeless if the present situation of Germany accurately reflected her potential capacity; the proceeds from Germany's national production could not in that case enable her both to meet the national needs and to ensure the payment of her foreign debts.

"But Germany's growing and industrious population; her great technical skill; the wealth of her material resources; the development of her agriculture on progressive lines; her eminence in industrial science; all these factors enable us to be hopeful with regard to her future production.

"Further, ever since 1919, the country has been improving its plant and equipment; the experts specially appointed to examine the railways have shown in their report that expense has not been spared in improving the German railway system; telephone and telegraph communications have been assured with the help of the most modern appliances; harbors and canals have likewise been developed; lastly, the industrialists have been enabled further to increase an entirely modern plant which is now adapted in many industries to produce a greater output than before the war.

"Germany is therefore well equipped with resources; she possesses the means for exploiting them on a large scale; when the present credit shortage has been overcome, she will be able to resume a favored position in the activity of the world where normal conditions of exchange are gradually being restored."

As to the financial burden which will devolve upon the individual German should the plan be adopted, the committee "is confident that it lies within the power of the German people to respond to the burdens imposed by the plan, without impairing a standard of living comparable to that of the Allied countries and their neighbors in Europe, who are likewise subject to heavy burdens, largely resulting from the catastrophe of the war."

The plan provided that the definite act of the German Government in meeting its financial obligations will be the payment of all reparation moneys, including interest and sinking fund on railways and industrial debentures, transport tax and budget contributions, in gold marks or their equivalent in German currency, into the bank of issue to the credit of an "Agent for Reparation Payments" to be appointed by the Reparation Commission.

To safeguard the stability of the budget and the currency, the committee provided that the use and withdrawal of the moneys deposited in the bank of issue for the account of reparations will be controlled by a committee consisting of the Agent for Reparation Payments and five persons skilled in matters relating to foreign exchange and finance, representing five of the Allied and associated powers.

The committee emphasized that its whole report is based on the hypothesis that the fiscal and economic unity of Germany will be restored and, while it regarded questions of military occupation as not coming within its competence, the committee assumed that the existing measures, in so far as they hamper German economic activity, will be withdrawn or sufficiently modified as soon as Germany has put the plan into execution.

CERTAIN REVENUES SET APART.

"If the economic system now in operation in occupied territory be modified," the committee "is unanimously of the opinion that a settlement of reparation must be reinforced by adequate and productive securities." For this purpose the committee suggested that the German revenues from customs, alcohol, tobacco, beer and sugar be assigned to Germany's treaty creditors as collateral for the payment of the sums charged annually on the German budget. The total yield of the assigned revenues will be paid into the account of the Agent for Reparation Payments through the receiving offices immediately on receipt. The amounts required to meet the reparation charges in the budget will be retained and the balances periodically released to the German Government. These revenues will be supervised by a commissioner to be appointed by the Reparation Commission, assisted by an advisory committee on which each of the interested Allied countries will be represented. The general functions of the commissioner will be to ascertain that all assigned revenues are properly obtained from the public and flow through the control administration.

"The plan," Gen. Dawes said, "if accepted, will lead to an ultimate and lasting peace."

ACCEPTED BY GERMANY.

On April 11, 1924, the Reparation Commission decided that the experts' reports "offer a practical basis for the rapid solution of the reparation problem," but reserved its approval and action until Germany declared its willingness to collaborate in the execution of the experts' plans. On April 16 the German Government sent to the Reparation Commission a note declaring its willingness to collaborate in the execution of the experts' plans.

On April 17 the Reparation Commission unanimously decided to approve and officially transmitted the reports to the governments concerned recommending "that the plans proposed might be brought into full operation with delay." At the same time the commission asked the German Government to submit the drafts of laws, decrees and other measures intended to insure the complete execution of the plans.

The British, Belgian and Italian Governments accepted the plan on April 24. The French Government, on April 25, expressed satisfaction with the report, dependent on the action of Germany and the Allied Governments

A conference of the Allied Premiers was called and met in London, July 16-Aug. 16, to discuss the execution of the Dawes plan. The American Government was invited to take part and the State Department instructed Ambassador Kellogg to attend "for the purpose of dealing with such matters as affect the interests of the United States, and otherwise for purposes of information."

The reports were thoroughly studied by committees and approved on Aug. 2, when an invitation was sent to Germany to attend the conference.

The German delegation, headed by Chancellor Marx, arrived on Aug. 5, studied the reports of the committees and submitted comments in writing, which were also gone over.

The military evacuation of the Ruhr within six months was asked by Germany, while France and Belgium proposed two years. Ultimately the main questions in dispute were compromised. The Reparation Commission retained jurisdiction of the question of German defaults, but an American is to be added when the commission is considering any point relating to the Dawes report, and the provisions of the Treaty of Versailles are amended so as to provide for appeals to an arbitral commission from decisions of the commission upon German defaults either under the treaty or the Dawes plan. The complete military evacuation of the Ruhr within one year was promised by France and Belgium, if the London agreements are carried out in good faith by Germany, and they gave up their demand for the retention of employees on the German railways.

The agreements were signed on Aug. 16 by the Allied Powers and Germany; the United States did not sign. On Aug. 18, the French began the evacuation of Dortmund and Hoerde, in the Ruhr. The Reichstag accepted the plan as a whole by a two-thirds vote (314 to 127) on Aug. 29, and the following day the final contracts were signed in London.

The Reparation Commission on Sept. 1 declared the Dawes plan in operation and officially recognized Owen D. Young as Agent General for Reparation Payments, Andrew McFadyan of England as Commissioner of Revenues, with M. Delacroix of France and Signor Nogara of Italy as associates. Germany made her first payment of 20,000,000 gold marks to Mr. Young on Sept. 2. The customs barrier between occupied and unoccupied Germany was abolished on Sept. 9, and the restrictions imposed since Jan. 11, 1923, on the movement of persons, goods and vehicles removed on Sept. 22. Seymour Parker Gilbert jr., formerly Under Secretary of State of the United States, was appointed on Sept. 3 Permanent Agent General to succeed Mr. Young on Oct. 31.

The Reparation Commission ann unced on Oct. 13 that the Dawes Plan Organization had been fully established and the German Governm ent had complied with all requirements to date under the London agreement. The commission approved the plans for a $200,000,000 loan, which was floated with great success; the $100,000,000 allotted to the United States was oversubscribed on Oct. 10 by $1,000,000,000, and the British share of £12,-000,000 ($60,000,000) was oversubscribed on Oct. 15 thirteen times over. The French share of £3,-000,000 and the Swedish share were also completely taken up.

The Reparation Commission practically went out of existence on Nov. 12.

The German Rentenbank went into liquidation under law passed by the Reichstag Aug. 30, establishing the reorganized Reichsbank. This bank began to function the second week in October and its first statement of its condition on Oct. 15 showed capital stock 300,000,000 reichsmarks (gold); surplus, 900,000 reichsmarks; and notes in circulation, 1,396,748,000 reichsmarks. Its assets totaled 4,264,833,000 reichsmarks. It may extend to the Government credit for working capital only up to 100,000,000 marks for ninety days, and must maintain a 40 per cent. reserve against its notes in circulation, of which 75 per cent. must be in gold. Dr. Hjalmar Schacht was made President; Gates McGarrah of New York represents the United States on General Board, and Prof. G. W. J. Bruins of the Netherlands is Commissioner of Note Issue.

The Rhineland railways were turned over on Nov. 16 by the Franco-Belgian Railway Administration to the new private company, the Reichseisenbahn Gesellschaft, to operate the German railways under the Dawes plan, completing the new organization. The capitalization is 26,000,-000,000 gold marks: Reparation bonds (held by trustee for the Agent General for Reparations), 11,000,000,000 gold marks; preferred stock (sold to the public), 2,000,000,000 gold marks; common stock (owned or sold by the German Government), 13,000,000,000 gold marks. Interest on the bonds is at 3 per cent. for the first year and at 5 per cent. after the third year. The total mileage is about 33,000 miles and the value approximately $200,000 a mile. Herr Karl von Siemens is President, and Herr Oeser, Director General.

WHAT GERMANY HAS PAID.

The Reparation Commission, July 31, gave out a statement showing that up to July 1, 1924, nearly five years since the Treaty of Versailles went into effect, Germany has paid 5,570,942,000 gold marks, and credited to her for material, etc. seized and turned over is the sum of 2,834,900,000 gold marks, n aking a total of 8,405,932,000 gold marks.

Of the cash paid, England received 641,000,000 gold marks; France, 144,000,000; Belgium, 1,084,-000,000; the rest being scattered among the other Allies. Of 3,300,000,000 gold marks in deliveries in kind France received 1,278,000,000. The total amount received by France in cash payments and deliveries in kind thus stands at 1,724,000,000 gold marks. After deduction of France's part in the Spa loan and the cost of the French Army of Occupation there is left for France for reparations for the first five years of the working of the peace treaty the sum of 101,874,000 gold marks, or the equivalent of half a billion paper francs, against which France has expended 100,000,000 paper francs.

The Reparation Commission's figures do not include the value of seizures in the Ruhr. This account is kept by the French and Belgians separately because of the English refusal to recognize the Ruhr occupation. It is generally estimated that there has been a profit of 600,000,000 gold marks, which would, therefore, bring the total of German payments up to slightly more than 6,000,-000,000 marks.

THE LEAGUE OF NATIONS.

The Assembly of the League of Nations met in Geneva Sept. 1-Oct. 2, 1924, for its fifth annual session. Mr. Guiseppe Motta of Switzerland was elected President. The Dominican Republic was admitted to membership, bringing the total number of member states up to fifty-five. The member states are:

Abyssinia	Esthonia	Norway
Albania	Finland	Panama
Argentina	France	Paraguay
Australia	Greece	Persia
Austria	Guatemala	Peru
Belgium	Hayti	Poland
Bolivia	Honduras	Portugal
Brazil	Hungary	Roumania
British Empire	India	Salvador
Bulgaria	Irish Free State	Kingd'm of Serbs
Canada	Italy	Croats-Slovenes
Chili	Japan	Siam
China	Latvia	South Africa
Colombia	Liberia	Spain
Costa Rica	Lithuania	Sweden
Cuba	Luxemburg	Switzerland
Czechoslovakia	Netherlands	Uruguay
Denmark	New Zealand	Venezuela
Dominican Rep.	Nicaragua	

The Argentine Republic, Bolivia, Guatemala, Honduras and Peru were the only ones not represented.

The states which are not members of the League of Nations are: Afghanistan, Ecuador, Egypt, Germany, Mexico, Russian Union of Socialist Soviet Republics, Turkey and the United States of America.

The Assembly elected six non-permanent members of the Council: Uruguay, Brazil, Czechoslovakia, Sweden, Spain and Belgium.

The permanent members of the Council are: British Empire, represented first by Viscount Cecil (Lord Robert Cecil), later by Lord Parmoor, and last, at Rome, in December, by J. Austen Chamberlain, Secretary for Foreign Affairs; France, represented by M. Leon Bourgeois, with M. Hanatoux as substitute, and part of the time by M. Briand and by M. de Jovenel; Italy, represented by M. Salandra; and Japan, represented by Viscount Ishii.

The Assembly approved the budget of the League for 1925, amounting to 22,658,138 gold francs ($4,371,963), as compared with 23,328,686 gold francs ($4,501,348) in 1923. That year closed with a surplus of 2,774,854 gold francs ($535,417). The budget expenditures are allocated as follows: Secretarial and Special Organizations, 12,217,334 gold francs ($2,357,375); International Labor Organization, 7,210,595 gold francs ($1,391,308); Permanent Court of International Justice, 1,905,084 gold francs ($367,592); capital expenditures, 1,275,125 gold francs ($246,040); and working capital fund, 50,000 gold francs ($9,647). The League has a permanent secretarial building, is completing a labor office building and the Assembly decided to erect at once a conference hall to cost 4,500,000 gold francs ($868,290) on a site presented by the Canton of and the City of Geneva.

The Council of the League, which held its thirtieth session Aug. 29-Oct. 3, had continued its oversight of the League's work in the nearly completed reconstruction of Austria (see article on Austria, page 598 in THE ALMANAC) and in the reconstruction of Hungary (see article on Hungary, page 632 in THE ALMANAC). The Assembly approved the work done and recorded its satisfaction with the progress made, noting in respect to Hungary that "the scheme has

been well launched under the best auguries for its complete success." It also praised the work of the Greek Refugee Settlement Commission under the Presidency of Henry Morgenthau, formerly American Ambassador to Turkey. The Assembly approved and continued the work of the Health Organization, Committee on Intellectual Co-operation, Permanent Mandates Commission, Committee on Traffic in Women and Children, Committee on Traffic in Opium and Other Dangerous Drugs and Committee on Slavery.

The Council also arranged for the protection of Moslem minorities in Albania, for Greek minorities in Bulgaria and for Bulgarian minorities in Greece. It also appointed a special commission of three members to collect facts whereby the Council may define the frontier between Turkey and the Iraq. Both Lord Parmoor, for Great Britain (the mandatory power for the Iraq), and Fethi Bey, for Turkey, declared before the Council on Oct. 29 that their respective Governments accepted in advance the Council's decision. A *status quo* was agreed to.

The Assembly also requested the Council to communicate to the Governments, including non-members, a draft convention on the control of the inter-nation traffic in arms and to ask whether they would be prepared to attend a conference on the subject in the spring of 1925. The Assembly further instructed the competent League organization to prepare, if possible with the co-operation of the United States, a convention on the private manufacture of arms. The American Minister to Switzerland, in a letter dated Aug. 29, had announced that his Government would consider favorably an invitation to take part in such conference

The British Government had proposed an amendment to Article XVI. of the Covenant to the Fourth Assembly which had adjourned the discussion of it to the Fifth Assembly. It was adopted and is to be submitted to the members for ratification; the amended text now reading (with the new matter in *italics*):

> Should any member of the League resort to war in disregard of its covenants under Articles XII., XIII., or XV., it shall ipso facto be deemed to have committed an act of war against all other members of the League, which hereby undertake immediately to subject it to the severance of all trade or financial relations and *to prohibit all intercourse at least between persons resident within their territories and persons resident in the territory of the covenant-breaking state and, if they deem it expedient, also between their nationals and the nationals of the covenant-breaking state, and to prevent all financial, commercial or personal intercourse at least between persons resident within the territory of that state and persons resident within the territory of any other state, whether a member of the League or not, and, if they deem it expedient, also between the nationals of that state and the nationals of any other state, whether a member of the League or not.*

The Prime Ministers of Great Britain (J. Ramsay MacDonald), France (Edouard Herriot) and Belgium (Georges Theunis) took part in the preliminary discussion on the reduction of armaments, which culminated in the joint resolution presented by the French and British delegations and unanimously adopted by the Assembly. This resolution paved the way for the drafting by three notable committees headed by Dr. Eduard Benes, Foreign Secretary of Czechoslovakia and M. Politis of Greece, deliberating in harmony, of the protocol for the Pacific Settlement of International Disputes, which the delegations to the Assembly, after debate, unanimously decided to recommend to their Governments for acceptance. Ten states signed it at once: France, Albania, Bulgaria, Esthonia, Greece, Latvia, Poland, Portugal, Jugo-Slavia, and Czechoslovakia.

This protocol aroused much opposition in Great Britain and in the Dominions. At the thirtieth session of the Council of the League at Rome in December, Foreign Secretary Austen Chamberlain, representing the British Empire, obtained the postponement without prejudice of its consideration and arrangements for the resultant disarmament conference until the March, 1925, meeting of the Council. Mr. Chamberlain's position was that the new British Government had not had sufficient time to consider a document "of such profound importance" and wished also to discuss it with the Dominions.

THE PROTOCOL IN BRIEF.

The main purpose of the Geneva protocol, in the three adjacent fields of arbitration, enforcement and disarmament, can be sufficiently appreciated from the following summary of its provisions:

1. The League Covenant to be amended on the lines laid down in the present protocol, whose provisions, nevertheless, will be operative as soon as the protocol comes into force (i.e., without waiting for the Covenant to be actually amended).

2. "The signatory states agree in no case to resort to war," except in resistance to acts of aggression or when acting in agreement with the Council or Assembly under the present protocol.

3. The jurisdiction of the Permanent Court of International Justice to be accepted in all cases falling within its scope.

PRESSURE.

4. Article XV. of the Covenant to be amended so as to establish the following procedure for the settlement of every class of dispute:

(a) The Council itself attempts to settle the dispute by conciliation.

(b) Failing this the Council endeavors to persuade the parties to make their own arrangements for judicial hearing or arbitration.

(c) Failing this the Council shall at the request of one party appoint arbitrators, acting so far as possible in agreement with both disputants. Points of law arising may, once only, at the request of either party be referred to the Permanent Court of International Justice.

(d) If neither party requests arbitration the Council shall resume direct consideration of the case as arbitrators (not merely as conciliators). Its findings if unanimous are binding.

(e) If the Council fails to reach unanimity it shall itself appoint arbitrators whose decision shall be final.

Signatories undertake to accept and carry out in good faith awards or findings so determined.

Should a state fail to carry out this undertaking the Council shall "exert all its influence to secure fulfillment," suggesting, if necessary, measures to secure this end (e. g., economic and financial pressure). Should the non-complying state resort to war, all the sanctions specified in Article XVI. of the Covenant become immediately operative.

DOMESTIC MATTERS.

5. Matters falling within the domestic jurisdiction of one party cannot be subjected to the procedure specified in the protocol, and a decision of the Permanent Court that a question is of this character shall be binding on the arbitrators. This, however, shall not prevent such a question being brought before the Council under Article XI. of the Covenant.

(Note—This last sentence was added at the urgent insistence of the Japanese delegation.)

6. Deals with the procedure (broadly analogous to that already specified for the Council) to be followed when a dispute is referred to the Assembly.

7. Signatories undertake to refrain from any kind of military action or preparation while an arbitration or inquiry is in progress. The Council may initiate (by a two-thirds majority) any kind of investigation into alleged infractions of this undertaking, and should a state be found guilty of illegal acts and decline to desist from them, the Council shall decide on the measures to be taken against it.

8. Signatories agree to refrain from any act which might constitute a threat of aggression. A nation suspected of preparing such acts may be cited before the Council under Article XI. of the Covenant.

9. Existing demilitarized zones may be permanently or temporarily supervised by the Council and the demarcation of new zones recommended where desirable.

THE AGGRESSOR.

10. Should hostilities break out, that state shall, unless the Council unanimously decides otherwise, be presumed to be an "aggressor" within the meaning of this protocol which

(a) Refuses to submit a dispute for pacific settlement;

(b) Refuses to conform to a judicial or arbitral decision or a unanimous finding of the Council;

(c) Commits an act of war in face of the Council's prohibition of the movement of its forces (see Article VII.);

(d) Violates a demilitarized zone. (See Article IX.)

If the Council cannot at once determine the aggressor it shall impose an armistice on the belligerents and either party violating its terms shall be deemed an aggressor.

When the Council has declared a state an aggressor on one of these grounds it must forthwith call on signatories to apply without delay the appropriate sanctions.

SANCTIONS.

11. As soon as an aggressor has been declared by the Council, all the measures indicated in Article XVI. of the Covenant become immediately operative.

"These obligations shall be interpreted as obliging each of the members of the League to co-operate loyally and effectively in support of the Covenant of the League and in resistance to any act of aggression in the degree in which its geographical position and its particular situation as regards armaments allow."

"In accordance with Article XVI. of the Covenant the signatories give a joint and several undertaking to come to the assistance of the state attacked or threatened," and to give each other mutual support in the matter of finance, economic measures and transit, and to take all measures in their power to keep open the sea and land communications of the threatened state. If both parties are aggressors the sanctions apply to both.

12. The Council shall invite the economic and financial organizations of the League to advise it on the most effective method of putting economic sanctions in force and definite plans based on this advice shall be prepared.

13. In view of the military sanctions provided for in Article XVI. of the Covenant and Article XI. of this protocol the Council "shall be entitled to receive undertakings from states determining in advance" the forces they would be able to bring into action at once.

Furthermore, as soon as the Council has called on signatory states to apply sanctions, the said states may, "in accordance with any agreements which they may previously have concluded," set their forces in motion in defense of the threatened or attacked state. Such agreements shall be registered and published by the League. "They shall remain open to all states members of the League which may desire to accede thereto."

(Note—This is all that remains of the so-called sectional agreements, or regional understandings.)

14. The Council shall declare when sanctions are to be withdrawn.

15. The whole cost of measures of enforcement shall be borne by the offending state up to the limit of its capacity.

States not members of the League shall, if involved in a dispute with a League member, be invited to accept the provisions of the protocol in the manner contemplated in Article XVII. of the Covenant. If such a state declines and resorts to war the provisions of Article XVI. of the Covenant shall be applicable against it.

DISARMAMENT.

17. The signatories agree to take part in a disarmament conference, to which all states shall be invited, at Geneva on June 15, 1925. The Council shall draw up a program of reduction and limitation in preparation for the conference.

If by May 1, 1925, this protocol has not been ratified by a majority of the permanent members of the Council, Britain, France, Italy, Japan and at least ten other members the conference shall be either abandoned or postponed.

18. In decisions taken by the Council under this protocol the votes of parties to the dispute shall not be counted.

19. The protocol in no way affects the Covenant except where so expressly stated.

20. Disputes regarding the interpretation of the protocol shall be decided by the Court of International Justice.

21. The protocol shall come into force as soon as a plan for the reduction of armaments has been approved by the disarmament conference.

In the event of the Council declaring, on grounds to be defined by the conference itself, that the disarmament plan has not been carried out, the protocol shall become null and void.

INTERNATIONAL OPIUM CONFERENCE.

The first International Opium Conference under the auspices of the League of Nations opened at Geneva under the Presidency of Herluf Zahle of Denmark on Nov. 3, 1924, followed immediately by the second conference on Nov. 17. In the first conference were representatives of the various countries which still permit the use of smoking opium, and was to devise ways and means of terminating its use. The debates were acrimonious, especially between the Englishmen representing India and the Japanese delegates. It failed to reach an agreement looking toward the suppression of opium smoking in the Far East.

The second conference was composed of all countries party to the Hague Opium Convention and was to deal specifically with raw materials, opium and coca leaves and with manufactured drugs. At this conference, by invitation, the United States was represented by a delegation composed of Representative Stephen G. Porter of Pennsylvania, Bishop Charles E. Brent, Dr. Rupert Blue, former Surgeon General of the Public Health Service, Mrs. Elizabeth Washburn Wright and Edwin Neville of the State Department.

The policy of the United States is to restrict the manufacture and domestic distribution of narcotics to medicinal and scientific uses in accordance with domestic laws as administered by the Treasury Department, and with regard to international traffic to adhere to its international obligations for the suppression of the traffic. It therefore urges the necessity of the curtailment of the production of opium and coco leaves.

The conference had not finished its work by Dec. 11 when these pages went to press.

PERMANENT COURT OF INTERNATIONAL JUSTICE.

The project drafted by the Advisory Committee of Jurists at The Hague in the summer of 1920 for a Permanent Court of International Justice was adopted by the Assembly of the League of Nations, modified in some important parts, notably in the matter of obligatory jurisdiction, on Dec. 13, 1920. The eleven regular or titular Judges, as they are called, and the four Deputy Judges were elected on Sept. 14 and 15, 1921. The election was made by the independent, separate and concurrent votes of the Council of the League, in which body the great powers form a majority, and the Assembly of the League, in which the small powers have an overwhelming preponderance. At the suggestion of Elihu Root of the Advisory Committee, upon failure of the Council and Assembly to agree, a committee of three was appointed from each body, which produced an agreement.

The Judges of the court which sits at The Hague are: Rafael Altamira y Crevea of Spain, Dionisio Anzilotti of Italy, Antonio Sanchex de Bustamente y Sirven of Cuba, Robert Bannatyne, Viscount Finlay of Great Britain, Bernard C. J. Loder of the Netherlands, Yorozu Oda of Japan, Charles Andre Weiss of France (Vice-President), John Bassett Moore of the United States, Didrik Galtrup Gjedde Nyholm of Denmark, Max Huber of Switzerland (President), and Epitacio da Silva Pessoa of Brazil (former President of the Republic, and Judge of the Federal Tribunal of Brazil), elected by the Assembly and Council of the League of Nations Sept. 10 to succeed Judge Ruy Barbosa of Brazil, deceased.

The Deputy Judges are: Dumitriu Negulescu of Roumania, Wang Chung Hui of China, Mikhailo Jovanovitch of the Serb-Croat-Slovene State and Frederick Valdemar Nikolai Beichmann of Norway. Each Judge is to serve nine years and may be re-elected. The ordinary Judges receive a salary varying from $6,030 to $14,070, in accordance with the length of session.

According to the League Covenant, all disputes between members of the League must be submitted either to arbitration or to inquiry of the League Council. According to the statute of the court (Art. 36), the jurisdiction of the court "comprises all cases which the parties refer to it." The following cases are recognized as being generally suited for arbitration: (1) The interpretation of a treaty; (2) any question of international law; (3) the existence of any fact which, if established, would constitute a breach of any international obligation; (4) the extent and nature of the reparation to be made for any such breach. There is no provision in the Covenant that compels members of the League to submit disputes of the above nature to arbitration.

In the Wimbledon case, the first on which the world court was asked for a definite judgment, the court on Aug. 17, 1923, handed down a decision against Germany, which had refused to allow the British steamer Wimbledon, chartered by a French company and loaded with munitions consigned to Poland, to pass through the Kiel Canal.

Finland appealed to the court for an interpretation of the Russo-Finnish Treaty regarding Eastern Karelian autonomy. Russia refused to take part on the ground that it was an internal question of Russia. The court held, on July 23, that it was not competent to pronounce an opinion in a dispute between a member of the League of Nations and a non-member without the latter's consent.

These 47 states have signed the protocol and the optional clause:

Albania	Finland	Paraguay
Australia	France	Persia
Austria	Great Britain	Poland
Belgium	Greece	Portugal
Bolivia	Hayti	Roumania
Brazil	Hungary	Kingdom of the Serbs, Croats, and Slovenes
Bulgaria	India	
Canada	Italy	
Chile	Japan	Siam
Chica	Latvia	Spain
Colombia	Liberia	Sweden
Costa Rica	Lithuania	Switzerland
Cuba	Luxemburg	Union of South Africa
Czecho-Slovakia	Netherlands	
Denmark	New Zealand	Uruguay
Salvador	Norway	Venezuela
Esthonia	Panama	

ENFORCEMENT OF THE NATIONAL PROHIBITION ACT.

The Eighteenth Amendment to the Constitution came into effect Jan. 16, 1920, one year after the date of its ratification. Since then it has been unlawful to manufacture, sell or transport intoxicating liquors for beverage purposes in United States territory. The Volstead act (entitled the National Prohibition Act), providing for Federal Prohibition enforcement, and defining "intoxicating liquor" as liquor which contained one-half of one per cent. or more of alcohol, passed Congress in October, 1919, and was vetoed by President Wilson on Oct. 27. The House immediately repassed the bill by a vote of 176 to 55; the Senate on the following day also overrode the veto, 65 to 20. The Volstead act provided for the licensing of sacramental wine in small quantities, and of whiskey and wine, under stringent restrictions, for medicinal purposes.

From a summary of the accomplishments in enforcement of the National Prohibition Act up to Sept. 11, 1924, prepared by the Federal Prohibition Commissioner, Roy A. Haynes, in the Department of Internal Revenue, these facts are taken.

At the urgent instance of the Treasury Department, Congress in the Appropriation Act for 1922-23 authorized the Commissioner of Internal Revenue to concentrate untaxpaid whiskey in bonded warehouses. Since then the number of bonded whiskey warehouses has been reduced from 296 to 85; 28 have been designated as official concentration warehouses and the stocks remaining in the warehouses not so designated will be gradually moved into them. These now contain about 24,500,000 gallons of the 33,000,000 gallons of whiskey, original gauge, now in bond, available for medicinal use. This means not only the safety of the whiskey for prohibition purposes, but a very large saving (over $300,000 last year) in salaries of Government guards, the number being reduced from 490 to less than 190 and the salaries of such guards being $1,440 per annum.

OPERATIONS OF PROHIBITION OFFICERS.

The magnitude of the policing activities of the enforcement agents of the Prohibition Unit can be realized from the fact that during the past fiscal year 68,161 persons were arrested by these officers for violating provisions of the National Prohibition Act. Fines and forfeitures resulting from these arrests were turned into the Federal Treasury in the amount of $5,682,719.87. Offers in compromise for civil liabilities incurred as a result of violations of the National Prohibition Act covered into the Treasury $855,395.37 in addition. This does not include the amounts paid as fines and forfeitures in the State Courts. Most of the cases made by Federal Prohibition agents are taken into the State Courts on account of the fact that the agents are able to get quicker action in the State Courts, owing to the congested dockets of the Federal Courts.

During the fiscal year 1922-23 the withdrawal of whiskey for taxpayment and consumption amounted to 1,813,295 gallons. This whiskey was taxpaid for distribution under permits, the major part of it being dispensed by druggists on physicians' prescriptions. This consumption of whiskey compares with the previous years as follows: During the fiscal year 1920-21, 8,671,860 gallons were taxpaid, this being the first full year of prohibition under the Eighteenth Amendment. The amount of 2,645,506 gallons was taxpaid during 1921-22, and 1,754,893 gallons during 1922-23. The average annual consumption of whiskey during ten years prior to prohibition was approximately 130,000,000 gallons. The high point of whiskey consumption in the country was reached in 1916-17, when 164,291,294 gallons of distilled spirits were taxpaid. The figures for seven years, including the production of denatured alcohol follow:

Fiscal Year.	Taxpaid Whiskey Released.	Taxpaid Alcohol & Spirits Released.	Denatured Alcohol Produced.
	In wine gallons.		
1918	56,222,477	33,865,231	50,163,016
1919	62,142,459	21,538,508	38,270,939
1920	5,484,125	22,846,270	28,836,350
1921	8,671,860	26,413,243	22,388,824
1922	2,654,503	16,433,158	33,345,747
1923	1,754,893	10,806,800	57,565,142
1924	1,813,295	9,497,725	67,687,295

One of the most difficult situations to handle when the present Administration came into office was the control of distribution of wine. Very large quantities of wine were being made into medicinal preparations which were being used to a large extent for beverage purposes. After exhaustive examination and experimentation, new rules were adopted requiring medication to an extent which now renders such medicinal wines unfit for use as a beverage. The result has been an extreme reduction in the quantities of wines so used. In 1920-21, there were 6,353,729 gallons of wine withdrawn from bond on permit, while in 1923-24 the quantity so withdrawn was 4,194,030 gallons, of which latter quantity 2,942,429 gallons were used for sacramental purposes.

PERMIT BLANKS AND DOCTORS' PRESCRIPTIONS.

Counterfeiting of withdrawal permits and physicians' prescription blanks is now practically impossible.

One of the most effective measures adopted by the present Administration in keeping control of sales of liquor and preventing the forcing of business in liquors by permit holders, was the adoption of a rule to the effect that wholesale druggists will be permitted to procure and sell potable spirits not to exceed an amount equal to 10 per cent. of their wholesale drug business during the preceding year. It was found that there was a tendency on the part of the persons desiring to deal in liquors to go into the wholesale drug business merely as a cover for their liquor business. The majority of the wholesale druggists agree that it is a necessary and salutary measure.

DENATURED ALCOHOL.

The National Prohibition Act directs the Treasury Department to foster and encourage the production of alcohol for the making of fuels, dyes and other lawful products. In 1923-24 119,948,406 proof gallons of alcohol were denatured under permit for use in the United States. This amount compares with 38,812,138 gallons denatured during 1920-21, the first full year of constitutional prohibition; 93,762,422 gallons during 1916-17, when practically the entire quantity was used in the manufacture of explosives for the war; and 17,811,078 gallons denatured during 1913-14, the last year prior to the war.

Considerable progress was made in the elimination of permits to use pure alcohol in making barbers' supplies and toilet waters by authorizing, and in many cases, compelling the use of specially denatured alcohol, formulae for which were authorized after extended consultation with the best chemists in the perfume industries and were the subject of joint experiments on the part of the Internal Revenue Laboratory and the trade associations. In 1920-21, 26,007,957 gallons of pure alcohol were so used, while in 1923-23 but 10,743,380 gallons were so used, and in 1923-24 but 9,457,312 gallons.

The Government of the United States at the present time has the most advanced system of industrial alcohol denaturation and distribution of any country in the world.

BREWERIES.

One of the most serious difficulties has been the control of cereal beverages which under the law may contain alcohol in volume of less than one-half of one per cent. There has seemed to be a rather general tendency on the part of some of these plants to overstep the legal alcoholic percentage. The large number of these plants in operation makes it impossible under available appropriations to maintain government offices at each plant at all times to supervise operations.

In 1917 there were 1,217 breweries in operation in this country. In 1922 there were 476 applications filed for permits to operate dealcoholizing plants; in 1923 there were 558 such applications filed; and 521 applications in 1924. Of these applications 367 were approved and permits issued in 1922; 402 in 1923; and 357 in 1924. The following numbers of such applications were disapproved: 101 in 1922; 145 in 1923, and 153 in 1924. Permits are issued only after thorough inspections are made of the plants and searching investigations of the personnel proposing to operate the plants. The number of dealcoholizing plants operated in 1923-24 was 483.

This unit, through its agents and its legal officers, has maintained a determined and persistent effort to control these plants and punish violations of the statute. During the past three years through these efforts 83 persons have been convicted for unlawfully operating breweries; 29 such plants have been closed by permanent injunctions.

EXPORTATION AND IMPORTATION.

Some of the most serious problems of enforcement which have been largely met and overcome during the past two years are those concerned with the exportation of whiskey and the importation of wines. Prior to the appointment by the Prohibition

Commissioner of a board for the regulation of importations and exportations of liquor and to pass upon each application, considerable quantities of liquors were being exported to Canada, Scotland and England, which were thereafter smuggled into this country. Since the creation of this board in April, 1923, applications have been considered for the exportation of about 4,400,000 gallons of whiskey, of which only about 4 per cent. were approved, and none of the whiskey shipped to Canada. Applications for the importation of wine in the amount of 583,246 gallons have been considered since the above date, only about 19 per cent. of which were approved. All approved applications were for medicinal or manufacturing purposes. The situation in connection with imports and exports is now believed to be very well in hand.

WHISKEY, WINES & BRANDY IMPORTED.

CALENDAR YEAR.	Whiskey.	Wine.	Brandy.
1918	6,326	2,797,327	2,423
1919	.....	279,687	224
1920	167,310	760,584	28,919
1921	342,519	1,482,836	16,219
1922	71,006	192,433	10,380
1923	4,146	152,621	3,320

Prior to the time the present Administration came into office, much of the liquor shipped from distillery warehouses was transported by truck. A great deal of loss of liquor occurred en route by pilfering and by purposely misrouting on the part of the parties holding the permits. Now freight and express shipments must be made in all cases of long hauls, and truck shipments only for intra-city or short hauls where railroad transportation is not available. Since the adoption of these rules there has been a very marked decrease in quantities of liquors disappearing in transit.

To insure uniform and thoroughly considered action on the part of the Government a Central Committee now considers applications for basic permits of the more important and troublesome classes such as dealcoholizing plants, alcohol and denatured alcohol manufacturers; and major problems of administration.

Commissioner Haynes in an address at Dayton, Ohio, in October, said that jail sentences are proving a real deterrent to law breaking, the heaviest sentence obtained in any case being one for conspiracy—a fine of $21,000 and 20 years in jail. The injunction or "padlock" is another effective weapon.

The judicial conference of the senior Circuit Judges adopted recommendations that the Prohibition unit be transferred bodily to the Department of Justice, Chief Justice Taft, the Chairman, informed Attorney General Stone, on Nov. 26, 1924, in a letter requesting him to submit the proposal to Congress. These Federal Judges, with Chief Justice Taft concurring, declared that such an immediate transfer "would make much for effectiveness in enforcing the law."

The Judges asserted that "all the appropriations for such enforcement should be expended under the direction of the Attorney General. In that way, the attempted prosecution of trivial, futile and unimportant cases which now crowd the dockets through the ill-advised zeal and practical ignorance of prohibition agents can be avoided, and only those cases taken up and pressed which will really deter the principal offenders, and in the preparation of which District Attorneys will have a personal responsibility."

CIVIL CASES IN THE COURTS.

Mrs. Mabel Walker Willebrandt, Assistant Attorney General, in charge of cases arising under the Federal Prohibition Act, in reporting for the fiscal year ending June 30, 1924, gave this summary of the civil suits to which the United States was a party:

Civil cases pending June 30, 1923	4,140
Civil cases commenced during fiscal year	5,741
Civil cases terminated	4,210
Judgments for United States	3,242
Judgments against United States	244
Dismissed after payment or compromise	80
Dismissed for other reasons	644
Appealed to Circuit Court of Appeals	71
Appealed to Supreme Court	8
Trials by jury	506
Civil cases pending June 30, 1924	5,671
Amount of judgments obtained	$221,005
Amount realized from such judgments	147,319
Amount realized from old judgments, settlements by compromise, etc	96,653
Amount paid through U. S. Attorney, on demand, in cases where no actual civil suit was commenced	12,410

ENFORCEMENT IN NEW YORK CITY.

Detailed figures of the Federal enforcement of the law in the Southern District of New York State, Col. William Hayward, United States Attorney, and the Eastern District, Ralph C Greene, United States Attorney, which together covered the City of New York with its environs, for the last four fiscal years, are as follows:

Southern District, covering the Boroughs of Manhattan and the Bronx, in New York City and the counties up the river, to and including Columbia.

	1921.	1922.	1923.	1924.
Prosecutions commenced	1,933	1,327	2,207	3,012
Prosecutions terminated	1,397	1,069	1,168	3,707
Pleas of guilty	1,002	911	1,052	2,975
Trials by jury	46	64	39	162
Convictions	1,023	937	1,065	3,044
Acquittals or discontinued	24	32	27	47
Nolled	289	77	15	220
Quashed	61	23	61	396
Pending June 30	850	1,108	2,147	1,452
Total of fines	$95,814	$70,355	$148,579	$419,699

Eastern District of New York State, covering Queens, Kings and Richmond Counties of Greater New York and Nassau and Suffolk Counties.

	1921.	1922.	1923.	1924.
Prosecutions commenced	1,094	465	974	3,005
Prosecutions terminated	789	734	942	2,328

Pending June 30	405	135	167	847
Total of fines	$41,717	$54,217	$47,672	$249,108

TREATIES TO STOP RUM-RUNNING.

A treaty intended to effectively check liquor smuggling was negotiated between the United States and Great Britain, ratified by the Senate March 13 by a vote of 61 to 7, and proclaimed May 22. It declares a "firm intention to uphold the principle of the three-mile limit" but authorizes search on British vessels suspected of carrying liquor anywhere within that distance from the coast of the United States which "can be traversed in one hour by the vessel suspected of endeavoring to commit an offense." When a transfer of cargo is made the "one hour distance" is to be measured by the speed of the vessel to which the cargo is transferred Seizure of British vessels and their detention in American ports "for adjudication in accordance with such laws" (the prohibition laws) is also stipulated. Claims for damages go to a joint commission

Similar treaties have been negotiated with France, Italy, Norway, Denmark, Sweden, Panama, and the Netherlands. To meet the new conditions at the Port of New York the Coast Guard of the district was equipped with 100 thirty-six foot speed boats capable of making 30 miles an hour, 223 seventy foot launches and 20 destroyers, and the personnel increased by 4,500 men.

A treaty with Canada to facilitate the suppression of smuggling across the border was signed on June 6.

PROGRESS OF PROHIBITION ABROAD.

Saskatchewan by a majority of about 30,000 in a ballot on July 16, 1924, abandoned the prohibition law which it had had since December, 1916, and joined her sister provinces British Columbia Quebec, Manitoba and Alberta in adopting the policy of Government control and sale of liquor. On Oct. 23, Ontario voted on the two policies but by a majority of about 40,000 refused to change from prohibition, which was adopted eight years ago by a majority of about 400,000. Toronto gave a majority of 50,000 for Government control; Ottawa, 10,000; Hamilton, 15,000, and other cities in proportion, but the country district "dry" majorities overbalanced them. Victoria in a referendum, June 20, on the sale of beer by the glass in licensed premises voted against beer, 74,159; for beer, 72,839.

Quebec's balance sheet for the fiscal year 1923-24 showed a surplus of $1,303,440 directly traceable to profits on the governmental control of the liquor traffic.

The Newfoundland Legislature repealed the colony's prohibition act, enacted during the war, and now has a system of governmental control.

In Norway both Houses of Parliament in July defeated the Government bill for the repeal of its partial prohibition laws. The Government resigned.

At the general elections held in November, a narrow majority of members of the Storthing returned favor the retention of prohibition.

The Soviet Government of Russia in August withdrew the ban on the consumption of vodka which was prohibited since the outbreak of the revolution, and has made the sale of spirits a Government monopoly.

ARRESTS, SEIZURES, ETC., MADE BY FEDERAL PROHIBITION OFFICERS SINCE THE EFFECTIVE DATE OF THE NATIONAL PROHIBITION ACT.

	From Jan. 17 to June 30, 1920.	Fiscal Year Ending June 30

ENFORCEMENT OF THE NARCOTIC ACT.

The administration of the Harrison Narcotic Act under the Federal Prohibition Commissioner in the Bureau of Internal Revenue has been attended with increasing success during the past three years. There were 4,300 persons reported by agents of this unit during the fiscal year 1920-21 for violations of the narcotic law. There were 7,301 persons so reported during 1923-24. The general disposition of the courts has been to impose heavy sentences on persons convicted of violating the narcotic law. This has proved to be of great assistance in enforcement.

On May 26, 1922, the Narcotic Drugs Import and Export Act was approved, giving the Government new powers to control the importation, exportation and transshipment of narcotics. By this act the Secretary of State, the Secretary of the Treasury, and the Secretary of Commerce are designated as the Federal Narcotics Control Board and are charged with the determination of the quantities of opium and coca leaves which may be admitted for medicinal uses into the United States. Permits for the importation and exportation of narcotics under that act are allotted by this board and are issued by this unit. The quantities of narcotics imported and exported have been more effectively controlled since the enactment of this law.

A statistical table showing the number of persons reported for violation of the narcotic laws, together with the cases tried and convictions and acquittals during the past nine years follows:

ENFORCEMENT OF THE INTERNAL REVENUE NARCOTIC LAWS.

Fiscal Year.	No. of Violations Reported.	No. of Cases Tried.	No. of Convictions.	No. of Acquittals.	Percentage of Convictions.
1916	1,910	846	663	183	78.3
1917	1,060	604	486	118	80.4
1918	1,264	654	553	101	84.5
1919	2,432	926	857	69	92.5
1920	3,932	1,252	1,119	133	89.3

Total (9 Yrs.)	36,101	18,473	16,937	1,536	Avg. 88 67

Dr. Lawrence Kolb and Pharmacologist A. G. Du Merz of the United States Public Health Service in an article in Public Health Reports, May 13, 1924, said:

"The evidence seems to show that a maximum estimate for the number of drug addicts in the United States at the present time would be 150,000. The estimates based on actual counts and on the available supplies of narcotics, together with the conditions reported by the physicians interviewed, point to about 110,000, which number is believed to be nearly correct.

"The number of addicts has decreased steadily since 1900. Before this decrease set in there may have been 264,000 addicts in this country.

"The greater number of addicts in prison at present as compared with former years is due to the rigid enforcement of recently enacted laws and not to an increase in the prevalence of addiction.

"The average daily addiction dose of the opiates in terms of morphine sulphate or heroin hydrochloride is not less than 6 grains. The dose of cocaine hydrochloride is practically the same.

"The quantities of narcotics imported by this country at the present time are believed to be only slightly in excess of the amounts required to supply medicinal needs.

"While physicians have been credited with being responsible for the creation of many addicts in the past, it is concluded as a result of our studies and observations that but few cases of recent addiction can be so attributed.

"Before the enactment of restrictive laws in this country there was much opium smoking and addiction to gum opium and laudanum. To-day addicts use the alkaloids or their derivatives almost exclusively. Cocaine hydrochloride was used alone by a large number of addicts prior to 1915, but is now used only in conjunction with the opiates except in a few cases.

"The proportion of the delinquent type of addict is gradually increasing. This is apparently not due to an increase in the number of this type, but to a gradual elimination of normal types.

"From the trend which narcotic addiction in this country has taken in recent years as a result of the attention given the problem by the medical profession and law enforcement officers, it is believed that we may confidently look forward to the time, not many years distant, when the few remaining addicts will be persons taking opium because of an incurable disease and addicts of the psychopathic delinquent type, who spend a good part of their lives in prison.

'One of the recently enacted laws has made it a crime for unlicensed persons to have narcotics in their possession. This law is being rigidly enforced, and addicts who formerly were unmolested are now being sent to jail.

"We have interviewed physicians from all parts of the United States and it is unusual to find one who has an addict among his patients.

"Dr. Carlton Simon, in charge of the Narcotic Division of the Police Department of New York City, sent out a questionnaire to the physicians of New York State. Of the 7,559 physicians who replied, only 5.2 per cent. reported that they were treating addicts in 1922.

"Practically all anti-narcotic legislation in the United States has been enacted since 1897. By 1912 every State, except Delaware and many large cities, had laws or ordinances designed to regulate in some way the prescribing or selling of opiates or cocaine, or both of these products. The Federal Pure Food and Drugs Act, enacted in 1906, required manufacturers to state on the label the amount of opium, opium alkaloids or derivatives and cocaine the preparation contained."

FEDERAL MATERNITY AND INFANCY ACT.

Under the Federal Maternity and Infancy Act (the Sheppard-Towner act), passed by Congress Nov. 21, 1921, $1,688,047.12 has been expended by Federal and State Governments to promote the welfare of mothers and babies during the first 15 months following its passage. The first national appropriations became available March 20, 1922.

Federal grants to the States during this period totaled $1,046,523.56. State appropriations made to match Federal funds totaled $641,523.56. In 1922 payments were made to 43 States, 28 of which matched the Federal grant in full or in part; the others receiving $5,000 each. In 1923, 41 States received grants, 35 of which matched the allotment in full or in part. By June 30, 1923, all State Legislatures had met and the appropriation acts passed enabled 40 States to co-operate during 1924—all but Kansas, Illinois, Louisiana, Vermont, Maine, Massachusetts, Connecticut, and Rhode Island. By action of its State Legislature in July, Louisiana for the first time accepted the act and will receive its share of 1925 Federal funds.

National administration of the Maternity and Infancy Act is vested in the Children's Bureau of the United States Department of Labor and has been carried out by the bureau's division of maternity and infant hygiene, the staff of which has consisted of six persons—a medical director, associate director, a public health nurse, an accountant, a secretary, and a stenographer. Plans for State work are initiated and carried out by a State agency, usually the child-welfare or child-hygiene division of the State Board of Health, and approved by the Federal Board of Maternity and Infant Hygiene.

Since the act became effective, 33 States accepting it have made definite increases in their own appropriations for the welfare of mothers and babies.

State activities under the act have included the employment of physicians, public health nurses, dentists, dietitians, health teachers and social workers, on staffs of health departments; education of the public through lectures, demonstrations, exhibits, films, etc; maternity consultations or centres; mothers' classes, correspondence courses and other forms of educational work for mothers; training and supervision of midwives; health conferences; dental clinics; nutrition classes; inspection of maternity and children's homes. Much of the work has been directed toward taking to the rural mother and baby the health facilities which the city mother has had for some time.

SOLDIERS' BONUS ACT AND HOW IT WORKS.

The Soldiers' Bonus Bill was passed by the House March 18, 1924, by a vote of 355 to 54, and passed the Senate on April 23, by a vote of 67 to 17. Repassed after conference had adjusted slight differences it was sent to the President on May 2. President Coolidge vetoed the bill on May 15. The House passed it over the veto on May 17 by a vote of 313 to 78. The vote was: Against veto—Reps., 166; Dems., 145; Soc., 1; Ind., 1; (paired, Reps., 8; Dems., 9; Ind. 1). To sustain veto—Reps., 57; Dems., 21; (paired, Reps, 6; Dems., 3). The Senate passed the bill over the President's veto on May 19 by a vote of 59 to 26. The vote was: Against veto—Reps., 30; Dems., 27; F.-L., 2; (paired, Dems. 2). To sustain veto—Reps., 17; Dems, 9; paired, Dems., 1). Absent and unpaired, Reps. 4, Dems., 3.

The Treasury estimates the obligation imposed for the first year at $152,500,000. Estimates of the total obligation are from $2,500,000,000 to $3,000,000.000.

The 5,000,000 persons who may apply includes about 1,000,000 individuals discharged from draft on account of physical defects, or because of its cancellation. Draft deserters, members of the students Army Training Corps, and members of the Reserve Officers' Training Corps, and members of other similar classes or organizations excluded from the benefits of the act.

The number of men finally accepted and who performed actual military service is **4,051,606.**

Number of men performing overseas service but excluded from the benefits of the act by provisions thereof—**115,274.**

Number of men performing home service only but excluded from the benefits of the act by provisions thereof—**404,822**

Number of possible beneficiaries of the bonus—**3,531,510.**

Number of applications filed by **Oct. 1, 1924—1,234,216.**

Number of applications computed and allowed by Oct. 1, 1924—**325,473.**

Number it is estimated will be computed and allowed by Jan. 1, 1925—**2,314,216.**

The size of staff necessary to put the bonus into effect was 16 commissioned officers (2 of whom are attorneys) and 2,500 civilian personnel.

The Bureau of Navigation of the Navy Department estimates there will be 561,000 members of the Navy and Coast Guard Service entitled to adjusted compensation. Up to Oct. 1, 1924, **142,000** applications had been received. The bureau employed 210 additional clerks.

Of the Marine Corps **78,362** were entitled to adjusted compensation, and by Oct. 1, 1924, **23,475** had made application and **8,175** cases had been adjusted. An increase of 37 clerks had been made and it was expected that by Dec. 31 all applications would be certified to the Veterans' Bureau daily as received.

PROVISIONS OF THE BONUS LAW.

The World War Adjusted Compensation Act, as it is officially entitled, provides adjusted compensation for veterans of the World War at the rate of $1.25 a day for each day of overseas service and $1 a day for each day of home service rendered subsequently to April 5, 1917, and prior to July 1, 1919, in excess of 60 days. If the amount due the veteran is $50 or less, he is to be paid in cash; if it exceeds $50, he is to receive from the United States Veterans' Bureau an adjusted service credit, increased by 25 per cent.

If it exceeds $50, 25 per cent. of this total is to be added to itself, which amount is then to be multiplied by a factor corresponding to the age of the veteran at the nearest birthday to Jan. 1, 1925. These factors are:

AGE.	Factor.	AGE.	Factor.	AGE.	Factor.
20.....	2.545	33.....	2.498	51.....	2.302
21.....	2.544	37.....	2.492	52.....	2.279
22.....	2.542	38.....	2.485	53.....	2.254
23.....	2.540	39.....	2.478	54.....	2.228
24.....	2.539	40.....	2.470	55.....	2.201
25.....	2.537	41.....	2.460	56.....	2.172
26.....	2.535	42.....	2.450	57.....	2.143
27.....	2.532	43.....	2.439	58.....	2.113
28.....	2.530	44.....	2.426	59.....	2.082
29.....	2.527	45.....	2.413	60.....	2.050
30.....	2.524	46.....	2.398	61.....	2.018
31.....	2.521	47.....	2.381	62.....	1.986
32.....	2.517	48.....	2.364	63.....	1.954
33.....	2.513	49.....	2.345	64.....	1.921
34.....	2.509	50.....	2.324	65.....	1.889
35.....	2.504				

The total thus obtained will be the face value of the veteran's policy. For example, a veteran who is thirty-two years old at the time his policy is issued and who would be entitled to the maximum amount of overseas service credit, $625, would be entitled to a policy equal to $625 plus $156.25 (one-fourth of that sum) multiplied by 2.517, or $1.966.

Loans may be made on the policies up to 90 per cent of their current face value any time after two years from the date of issuance. Thus on a $1,000 policy, at the end of two years a loan of $87.93 could be made. On this same policy at the end of nineteen years a loan of $831.23 would be possible. The loans may be made at any national or State bank.

The law further provides that, should a veteran die without having filed an application, the amount due shall be paid in cash to his dependents in the order of preference specified in the law. All applications, whether by the veterans themselves or their dependents, must, in order to receive consideration, be made on or before Jan. 1, 1928, except that in the case of veterans who die during the six months immediately preceding that date, their dependents may make application at any time within six months after the veteran's death.

All veterans up to and including the rank of Captain in the army and Marine Corps and Lieutenant in the navy are eligible. Women who served as yeomen in the navy and Marine Corps also are included. Service as a civilian officer or in the Students' Army Training Corps does not count.

ADMINISTRATION OF THE ACT.

The enactment of this legislation with its intricate restrictions and exceptions, imposed a tremendous task upon the War Department. It is possible that as many as 5,000,000 persons may submit applications, every one of which will have to receive consideration, albeit large numbers of the applicants will be found ineligible to receive compensation under the terms of the law.

The War Department, because of having prepared detailed plans for the administration of the law in anticipation of its enactment, was in a position to undertake the work as soon as funds for the purpose became available. These plans were instituted during the spring of 1922, when the Secretary of War designated Major Gen. Robert C. Davis, the Adjutant General of the Army, to devise a system of operation. Changes in the bills compelled constant alterations, modifications, and sometimes drastic changes, in the existing plans of operation.

In 1922, upon the granting of funds for the purpose, the Adjutant General accelerated the labor of perfecting the records of veterans and organizations of the World War contained in some 18,000 four-drawer filing cases, occupying about 4 acres of floor space and consisting of approximately 165,000,000 documents, in order that, in the event of the enactment of any adjusted compensation measure, the information essential as a basis for payment could be furnished with despatch and at a minimum cost of operation.

The form of application blank and instruction sheet had been prepared and concurred in by all concerned prior to the enactment of the law; proofs had been obtained from the Government Printing Office, and that establishment was ready to proceed with the printing immediately upon notice.

The bill under consideration during the spring of 1922 was passed by the House of Representatives and, in the fall of the same year, by the Senate, but failed of enactment because of President Harding's veto. This result did not, however, divert the War Department from its task of keeping intimately informed regarding the numerous bills subsequently introduced and of amending its plans to conform thereto. In consequence, when legislation was finally enacted on May 19, 1924, the department was able to present to the Director, Bureau of the Budget, before noon on the following day, complete estimates on the cost of administering the law, so far as the War Department itself was concerned. These estimates, which totaled $4,503,644 and called for a clerical force of approximately 2,500 for a period of one year, printing, office furniture, etc., were submitted by the Director, Bureau of the Budget, to Congress, with the recommendation that $3,600,000 be made available immediately and that subsequent estimates be made at the opening of Congress in December. The estimates were incorporated in the Second Deficiency Bill, which failed of enactment owing to the adjournment of Congress.

This failure to provide funds for the administration of the law placed the department in an unenviable position. Issuance of the adjusted service certificates provided for by the act was to begin on

Jan. 1, 1925, and cash payments were to be made beginning March 1, 1925. This demanded that there be placed in the hands of the United States Veterans' Bureau, prior to those dates, a substantial number of certificates showing the amounts due in the cases of the veterans concerned. Before this could be accomplished, application blanks must be issued and made available for use by the veterans, and provisions made for the receipt and examination of executed applications, the verification of service claimed through comparison with individual records on file in this office (some 25 items of service being involved in each case) and the computation of the amount in dollars due in each instance. Congress would not meet until December, and without funds the department was unable to obtain the clerical assistance and supplies essential to the prosecution of the work.

In this emergency the President, on June 14, made available sufficient funds to enable the department to begin its stupendous task.

The distribution of application blanks was commenced on June 16, 1924, the initial distribution consisting of 6,000,000 blanks which were despatched to all posts of the American Legion, chapters of the American Red Cross, camps of the Veterans of Foreign Wars, headquarters of the Disabled American Veterans, all post offices and all activities of the Army, Navy, Marine Corps, and Veterans' Bureau. The initial distribution was so planned that on June 21, blanks were available to veterans, through the agencies mentioned, in all parts of the United States. A second distribution, involving 6,000,000 additional blanks, was begun on June 23 and completed on June 28. The prompt distribution of the blanks was effected through the co-operation and efficient help of the Government Printing Office, a force of clerks having been placed in that office to wrap, bundle, address and mail the blanks as they came off the press. All told, about 75,000 packages of blanks were mailed.

The force of 1,233 clerks of the World War Division of the Adjutant General's Office formed the nucleus of the large clerical force needed; all others were obtained through the Civil Service Commission, but these were without experience. The instruction which included familiarizing the clerks with the essential records pertaining to veterans, including fingerprints; the filing system; and the various provisions of the new law, continued until July 26, 1924, when actual work on the applications was begun. During this period the names of 68,910 enemy aliens, conscientious objectors, and men on industrial furlough were typed, alphabetized and filed with the individual records, 4,000 reports of indebtedness to the Government on the part of former soldiers were similarly filed, pertinent data from approximately 80,000 muster rolls were carded and filed, and over a million individual papers pertaining to veterans of the World War were placed in the veterans' files.

HANDLING AN APPLICATION.

The following is a brief outline of the method of handling an application:

Upon the receipt of an application, a card notifying him of that fact is mailed to the applicant. The application is then placed in the hands of an examiner who scrutinizes it for possible omissions of essential information. If found incomplete, the application is returned to the veteran for necessary amendment; if found complete, it is passed to a fingerprint expert who compares the fingerprints on the application with those of the veteran made at the time of his enlistment. The application is then passed to the searcher employed on that portion of the general file where the applicant's record is kept and the statements thereon checked against the official record. If no discrepancies are found, the application, with the searcher's notations thereon, is sent to a typist who prepares a certificate in duplicate, entering thereon the necessary information contained in the application. If discrepancies do exist between the statements on the application and the entries on the official records, searching investigations are made and, after careful consideration has been given to all available evidence, a final determination is based upon the facts as shown. The case is thereupon handled as it would have been had no discrepancies been found. The certificate prepared by the typist is carefully reviewed, after which the original application is placed in the files and the certificate sent to a computing division, where the adjusted service credit is figured in dollars and cents. The certificate is then properly authenticated, securely clipped to the portion of the application containing the fingerprints, and forwarded to the Director of the Veterans' Bureau for issuance thereon of either a check or an adjusted-service certificate, as the case may be.

The requirement that the application be accompanied by the applicant's fingerprints affords protection to veterans and their dependents against forged applications. By means of these fingerprints the United States Veterans' Bureau will be able to identify easily and positively veterans who later apply for loans. This method supplants the former rather unsatisfactory practice of having two individuals take oath as to the identity of the applicant.

The importance of the fingerprints is obvious when it is noted that among the veterans are 50,328 of the name of Smith, 40,101 Johnsons, 28,902 Browns and 29,938 Williams; and identical names are many. Moreover, nearly one-quarter of the potential claimants cannot read or write the English language.

In securing its office supplies and equipment, this office exercised the utmost economy. The General Supply Committee made available all furniture and other equipment that it had on hand and inventories were made of all reserve stocks within a reasonable distance from Washington and of office equipment on hand but not actually in use at Government agencies in Wasnington. A large amount of damaged property was put in serviceable condition. As a result of this policy of borrowing and reclaiming property wherever possible, a saving to the Government of approximately $500,000 had been accomplished by Oct. 1, 1924. It was, however, necessary to purchase outright specially constructed tabulating machines for use in computing the amounts due to applicants for adjusted compensation. These devices mechanically translate dates into days and then into dollars, and thus practically eliminate the human element from this portion of the work.

The United States Veterans' Bureau computes the amount of insurance from the money value shown on the certificate forwarded to it by the Adjusted Compensation Branch of the War Department. The Bureau also draws the checks for the cash pay ments to be made March 1, 1925, based on the figures furnished it by the War Department.

UNITED STATES VETERANS' BUREAU.

Director, Gen. Frank T. Hines; *Assistant Director*, George E. Ijams.

Charles E. Mulhearn, Assistant Director in charge of Claims and Insurance Service; Davis G. Arnold, Assistant Director in charge of Control Service; H. W. Breining, Assistant Director in charge of Finance Service; R. C. Routsong, Assistant Director in charge of Planning Service; William H. Conklin, Assistant Director in charge of Supply Service.

Dr. E. O. Crossman, Medical Director; William Wolff Smith, General Counsel; C. O. Shaw, Chairman Board of Appeals; M. E. Pollock, Chief, Policy and Procedure Division, Planning Service.

L. C. Denslow, Chief, Office Management Division, Planning Service; E. A. Shepherd, Chief, Inspection Division, Control Service; A. D. Hiller, Chief, Statistics and Costs Division, Control Service; B. R. Patton, Chief, Information and Co-operation Division, Control Service.

O. W. Clark, Chief, Adjusted Compensation Division; W. H. Holmes, Chief, Disbursing Division, Finance Service; J. B. Schommer, Chief Accounting Division, Finance Service; J. E. Sasser, Chief, Supply Division, Supply Service.

L. H. Tripp, Chief, Construction Division, Supply Service; W. M. Cobb, Chief, Personnel Division, Supply Service; W. C. Black, Chief, Chief Clerk's Division, Supply Service.

Dr. Chas. M. Griffith, Dr. Winthrop Adams, Chiefs, General Medical Division, Medical Service; Dr. P. S. Rawls, Dr. O. D. Westcott, Chiefs, Tuberculosis Division, Medical Service; Dr. G. A. Rowland, Dr. Ord Everman, Chiefs, Neuro-psychiatric Division, Medical Service.

H. H. Milks, Chief, Claims Division, Claims and Insurance Service; C. A. Penington, Chief, Insurance Division, Claims and Insurance Service; H. V. Stirling, Chief, Rehabilitation Division.

During the fiscal year ended June 30, disbursements of all veterans' activities totaled $415,138,398, a decrease of nearly $28,000,000 from the previous year's total, due principally to fewer men requiring vocational training and administrative economies. Compensation disbursements also decreased.

Soldier patients under the care of the bureau at the close of the year totaled 22,610, of which 79 per cent. were in Government hospitals. A material increase in the number has been reported in recent months as a result of the passage of the World War Veterans' Act of 1924, which liberalizes hospitalization.

Hospital facilities for 25,010 bed patients were provided through use of other hospitals.

SOLDIERS' BONUS GIVEN IN THE SEVERAL STATES.

STATE.	Bonus Voted.	Number of Soldiers.	Claims Filed.	Claims Paid.	Maximum Bonus.	Average Paid.
Illinois	$55,000,000	305,139	280,582	245,512	$300	$207.00
Iowa	22,000,000	114,780	105,975	100,162	350	195.70
Kansas	25,000,000	78,629	78,916	76,065	1 a day	381.00
Maine	2,400,000	32,155	32,866	31,959	100	100.00
Massachusetts	18,210,725	192,187	184,797	184,416	100	100.00
Michigan	30,750,000	161,672	160,058	149,617	300	204.00
Minnesota	22,412,442	115,181	119,243	107,212	600	.....
Missouri	19,600,000	160,361	150,000	133,025	10 a mo.	133.06
New Hampshire	1,932,800	18,150	.....	19,372	100	100.00
New Jersey	12,000,000	137,946	127,954	124,779	100	87.50
New York	45,000,000	475,074	338,726	187,327	250	112.00
North Dakota	11,000,000	29,714	.....	.....	25 a mo.	.....
Ohio	28,000,000	233,405	228,600	211,440	250	134.53
Oregon	20,000,000	40,266	33,917	21,714	435	250.00
Rhode Island	2,561,900	27,078	25,600	25,500	100	100.00
South Dakota	6,000,000	32,572	30,616	28,876	400	195.92
Vermont	1,200,000	13,026	13,100	13,022	120	91.81
Washington	12,532,504	63,775	61,992	57,426	465	217.31
Wisconsin	21,000,000	119,415	130,000	114,835	10 a mo.	137.00
Total	$356,600,571	2,350,565	2,083,342	1,817,234	.....	.....

Nineteen States, as shown in the accompanying table, have paid, are paying or are about to pay a bonus to their veterans who served in the World War. Massachusetts raised the money by a special poll tax and other special taxes; Minnesota and North Dakota by a special tax levy; and Vermont paid its bonus out of its regular funds. The others issued or will issue bonds.

The States at present paying no bonus are:

STATE.	No. of Soldiers.	STATE.	No. of Soldiers.
Alabama	83,137	Montana	24,401
Arizona	13,728	Nebraska	57,308
Arkansas	72,745	Nevada	5,617
California	152,409	New Mexico	14,728
Colorado	43,241	N. Carolina	83,872
Connecticut	65,156	Oklahoma	93,223
Delaware	9,180	Pennsylvania	357,417
Dist. of Col	23,526	S. Carolina	61,502
Florida	41,374	Tennessee	89,319
Georgia	99,160	Texas	190,519
Idaho	22,348	Utah	21,144
Indiana	122,386	Virginia	88,606
Kentucky	85,330	W. Virginia	60,866
Louisiana	78,749	Wyoming	13,488
Maryland	59,483		
Mississippi	61,533	Total	2,195,516

The Legislatures of four States voted a bond issue to provide funds to pay a bonus, to be voted on by the people.

Montana passed one bonus law which was declared unconstitutional. The State voted again on Nov. 6, 1923, on a referendum to issue $4,500,000 bonds to pay a bonus of $10 a month with a maximum of $200, and it was carried by a vote of 67,463 to 62,100. Declared unconstitutional by the courts, it was put before the people in a revised form at the election, Nov. 4, 1924. It was defeated by a majority of 1,569.

Pennsylvania's Legislature proposed an amendment to the Constitution to be submitted to the people at the 1924 election providing for an issue of bonds to the amount of $35,000,000 to pay a bonus. This was declared unconstitutional by the courts, and the Legislature must re-enact the measure before it can be submitted to the people.

The **Colorado** Legislature submitted a proposition to issue $8,000,000 bonds to pay a bonus but it was defeated by a large majority on Nov. 4, 1924.

New York voted for an issue of $45,000,000 bonds in November, 1923—for, 1,051,200; against, 669,444. At the end of November, 1924, the State Comptroller had paid $27,331,636 to 227,530 claimants. The Bonus Bureau was organized with Capt. Frank S. Harris as director April 17 and began payments May 7. Up to Oct. 15, 17,896 veterans had assigned their bonus, wholly or in part, a total of $130,453, to the Veterans' Mountain Camp for disabled veterans.

Five States, however, instead of giving a cash bonus to veterans have voted various measures of relief and assistance. These are:

STATE.	Amount Voted.	No. of Soldiers.
California	$10,500,000	152,409
Connecticut	2,500,000	65,156
Nevada	1,000,000	5,617
Utah	1,000,000	21,144
Wyoming	2,000,000	13,488
Total	$17,000,000	257,814

Maryland passed a bill providing for a bond issue of $9,000,000 for a bonus for her 59,483 soldiers but it was declared unconstitutional. At the general election, Nov. 4, 1924, however, the people by a vote of 92,506 to 49,544 authorized the Legislature to pass a State law to give a bonus to soldiers.

Missouri exhausted its bond issue of $15,000,000 in the payment of 118,000 claims; 25,000 additional claims had been accepted and it was expected that 15,000 more will be filed. The Legislature voted a supplementary bond issue of $4,600,000, which was carried by a vote of 201,218 to 135,234 at a special election on Feb. 26, 1924.

Oregon gave her veterans an option. By Oct. 1, 1924, 21,714 elected to receive the cash bonus of $15 a month (maximum $435) and were paid a total of $4,695,870. A loan not to exceed $3,000 was offered, which was elected by 11,217; of these to that date 5,619 had received loans totaling $13,880,800.

New Mexico and **Wyoming** have a $2,000 taxation exemption law for ex-service men.

In **Connecticut** a bonus bill was proposed, but dropped when the Attorney General declared it unconstitutional; the Legislature then appropriated $2,500,000 for relief work and turned the sum over to the American Legion to disburse.

California never attempted to pass a bonus measure. It has, however, adopted a veterans' welfare program—Farm and Home Purchase Act, Welfare Act (land settlement) and Educational Institute Act. For the administration of the first two an appropriation of $10,000,000 was passed at the 1922 general election by a vote of three to one, and $500,000 was appropriated for the third.

Nevada voted $1,000,000 for reclaiming lands to be given veterans.

Utah appropriated $1,000,000 for relief work.

Wyoming appropriated $2,000,000 for loaning to veterans buying farm or city homes. **South Dakota** also has loan help.

Minnesota and **Wisconsin** also provide for extra assistance for veterans choosing educational benefits.

West Virginia has appropriated $50,000 a year for four years for the relief of veterans.

Oklahoma voted on a bonus referendum and it was defeated at the polls in October, 1923.

In **Arizona, Delaware, Kentucky and Nebraska** bonus bills were defeated in the Legislatures.

In **Indiana** the Legislature passed a bonus bill in 1922, but the Governor vetoed it.

Approximately, therefore, the individual States have paid or authorized payment to date of bonuses to veterans $356,600,571, with $35,000,000 pending; and have paid out for relief in lieu of bonus $17,000,000; in addition the Federal Government paid the soldiers on discharge from service $270,000,000.

The grant total is approximately $678,600,571.

The amount of bonuses paid by other nations to their discharged soldiers is given by the Chamber of Commerce of the United States as follows:

Great Britain	$275,910,446
Canada	147,600,000
Australia	105,000,000
New Zealand	18,290,650
France	373,371,150
Belgium	10,592,250

Under the Soldier Settlement Act of Canada, ex-soldiers who served overseas may obtain a loan from the Canadian Government toward the purchase of land from the Soldier Settlement Board, and the equipping of such land for farming purposes, up to an amount equal to 80 per cent. of the cost, provided they can meet the qualifications prescribed by the board, and possess 20 per cent. capital of their own.

CONTRIBUTIONS TO NATIONAL CAMPAIGNS.

It cost the Republican National Committee $3,063,952.74 to elect Coolidge and Dawes and it came out of the campaign with a surplus of more than $350,000, according to final figures on campaign expenditures made public at Washington on Nov. 30, 1924, by William M. Butler, the Republican National Chairman. The complete report was filed with the Clerk of the House on Dec. 1.

"Directly following the Cleveland Republican National Convention, a formal estimate was made that a total expenditure of $3,000,000 was necessary for the successful conduct of the campaign, this amount including the campaign expenses of the Senatorial and Congressional Committees, which in past years had been financed independently," he said.

"It is with satisfaction that I am able to report that the actual expenditures of the campaign were $3,063,952.74. This amount was spent by the various campaign divisions as set forth in the following tabulation:

Publicity Bureau	$741,278.49
Speakers' Bureau	366,442.78
Colored Bureau	89,111.22
Research Bureau	4,836.04
Women's Bureau	64,796.65
Labor Bureau	101,188.31
Club Bureau	51,266.79
Foreign Language Bureau	34,017.25
Caravan tour	33,470.85
National Contributors' Committee	144,990.62
Farm Section	16,038.10
Commercial Travelers' Bureau	1,263.34
Service Men's Bureau	17,988.92
Congressional Committee	170,500.00
Senatorial Committee	87,000.00
State Committees	686,300.00
Washington Headquarters	43,417.72
General Administration	410,045.66
Total	$3,063,952.74

"The campaign was financed by 90,605 individual contributors as follows:

Number of Contributors.	Amount of Contribution.	Total.
63,299	under $100	$486,525.80
6,087	100 to $500	1,218,137.43
744	501 to 1,000	729,876.72
270	1,001 to 2,500	539,523.51
150	2,501 to 5,000	672,315.36
39	5,001 to 10,000	385,600.00
16	over 10,000	327,500.00
Total		$4,359,478.82

"While the total amount collected was $4,359,478.82, approximately a million dollars of this amount, $956,525.11, was collected by the National Committee in certain States, but only in its capacity as agent for the local State Committees, and this money was immediately returned to the committees in the States in which it was collected, no part being available for the National Committee budget expenditures.

"Thus, for the actual expenses of the National Committee, there was collected and made available $3,402,953.71, which, with bank interest and small balances of $16,263.58, made a grand total of $3,419,217.29.

"Inasmuch as the actual campaign expenditures as already set forth were only $3,063,952.74, the committee has closed the campaign not only without a deficit but with a surplus of $355,264.55 available for the routine maintenance of the National Committee, making unnecessary any new appeals for contributions for a substantial period."

TO THE DEMOCRATIC CAMPAIGN.

The Democratic National Committee filed with the Clerk of the House at Washington Dec. 2, 1924, a report showing total campaign contributions of $845,520 from July 1 to Nov. 20, inclusive. The committee also reported a loan of $120,000 from the New York Trust Company, which made available for the campaign a total of $965,520.

The report listed expenditures for this period at $903,908, which gave a balance of $61,612.

Contributions received at the New York headquarters were $780,122.73; at Washington, $31,311.82, and Chicago, $9,602.50, the report stated, listing in addition, as miscellaneous receipts, $3,720.38 from the New York office, $20,715.45 from Washington, and $47.50 from Chicago.

Expenditures by the New York office were placed at $633,452.99; by Washington, $216,305.22; and Chicago, $54,150. The balance of $61,612 was accounted for by computing the $120,000 loan among the assets.

Contributions of more than $100 amounted to $635,902. The largest single contributor was John D. Ryan of New York, who gave $55,000 in two instalments of $25,000 each and one of $5,000.

Other large contributors were Thomas L. Chadbourne, New York, $20,000; Jesse H. Jones, Houston, $25,000; Mrs. Jesse H. Jones, Houston, $5,000; B. M. Baruch, New York, $22,500; Henry Morgenthau, New York, $21,000; C. W. Watson, Fairmont, W. Va., $15,000; James W. Gerard, New York, $10,000; Francis P. Garvan, New York, $10,000; H. H. Lehman, New York, $8,000; Clem L. Shaver, Washington, $7,500. Percy Chubb, New York; Willard U. Taylor, New York; D. H. Heinemann, Charlotte, N. C.; W. A. Comstock, Detroit; Samuel Untermyer, New York; Norman H. Davis, New York; Cleveland H. Dodge, New York; Edwin Corning, Albany, N. Y.; Frank L. Polk, New York; Arthur Sachs, New York; George Brennan, Chicago; S. D. Camden, New York; A. McC. Blair, Chicago; W. L. Clayton, Houston; and Hugh C. Wallace, Washington, $5,000 each.

LA FOLLETTE EXPENDITURES.

Expenditures of the La Follette-Wheeler Campaign Committee to Dec. 2, as reported to the Clerk of the House, totaled $221,977 and receipts amounted to $225,936.50.

Representative John M. Nelson, National Manager for La Follette, told the Borah Committee on Oct. 16 that up to Oct. 10 $155,062 had been contributed by 72,000, in addition to those who gave at political meetings, and $155,061 disbursed. On Oct. 31, it was shown that $125,000 had been collected in Washington, that the American Federation of Labor had raised $23,736 for the fund, that the Amalgamated Garment Workers of New York had raised $18,020, and that Alexander Kahn of the Forward had collected $20,000. The National Treasurer, W. T. Rawleigh of Freeport, Ill., gave $44,000 and the only other contribution of more than $1,000 listed was Mrs. Dorothy Whitney Straight of New York, who gave $2,500.

The Prohibition National Committee reported to the Clerk of the House contributions of $4,707 and disbursements of $4,855.

IN THE NEW YORK STATE CAMPAIGN.

In the New York State campaign expenses, filed with the Secretary of State at Albany, the Republican State Committee reported $408,560 received and $401,930 disbursed; the Democratic State Committee reported $54,562 received and $45,103 disbursed; and the La Follette State Committee reported $17,987 receipts and $7,503 disbursed. Gov. Smith (Dem.) spent nothing in the gubernatorial campaign but the Citizens' Committee working for him received and spent $116,459; Col. Roosevelt (Rep.) spent $975; and the Rev. Norman Thomas (Soc. and Prog.), $895.

CAMPAIGN FUNDS AND THE ELECTORAL VOTE.

A Washington statistician prepared this table for *The Wall Street Journal* showing the amounts spent, and the electoral vote for various candidates beginning with the election in 1860:

Year.	Candidate.	Campaign Fund.	Elec. Vote.
1860	Lincoln	$100.000	180
	Douglas	50,000	12
	Breckinridge		212
1864	Lincoln	125.000	212
	McClellan	50,000	21
1868	Grant	150,000	214
	Seymour	75,000	80
1872	Grant	250,000	286
	Greeley	50,000	80
1876	Hayes	950.000	185
	Tilden	900,000	184
1880	Garfield	1,100,000	214
	Hancock	355,000	155
1884	Blaine	1,300,000	182
	Cleveland	1,400,000	219
1888	Harrison	1,350,000	233
	Cleveland	855,000	168
1892	Harrison	1,850,000	145
	Cleveland	2,350,000	277
1896	McKinley	16,500,000	271
	Bryan	675,000	176
1900	McKinley	9,500,000	292
	Bryan	425,000	155
1904	Roosevelt	3,500,000	336
	Parker	1,250,000	140
1908	Taft	1,700,000	321
	Bryan	750.000	162
1912	Taft	750,000	8
	Roosevelt	325,000	88
	Wilson	850.000	435
1916	Hughes	2,012,535	254
	Wilson	1,400,229	277
1920	Harding	3,986.383	404
	Cox	2,891,252	127
1924	Coolidge	4,359,479	382
	Davis	965,520	136
	La Follette	221,977	13

DEMOCRATIC NATIONAL COMMITTEE.

Headquarters, Bond Building, Washington, D. C.

Chairman—Clem L. Shaver, W. Va. *1st Vice Chairman*—Mrs. Emily Newell Blair, Mo. *2d Vice Chairman*—Samuel B. Amidon, Kan. *3d Vice Chairman*—Frank Hague, N. J. *Secretary*—Charles A. Greathouse, Ind. *Executive Secretary*—Burt New, Ind. *Chairman Finance Committee*—Jesse H. Jones, Tex. *Treasurer*—James W. Gerard, N. Y. *Assistant Treasurer*—Robert N. Harper, D. C.

MEMBERS OF THE DEMOCRATIC NATIONAL COMMITTEE.

Alabama	Walter Moore, Birmingham	Mrs. Chas. J. Sharp, Birmingham.
Arizona	W. L. Barnum, Phoenix	Mrs. Theodora Marsh, Nogales.
Arkansas	Vincent M. Miles, Fort Smith	Miss Alice Cordell, El Dorado.
California	Isidore B. Dockweiler, Los Angeles	Mrs. Chas. L. Donohoe, Los Altos.
Colorado	John T. Barnett, Denver	Mrs. Gertrude A. Lee, Denver.
Connecticut	Homer S. Cummings, Stamford	Miss Caroline Ruutz-Rees, Greenwich.
Delaware	Andrew C. Gray, Wilmington	Mrs. John R. Eskridge, Seaford.
Florida	J. T. G. Crawford, Jacksonville	Mrs. Lois K. Mayes, Pensacola.
Georgia	John S. Cohen, Atlanta	Mrs. Edgar Alexander, Atlanta.
Idaho	Robert H. Elder, Coeur d'Alene	Mrs. Teresa M. Graham, Coeur d'Alene.
Illinois	George E. Brennan, Chicago	Mrs. Kellogg Fairbank, Chicago.
Indiana	Charles A Greathouse, Indianapolis	Mrs. Bessie L. Riggs, Sullivan.
Iowa	C. L. Herring, Des Moines	Mrs. Madge O'Neill, Columbus Junction.
Kansas	Samuel B. Amidon, Wichita	Mrs. Florence G. Farley, Wichita.
Kentucky	Urey Woodson, Owensboro	Mrs. J. C. Cantrill, Frankfort.
Louisiana	Lee Emmett Thomas, Shreveport	Mrs. G. C. Thomson, New Orleans.
Maine	D. J. McGillicuddy, Lewiston	Mrs. Wm. R. Pattangall, Augusta.
Maryland	John Walter Smith, Baltimore	Mrs. S. Johnson Poe, Baltimore.
Massachusetts	Edward W. Quinn, Cambridge	Mrs. Nellie M. Sullivan, Fall River.
Michigan	William A. Comstock, Detroit	Mrs. Etta C. Boltwood, Grand Rapids.
Minnesota	Joseph Wolf, St. Paul	Miss Jessie Scott, St. Paul.
Mississippi	Henry Minor, Macon	Mrs. Daisy McLaurin Stevens, Brandon.
Missouri	W. T. Kemper, Kansas City	Mrs. Emily Newell Blair, Joplin.
Montana	J. Bruce Kremer, Butte	Mrs. J. S. M. Neill, Helena.
Nebraska	Arthur F. Mullen, Omaha	Dr Jennie Callfas, Omaha.
Nevada	Samuel M. Pickett, Reno	Mrs. Frances Friedhoff, Yerington.
New Hampshire	Robert C. Murchie, Concord	Mrs. Dorothy B. Jackson, Concord.
New Jersey	Frank Hague, Jersey City	Mrs. James J. Billington, Jersey City.
New Mexico	Arthur Seligman, Santa Fe	Mrs Jennie Martin Kirby, Tucumcari.
New York	Norman E. Mack, Buffalo	Miss Elisabeth Marbury, New York.
North Carolina	F. M. Simmons, New Bern	Miss Mary O. Graham, Raleigh.
North Dakota	R. B. Murphy, Bismarck	Mrs. Esther S. Johnson, Bismarck.
Ohio	E. H. Moore, Youngstown	Mrs. Bernice Pyke, Cleveland.
Oklahoma	Scott Ferris, Lawton	Mrs D. A. McDougall, Sapulpa.
Oregon	Will R. King, Portland	Mrs. Irene G. Stuart, Portland.
Pennsylvania	Joseph F. Guffey, Pittsburgh	Mrs. Lillian D. Bergey, Philadelphia.
Rhode Island	Patrick H. Quinn, Providence	Mrs. Jane A. Newton, Providence.
South Carolina	Joseph Gary Evans, Spartanburg	Mrs. Leroy Springs, Lancaster.
South Dakota	W. W. Howes, Wolsey	Mrs. H. C. Snodgrass, Interior.
Tennessee	Cordell Hull, Carthage	Mrs. Benton McMillin, Nashville.
Texas	Jed Adams, Dallas	Mrs. J. T. Bloodworth, Fort Worth.
Utah	James H. Moyle, Salt Lake City	Mrs. Weston Vernon, Logan.
Vermont	Frank H. Duffy, Rutland	Miss Alice D. Sullivan, Windsor.
Virginia	Carter Glass, Lynchburg	Mrs Beverly B. Munford, Richmond.
Washington	George F. Christensen, Stevenson	Mrs. E. D. Christian, Spokane.
West Virginia	C. W. Osenton, Fayetteville	Mrs. Frank Mann, Huntington.
Wisconsin	Martin L. Lueck, Beaver Dam	Mrs. Gertrude Bowler, Sheboygan.
Wyoming	Patrick J. Quealy, Kemmerer	Mrs. Burke I. Sinclair, Casper.
Alaska	T. J. Donohoe, Cordova	Mrs. John W. Troy, Juneau.
Dist. of Columbia	John F. Costello, Washington	Mrs. J. Borden Harriman, Washington.
Hawaii	John H. Wilson, Honolulu	Mrs. L. L. McCandless, Honolulu.
Philippines	Robert E. Manley, Naga, Camerines, Sur.	Grace E. Westerhouse, Los Angeles.
Porto Rico	Henry W. Dooley, San Juan	Mrs. Isabel Locke Horton, Mayaguez.
Canal Zone	Frank T. Hamlin, Santa Fe, N. M.	Mrs. L. O. Keen, Balboa.

DEMOCRATIC STATE CHAIRMEN.

CITIES HAVING CITY MANAGERS.

Cincinnati, O., at the election on Nov. 4, 1924, by a vote of more than 2 to 1 adopted a City Charter amendment providing for the City Manager type of government, with a Council of nine members elected by proportional representation. The City Manager, who will take office on Jan. 1, 1926, will be appointed by the Council.

The following represents the growth of the Manager plan by years:

Put in Effect.	By Charter.	By Ordinance.	Total	Put in Effect.	By Charter.	By Ordinance.	Total	Put in Effect.	By Charter.	By Ordinance.	Total
1912.....	1	2	3	1918.....	20	8	28	1924.....	18	11	31
1913.....	8	2	10	1919.....	20	8	28	1925.....	2	0	2
1914.....	15	5	20	1920	23	12	35	1926.....	1	0	1
1915.....	13	7	20	1921.....	41	7	48				
1916.....	15	5	20	1922.....	28	10	38	Total....	258	87	347

The Tariff Act of 1922.

The Fordney-McCumber Tariff Act was signed by President Harding Sept. 21, 1922, and it went into effect at 12.01 A. M., Sept. 22. It was over twenty months in the making. The Republican members of the House Ways and Means Committee began hearings on it Jan. 6, 1922, which continued until Feb. 16, and the bill passed the House July 21, 1921. It rested for eight months and three weeks in the Finance Committee of the Senate, and was reported April 11, 1922, to the Senate with 2,082 amendments. The Senate began consideration of it April 19, and adopted 2,436 amendments. It was passed by the Senate Aug. 19 by a vote of 48 to 25 and was sent to conference at once.

The conference report was submitted to the House Sept. 12, and on the 13th the House sent it back to the Conference Committee by a vote of 177 to 136 (102 Republicans joining with the Democrats) with instructions to eliminate the embargo on dyestuffs and the duty on potash. When submitted again with these changes it was adopted and the bill passed by a vote of 240 to 90 on Sept. 15. The Senate adopted the conference report as amended on Sept. 19 by a vote of 43 to 28.

Customs receipts for the fiscal year 1922-23 amounted to $561,928,867; and for the fiscal year 1923-24 to $545,637,504. The Underwood-Simmons law yielded in 1921-22 $308,025,125.17. The Payne-Aldrich law brought $318,891,395.86 into the Treasury in 1913, the last year of its operation.

FLEXIBLE TARIFF PROVISIONS.

The power of the President to alter rates of duty is provided for under Title III. Section 315 provides that:

(a) Whenever the President, upon investigation of the differences in costs of production of articles the growth or product of the United States, and of like or similar articles the growth or product of competing foreign countries, finds it thereby shown that the duties fixed in the act do not equalize such differences, he shall ascertain the differences and determine and proclaim a rate of duty which will equalize the same.

Such changed rate or rates of duty become effective thirty days after the date of the President's proclamation.

The right to change any rate of duty is restricted to a total increase or decrease of 50 per centum of the rate specified in the act. These rates of duty are to be based upon foreign valuation.

(b) Whenever the President upon investigation finds it thereby shown that the cost differences cannot be equalized by proceeding under subdivision (a) he is empowered to proclaim a change to the American selling price as the basis of the ad valorem duty fixed in the act.

When action is taken by the President to base any rate of duty upon the American selling price no such rate shall be decreased more than 50 per cent., nor shall any such rate be increased.

Such rate or rates of duty become effective fifteen days after the proclamation of the President.

(c) In ascertaining the differences in costs of production under subdivisions (a) and (b) the President, in so far as he finds it practicable, shall take into consideration:

(1) The differences in conditions in production, including wages, costs of material, and other items in costs of production of such or similar articles in the United States and in competing foreign countries.

(2) The differences in the wholesale selling prices of domestic and foreign articles in the principal markets of the United States.

(3) Advantages granted to a foreign producer by a foreign Government, or by a person, partnership, corporation, or association in a foreign country.

(4) Any other advantages or disadvantages in competition.

Investigations to assist the President under this section are required to be made by the United States Tariff Commission, and no proclamation shall be issued until such investigation shall have been made.

The commission is required to give reasonable public notice of its hearings and to give reasonable opportunity to parties interested to be present, to produce evidence, and to be heard. The commission is authorized to adopt such reasonable procedure, rules, and regulations as it may deem necessary.

Whenever the President determines that the differences in costs of production which led to a proclamation have changed or no longer exist, he is empowered to modify or terminate the same.

The President cannot transfer a dutiable article to the free list, or an article on the free list to the dutiable list, or substitute an ad valorem rate for a specific rate, or a specific rate for an ad valorem rate. Nor can he increase a rate beyond the maximum ad valorem rate as provided in the Tariff of 1922.

Section 316 makes unlawful unfair methods of competition and unfair acts of importation which have the effect or tendency to injure or destroy an industry in the United States efficiently and economically operated, or to prevent the establishment of such industry. The Tariff Commission is authorized to investigate and report upon such methods and acts, and its findings are to be conclusive if supported by evidence; the offending parties may be given a rehearing by the commission; appeal may be taken to the United States Court of Customs Appeals and its decision shall be final, except that the subject may be reviewed by the United States Supreme Court. In such cases the President shall increase the duties upon the articles in question by not less than 10 per centum ad valorem or more than 50 per centum ad valorem; or the articles may be excluded from entry into the United States. The President's decision is conclusive, but he can modify it thereafter as the facts may warrant.

RETALIATORY PROVISIONS.

Section 317 provides that when any foreign country discriminates against articles wholly or in part the product or products of this country, by imposing, directly or indirectly, by any unreasonable charge, fee, duty, exaction, regulation or limitation, or other method of discrimination and the commerce in them, and the President finds in fact that said foreign country has done and continues so to do, and that the American public interest will be served thereby, he shall by proclamation declare such new and additional rates of duty as will offset the burdens placed upon our commerce, not exceeding 50 per centum ad valorem on the commodities from the offending country or countries named in his proclamation; or he may by proclamation exclude the articles named. The provisions of a proclamation become effective 30 days after its date. It is the duty of the Tariff Commission to continually make investigation concerning the welfare of our commerce abroad and to bring to the attention of the President any discrimination.

In order to give prompt effect to the flexible tariff and retaliatory provisions of the act, the Tariff Commission, under Section 318, is among other things directed to obtain and compile and have ready for prompt use the conversion costs, costs of production, import costs, growers', manufacturers' or producers' selling prices at home and in the manufacturing, producing and growing centres of foreign countries which export to the United States competitive articles.

TWELVE-MILE LIMIT ENFORCED.

The act continues the zone of search and seizure at sea at twelve miles, in this section:

"Sec. 581—Boarding Vessels—Officers of the customs or of the Coast Guard, and agents or other persons authorized by the Secretary of the Treasury, or appointed for that purpose in writing by a Collector, may at any time go on board of any vessel or vehicle at any place in the United States **or within four leagues of the coast of the United States**, without as well as within their respective districts, to examine the manifest and to inspect, search and examine the vessel or vehicle, and every part thereof, and any person, trunk or package on board, and to this end to hail and stop such vessel or vehicle, if under way, and use all necessary force to compel compliance, and if it shall appear that any breach or violation of the laws of the United States has been committed, whereby or in consequence of which such vessel or vehicle, or the merchandise, or any part thereof, on board of or imported by such vessel or vehicle is liable to forfeiture, it shall be the duty of such officer to make seizure of the same, and to arrest or, in case of escape or attempted escape, to pursue and arrest any person engaged in such breach or violation.

"Officers of the Department of Commerce and other persons authorized by such department may go on board of any vessel at any place in the United States **or within four leagues of the coast of the United States** and hail, stop, and board such vessels in the enforcement of the navigation laws and arrest or, in case of escape or attempted escape,

pursue and arrest any person engaged in the breach or violation of the navigation laws."

The more important rates in the tariff law are given below, with the corresponding rates in the Payne-Aldrich (Republican) tariff law of 1911, and in the Underwood (Democratic) law of 1914:

AGRICULTURAL PRODUCTS.

Cattle, from 1½ to 2 cents a pound; Payne-Aldrich, from $2 a head to 27½% ad valorem; Underwood, free.

Sheep and goats, $2 a head; Payne-Aldrich, from 75 cents to $1.50; Underwood, free.

Fresh lamb, 4 cents a pound; Payne-Aldrich, 1½; Underwood, free.

Hogs, ½ cent a pound; Payne-Aldrich, $1.50 a head; Underwood, free.

Bacon, hams and shoulders, 2 cents a pound; Payne-Aldrich, 4 cents a pound; Underwood, free.

Lard, 1 cent a pound; Payne-Aldrich, 1½ cents; Underwood, free; lard compounds and substitutes, 4 cents a pound; Payne-Aldrich (no provision); Underwood, free.

Milk, fresh, 2½ cents a gallon; Payne-Aldrich, 2 cents; Underwood, free; buttermilk, 1 cent a gallon; Payne-Aldrich and Underwood (no corresponding provision); cream, 20 cents a gallon; Payne-Aldrich, 5 cents; Underwood, free.

Milk, condensed or evaporated, unsweetened, 1 cent a pound; sweetened, 1½ cents a pound; Payne-Aldrich, 2 cents in each case; Underwood, free.

Butter and oleomargarine, and other butter substitutes, 8 cents a pound; Payne-Aldrich, 6 cents; Underwood, 2½ cents.

Cheese and substitutes, 5 cents a pound, but not less than 25% ad valorem; Payne-Aldrich, 6 cents; Underwood, 20%.

Poultry, live, 3 cents a pound; Payne-Aldrich, 3 cents; Underwood, 1 cent; poultry, dead, 6 cents a pound; Payne-Aldrich, 5 cents; Underwood, 2 cents.

Eggs of poultry, in the shell, 8 cents a dozen; Payne-Aldrich, 5 cents a dozen; Underwood, free.

Honey, 3 cents a pound; Payne-Aldrich, 20 cents a gallon; Underwood, 10 cents a gallon.

Horses and mules, valued at not more than $150 each, $30 each; valued at over $150 each, 20%; Payne-Aldrich, $30 each and 25% respectively; Underwood, 10%.

Typewriters.

Shoe machinery.

Tar and oil-spreading machines for road construction.

Crude chalk.

Coal, anthracite, bituminous, culm, slack and shale and coke.*

Cocoa and cacao beans.

Coffee.

Coins of gold, silver, copper or other metals.

Copper ore and copper in plates, bars, ingots or pigs.

Cork wood or cork bark.

Cotton.

Fans, common palm leaf, not ornamented or decorated.

Guano, basic slag, manures and other substances used chiefly for fertilizers.

Hair of horses and cattle.

Rope made of rawhide.

Hides of cattle.

Ice.

India rubber and gutta-percha, crude.

Iodine, crude.

Iron ore.

Ivory tusks in their natural state.

Jet, unmanufactured.

Junk.

Boots and shoes made wholly or in chief value of leather.

Leather cut into shoe uppers, vamps or soles.

Asphalt and bitumen.

Lemon juice and lime juice, containing less than 2% of alcohol.

Mechanically ground and chemical wood pulp.

Needles, hand sewing or darning.

Newspapers and periodicals.

Oil cake and oil-cake meal.

Oakum.

Whale and other fish oils of American fisheries.

Crude petroleum and fuel oil.

Ores of gold, silver or nickel and of the platinum metals.

Parchment and vellum.

Pearl, mother of, and shells, not sawed, cut, flaked or advanced in value from the natural state.

Personal effects, not merchandise, of citizens of the United States dying in foreign countries.

Phosphates, crude and apatite.

Platinum, unmanufactured or in ingots, bars, sheets or plates.

Potassium chloride and sulphate.

Quinine sulphate.

Radium and salts of.

Shrimps and lobsters.

Silk, raw, and silk cocoons and silk waste.

Sodium nitrates, sulphate, crude, or salt cake and nitre cake.

Standard newsprint paper.

Sulphur in any form, and sulphur ore.

Tar and pitch of wood.

Tea.

Teeth, natural.

Tin ore and black oxide of tin, provided that there shall be imposed upon black oxide of tin a duty of 4 cents a pound and upon bar, block, or pig tin a duty of 6 cents a pound when the American mines are producing 1,500 tons of cassiterite and bar, block and pig tin a year.

Turpentine, gum, and spirits of, and rosin.

Vegetable tallow.

Wax.

All barbed wire, whether plain or galvanized.

Original paintings in oil, mineral, water or other colors, and original sketches.

Works of art, productions of American artists residing temporarily abroad.

White arsenic.

Bananas.

Common house brick.*

Portland cement.*

Cotton, both long and short staple.

Cyanide.

Fish for fertilizer.

Gloves made from cattle leather.

Gunpowder, sporting powder.

Potassium nitrate, or saltpetre, crude.

Shingles.

Tin, in bars, blocks, or pigs.

Wood: Logs, timber, round, unmanufactured, hewn, sided or squared.*

Paving posts, railroad ties and telephone, electric light, etc., poles.

Pickets, palings, hoops and staves.

Potash.

---

*Countervailing duty as to countries imposing duties upon like articles imported from the United States.

THE UNITED STATES IMMIGRATION LAW.

The new United States Immigration quota law was passed by Congress May 15, 1924, after going to conference, where an effort was made and later repudiated, to extend the time of the going into effect of the Japanese exclusion clause from July 1, 1924 to July 1, 1925.

The vote in the House was 308 for and 58 against. The vote in the Senate was 69 for and 9 against.

President Coolidge had requested this postponement of the date so that a suitable treaty might be negotiated with Japan. Congress refused. The President signed the bill on May 26, 1924.

The new act not only supplements but also changes the old law of 1917 in two important points.

First—Under the new law the undesirable or ineligible aliens are largely weeded out before they start instead of after they get here.

The law relieves the great body of immigrants of detention at Ellis Island and removes many causes for delays and misfortunes after they reach American ports. The act was intended also to prevent separation of families, and to reduce the number of deportations for causes which can be determined on the other side.

The American Consuls are directed to examine the information given on questionnaires and eliminate applicants who are feeble-minded and whose prison records make them undesirable.

Under the terms of the new law the Labor Department issues only enough certificates to cover each national quota. If an alien obtains a certificate and later changes his mind about emigrating to the United States, his place cannot be taken by another and he will be keeping some one else from coming.

Second—The annual quota from each country until July 1, 1927 is lowered to 2 per cent. of the number of persons born in that country who were residents of continental United States as shown by the 1890 census.

But the minimum quota is 100.

The old quota was 3 per cent. based on the number as shown at the 1910 census.

Tables showing the quotas under the new and old laws will be found with the regular immigration statistics, following the Immigration Act.

The weeding out under the new law is put in the hands of the American consular officers abroad.

THE JAPANESE EXCLUSION CLAUSE.

The quotas are available only for persons born in the respective countries who are eligible to citizenship in the United States and admissible by the immigration law. This clause excludes Japanese, Chinese, and other yellow races.

The 1924 act thus creates two classes of immigrants—quota and non-quota.

A non-quota immigrant is:

(a) The foreign-born wife or unmarried child, under 18 years, of a United States citizen resident here.

(b) A foreign-born resident of the United States returning from a temporary visit abroad.

(c) A native resident of Canada, Newfoundland, Mexico, Cuba, Haiti, Dominica, Canal Zone, or any independent country of Central or South America and his wife, and his unmarried children under 18 years of age, if accompanying or following to join him.

(d) A foreign-born minister or school teacher, having been such for the last two years, who comes here to continue his profession, also his wife and his unmarried children under 18 years, if accompanying or following to join him.

(e) A foreign-born student at least 15 years of age who comes here to continue his studies.

A quota immigrant is any other than a non-quota.

An alien who is not particularly specified in this act as a non-quota immigrant or a non-immigrant shall not be admitted as a non-quota immigrant or a non-immigrant by reason of relationship to any individual who is so specified or by reason of being excepted from the operation of any other law regulating or forbidding immigration.

PREFERENCES WITHIN QUOTAS.

(a) In the issuance of immigration visas to quota immigrants preference shall be given:

(1) To a quota immigrant who is the unmarried child, under 21 years of age, the father, the mother, the husband, or the wife, of a citizen of the United States who is 21 years of age or over; and

(2) To a quota immigrant who is skilled in agriculture, and his wife, and his dependent children under the age of 16 years, if accompanying or following to join him.

This preference shall not apply to immigrants of any nationality the annual quota for which is less than 300.

(b) The preference provided for those skilled in agriculture shall not in the case of quota immigrants of any nationality exceed 50 per centum of the annual quota for such nationality.

IMMIGRATION VISAS.

Visas are issued to immigrants at $9 apiece by the United States consular officers abroad. They constitute the document which admits them to this country. Each visa contains the full details as to the immigrant's nationality, history, etc.; also a description of him, with his photograph.

A visa is good for four months, not counting the ocean trip, and it also validates a passport.

The steamship companies must keep a record of each visa they handle.

When the alien reaches the United States his visa is taken by the immigration officer at the port of arrival, who inspects the holder and, if the immigrant is acceptable, permits the person to enter and forwards the visa to the United States Department of Labor at Washington.

WHO MUST HAVE VISAS.

With the following exceptions all aliens are required to obtain from an American consular officer abroad an immigration visa before they can be admitted to the United States:

(1) A governmental official, his family, attendants, servants, and employees, (2) an alien visiting the United States temporarily as a tourist or temporarily for business or pleasure.

(3) An alien in continuous transit through the United States.

(4) An alien lawfully admitted to the United States who later goes in transit from one part of the United States to another through foreign contiguous territory.

(5) A bona fide alien seaman serving as such on a vessel arriving at a port of the United States and seeking to enter temporarily the United States solely in the pursuit of his calling as a seaman.

(6) An alien entitled to enter the United States solely to carry on trade under and in pursuance of the provisions of a present existing treaty of commerce and navigation.

(7) An alien, lawfully resident in the United States, who is returning from a temporary visit abroad and who is possessed of an unexpired return permit.

(8) An alien lawfully resident in the United States, who is returning from a temporary visit to the Dominion of Canada, Newfoundland, the Republic of Mexico, or the Republic of Cuba, whether such alien is or is not possessed of the return permit.

American citizens residing in the United States desirous of having their wives or unmarried children under 18 years of age admitted as non-quota immigrants, or that a preference in the issuance of immigration visas be granted their father, mother, husband, or unmarried child between the ages of 18 and 21 years may make application therefor to the Commissioner General of Immigration upon forms which will be provided for that purpose upon application.

If the husband or father, respectively, is residing abroad, his wife and children under 21 years of age are entitled only to a preference and not to the issuance of a non-immigrant visa.

Applications to have relatives placed in a non-quota or preference class will not be accepted from aliens resident in the United States even though they have declared their intention to become citizens of the United States.

An alien in the United States going abroad for a visit may, in application, if his title is clear, get for $3 from the Commissioner General of Immigration at Washington, a re-entry permit.

A false statement under oath in any immigration document is punishable, on conviction, by not more than $10,000 fine or 5 years in prison, or both.

Steamship fines are fixed at $1,000, plus refunded fare, for each immigrant involved in attempted unlawful entry.

Parts of the new law took effect May 26, 1924, the rest on July 1, 1924.

The 109,000 Japanese residing in the Hawaiian Islands are not affected by the exclusion provisions of the new Immigration Act, but are still subject to the restrictions of the General Immigration Act of Feb. 5, 1917, Secretary of Labor Davis ruled on July 15, 1924.

This ruling, which was promulgated in answer to contentions that as the Japanese in Hawaii are already within the territory of the United States, they have a right to proceed to the mainland, means that even though the new law does not apply to them, they may still be prevented from entering this country and are in the same status as they were before the new law went into effect.

The provisions of the 1924 act, says the Secretary of Labor, are in addition to and not in substitution for the provisions of the immigration laws, and shall be enforced as a part of such laws, and all

the penal or other provisions of such laws, not inapplicable, shall apply to and be enforced in connection with the provisions of the 1924 act.

An alien, although admissible under the provisions of the 1924 act, shall not be admitted to the United States if he is excluded by any provision of the immigration laws other than this act, and an alien, although admissible under the provisions of the immigration laws other than this act, shall not be admitted to the United States if he is excluded by any provision of the 1924 act.

EXCLUDED CLASSES.

(1) All idiots, imbeciles, feeble-minded persons, epileptics, insane persons; persons who have had one or more attacks of insanity at any time previously; persons of constitutional psychopathic inferiority; persons with chronic alcoholism; paupers; professional beggars; vagrants, persons afflicted with tuberculosis in any form or with a loathsome or dangerous, contagious disease; persons not comprehended within any of the foregoing excluded classes who are found to be and are certified by the examining surgeon as being mentally or physically defective, such physical defect being of a nature which may affect the ability of such alien to earn a living; persons who have been convicted of or admit having committed a felony or other crime or misdemeanor involving moral turpitude; polygamists, or persons who practise polygamy or believe in or advocate the practise of polygamy.

(2) Anarchists, or persons who believe in or advocate the overthrow by force or violence of the Government of the United States or of all forms of law or who disbelieve in or are opposed to organized government, or who advocate the assassination of public officials, or who advocate or teach the unlawful destruction of property; persons who are members of or affiliated with any organization entertaining and teaching disbelief in or opposition to organized government, or who advocate or teach the duty, necessity, or propriety of the unlawful assaulting or killing of any officer or officers, either of specific individuals of or officers generally, of the Government of the United States or of any other organized Government because of his or their official character, or who advocate or teach the unlawful destruction of property; prostitutes, or persons coming into the United States for the purpose of prostitution or for any other immoral purpose; persons who directly or indirectly procure or attempt to procure or import prostitutes or persons for the purpose of prostitution or for any other immoral purpose; persons who are supported by or receive in whole or in part the proceeds of prostitution.

(3) Persons, hereinafter called contract laborers, who have been induced, assisted, encouraged, or solicited to migrate to this country by offers or promises of employment, whether such offers or promises are true or false, or in consequence of agreements, oral, written, or printed, express or implied, to perform labor in this country of any kind, skilled or unskilled; persons who have come in consequence of advertisements for laborers printed, published, or distributed in a foreign country; persons likely to become a public charge, persons who have been deported under any of the provisions of this act, and who may again seek admission within one year from the date of such deportation, unless prior to their re-embarkation at a foreign port or their attempt to be admitted from foreign contiguous territory the Secretary of Labor shall have consented to their reapplying for admission.

Persons whose ticket or passage is paid for with the money of another, or who are assisted by others to come, unless it is affirmatively and satisfactorily shown that such persons do not belong to one of the foregoing excluded classes; persons whose ticket or passage is paid for by any corporation, association, society, municipality, or foreign Government, either directly or indirectly; stowaways, except that any such stowaway, if otherwise admissible, may be admitted in the discretion of the Secretary of Labor; all children under sixteen years of age unaccompanied by or not coming to one or both of their parents, except that any such children may, in the discretion of the Secretary of Labor, be admitted if in his opinion they are not likely to become a public charge and are otherwise eligible.

(4) Unless otherwise provided for by existing treaties, persons who are natives of islands not possessed by the United States adjacent to the continent of Asia, situate south of the twentieth parallel latitude north, west of the one hundred and sixtieth meridian of longitude east from Greenwich, and north of the tenth parallel of latitude south, or who are natives of any country, province, or dependency situate on the continent of Asia west of the one hundred and tenth meridian of longitude east from Greenwich and east of the fiftieth meridian of longitude east from Greenwich and south of the fiftieth parallel of latitude north, except that portion of said territory situate between the fiftieth and the sixty-fourth meridians of longitude east from Greenwich and the twenty-fourth and thirty-eighth parallels of latitude north, and no alien now in any way excluded from or prevented from entering the United States shall be admitted to the United States.

ILLITERACY.

All aliens over 16 years of age who cannot read the English language or some other language or dialect, including Hebrew or Yiddish, are excluded, with the following exceptions:

(a) Persons who are physically incapable of reading.

(b) Any admissible alien or any alien heretofore or hereafter legally admitted, or any citizen of the United States may bring in or send for his father or grandfather, over 55 years of age, his wife, his mother, his grandmother, or his unmarried or widowed daughter, who, if otherwise admissible, may be admitted whether such relative can read or not.

(c) Persons seeking admission to the United States to avoid religious persecution in the country of their last permanent residence.

(d) Persons previously residing in the United States who were lawfully admitted, resided continuously therein for five years, and return thereto within six months from the date of their departure therefrom.

(e) Persons in transit through the United States.

(f) Persons lawfully admitted and who later go in transit through foreign contiguous territory (the period an alien may remain in foreign contiguous territory while in transit under this exemption shall be limited to 60 days; an alien may leave and enter the United States at the same port and still be in transit within the meaning hereof).

(g) Exhibitors and employees of fairs and expositions authorized by Congress.

(h) Aliens whose ability to read can be readily determined by any ordinary method approved by the department may be excused from the actual taking of the test.

(i) An illiterate alien girl coming here to marry may be admitted if her intended husband is a citizen of the United States who served in the military or naval forces of this country in the recent war with Germany, and if such marriage takes place in an immigration station.

The provisions relating to the payments for tickets or passage by any corporation, association, society, municipality, or foreign Government do not apply to the tickets or passage of aliens in immediate and continuous transit through the United States to foreign contiguous territory.

Skilled labor, if otherwise admissible, may be imported if labor of like kind unemployed cannot be found in this country, and the question of the necessity of importing such skilled labor in any particular instance may be determined by the Secretary of Labor upon the application of any person interested, such application to be made before such importation and such determination by the Secretary of Labor to be reached after a full hearing and an investigation into the facts of the case.

The provisions of law applicable to contract labor shall not be held to exclude professional actors, artists, lecturers, singers, nurses, ministers of any religious denomination, professors for colleges or seminaries, persons belonging to any recognized learned profession, or persons employed as domestic servants.

VIOLATIONS AND PENALTIES.

Violations of the immoral-women clause are punishable, on conviction, by imprisonment up to ten years and a fine up to $5,000. Violations of the contract-labor clause are punishable, on conviction, by $1,000 fine in each case and (or) imprisonment up to two years. Violations of the Anarchist clause carry prison up to five years and fine up to $5,000. Other violations carry various penalties. It is unlawful for any person or concern engaged in bringing immigrants to give fare rebates or to solicit immigration; penalty, $400 fine in each case. The penalty for smuggling immigrants is fine up to $2,000 and prison up to five years.

Incoming aliens at all U. S. ports are examined by U. S. Public Health Service doctors. An alien can appeal to a board of special inquiry, and then to the Secretary of Labor, whose word is final. Excluded aliens are returned at the ship's expense.

Aliens may be deported at any time within five years of their arrival if found guilty of crime or of having been of the excluded classes at arrival. An alien otherwise admittable may be let in by giving a cash bond that he or she will not become a public charge. The amount of cash is fixed in each case by the Secretary of Labor. It is unlawful for a ship to pay off or discharge an alien seaman in a U. S. port unless he lands merely to

reship. An alien seaman unlawfully entered may be deported within three years of arrival, and this applies to any other person who got in unlawfully and who was not of the excluded classes.

Every alien who may not appear to the examining immigrant inspector at the port of arrival to be clearly and beyond a doubt entitled to land under the provisions of this act, or any other immigration law, shall be detained for examination in relation thereto by a board of special inquiry, which board shall proceed in the manner provided for in the Immigration Act of February 5, 1917.

Aliens excluded by a board of special inquiry, under the provisions of this act, shall be entitled to the right of appeal to the Secretary of Labor.

ISSUANCE OF VISAS TO RELATIVES.

Any citizen of the United States, seeking to bring in a husband, wife, child, father, or mother as a non-quota immigrant or to obtain for such relatives a preference under the quota, shall be required to file with the Commissioner General of Immigration a petition on a form to be provided by the Commissioner General for that purpose, which form must be executed in the manner therein specified.

The fact that such petition is approved and that, as a consequence thereof, a non-quota visa is granted shall not relieve the applicant upon arrival at a designated port of entry for aliens from establishing to the satisfaction of the examining immigration officer that the holder is rightfully entitled to the status of a non-quota immigrant, nor shall such applicant be admitted if he is found to be inadmissible under any excluding provision of the immigration laws.

ALIENS ADMITTED TO MARRY.

An act of Congress, approved June 5, 1920, amended the Immigration Act by adding that an alien who cannot read may, if otherwise admissible, be admitted if within five years thereafter a citizen of the United States who has served in the military or naval forces of the United States during the war with the Imperial German Government requests that such alien be admitted, and with the approval of the Secretary of Labor marries such alien at a United States immigration station.

Under an act of Congress, approved May 10, 1920, the Secretary of Labor was given power to deport, after a hearing, aliens found guilty of violating any of the so-called war acts, including interned aliens.

Congress, by a joint resolution, approved Oct. 19, 1918, amended the Immigration Law so as to readmit any alien who enlisted or served here or abroad in the United States or other Allied forces if such alien applies for readmission within a year after the war's end, or returns to a United States port within two years after the war's end. In such cases the head tax is remitted, and the alien is let in.

YEARLY QUOTAS UNDER 1924 UNITED STATES IMMIGRATION LAW.

Country or Area of Birth.	Annual Quota.	Country or Area of Birth.	Annual Quota.	Country or Area of Birth.	Annual Quota.

Hungary	473				
Iceland	100				
*India	100				

*For each of the countries indicated by an asterisk (*) is established a nominal quota according to the minimum fixed by law. These nominal quotas, as in the case of all quotas hereby established, are available only for persons born within the respective countries who are eligible to citizenship in the United States and admissible under the immigration laws of the United States.

Under the 1924 act the monthly quota must not exceed 10 per cent. of the annual quota, except when the annual quota is less than 300, when special monthly quotas may be fixed by the Commissioner General of Immigration, with the approval of the Secretary of Labor.

The present quotas under the new law hold for each year until June 30, 1927. For each fiscal year thereafter the annual quota of any nationality shall be a number which bears the same ratio to 150,000 as the number of inhabitants in continental United States in 1920 having that national origin bears to the number of inhabitants in continental United States in 1920, but the minimum quota of any nationality shall be 100.

The quotas under the former Restriction Act, which went into the discard June 30, 1924, were as follows:

QUOTAS UNDER OLD RESTRICTION ACT IN YEAR ENDED JUNE 30, 1924.

Not included above are certificates issued to American soldiers or sailors in the World War, as follows—(1918) 63,993; (1919) 128,335; (1920) 51,972; (1921) 17,636; (1922) 9,468; (1923) 7,109.

U. S. NATURALIZATION LAWS.

By an act of Congress approved Sept. 22, 1922, it is provided that after that date the citizenship status of a married woman shall no longer follow that of the husband, and that thereafter a married woman shall have the privilege of becoming naturalized on her own account.

An alien woman married to an alien at the time of the passage of the above act, or who thereafter marries an alien may become naturalized by complying with all requirements of the naturalization laws, including declaration, five years' continuous United States residence, one year continuous State residence, certificate of arrival if her entry dates from June 29, 1906, etc.

The status of *single* alien women is not affected by this law, and women of this class may continue as in the past to file declarations and petitions for the purpose of becoming naturalized.

The act referred to further provides that no married woman whose husband is not eligible to citizenship shall be naturalized during the continuance of the marital status, and that she herself must be eligible to citizenship. Eligibility for citizenship is determined almost entirely by the question of whether the persons concerned are "white persons" or "persons of African nativity or African descent," as provided by the Revised Statutes.

The following courts alone have the power to naturalize aliens: United States District Courts in the States and Territories; also all courts of record in any State or Territory having a seal, a clerk, and jurisdiction in actions at law or equity, or law and equity, in which the amount in controversy is unlimited.

Any alien, white, or of African nativity or descent, is required, if he desires to become naturalized, to file a declaration of intention in the clerk's office of a court having jurisdiction, and such declaration may not be filed until the alien has reached the age of eighteen. This declaration must contain information as to the name, age, occupation, time and place of arrival in the United States, and must further show that it is the declarant's *bona fide* intention to become a citizen of the United States and to renounce forever all allegiance and fidelity to any foreign prince, potentate, state or sovereignty.

Not less than two years after an alien has filed his declaration of intention, and after not less than five years' continuous residence in the United States, he may file a petition for citizenship in any one of the courts which has jurisdiction over the place in which he resides, provided he has lived at least one year continuously, immediately prior to the filing of such petition, in the State or Territory in which such place is located. This petition must be signed by the petitioner in his own handwriting and shall give his full name, place of residence, occupation, place of birth and the date thereof, the place from which he emigrated, and the date and place of his arrival in the United States. If such aival occurred subsequent to the passage of the act of June 29, 1906, he must secure a certificate from the Department of Labor showing the fact of such arrival and the date and place thereof, for filing with the clerk of the court to be attached to his petition. If he is married he must state the name of his wife and, if possible, the country of her nativity and her place of residence at the time of the filing of his petition, and, if he has children, the name, date and place of birth and present place of residence of each living child. The petition must set forth that he is not a disbeliever in or opposed to organized government, or a member of or affiliated with any organization or body of persons teaching disbelief in or opposition to organized government; that he is not a polygamist or a believer in the practice of polygamy, and that he absolutely and forever renounces all allegiance and fidelity to any foreign country of which he may, at the time of filing such petition, be a citizen or subject. This petition must be verified at the time it is filed by the affidavit of two credible witnesses, who are citizens of the United States and who shall state that they have known the petitioner during his entire residence (not exceeding five years) in the State in which the petition is filed, which must be not less than one year, and that they have known him to be a resident of the United States continuously during the five years immediately preceding the filing of the petition; that during such time he acted as a man of good moral character, attached to the principles of the Constitution of the United States and well disposed to the good order and happiness of the same. If a portion of the five years has been passed by the petitioner in some other State than that in which he resides at the time of filing his petition the affidavit of the witnesses may verify so much of the petitioner's residence as has been passed in the State (not less than one year), and the portion of said five years' residence out of the State may be shown by depositions at the time of hearing on the petition.

No petition may be heard until the expiration of at least ninety days after it is filed nor within thirty days preceding a general election.

Alien seamen who have sailed three years on United States merchant or fishing vessels are protected as American citizens after declaring intention of becoming such. Aliens honorably discharged on account of disability in performance of duty while in military or naval service during the war or at its termination, may be relieved of the necessity of proving continuous five years' residence.

IMPEACHMENTS IN UNITED STATES HISTORY.

The Constitution of the United States, Article II., Section IV., provides that civil officers of the United States may be removed from office on impeachment and conviction of treason, bribery or other high crimes and misdemeanors; that the House of Representatives has the sole power of impeachment, and the Senate the sole power to try impeachments; that the Vice President shall preside at impeachments except when the President is tried, when the Chief Justice of the Supreme Court shall preside; and that two-thirds of the members present must vote for conviction before a person impeached shall be deemed guilty. Only eight persons have been impeached and tried before the Senate, and only two of them have been convicted. The record is as follows:

William Blount, Senator from Tennessee, impeached July 7, 1797, for conspiring to wage war with Spain in favor of Great Britain, to excite the Cherokee Indians against Spain, and to create disaffection among the Indians toward the United States; trial Dec. 17, 1798, to Jan. 14, 1799; vote, 11 guilty, 14 not guilty; verdict, acquittal.

John Pickering, Judge of the District Court of the United States for the District of New Hampshire; impeached 1803 for drunkenness and disregard of the terms of the statutes; trial March 3 to March 12, 1803; vote, 19 guilty, 7 not guilty; verdict, guilty; punishment, removal from office.

Samuel Chase, Associate Justice of the Supreme Court of the United States; impeached 1804 for misconduct at trials of persons charged with breach of the Sedition Law; trial Nov. 30, 1804, to March 1, 1805; vote, 9 guilty, 30 not guilty, and 15 guilty, 19 not guilty, on different counts; verdict acquittal.

James Peck, Judge of the District Court of the United States for the District of Missouri; impeached for tyrannous treatment of counsel, 1830; trial May 11 to May 30, 1830, and from Dec. 13, 1830, to Jan. 31, 1831; vote, 22 guilty, 21 not guilty; verdict acquittal.

West H. Humphreys, Judge of the District Court of the United States for the District of Tennessee, impeached 1862 for supporting the secession movement and unlawfully acting as Judge of the Confederate District Court; trial May 22 to June 26, 1862; vote, 32 guilty, 4 not guilty; verdict, guilty; punishment, removal from office.

Andrew Johnson, President of the United States, impeached for usurpation of the law, corrupt use of the veto power, interference at elections and high crimes and misdemeanors; trial, March 30 to May 26, 1868; vote, guilty, 35, not guilty, 19; verdict, acquittal.

William W. Belknap, Secretary of War of the United States, impeached for accepting bribes; trial April 5 to Aug. 1, 1876; vote, guilty, 5, not guilty, 25; verdict, acquittal.

Charles Swayne, Judge of the District Court of the United States for the District of Florida; impeached 1905 for misconduct in office; trial Feb. 6 to Feb. 27, 1905; vote, 55 guilty, 37 not guilty; verdict, acquittal.

Robert W. Archibald, Associate Judge of United States Commerce Court, was impeached July 11, 1912, on thirteen articles charging him with corrupt collusion with coal mine owners and railroad officials while in office. The Senate began his trial Dec. 3, 1912, and ended Jan. 13, 1913. Verdict, guilty; removal from office.

On June 12, 1914, District Judge Alston G. Dayton was impeached. Proceedings dropped March 3, 1915.

In the House, near the close of the 66th Congress, a member asked for the impeachment of Federal District Judge Kenesaw Mountain Landis for having accepted, at a salary, the post of Commissioner of Baseball. The demand was not acted upon by the House.

PASSPORT REGULATIONS.

1. AUTHORITY TO ISSUE—Section 4075 of the Revised Statutes of the United States, as amended by the act of Congress approved June 14, 1902, provides that "the Secretary of State may grant and issue passports, and cause passports to be granted, issued, and verified in foreign countries by such diplomatic or consular officers of the United States, and by such chief or other executive officer of the insular possessions of the United States, and under such rules as the President shall designate and prescribe for and on behalf of the United States."

2. TO WHOM PASSPORTS ARE ISSUED—Section 4076 of the Revised Statutes of the United States (U. S. Comp. Stat., 1901, 2765) provides that "no passport shall be granted or issued to or verified for any other persons than those owing allegiance, whether citizens or not, to the United States." Persons who have declared their intention to become citizens are not classed as citizens.

3. BY WHOM ISSUED AND REFUSAL TO ISSUE—No one but the Secretary of State may grant and issue passports in the United States (Rev. Stat., Secs. 4075, 4078), and he is empowered to refuse them in his discretion. Passports are not issued by American diplomatic and consular officers abroad, except in cases of emergency; and a citizen who is abroad and desires to procure a passport must apply therefor through the nearest diplomatic or consular officer to the Secretary of State. Applications for passports by persons in Hawaii, Porto Rico or the Philippines should be made to the chief executives of those islands. The evidence required of such applicants is similar to that required of applicants in the United States.

4. FEE—A fee of $10 is required to be collected for every citizen's passport issued. That amount in currency or postal money order should accompany each application made by a citizen or person owing allegiance or entitled to the protection of the United States. Orders should be made payable to the Disbursing Clerk of the Department of State. Drafts or checks will not be accepted. No fees charged to widow, child, parent, brother or sister of an American soldier, sailor or marine buried abroad, to visit country of burial.

5. APPLICATIONS: AFFIDAVIT OF APPLICANT—A person who is entitled to receive a passport, if within the United States, must submit a written application, in the form of an affidavit, to the Secretary of State. The application must be made by the person to whom the passport is to be issued, and signed by him, as it is not proper for one person to apply for another.

The affidavit must be made before a clerk of a Federal court or a State court authorized to naturalize aliens, within the jurisdiction of which the applicant or his witness resides, and the seal of the court must be affixed, unless there is in such place an agent of the Department of State, in which case the application must be made before such agent. Passport agents are located in New York City, Chicago, Seattle, San Francisco and New Orleans. The application should, where possible, state from what point the applicant intends to leave the United States and the intended date of departure.

(*d*) WITNESS—The application must be witnessed by some person who has known the applicant for at least two years and who can state that the applicant is the person he represents himself to be, and that the facts stated in the application are true to the best of the witness's knowledge and belief. This affidavit must be made before the clerk of the court, or the Department's agent, before whom the application is executed, and the witness must accompany the applicant when he makes his application. The witness should, where possible, be an American citizen residing within the jurisdiction of the court or the Department's agent, and established in a recognized profession, business, or employment. The witness, in signing the application, should state the nature of his profession, business, or employment. The applicant or his witness must be known to the clerk of court or the Department's agent before whom the application is executed or must be able to satisfy such officer as to his identity and the bona fides of the application. No lawyer or other person will be accepted as witness to a passport application if he has received or expects to receive a fee for his services in connection therewith. A passport issued by the Secretary of State on and after January 3, 1918, will be accepted in lieu of an identifying witness.

A person applying for a passport or for a renewal of his passport or for an amendment thereto to include additional countries should state in a brief form the object or objects of his proposed trip abroad, but it is no longer necessary to submit with the application documentary evidence supporting the statements as to the objects of the visit.

If the applicant is proceeding abroad on his own behalf he should so indicate by the use of expressions similar to the following: Study, Health, Tourist, Recreation, Temporary Residence, Settling my own Estate, Care for my Property, Visit my Relatives.

If the applicant is proceeding abroad for other personal reasons or to represent some other person or organization, he should state definitely the object of the trip. The following expressions will serve as examples: Commercial Banking, Legal, (or other) business for (name of person or organization); Research, Literary, Construction, Relief (or other) work for (name of person or organization); Distribute funds (food, clothing, etc.) for (name of person or organization).

If there is more than one object of the trip each object should be clearly stated opposite the name of the country in which it is intended to accomplish the objects.

Passports will be issued to all parts of the world except countries where internal conditions or relations with the United States prevent.

(*c*) PHOTOGRAPHS—The application must be accompanied by duplicate photographs of the applicant, on thin paper, unmounted, and not larger in size than three by three inches. One must be attached to the back of application by the clerk of court or the department's agent before whom the application is made, with an impression of such officer's seal so placed as to cover part of the photograph but not the features, and the other sent loose, to be attached to the passport by the department. The loose photograph must be signed by the applicant across its face, so as not to obscure the features, and the signature thereon must correspond to the applicant's signature affixed to the application. *Photographs on cardboard or postcards will not be accepted.*

(*d*) WITNESS—The application must be supported by an affidavit of at least one credible witness, who has known the applicant at least two years, stating that the applicant is the person he represents himself to be and that the facts stated in the application are true to the best of the witness's knowledge and belief. This affidavit must be made before the clerk of court or the department's agent before whom the application is executed, and the witness must accompany the applicant when he makes his application. The witness must be an American citizen, established in a recognized profession or business and having his office or place of business within the jurisdiction of the court or the department's agent (e. g., a clergyman, lawyer, physician, banker, broker, real estate dealer, or merchant). The witness, in signing the application, should state the nature of his profession or business and his professional or business address. *No lawyer or other person will be accepted as witness to a passport application if he has received or expects to receive a fee for his services in connection therewith.* A passport issued by the Secretary of State on and after June 3, 1918, to which is attached the photograph and signature of the person to whom the passport was originally issued, will be accepted in lieu of an identifying witness.

6. NATIVE CITIZEN—An application containing the information indicated by rule 5 will be sufficient evidence in the case of a native citizen; except that a person born in the United States in a place where births are recorded will be required to submit a birth certificate, bearing the official seal of the certifying officer, with his application. If a birth certificate is not obtainable, the application must be supported by a baptismal certificate or an affidavit of the physician who attended the birth or affidavits of parents or other reputable persons having sufficient knowledge to be able to testify as to the place and date of the applicant's birth. Passports issued by the Department of State or its diplomatic or consular representatives are intended for identification and protection in foreign countries and not to facilitate entry into the United States, immigration being under the supervision of the Department of Labor.

7. A PERSON BORN ABROAD WHOSE FATHER WAS A NATIVE CITIZEN OF THE UNITED STATES—In addition to the statements required by rule 5, his application must show that his father was born in the United States, resided therein, and was a citizen at the time of the applicant's birth. In such case evidence of the father's birth in this country, similar to that required in section 6, above, should be submitted.

8. NATURALIZED CITIZEN—In addition to the statements required by rule 5, a naturalized citizen must transmit his certificate of naturalization, or a duly certified copy of the court record thereof, with his application. It will be returned to him after

inspection. He must state in his affidavit when he emigrated to this country, where he has lived since his arrival in the United States, when and before what court he was naturalized, and that he is the identical person described in the certificate of naturalization. The signature to the application should conform in orthography to the applicant's name as written in his certificate of naturalization, or an explanation of the difference should be submitted.

9. WOMAN'S APPLICATION—If she is unmarried, in addition to the statements required by rule 5, she should state that she has never been married. A woman married to an American citizen prior to the Act of Congress approved September 22, 1922, has the same citizenship as her husband unless she was, because of her race, ineligible to naturalization. If she is the wife of a native citizen of the United States, the fact should be made to appear in her application, which should be made according to the form prescribed for a native citizen, whether she was born in this country or abroad. If she is the wife of a naturalized citizen, in addition to the statements required by rule 5, she must transmit for inspection her husband's certificate of naturalization or a certified copy of the court record thereof, must state that she is the wife of the person described therein, and must set forth the facts of his birth, immigration, naturalization, and residence, as required in the rules governing the application of a naturalized citizen. A woman married after the passage of the Act of Congress mentioned above, does not take the citizenship of her husband and therefore she must submit evidence of her own American citizenship. The wife of an alien who was naturalized after September 22, 1922, does not acquire American citizenship by virtue of her husband's naturalization. A married woman should sign her own Christian name with the family name of her husband. (Thus: Mary Doe; not Mrs. John Doe.)

10. THE CHILD OF A NATURALIZED CITIZEN CLAIMING CITIZENSHIP THROUGH THE NATURALIZATION OF THE PARENT—In addition to the statements required by rule 5, the applicant must state that he or she is the son or daughter, as the case may be, of the person described in the certificate of naturalization, which must be submitted for inspection, and must set forth the facts of emigration, naturalization, and residence as required in the rules governing the application of a naturalized citizen.

11. A RESIDENT OF AN INSULAR POSSESSION OF THE UNITED STATES WHO OWES ALLEGIANCE TO THE UNITED STATES—In addition to the statements required by rule 5, he must state that he owes allegiance to the United States and that he does not acknowledge allegiance to any other government, and must submit affidavits from at least two credible witnesses who are able to corroborate his statements as to birth, residence, and loyalty.

12. EXPIRATION OF PASSPORT—*A passport is valid for twelve months from date of its issuance, and may be renewed for another twelve months.* A new one will be issued upon a new application. If the applicant is a naturalized citizen, the old passport will be accepted in lieu of a certificate of naturalization, provided the application upon which a previous passport was issued is found to contain sufficient information as to the naturalization of the applicant. If the applicant is a native citizen, a reference to a previous application with which the required evidence of birth was submitted will be sufficient, provided the application upon which the previous passport was issued is found to contain the necessary record of the evidence submitted.

13. WIFE, MINOR CHILDREN—When the applicant is accompanied by his wife and minor children who owe allegiance to the United States, one passport will suffice for all, except for travel in the countries listed below. The full name of each person and the date and place of the birth of each person should be given. When the applicant's wife and minor children are to be included, two photographs of each person should accompany the passport application. A woman's passport may include her minor children.

It is understood that the countries named below require separate passports of persons above the age given after the name of the country, but that a wife may be included in her husband's passport for all countries.

COUNTRY.	Age.	COUNTRY.	Age.
Australia..	16 yrs. (males only)	Haiti.....	17 yrs.
Brazil....	14 yrs. (males only)	Peru.....	12 yrs.
Denmark..	14 yrs.	Poland...	14 yrs.
Finland...	15 yrs.	Sweden...	16 yrs.

14. TITLES—Professional and other titles will not be inserted in passports, but an applicant's name in religion, an author's nom de plume, a stage name, etc., may be included in parentheses.

15. SURRENDER OF OLD PASSPORTS—An applicant for a new passport who holds an expired or unexpired passport or passports issued on or after January 3, 1918, should submit the latter to the official before whom he executed his application for a new passport. In such case the official will cancel the old passport by cutting out a piece of the seal thereon and stamping or writing, in indelible ink, the word "cancelled" across the face of the passport, which may then be returned to the applicant. After cancelling an old passport the official who takes the application should make a notation on the margin or in the body thereof, stating the number and date of issue of the passport cancelled and the name of the official by whom it was issued. However, if the applicant desires to surrender the old passport it should be forwarded to the department with the new application.

16. BLANK FORMS OF APPLICATION—They will be furnished by the department free of charge to persons who desire to apply for passports. Supplies of blank applications are also furnished by the department to clerks of courts and are held by the department's agents.

Note—The applicant should not expect to receive his passport in less than ten days after completing correctly all the formalities of application.

17. ADDRESS—Communications should be addressed to the Department of State, Division of Passport Control, Washington, D. C., and each communication should give the post office address of the person to whom the answer is to be directed.

No passports are required from Cubans, Santo Dominicans, or Haitians. Aliens regularly residing in the United States going to Canada, Newfoundland, Bermuda, the Bahamas, St. Pierre-Miquelon, Mexico, Cuba, Santo Domingo or Haiti, may return within six months without passports.

After passport has been received it is necessary for aliens to obtain a clearance certificate at port of departure to show Income Tax laws have been complied with. It is necessary to obtain vises from the Consuls representing countries named in passport.

LITIGATION OF CUSTOMS CLAIMS.

A statutory judicial remedy is given by the Customs Practice Act of June 10, 1890, and supplements thereto, for the return of money illegally exacted by the administrative customs officials before a special statutory Court of Customs Claims called the Board of United States General Appraisers. If the valuation by the local appraiser of imported merchandise upon which an ad valorem duty is assessed is disputed by the importer he may appeal for a revaluation (or reappraisement as it is called) within ten days after the local appraiser has made the assessment. If the importer is dissatisfied with the classification by the Collector of Customs at the port of entry, he may file a protest in writing within sixty days with such Collector, who thereupon must forward the papers to the board, and the case is regularly docketed.

There is no limitation upon the amount involved in such litigation. It covers and includes merchandise imported by Parcel Post and claims arising from the assessment and classification of baggage claimed to be exempt from duty. The trial of the case is usually had at the port of entry or some nearby place. Regular dockets for the trial of such cases are held at New York, Philadelphia, Boston, Baltimore, Chicago, Cincinnati, St. Louis, St. Paul, Seattle, Portland, San Francisco and Los Angeles. In addition special dockets are held in other customs districts at the convenience and on request of the importers' attorneys. There are no court costs and the procedure is simple and expeditious, yet includes all the safeguards and protections of an ordinary court trial. Numerous claims against the Government, arising from the administration of the customs laws are thus litigated and involve in the aggregate large sums of money. Reappraisement cases are heard by a single member of the board, with an appeal by either the Government or the importer from his judgment to a board of three. Classification cases, including contests over the legality of an appraisement, the legality of any administrative regulation promulgated by the Secretary of the Treasury, or the legality of other administrative action resulting in the levy of an excessive rate or amount of duty by the Collector of Customs are decided by the Classification Board.

An appeal lies from this board's judgment to the Court of Customs Appeals at Washington, from whence certiorari lies to the Supreme Court of the United States in treaty cases, constitutional cases and other cases which the Attorney General certifies as of sufficient importance.

THE SHERMAN LAW AND AMENDMENTS THERETO.

The following is the text concerning trusts:

SEC. 1. Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal. Every person who shall make any such contract, or engage in any such combination or conspiracy shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by a fine not exceeding $5,000, or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the Court.

SEC. 2. Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by a fine not exceeding $5,000, or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the Court.

SEC. 3. Every contract, combination in form of trust or otherwise, or conspiracy, in restraint of trade or commerce in any Territory of the United States, or the District of Columbia, or in restraint of trade or commerce between any such Territory and another, or between any such Territory or Territories and State or States or the District of Columbia, or with foreign nations, or between the District of Columbia and any State or States or foreign nations, is hereby declared illegal. Every person who shall make any such contract, or engage in any such combination or conspiracy, shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by a fine not exceeding $5,000, or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the Court.

SEC. 4. The several Circuit Courts of the United States are hereby invested with jurisdiction to prevent and restrain violations of this act; and it shall be the duty of the several District Attorneys of the United States, in their respective districts, under the direction of the Attorney General, to institute proceedings in equity to prevent and restrain such violations. Such proceedings may be by way of petition setting forth the case and praying that such violation shall be enjoined or otherwise prohibited. When the parties complained of shall have been duly notified of such petition, the Court shall proceed, as soon as may be, to the hearing and determination of the case; and pending such petition and before final decree, the Court may at any time make such temporary restraining order or prohibition as shall be deemed just in the premises.

SEC. 5. Whenever it shall appear to the Court before which any proceeding under Section 4 of this act may be pending that the ends of justice require that other parties should be brought before the Court, the Court may cause them to be summoned, whether they reside in the district in which the Court is held or not; and subpoenas to that end may be served in any district by the Marshal thereof.

SEC. 6. Any property owned under any contract or by any combination, or pursuant to any conspiracy (and being the subject thereof) mentioned in Section 1 of this act, and being in the course of transportation from one State to another, or to a foreign country, shall be forfeited to the United States, and may be seized and condemned by like proceedings as those provided by law for the forfeiture, seizure and condemnation of property imported into the United States contrary to law.

SEC. 7. Any person who shall be injured in his business or property by any other person or corporation by reason of anything forbidden or declared to be unlawful by this act may sue therefor in any Circuit Court of the United States in the district in which the defendant resides or is found, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the costs of suit, including a reasonable attorney's fee.

SEC. 8. That the word "person" or "persons" wherever used in this act shall be deemed to include corporations and associations existing under or authorized by the laws of either the United States, the laws of any of the Territories, the laws of any State or the laws of any foreign country.

Approved July 2, 1890.

CLAYTON ACT AMENDMENTS TO SHERMAN LAW.

Suits and proceedings against a corporation may be brought in any district wherein found or transacting business. Subpoenas may run into any district, except that in civil cases permission of Court must be had to bring witness more than 100 miles. Violations by corporations deemed also that of individual directors, officers or agents authorizing, or doing any of acts constituting violation in whole or in part. Injunctive relief against threatened loss provided for, and temporary injunctions without notice under stringent safeguards (giving security, prompt and early hearing, etc.). Special provisions enacted to cover disputes between employers and employees. In general so-called "strikes" and "striking" by laboring men and unions where peaceable means and methods alone are employed cannot be enjoined. Persons or corporations wilfully disobeying orders, decrees, etc., issued under the Sherman law may, in certain cases, be proceeded against as for criminal contempt. In such cases defendant may demand jury trial. Punishment for contempt is not to exceed $1,000 fine, nor six months' imprisonment. These provisions do not apply to contempts committed in presence of the Court, or so near thereto as to obstruct the administration of justice.

The Sherman and Clayton acts do not apply to labor or farmers' unions not run for profit.

LAW OF 1922 AUTHORIZING FARMERS TO SELL CO-OPERATIVELY.

(Approved by President Harding and in effect February 18, 1922.)

Persons engaged in the production of agricultural products as farmers, planters, ranchmen, dairymen, not or fruit growers may act together in associations, corporate or otherwise, with or without capital stock, in collectively processing, preparing for market, handling, and marketing in interstate and foreign commerce, such products of persons so engaged. Such associations may have marketing agencies in common; and such associations and their members may make the necessary contracts and agreements to effect such purposes: *Provided, however*, That such associations are operated for the mutual benefit of the members thereof, as such producers, and conform to one or both of the following requirements:

First. No member of the association is allowed more than one vote because of the amount of stock or membership capital he may own therein, or, *Second*, The association does not pay dividends on stock or membership capital in excess of 8 per centum per annum. And in any case to the following: *Third.* The association shall not deal in the products of non-members to an amount greater in value than such as are handled by it for members.

SEC. 2. If the Secretary of Agriculture shall have reason to believe that any such association monopolizes or restrains trade in interstate or foreign commerce to such an extent that the price of any agricultural product is unduly enhanced by reason thereof, he shall serve upon such association a complaint stating his charge in that respect, to which complaint shall be attached, or contained therein, a notice of hearing, specifying a day and place not less than thirty days after the service thereof, requiring the association to show cause why an order should not be made directing it to cease and desist from monopolization or restraint of trade. An association so complained of may at the time and place so fixed show cause why such order should not be entered. The evidence given on such a hearing shall be taken under such rules and regulations as the Secretary of Agriculture may prescribe, reduced to writing, and made a part of the record therein. If upon such hearing the Secretary of Agriculture shall be of the opinion that such association monopolizes or restrains trade in interstate or foreign commerce to such an extent that the price of any agricultural product is unduly enhanced thereby, he shall issue and cause to be served upon the association an order reciting the facts found by him, directing such association to cease and desist from monopolization or restraint of trade.

The law further provides that either side to the controversy may appeal to the U. S. District Courts.

BUSINESS (CORP.) AND COMPENSATION LAWS.

For the laws of the various States and Territories of the Union bearing on business corporations and on Workmen's Compensation, consult The 1923 World Almanac and Book of Facts.

The Business Laws begin on page 177 of that publication, and the Compensation Laws on page 204.

COPYRIGHT LAW OF THE UNITED STATES.

(Revised by Thorvald Solberg, Register of Copyrights.)

The copyright law approved March 4, 1909, which took effect on July 1, 1909, provides that the application for registration of any work "shall specify to which of the following classes the work in which copyright is claimed belongs":

(a) Books including composite and cyclopaedic works, directories, gazetteers and other compilations; (b) periodicals, including newspapers; (c) lectures, sermons, addresses, prepared for oral delivery; (d) dramatic or dramatico-musical compositions; (e) musical compositions; (f) maps; (g) works of art, models or designs for works of art; (h) reproductions of a work of art; (i) drawings or plastic works of a scientific or technical character; (j) photographs; (k) prints and pictorial illustrations. The amendment of Aug. 24, 1912, adds: (l) motion picture photo-plays; (m) motion pictures other than photo-plays.

The application for registration of any article should distinctly specify to which one of these classes the work belongs. An article is not entitled to registration unless it is reasonably possible to class it under one or the other of the designations named in the statute.

For works reproduced in copies for sale or public distribution: 1. Publish the work with the copyright notice. The notice may be in the form "Copyright, 19.... (year date of publication), by..... (name of copyright proprietor), or in the case of works specified above (f) to (k) the notice may consist of the letter C inclosed in a circle (C) accompanied by the initials, monogram, mark or symbol of the proprietor—provided that his name shall appear on some accessible part of the copies." 2. Promptly after publication send to the Copyright Office, Library of Congress, Washington, D. C., two copies (or if the work is by a foreign citizen and is first published in a foreign country, one copy only) of the best edition of the work, with an application for registration. In the case of motion picture photo-plays and of motion pictures other than photo-plays a description of the work must be filed, together with copies of the reels, and a money order payable to the Register of Copyrights for the statutory registration fee of $1.

BOOKS BY AMERICAN AUTHORS.

In the case of books by American authors, or permanent residents of the United States, the copies deposited must be accompanied by an affidavit, under the official seal of an officer authorized to administer oaths, stating that the typesetting, printing and binding of the book have been performed within the United States. Affidavit and application forms will be supplied by the Copyright Office on request.

BOOKS IN FOREIGN LANGUAGE.

Books of foreign origin in a language or languages other than English are not required to be manufactured in the United States. In the case of a book in the English language published abroad before publication in this country, an *ad interim* copyright for four months from the day of the deposit of the foreign copy may be secured by depositing in the Copyright Office one complete copy of the foreign edition within sixty days after its publication abroad. If two copies of such book manufactured in this country are deposited with application for registration and fee ($1) published during the *ad interim* term, the copyright shall be extended for the full term of twenty-eight years.

For works not reproduced in copies for sale: Copyright may also be had of certain classes of works (see a, b, c, below) of which copies are not reproduced for sale, by filing in the Copyright Office an application for registration, with the statutory fee of $1, sending therewith: (a) In the case of lectures or other oral addresses or of dramatic or musical compositions, one complete manuscript or typewritten copy of the work. This privilege of registration, however, does not exempt the copyright proprietor from the deposit of printed copies of a dramatic or musical composition or lecture where the work is later reproduced in copies for sale. A new application must be made in such cases and another fee of $1 paid. (b) In the case of photographs not intended for general circulation, one photographic print. (c) In the case of works of art (paintings, drawings, sculpture), or of drawings or plastic works of a scientific or technical character, one photograph or other identifying production of the work. In the case of a motion picture photo-play, a title and description and one print taken from each scene or act. In case of a motion picture other than a photo-play, a title and description with not less than two prints to be taken from different sections of a complete motion picture. In all these cases, if the work is later reproduced in copies for sale, two copies must then be deposited.

REGISTRATION FEE.

For registration of any work subject to copyright, $1, which sum is to include a certificate of registration under seal. But only one registration at one fee is required in the case of several volumes of the same book deposited in the Copyright Office at the same time. For every additional certificate of registration, or copy of record under seal, 50 cents. In the case of photographs the fee shall be 50 cents where a certificate is not requested. For recording and certifying an assignment of copyright, or for a certified copy of an assignment, $1, if the instrument is not over three hundred words in length; if more than three hundred and less than one thousand words in length, $2; if more than one thousand words in length, $1 additional for each additional one thousand words or fraction thereof over three hundred words. For comparing a copy of an assignment with the record of such document in the Copyright Office and certifying the same under seal, $1. For recording the transfer of the proprietorship of copyright articles, 10 cents for each title of a book or other article, in addition to the fee prescribed for recording the instrument of assignment. For recording an extension or renewal of copyright, 50 cents. Remittances should be made by money order payable to the Register of Copyrights. Forms for application for copyright registration will be furnished on request.

TERM LASTS 28 YEARS.

The original term of copyright runs for twenty-eight years. Within one year prior to the expiration of the original term, the author, if living, or the widow or widower of the author, or the children of the author if he be not living; or if none of these be living, then the author's executors, or in the absence of a will the author's next of kin, may secure a renewal for a further term of twenty-eight years, making fifty-six years in all. In case of composite works, if the proprietor secured the original copyrights, he may also secure the renewal.

COPYRIGHTS ASSIGNABLE.

Copyrights are assignable by any instruments of writing. Every assignment of copyright must be recorded in the Copyright Office within three calendar months after its execution in the United States or within six calendar months after its execution without the limits of the United States, "in default of which it shall be void as against any subsequent purchaser or mortgagee for a valuable consideration, without notice, whose assignment has been duly recorded." Every assignment of copyright executed in a foreign country must be acknowledged by the assignor before a consular officer or Secretary of Legation of the United States authorized by law to administer oaths or perform notarial acts. The certificate of such acknowledgment under the hand and official seal of such consular officer or Secretary of Legation is *prima facie* evidence of the execution of the instrument.

INTERNATIONAL COPYRIGHT RELATIONS.

Copyright is not secured in foreign countries by action in the Copyright Office, but only by complying with the legislation of such countries.

Copyright relations have been established with the following foreign countries by proclamation of the President: Austria, Belgium, Chile, Costa Rica, Cuba, Denmark, France, Germany, Great Britain and the British possessions, Italy, Luxemburg, Mexico, Netherlands and possessions, Norway, Portugal, Spain, Sweden, Switzerland, Tunis.

Copyright proclamations have been issued under Sec. 1 (e) of the act of 1909, securing copyright control of mechanical musical reproduction in the U. S. to citizens or subjects of Australia, Belgium, Canada, Cuba, Denmark. France, Germany, Great Britain, Italy, Luxemburg, New Zealand, Netherlands, Norway, South Africa and Sweden. The convention with Hungary includes such protection.

Copyright treaties have also been entered into with China, Japan and Hungary (the latter in effect on Oct. 16, 1912). The Copyright Convention of Mexico of 1902 has been ratified by the United States and is effective from July 1, 1908, as between the United States and Costa Rica, Guatemala, Honduras, Nicaragua and Salvador. The Pan-American Copyright Convention signed at Buenos Ayres in 1910 was proclaimed July 16, 1914, and is effective as between the United States and Bolivia, Brazil, Costa Rica, Dominican Republic, Ecuador, Guatemala, Haiti, Honduras, Nicaragua, Panama, Paraguay and Uruguay.

CRIMES AND PENALTIES.

While the penalties for homicide are not precisely uniform throughout the various States of the Union, except for the continuance or the abolishment of capital punishment, they are similar. With regard to other serious crimes, likewise, differences are more seeming than real. Felonies, such as manslaughter, arson, burglary, robbery and larceny, are in some States subdivided into degrees, first, second, third and even fourth; while in others there is a single general classification. Where there is no subdivision into degrees, however, the modifying of penalties by reason of attending circumstances results in the same effect as though there were degrees.

CRIMES AGAINST THE UNITED STATES.

Treason—Whoever, owing allegiance to the United States, levies war against them, or adheres to their enemies, giving them aid and comfort, is guilty of treason. The penalty upon conviction is imprisonment for not less than 5 years, fine of not less than $10,000, or death. Misprision of treason consists in general of having knowledge of, concealing and not disclosing the treason of others. The penalty is imprisonment for not more than 7 years, and fine of not more than $1,000; or both fine and imprisonment. Rebellion or insurrection is the inciting, setting on foot, assisting or engaging in armed resistance to the execution of the laws by two or more. The penalty on conviction is imprisonment for not more than 10 years, fine of not more than $10,000, or both. Offenses against the mails fall into two general classes; one, the misuse of the mails for immoral or fraudulent purposes; the other, robbing the mails; penalties vary with the nature of the particular offense.

CRIMES AGAINST THE STATES, PROVIDED FOR IN THE VARIOUS STATE PENAL CODES

Bank Hold-Up—Kan., 10 to 50 yrs.; No. Dak., 30 yrs. or less.

Murder in the First Degree may be generally defined to be the unlawful, intentional and premeditated killing of a human being, or such a killing resulting from the commission or attempt to commit one of the graver crimes, such as arson, burglary, rape or robbery.

Murder in the Second Degree is such a killing without premeditation, or resulting from the attempt to commit some lesser crime.

The penalty for murder in the first degree by the Federal Statutes is death by hanging. Hanging is also the penalty in Arizona, Connecticut, Delaware, Florida, Georgia, Missouri, New Mexico, Hawaii and the District of Columbia. Death by hanging or life imprisonment in Alabama, California, Colorado, Idaho, Iowa, Louisiana, Maryland, Mississippi, Montana, New Hampshire, Oregon, West Virginia and Wyoming, Alaska and Porto Rico. In Illinois, hanging or imprisonment not less than 14 years to life. In Texas, hanging, or any term of imprisonment not less than 5 years. Death by electricity in Arkansas, Massachusetts, Nebraska, New Jersey, New York, North Carolina, Pennsylvania and Vermont. Death by electricity or life imprisonment in Indiana, Kentucky, Ohio, Oklahoma and South Carolina. Life imprisonment in Kansas, Maine, Michigan, Minnesota, South Dakota and Wisconsin. In the State of Utah, the penalty may be death or life imprisonment; if death, the convicted person may choose between hanging or shooting. In Tennessee, the jury may fix the term of imprisonment. In the State of Washington, the jury may, by special verdict, find for the death penalty. In New Jersey and Oregon penalty is death, unless jury recommends life imprisonment; in Nevada, lethal gas.

Murder in the second degree is punished in the Federal Constitution by imprisonment for not less than 10 years to life. The same penalty, not less than 10 years up to life is imposed in the States of Arizona, Idaho, Iowa, Nebraska, Nevada, Rhode Island, Utah. Not less than 10 (the statutes not mentioning life imprisonment) is the penalty in Alabama, California, Kansas, Missouri, Montana, Washington and Porto Rico. Life imprisonment is the penalty in Connecticut, Delaware, Florida, Georgia, Indiana, Michigan, Minnesota, Ohio, Oregon, Vermont. The statutes of Illinois, Kentucky, Louisiana, Mississippi, Oklahoma, South Carolina and Texas have no second degree murder classification. In Arkansas the penalty is from 5 to 21 years; Maryland, 5 to 18; Michigan and New Hampshire, any term of years to life; no minimum term mentioned. New Jersey, not over 30; New Mexico, 3 or more; New York, not less than 20 up to life; North Carolina, 2 to 30; North Dakota, 10 to 30; Pennsylvania, not over 20; Tennessee, 10 to 20; Virginia and West Virginia, 5 to 18; Wisconsin, 14 to 25; Wyoming, not less than 20 up to life; Alaska, not less than 15; Hawaii, 20 up to life; District of Columbia, not less than 20 up to life.

In Colorado the death sentence is not imposed where the conviction is had on circumstantial evidence, nor on one under 18 years of age. In Delaware the jury may recommend commutation of the death sentence to imprisonment for life. In Delaware killing by husband of man found in adultery with wife is a misdemeanor, not a felony.

Manslaughter may be defined as a killing either unintentionally resulting from the careless or unlawful doing of some otherwise lawful act or from the commission of some unlawful act of comparatively trivial character or intentionally in the heat of passion and without premeditation.

Penalties for manslaughter vary, scarcely any two States fixing precisely the same. Many of the States do not subdivide into first and second. Where there is but the single heading the penalties are as follows: California (not over 10), Connecticut (not over 10 years and fine of $1,000), Delaware (1-10 and $500 to $5,000), Florida (not over 20 or $5,000), Idaho (not over 10), Illinois (any term up to life fixed by the Division of Pardons and Paroles), Indiana (2-21), Iowa (not over 8 and $1,000), Louisiana (not over 20 and $2,000), Maine (not over 20 and $1,000, or both), Maryland (not over 10 or $500), Massachusetts (not over 20), Michigan (15 or not over $1,000), Mississippi (not over 20 and $500), Montana (not over 10), Nebraska (1-10), Nevada (not over 10), New Jersey (not over 10), New Mexico (1-10), North Carolina (4 months to 20 years), Ohio (1-20), Oregon (1-15 and $5,000), Rhode Island (not over 20), South Carolina (2-30), Texas (2-5) Vermont (not less than 1 up to life or $1,000), Virginia (1-15), Washington (not over 20 and fine), Wyoming (1-20), Alaska (1-15), District of Columbia (not over 15, or $1,000, or both). Where two degrees are specified the penalty for manslaughter in the first is: Alabama (1-10), Arizona (not over 10), Arkansas (2-7), Colorado (1-8), Georgia (1-20), Kansas (5-21), Kentucky (2-21), Minnesota (5-20), Missouri (not less than 5), New Hampshire (not over 30), New York (not over 20), North Dakota (5-15), Oklahoma (not less than 4), Pennsylvania (not over 12 and $1,000), South Dakota (not less than 4), Tennessee (2-10), Utah (1-10), West Virginia (1-5), Wisconsin (5-10), Hawaii (10-20), Porto Rico (not over 10). And for second degree: In Alabama (not over 1 and $500), Georgia (1-3), Kansas (3-5), Kentucky (1-6), Minnesota (1-15), Missouri (3-5), New Hampshire (not over 10 or $1,000, or both), New York (not over 15 or $1,000, or both), North Dakota (1-15), Oklahoma (2-4), Pennsylvania (not over 2 and $1,000), South Dakota (2-4), Tennessee (1-15), Utah (not over 1), West Virginia (court fixes penalty), Wisconsin (4-7), Hawaii (5-10), Porto Rico (not over 10).

Assault with Intent to Kill—Under Federal Statutes, assault with intent to kill or to commit a rape is punishable by imprisonment for not more than 20 years, while assault with intent to commit a felony other than murder or rape is punishable by not more than 5 years' imprisonment and a fine of not over $3,000. In Iowa, assault with intent to kill is punishable by 10 years' imprisonment; not over 10 in Kansas, Massachusetts, Missouri, New York and Oklahoma; from 1 to 10, North Dakota, Oregon, Virginia; not less than 10 in Porto Rico; 1 to 14, California, Colorado, Idaho, Illinois, Nevada, Wyoming; 1-20, Maine, Rhode Island and Utah; Alabama (2-20), Arizona (5 up to life), Arkansas (2-21), Connecticut (10-30), Delaware (not over 3), Florida (not over 20), Georgia and Maryland (2-10), Indiana (2-14 and $2,000), Kentucky (1-5), Louisiana (not over 2 and $1,000), Michigan (any term to life or $8,000), Minnesota (5-10 and not over $100), Mississippi (not over 5 or $1,000), Montana (5-10), Nebraska and Texas (2-15), New Hampshire (not over 20), New Jersey (not over 7 or $200, or both), New Mexico (1 to 25 years or $1,000), North Carolina (fine or imprisonment, or both), Ohio and Alaska (1-15), Pennsylvania (not over 7 and $1,000), South Dakota (not over 5), Tennessee (3-21), Vermont (not over 10 and $1,000), Washington (not less than 5), West Virginia (2-10), Wisconsin (1-5 or $1,000), Hawaii (not over 5 and a fine), District of Columbia (not over 15). In Texas, an assault with a dagger incurs a double penalty. In Iowa, assault with intent to commit a rape (not more than 20).

Rape—In Federal Courts, rape is punishable with death by hanging. While many States have death as the extreme penalty, in few is it the same one. Arkansas and North Carolina (death by electricity), Alabama, Delaware, Kentucky, and Louisiana (hanging), Florida and Mississippi (hanging or life imprisonment), Georgia (hanging or 1-20), Missouri (hanging or not less than 5), Oklahoma electrical execution or not less than 15), South Carolina (elec-

trical execution or 5-40), Tennessee (electrical execution or not less than 10 to life), Texas (hanging or not less than 5 to life), Virginia (electrical execution or 5-20) West Virginia (hanging or 7-20), District of Columbia (hanging or 5-30). Many of the States do not inflict the death penalty. Arizona (5 to life), California (not over 50), Colorado (3 to life), Connecticut (not over 20), Idaho (not less than 5 to life), Illinois (1-life), Indiana (2-21), Iowa (any term to life), Kansas (5-21), Maine (any term of years), Maryland (hanging or 18 months-21 years), Massachusetts and Michigan (any term to life), Minnesota (7-30), Montana (not less than 5), Nebraska (3-20), Nevada (not less than 20 up to life), New Hampshire (not over 30), New Jersey (not over 15, or $5,000, or both), New Mexico (5-20), New York (10-20), North Dakota (not less than 1), Ohio and Oregon (3-20) Pennsylvania (not over 15 and $1,000), Rhode Island (not less than 10 up to life), South Dakota (not less than 10), Utah and Washington and Porto Rico (not less than 5), Vermont (not over 20 or $2,000, or both), Wisconsin (1-30), Wyoming (not less than 1 up to life), Alaska (3-20), Hawaii (up to life and $1,000). The rape of a daughter, sister or female under 12 is punishable in Alaska by life imprisonment. In Indiana rape of female under 12, life imprisonment. In Nevada rape accompanied with extreme violence may be punished by death or imprisonment not less than 20 years in jury's discretion.

Arson—where classified in degrees—though the number and exact definitions of degrees vary greatly —is in general classified with reference to two conditions, first, the character of the building burned, whether a dwelling house or structure likely to contain a human being; and, second, whether the crime is committed by day or night. Thus the most serious offense is the burning of an inhabited dwelling by night, and the least serious, the burning of an uninhabited structure by day. The intermediate degrees are recognized, such as burning a dwelling by day or an uninhabited building by night. The Federal Statutes for arson in the first degree impose a penalty of not more than 20 years, and for the second degree, not more than 20 years and a fine of not more than $5,000. Some States punish arson in the first degree with death. These are: Alabama (hanging or not less than 10), Delaware (hanging), Louisiana (hanging or 1 to 10), Maryland (hanging or not over 20), Mississippi (hanging or life imprisonment), North Carolina, South Carolina and Virginia (death by electricity), Vermont (any term to 30 years or death by electricity), Hawaii (hanging or life imprisonment). The imprisonment which may be imposed for arson in the first degree takes a wide range—New York (not over 40), Iowa (30), New Hampshire (not over 30), Oklahoma (10-30), Florida and Michigan (any term up to life), Georgia (1 to life), Idaho (1 to life), Illinois (1-20), Indiana (2-21), Kansas (10-21), Kentucky (5-12) Maine (1-20), Minnesota and North Dakota (not less than 10), Nebraska (1-20), New Jersey (not over 15 or $2,000, or both), New Mexico (2-20), Ohio (not over 20), Oregon, West Virginia and Alaska (10-20), Texas (5-20), Utah (2-15), Wisconsin (3-14), Wyoming (1-21), South Dakota and Porto Rico (not less than 10), Arizona and California (not less than 2), Arkansas (2-10), Colorado and District of Columbia (1-10), Connecticut (not over 10), Missouri, Montana and Washington (not less than 5). The penalties for arson in the second degree are as varied as those for the first. In the Federal Courts, not more than 20 and $5,000. California (1-25), Colorado (not over 2 and $1,000), Delaware (1-10 and $500 to $5,000), Iowa (10-20), Kansas (7-10), Louisiana (1-20), Maine (any term of years), Maryland (2-20), Minnesota (7-15), New Hampshire (not over 20), New Mexico (1-15), New York (not over 25), North Dakota (1-10) Oregon (5-15), Pennsylvania (not over 10 and $2,000), South Dakota (7-10), Tennessee (2-21), Vermont (not over 10 or $1,000) Virginia (5-18), Washington (not over 10 or $5,000), Alaska (5-15), Hawaii (life or any number of years), Alabama and Oklahoma (2-10), Arizona, Idaho, Montana, Utah and Porto Rico (1-10), Arkansas (6 months and fine), Massachusetts and Mississippi (not over 10), Missouri (not less than 5), Nevada (1-3 and fine), South Carolina (in discretion of the court) Wisconsin (3-10).

Burglary—The classification of burglary or housebreaking depends on substantially the same elements as those of arson; namely, the building entered, whether a dwelling or other building, and whether the offense was committed by day or night. Burglary in the first degree is punished in North Carolina by death by electricity; Virginia (electricity or 5-18), Delaware (hanging or not over 14), Florida and Iowa (any term up to life), Maine (any term of years), Massachusetts (life imprisonment or not less than 10), Ohio (life or 5-30), Rhode Island and South Carolina (not less than 5 up to life), Alabama, Georgia and Illinois (1-20), Arkansas, California, Idaho, Montana, Alaska and Porto Rico (1-15), Connecticut, Michigan and Hawaii (not over 20), Indiana (10-20), Kansas (10-20), Mississippi (7-15), Nevada and Wyoming (1-14), New Hampshire (not over 30), New Mexico (3-12), Oklahoma (7-20), Oregon, Tennessee and Wisconsin (5-15), Pennsylvania (not over 10 and $10,000), Texas (2-12), Utah (25-40), Vermont (not over 15 or $1,000), District of Columbia (not over 15), West Virginia (2-15), Minnesota, New York, North Dakota, South Dakota (not less than 10), Missouri and Washington (not less than 5), Arkansas (3-7), Colorado and Nebraska (1-10), Kentucky (2-10), Maryland (3-10). Burglary by means of dynamite or other explosives is punished in Colorado by imprisonment from 25 to 40 years; in Wisconsin (15-40), and in Wyoming (not over 20). Quite a number of States have no heading of second degree burglary. These are Alabama, Arkansas, Colorado, Kentucky, Louisiana, Maryland, Michigan, Nebraska, New Jersey, Rhode Island, South Carolina, West Virginia, and Wyoming, also the District of Columbia. The penalties where it is specified do not show as much variance as in the first degree. Connecticut, Florida, Iowa, Massachusetts (not over 20), Delaware, Georgia and Utah (1-20), Minnesota, Mississippi, New York, North Carolina and Hawaii (not over 10), Maine (1-10), Arizona, California, Idaho, Montana, Nevada and New Hampshire (not over 5), Texas (not less than 5), North Dakota and New Mexico (1-5), Oregon, South Dakota, Tennessee and Virginia (3-10), Indiana (2-14) Kansas (5-10), Missouri (not less than 2), Ohio (1-15), Oklahoma (2-7), Pennsylvania (not over 10 and $500), Vermont (not over 10 or $1,000), Washington (not over 15), Wisconsin (3-8), Alaska (2-5), Porto Rico (not over 2).

Robbery may be generally defined as the theft of property from the person or immediate presence of the victim, accomplished by force or fear. Where degrees of robbery are recognized, the distinction is generally determined by whether the thief be armed or unarmed, though some States also distinguish the second from the first degree, where the theft is accomplished by means of threats of future rather than immediate injury. In the following synopsis, degrees are not considered. Federal Statutes fix the penalty for robbery at not more than 15 years. Alabama punishes robbery by death (hanging or not less than 10), Virginia (electrical execution or 5-18), Massachusetts, Michigan and Hawaii (any number of years to life), Maine (any term of years), Idaho, Rhode Island and Texas (5 to life), Oregon and Utah (3 to life), Illinois (1 to life), Oklahoma (not less than 10), New York and South Dakota (10-20), Kansas (10-21), Arizona, Nevada and Washington (not less than 5), North Carolina (5-60), Minnesota (5-20), Tennessee (5-15), Indiana (5-14 and $1,000), West Virginia (5-10), Arkansas (3-21), Nebraska, New Mexico and Wisconsin (3-15), Colorado (3-14), Maryland (3-10), Kentucky and South Carolina (2-10), Georgia and Iowa (2-20), Montana and Porto Rico (1-20), Ohio and Alaska (1-15), Wyoming (1-14), North Dakota (1-10), California, (not less than 1), New Hampshire (not over 30), Vermont (not over 20 and $1,000), Florida (not over 20), New Jersey (not over 15 or $1,000, or both), Louisiana (not over 14), Delaware (not over 12), Connecticut (not over 7), Pennsylvania (not over 5 and $1,000), District of Columbia (6 months to 15 years). In Nevada train robbery and in Texas robbery by means of deadly weapons may be punished with death. Train robberies in Territories are punishable by imprisonment not more than 20 years and a fine of not more than $5,000.

Grand Larceny is simply theft of property above a fixed value, generally $25 to $50—more States also classify as grand larceny theft of property from the person of the victim, irrespective of value, though, of course, accomplished without the force or fear which constitutes the crime of robbery. In the Federal Courts, grand larceny is punishable by not more than 10 years' imprisonment and a fine of not more than $10,000. Wisconsin (1-25), Alabama and Georgia (1-20), Maryland (1-15), Idaho, Indiana, Montana and Nevada (1-14), New Mexico, Oregon, Utah, Virginia, Alaska, Porto Rico and District of Columbia (1-10), Tennessee, Texas and West Virginia (2-10), Nebraska and Ohio (1-7), Arkansas, Kentucky, Maine and North Dakota (1-5), Hawaii (not over 20), Washington (not over 15), Louisiana, New York, North Carolina and Wyoming (not over 10), Kansas and Missouri (not over 7), New Jersey (not over 7 or $2,000, or both), Connecticut, Iowa, Massachusetts, Mississippi, New Hampshire, Oklahoma and South Dakota (not over 5), Florida and Rhode Island (not over 5 or $1,000), Michigan (not over 5 or $5,000), Pennsylvania (3 and $500), Delaware (not over 3), South Carolina (3 months to 10 years). Special penalties are imposed in certain States for horse and cattle stealing. In Calif., Mont.

and N. Mex., taking horses, cattle, etc., is grand larceny, irrespective of value; in Arkansas for stealing horse or mule (1-15); in Missouri and New Hampshire, larceny of horse or cattle (not over 7); in Texas horse theft (5-10); in Georgia there are various grades of larceny of horses, cattle, etc. In North Carolina habitual offenders receive longer terms.

Forgery in general means the false making, imitating or counterfeiting or alteration of a genuine signature or written instrument. There are numerous Federal Statutes defining and imposing penalties for alteration of public records and documents. These do not come within the purview of this synopsis, being no one general classification. Counterfeiting is punished by imprisonment of not more than 15 years and a fine of not more than $5,000. There is some uniformity but not a great deal in the various State penalties for forgery.

Bigamy—A person who, having a husband or wife living, marries another, is guilty of bigamy. Under Federal Statutes, polygamy (or bigamy) in the Territories is punished by imprisonment for not more than 5 years and a fine of not more than $500. Five years' imprisonment is the most general maximum penalty in the States for bigamy and fines are quite commonly imposed.

Perjury under the various State codes usually means false testimony on a material point given in an action or proceeding at law. The following are the penalties imposed in accordance with this usual definition. In the Federal Courts (not more than 5 and not more than $2,000).

NOTE—Figures in parentheses are years. Money figures are maximum.

STATUTES OF LIMITATIONS IN CRIMINAL CASES.

There is no general statute of limitations applicable to criminal prosecutions in all the States of the Union. In each jurisdiction the matter is regulated by local statutes. Below are given the New York and Federal statutes:

NEW YORK.

In New York, the provisions in limiting the time for commencing prosecutions are contained in Sections 141 to 144, inclusive, of the Code of Criminal Procedure. These sections read as follows:

"There is no limitation of time within which a prosecution for murder must be commenced. It may be commenced at any time after the death of the person killed. (Section 141.)

"An indictment for a felony, other than murder, must be found within five years after its commission, except where a less time is prescribed by statute. And an indictment for a misdemeanor must be found within two years after its commission. (Section 142.)

"If, when the crime is committed, the defendant be out of the State, the indictment may be found within the term herein limited after his coming within the State; and no time during which the defendant is not an inhabitant of, or usually resident within, the State, or usually in personal attendance upon business or employment within the State, is part of the limitation. (Section 143.)

"An indictment is found, within the meaning of the last three sections, when it is duly presented by the Grand Jury in open court, and there received and filed." (Section 144.)

UNITED STATES.

"No person shall be prosecuted, tried, or punished for treason or other capital offense, wilful murder excepted, unless the indictment is found within three years next after such treason or capital offense is done or committed. (R. S. §1043.)

"No person shall be prosecuted, tried or punished for any offense, not capital, except as provided in section one thousand and forty-six, unless the indictment is found or the information is instituted within three years next after such offense shall have been committed. But this act shall not have effect to authorize the prosecution, trial or punishment for any offense barred by the provisions of existing laws. (R. S. §1044, amended, April 13, 1876, c. 56, 19 Stat. 32.)

"Nothing in the two preceding sections shall extend to any person fleeing from justice. (R. S. §1045.)

"No person shall be prosecuted, tried, or punished for any crime arising under the revenue laws, or the slave-trade laws of the United States, unless the indictment is found or the information is instituted within five years next after the committing of such crime. (R. S. §1046.)

No person shall be prosecuted, tried or punished for any of the various offenses arising under the internal revenue laws of the United States unless the indictment is found or the information instituted within three years next after the commission of the offense, in all cases where the penalty prescribed may be imprisonment in the penitentiary, and within two years in all other cases: Provided, That the time during which the person committing the offense is absent from the district wherein the same is committed shall not be taken as any part of the time limited by law for the commencement of such proceedings: Provided further that the provisions of this act shall not apply to offenses committed prior to its passage: And provided further that where a complaint shall be instituted before a Commissioner of the United States within the period above limited, the time shall be extended until the discharge of the Grand Jury at its next session within the district: And provided further that this act shall not apply to offenses committed by officers of the United States."

ARREST IN CIVIL ACTION.

While imprisonment for debt as it formerly existed in English and American law, by which a debtor might be arrested and imprisoned for mere inability to pay his creditor, no longer exists in the United States, the statutes of the majority of the States provide for the arrest of a defendant in a civil action under varying conditions. A large number of States determine the right of arrest by the character of the claim on which suit is brought, allowing in it actions for fraud or the injuries known in the law as "torts," such as an injury to the person or property, conversion or embezzlement, libel, slander, or the like.

In the following States no civil arrest is allowed: Arizona, District of Columbia, Florida, Maryland, Minnesota, Mississippi, Missouri, Nebraska, New Mexico, Tennessee, and Texas.

In the following States the right to arrest depends upon the nature of claim in suit: In actions for fraud or torts, Connecticut; for fraud, libel, slander, or violent injury to person or property, Delaware; for fraud only, Iowa and Kansas; only after verdict of jury, finding malice, fraud, or wilful deceit, Colorado; for torts, breach of promise to marry, misconduct or embezzlement in office or professional capacity, Michigan, Pennsylvania, and New York (also for fine or penalty or to recover property concealed from Sheriff).

In the following States arrest is only allowed against a defendant about to remove from State or about to conceal, transfer, or remove his property to avoid plaintiff's claim or defraud creditors, irrespective of the nature of the claim: Indiana, Kentucky, Louisiana, New Hampshire, Utah, Virginia, In New Hampshire tax collector may also arrest person for non-payment of poll tax if not sufficient property upon which to make distress.

In the following States arrest is allowed in contract actions where the defendant is about to depart from the State or conceal or remove his property, and also in actions for fraud or torts of various kinds, though the provisions are not identical: Arkansas (fraud only), California, Idaho, Illinois, Maine, Massachusetts, Montana, Nevada, New Jersey, North Carolina, North Dakota, Oregon, South Carolina, South Dakota, Vermont, Washington, West Virginia (fraud only), Wisconsin.

In Georgia arrest only allowed against attorneys, Sheriffs or other officers of the court for failure to pay over money collected, and in certain circumstances against defendant who conceals property from Sheriff. The drawer of a check on which, on presentation to the bank, payment is refused is guilty of a misdemeanor.

In Wyoming (only after judgment) in actions for fraud, or money lost at gambling, or where defendant has removed or concealed property to avoid judgment.

In Rhode Island, allowed in all actions except to recover debt or taxes.

In Ohio, when an affidavit is filed showing: About to remove property to defraud creditors, convert property into money for same purpose, conceal property or rights in action fraudulently, assigned or disposed of property with intent to defraud creditors. Fraudulently contracted the debt, or incurred the obligation. Money or property sought to be recovered was in gambling on a bet or wager.

MARRIAGE AND DIVORCE LAWS.

Figures in parentheses after each State show number of years residence required before divorce action can be begun.

Causes means causes for absolute divorce *in addition to adultery.*

Marriage Licenses—Required in all the States and Territories. California and New Mexico require both parties to appear and be examined under oath, or submit affidavit.

Marriage, Prohibition of—Marriages between whites and persons of Negro descent are prohibited and punishable in Ala., Ariz., Ark., Cal., Col., Del., Fla., Ga., Idaho, Ind., Ky., La., Md., Miss., Mo., Mont., Neb., Nev., N. C., N. Dak., Okla., Ore., S. C., S. Dak., Tenn., Tex., Utah, Va., and W. Va. Marriages between whites and Indians are void in Ariz., N. C., Ore., and S. C.; and between whites and Chinese in Ariz., Cal., Idaho, Miss., Ore., and Utah. Both parties must submit in Oregon to physical examination on applying for license. N. J. and N. H. bar communicable diseases in either party. Vermont prohibits marriage where either party is infected with venereal disease.

In Mo. marriages are prohibited between persons either of whom is insane, mentally imbecile, feebie-minded or epileptic.

Marriage between first cousins is forbidden in all of the States except Ala., Cal., Col., Conn., Del., Ga., Hawaii, Ky., Me., Mass., N. Mex., N. Y., N. C., R. I., S. C., Tex., Va., and Wash.; between step-relatives except in Alaska, Ariz., Ark., Del., Hawaii, Ill., Ind., Iowa, La., Md., Minn., Neb., Nev., N. Mex., N. Y., Ohio, Ore., Tenn., Utah, Wis. and Panama.

SUMMARY OF DIVORCE LAWS OF THE STATES.

Alabama—(1-3). *Causes.* Abandonment 2 years, crime against nature, habitual drunkenness, violence, pregnancy of wife by other than husband at marriage, physical incapacity, imprisonment for 2 years for felony, confinement in insane asylum for 20 years, provided insanity is incurable, if husband becomes addicted to cocaine, morphine or similar drugs. New ground for divorce: To the wife, when the wife without support from the husband for 2 years preceding the filing of the bill has lived separate and apart from the bed and board of the husband for 5 years next preceding the filing of the bill and she has actually resided in this State during all of said period.

Alaska—(2). *Causes.* Felony, physical incapacity, desertion 2 years, cruelty, habitual drunkenness, wilful neglect of husband for six months to provide for wife (he being of ability to do so), adultery.

Arizona—(1). *Causes.* Felony, physical incapacity before marriage, desertion 1 year, excesses cruelty, neglect to provide 1 year, pregnancy of wife by other than husband at marriage, conviction of felony prior to marriage unknown to other party, habitual drunkenness.

Arkansas—(1). *Causes.* Desertion 1 year, felony, habitual drunkenness 1 year, cruelty, former marriage existing, physical incapacity.

California—(1). *Causes.* Cruelty, desertion 1 year, neglect 1 year, habitual drunkenness 1 year, felony.

Colorado—(1). *Causes.* Desertion 1 year, physical incapacity, cruelty, failure to provide 1 year, habitual drunkenness or drug fiend 1 year, felony, former marriage existing.

Connecticut—(3). *Causes.* Adultery, fraudulent contract, wilful desertion 3 years, with total neglect of duty, habitual intemperance, intolerable cruelty, sentence to imprisonment for life, infamous crime involving violation of conjugal duty and punishable by imprisonment in State prison, 7 years' absence without being heard from. Where both husband and wife are residents, if either has become incurably insane and has been legally confined in a hospital or asylum for at least 5 years next preceding date of bringing complaint, divorce may be granted.

Delaware—(1). *Causes for absolute divorce.* Desertion 2 years, habitual drunkenness for 2 years, extreme cruelty such as to endanger life or health of either party, bigamy, felony followed by a continuous imprisonment for at least 2 years—and at the discretion of the Court, fraud, want of age, neglect to provide 3 years. "When at the time the cause of action arose, either party was a bona-fide resident of the State, and has continued so to be down to the time of the commencement of the action; except that no action for absolute divorce shall be commenced for any cause other than adultery, or bigamy, unless one of the parties has been for the 2 years next preceding the commencement of the action, a bona-fide resident of this state."

Marriages may be annulled: for impotency, consanguinity (provided proceeding is taken during lifetime of both parties), fraud, insanity, former marriage (still existing).

District of Columbia—(3). *Causes.* Marriages may be annulled for former existing marriage, lunacy, fraud, coercion, physical incapacity and want of age at time of marriage, Absolute divorce granted only for adultery.

Florida—(2). *Causes.* Cruelty, violent temper, habitual drunkenness, physical incapacity, desertion 1 year, former marriage existing, relationship within prohibited degrees.

Georgia—(1). *Causes.* Mental and physical incapacity, desertion 3 years, felony, cruelty, force, duress, or fraud in obtaining marriage; pregnancy of wife by other than husband at marriage, relationship within prohibited degrees.

In Georgia, under a law in effect Aug. 18, 1924, a marriage license must not be issued until 5 days after the application is posted in the County Court House with a questionnaire filled out by the applicants.

Hawaii—(2). *Causes.* Desertion 6 months; imprisonment for life or more than 7 years; non-support for 60 days; incurable insanity (3 years or more); felony, leper, cruelty, habitual drunkenness.

Idaho—(12 months). *Causes.* Cruelty, desertion 1 year, neglect 1 year, habitual drunkenness 1 year, felony, insanity.

Illinois—(1). *Causes.* Desertion 2 years, habitual drunkenness 2 years, former extisting marriage, Cruelty, felony, physical incapacity, attempt on life of other party, infection of other with communicable venereal disease.

Indiana—(2). *Causes.* Abandonment 2 years, cruelty, habitual drunkenness, failure to provide 2 years, felony, physical incapacity.

Iowa—(1). *Causes.* Desertion 2 years, felony, habitual drunkenness, cruelty, pregnancy of wife by other than husband at marriage, unless husband has illegitimate child or children living of which wife did not know at time of marriage. The marriage may be annulled for the following causes existing at the time of the marriage: Insanity, physical incapacity, former existing marriage.

Kansas—(1). *Causes.* Abandonment 1 year, extreme cruelty, fraud, habitual drunkenness, gross neglect of duty, felony, physical incapacity, pregnancy of wife by other than husband at marriage, former existing marriage, conviction of a felony and imprisonment therefor subsequent to the marriage.

Kentucky—(1). *Causes.* Separation 5 years, desertion 1 year, felony, physical incapacity, loathsome disease, habitual drunkenness 1 year, cruelty, force, fraud or duress in obtaining marriage, joining religious sect believing marriage unlawful, pregnancy of wife by other than husband at marriage or subsequent uncharitable behavior, ungovernable temper.

Louisiana—(1). *Causes.* Condemnation to infamous punishment, 7 years' separation, absence of reconciliation for 1 year after a judgment of separation, separation from bed and board may be granted for habitual intemperance, excesses, cruel treatment or outrages, public defamation, abandonment, attempt by one spouse on life of the other, when fugitive from justice on charge of infamous crime.

Maine—(1). *Causes.* Cruelty, desertion 3 years, physical incapacity, habits of intoxication by liquors, opium or other drugs, neglect to provide.

Maryland—(2). *Causes.* 1. Impotence of either party before marriage. 2. Any cause which renders a marriage null and void. 3. Adultery. 4. Abandonment for 3 years. 5. Unchastity of wife before marriage. *Grounds for Partial Divorce.* 1. Cruel treatment. 2. Excessively vicious conduct. 3. Abandonment and desertion.

Massachusetts—*Causes.* Adultery, impotency, 3 years' desertion, gross and confirmed habits of intoxication caused by voluntary and excessive use of intoxicating liquor, opium or other drugs, cruel and abusive treatment, or on wife's libel, if husband being of sufficient ability, grossly or wantonly and cruelly refuses or neglects to provide suitable maintenance for her.

Michigan—(1). *Causes.* Felony, desertion 2 years, habitual drunkenness, physical incapacity, and in the discretion of the Court for cruelty or neglect to provide.

Minnesota—(1). *Causes.* Desertion 1 year, habitual drunkenness 1 year, cruelty, physical incapacity, sentence for felony. Marriages may be annulled on account of consanguinity, bigamy, incapacity for assent, or consent obtained by fraud or force.

Mississippi—(1). *Causes.* Adultery, felony, desertion 2 years, consanguinity, physical incapacity, habitual drunkenness by liquor, opium or other drugs, cruelty, insanity at time of marriage, former existing marriage, pregnancy of wife by other than husband at marriage.

Missouri—(1). *Causes.* Felony, absence 1 year, habitual drunkenness 1 year, cruelty, indignities, vagrancy, former existing marriage, physical incapacity, conviction of felony prior to marriage unknown to other party, wife pregnant by other than husband at marriage.

Montana—(1). *Causes.* Adultery, action must be commenced within 2 years after discovery by injured party, extreme cruelty by inflicting grievous mental suffering for 1 year, 1 year's wilful desertion, 1 year of wilful neglect, 1 year of habitual intemperance, conviction of felony. Action must be commenced within 2 years after final judgment and sentence.

Nebraska—(1†). *Causes.* Abandonment 2 years, habitual drunkenness, physical incapacity, felony, failure to support 2 years, cruelty, imprisonment for more than 3 years.

Nevada—(6 months). *Causes.* Wilful desertion 1 year, conviction of felony or infamous crime, habitual gross drunkenness contracted since marriage, impotency at the time of the marriage continuing to the time of the divorce, extreme cruelty, neglect to provide 1 year.

New Hampshire—Residence of 3 years required when action brought for desertion; for other causes but one year required. *Grounds for divorce are*: impotency of either party; extreme cruelty; conviction of crime punishable in this State with imprisonment for more than one year, and actual imprisonment; when either party has so treated the other as to injure health or seriously to endanger reason; absence for three years and not been heard from, habitual drunkenness for three years together; when either party has joined any religious sect or society which professes to believe the relation of husband and wife unlawful.

New Jersey—(2). *Causes.* Desertion 2 years, extreme cruelty to either of the parties, whether the acts of cruelty were committed prior to or after the passage of this act (1923); provided that no petition for divorce shall be filed until after 6 months from the date of the last act of cruelty complained of. No divorce may be obtained on grounds arising in another State unless they constituted ground for divorce in the State where they arose. The marriage may be annulled for the following causes existing at the time of the marriage: Want of legal age, former existing marriage, consanguinity, physical incapacity, idiocy. In other cases, an action may be begun if the overt act was committed here.

New Mexico—(1). *Causes.* Abandonment, cruelty, non-support, habitual drunkenness, felony, impotency, pregnancy of wife by other than husband at marriage, habitual drunkenness, conviction of felony and imprisonment therefor.

New York—(2). *Causes.* Adultery; abandonment or absence for 5 successive years with proof of diligent but unavailing search, and consequent presumption of death. The marriage may be annulled for such causes as rendered the relationship void at its inception.

North Carolina—(2). *Causes.* Adultery by either party, pregnancy of wife by other than husband at marriage, physical incapacity, husband and wife living apart for 5 successive years, plaintiff in suit residing in State for that period.

North Dakota—(1). *Causes.* Adultery, extreme cruelty, desertion 1 year, neglect 1 year, habitual intemperance 1 year, conviction of felony. Insanity, party having been inmate of State institution for 5 years; no divorce for insanity to be granted until after thorough examination by committee, all of whom must agree insanity is incurable. The marriage may be annulled for the following causes existing at the time of the marriage: Former existing marriage, insanity, physical incapacity, force or fraud inducing the marriage, or want of age.

Ohio—(1). *Causes.* That either party had a husband or wife living at the time of the marriage from which the divorce is sought, wilful absence of either party from the other for 3 years, adultery, impotency, extreme cruelty, fraudulent contract, any gross neglect of duty, habitual drunkenness for 3 years, the imprisonment of either party in a penitentiary under sentence thereto. The petition for divorce under this clause must be filed during the imprisonment of the adverse party. The procurement of a divorce without this State, by a husband or wife, by virtue of which the party who procured it is released from the obligations of the marriage, while they remain binding upon the other party.

Oklahoma—(1). *Causes.* Abandonment 1 year, adultery, extreme cruelty, fraud, habitual drunkenness, conviction of a felony, gross neglect of duty, physical incapacity, former existing marriage, pregnancy of wife by other than husband at marriage.

Oregon—(1). *Causes.* Conviction of felony, habitual gross drunkenness contracted since marriage and continuing 1 year, impotency existing at the time of the marriage and continuing to the commencement of the suit, wilful desertion 1 year, cruelty or personal indignities rendering life burdensome.

Pennsylvania—(1). *Causes.* Former existing marriage, desertion 2 years, personal abuse or conduct rendering life burdensome, felony, fraud, relationship within prohibited degrees, physical incapacity.

Porto Rico—(1). *Causes.* Adultery, felony, habitual drunkenness or continued and excessive use of opium, morphine, or any other narcotic; cruel treatment or grave injury; abandonment for more than 1 year; absolute, perpetual and incurable impotence occurred after marriage; attempt to corrupt sons or prostitute daughters; proposal of husband to prostitute wife.

Rhode Island—(2). *Causes.* Impotency, extreme cruelty, wilful desertion for 5 years of either of the parties, or for such desertion for a shorter period of time, in the discretion of the Court; continued drunkenness, for the habitual, excessive and intemperate use of opium, morphine or chloral, neglect and refusal for the period of at least 1 year next before the filing of the petition on the part of the husband to provide necessaries for the subsistence of his wife (the husband being of sufficient ability), and for any other gross misbehavior and wickedness, in either of the parties, repugnant to and in violation of the marriage covenant.

South Carolina—No divorces granted.

South Dakota—(1). *Causes.* Cruelty, desertion 1 year, neglect 1 year, habitual drunkenness 1 year, felony. The marriage may be annulled for the following causes existing at the time of the marriage: Want of age, former existing marriage, insanity, physical incapacity, force or fraud inducing marriage.

Tennessee—(2). *Causes.* Former existing marriage, desertion 2 years, felony, physical incapacity, attempt on life of other party, refusal of wife to live with husband in the State and absenting herself 2 years, pregnancy of wife by other than husband at marriage; cruelty, indignities, habitual drunkenness, habit contracted after marriage.

Texas—(1). *Causes.* Abandonment 3 years, physical incapacity, cruelty, excess or outrages rendering life together insupportable, felony, living apart without cohabitation 10 years.

Utah—(1). *Causes.* Desertion 1 year, physical incapacity, habitual drunkenness, felony, cruelty, permanent insanity.

Vermont—(2). *Causes.* Imprisonment 3 years, intolerable severity, desertion 3 years, neglect by husband to provide, absence 7 years without being heard from.

Virginia—(1†). *Causes.* Adultery, felony, desertion 3 years, fugitive from justice 2 years, pregnancy of wife by other than husband at marriage, wife a prostitute, or either party convicted of felony before marriage unknown to other, physical incapacity.

Washington—(1). *Causes.* When consent to marriage was obtained by force or fraud and there has been no subsequent voluntary cohabitation, for adultery on part of wife or of husband when unforgiven, and application is made within 1 year after it shall have become known; impotency, abandonment for 1 year; cruel treatment of either party by other, or personal indignities rendering life burdensome; habitual drunkenness of either party, or neglect or refusal of husband to make suitable provision; imprisonment in State penal institution; 5 years separation; in case of incurable chronic mania or dementia for 5 years or more, while under confinement by order of a court of record, Court may in its discretion grant a divorce.

West Virginia—(1). *Causes.* Desertion 3 years, felony, physical incapacity, pregnancy of wife by other than husband at marriage, husband a licentious character or wife a prostitute unknown to other party, either party convicted of felony before marriage unknown to other. The marriage may be annulled for the following causes existing at the time of the marriage: Former existing marriage, consanguinity, insanity, physical incapacity, miscegenation, want of age.

Wisconsin—(2). *Causes.* Felony (imprisonment 3 years), desertion 1 year, cruelty, impotency, habitual drunkenness 1 year, separation 5 years. In the discretion of the Court for cruelty or neglect to provide. The marriage may be annulled for the following causes existing at the time of the marriage: Want of age or understanding, consanguinity, force or fraud inducing marriage, impotency if not known at time of marriage, former marriage.

Wyoming—(1). *Causes.* Felony, desertion 1 year, habitual drunkenness, cruelty, neglect to provide 1 year, husband a vagrant, physical incapacity, indignities rendering condition intolerable, pregnancy of wife by other than husband at marriage, either party convicted of felony before marriage unknown to other. The marriage may be annulled for the following causes existing at the time of the marriage: Want of age, force or fraud.

NEW LAW ON ANNULMENT IN NEW YORK STATE.

The New York State Legislature, in 1923, passed an act, signed by the Governor May 21 and in immediate effect, amending the Marriage Law as follows:

Conditions attached to maintenance of action to annul a marriage. An action to annul a marriage may be maintained in either of the following cases:

1. Where both parties are residents of the State when the action is commenced.

2. Where the parties were married within the State and the plaintiff is a resident thereof when the action is commenced.

3. Where the parties, having been married without the State have become residents of the State, and have continued to be residents thereof at least one year; and the plaintiff is such a resident when the action is commenced.

AGES AT WHICH MARRIAGE IS VALID.

Males (age without parents' consent), 21 years in every State except Col., Idaho., Ill., Mich., Minn., Nev., N. H., N. C., S. C., Tenn., and W. Va., where it is 18 years.

Males (age with parents' consent), 14 years in Ky., La., N. H., and Va.; 16 years in Iowa, Tex., and Utah; 17 years in Ala., Ark., Ga., and Kan.; 18 years in Alaska, Ariz., Cal., Hawaii, Idaho, Ill., Ind., Mich., Minn.. Mont., Neb., Nev., N. Mex., N. C., N. Dak., Ohio, Okla., Ore., Porto Rico, S. C., S. Dak., Tenn., Wis., Wyo. There is no definite age provision in Conn., Del., District of Columbia, Fla., Me., Mass., N. Y., R. I., S. C., and Tex.; 21 years elsewhere.

Females (age without parents' consent), 16 years in Md., Neb., N. H., Ill.; 21 years in Fla., Ky., La., Ohio, Pa., Porto Rico, R. I., Va., W. Va., and Wyo.; 18 years in the other States, except Ga., 14; in Hawaii, 20.

Females (age with parents' consent), 12 years in Ky., La., Md., Miss., Va.; 13 years in N. H.; 14 years in Ala., Ariz., Ark., Ga., Iowa, N. C., R. I., S. C., Tex., Utah; 15 years in Cal., Hawaii, Kan., Minn., Mo., N. Mex., N. C., N. Dak., Okla., S. Dak.; 16 years in Alaska, Ill., Ind., Mich., Mo., Mont., Neb., Nev., Ohio, Ore., Porto Rico, W. Va., and Wis.; 18 years in Col., Idaho, N. J., N. Y., Tenn.

The lowest age at which a single female can make a valid contract, except marriage, is 18 years in Ark., Cal., Col., Hawaii, Idaho, Ill., Iowa, Kan., Minn., Mont., Neb., Okla., Ore., S. Dak., Vt., and Wash.; 21 years in the other States.

Most of the States require consent of parents to marriages of males under 21 or of females under 18; exceptions are for males under 18 in Idaho, Ill., Minn., Nev., N. H., S. C.,; under 20 in Hawaii; under 16 in Conn. and Tenn.; for women under 21 in Fla., Ky., La., Mo., Pa., Va., W. Va., and Wyo.; under 16 in Conn., Ill., Md., Nev., N. H., R. I., Tenn., and W. Va.; under 15 in Minn.

The lowest age at which a married female can make a valid contract, except marriage, is 14 years in Ariz., Iowa, Tex.; 16 years in Neb., Ore., Porto Rico; 18 years in Ala., Alaska, Ark., Cal., Hawaii, Idaho, Ill., Ind., Kan., Minn., Mont., Okla., S. Dak., Utah, Vt., Wash.; 21 years in the other States.

WORKMEN'S COMPENSATION IN NEW YORK STATE.

(Prepared by the State Department of Labor.)

The Workmen's Compensation Law of New York provides free treatment and maintenance for employees incapacitated for work by accidental injury or occupational disease, and if they die of their accidents or diseases, maintenance and funeral money for their widows, children and dependents.

By obligating employers to insure their employees, it throws the main financial burden of misfortune upon the industry and the consumer. It took the place in 1914 of a law that held employer liable only when he was negligent. It tends to free the employee and society of pauperism.

It covers many and varied employments and industries. They are enumerated in its text by alphabetical lists. In addition, it covers any business that regularly employs "four or more workmen or operatives" and any employment voluntarily brought under it by employer and employee.

The clerical or office force of a factory carrying on an industry that it enumerates and all the clerks of a department store or other business that employs four or more elevator operators, chauffeurs or other "workmen or operatives" come within the law.

It expressly excludes farm laborers and domestic servants.

It stipulates that employments must be carried on for profit or pecuniary gain. This excludes, for example, repairing private residences from which the owners derive no rentals, or grave digging for religious corporations. The pecuniary gain limitation does not apply to public employment.

All State employees are entitled to compensation.

Railroad employees injured in interstate commerce are excluded by the Federal Employers' Liability Act.

Masters and crews of vessels on navigable waters are excluded by the Admiralty jurisdiction of the Federal courts. Longshoremen and other maritime workers injured on docks are protected by the compensation law. They are not covered if injured on vessels in navigable waters.

The injured employee or others must give written notice of the accident to the employer and the Department of Labor within thirty days and must file claim for compensation within a year.

The accident must not be due to the injured employee's wilful intent to injure himself or another or solely to his intoxication.

The employer is entitled to select the physician or hospital or to consent to the employee's selection; otherwise the employee is liable for the fees.

The compensation of a disabled employee is two-thirds of his weekly wages, but not to exceed $20 or be less than $8, except that the compensation is the same as the wages when the wages are less than $8.

In death cases awards are made to dependents in accordance with a schedule provided therefor. The total amount of such benefits must not exceed two-thirds of the average weekly wage of the deceased based on maximum earnings of $150 a month.

Compensation (other than death) benefits granted by the law:

Permanent total disability—two-thirds of the average weekly wage for period of disability.

Permanent partial disability—two-thirds of the average weekly wage for periods specified in a schedule arranged by parts of the body, ranging from 15 weeks for loss of little finger to 312 weeks for an arm. In case of protracted temporary total disabilities in connection therewith, the injured is compensated in addition for the length of the temporary total disability in excess of periods stated in a schedule.

Temporary total disability—two-thirds of the average weekly wage for the period of disability, but not to exceed $3,500.

Occupational disease—two-thirds of the average weekly wage during the period of disability.

Waiting period—the first fourteen days' disability are not compensated unless the disability exceeds forty-nine days. On and after January 1st, 1925, the waiting period is reduced to seven days.

State Insurance Fund—As of Jan. 1, 1924: Assets, $8,673,078, including bonds valued at $7,815,284; liabilities include a surplus of $830,000, and several reserve funds to cover unpaid losses, investigation and settlement of deferred claims, unearned premiums and administrative expenses. The reserve funds total $6,968,699.

Industrial accidents in the State in years ended June 30—(1919), 288,444; (1920), 345,672; (1921), 294,469; (1922), 293,844; (1923), 346,845.

The figures as to accidents cover only those reported to the State Department of Labor under the Workmen's Compensation Law.

The deaths resulting from those accidents numbered: (1919), 1,815; (1920), 1,236; (1921). 1,177; (1922), figures not available; (1923), 1,665.

For compensation laws of the different States see the 1923 Almanac.

ADMINISTRATION OF DECEASED PERSONS' ESTATES.

The following is a synopsis of the laws of the various States affecting the administration of the estate of a deceased person:

1. Who to Administer.—(a) If the deceased leaves a will, the duty of administration falls upon the executor. If no executor is named, or in the event of the death or refusal of the executor to act, the Court will grant administration under the will to some suitable person, generally selected from those most largely interested under the provisions of the will, such as the residuary legatees, if any. (b) If the deceased died intestate, letters of administration are granted to the following persons in practically all the States:

First—To the surviving husband or widow.

Second—To one or more of the next of kin entitled to share in the estate.

Third—If none of the above consent to act, to one of the creditors of the estate, except in localities where there is provided by law a Public Administrator, who is preferred to creditors.

In practically all the States an administrator is required to give bond for the faithful performance of his duties in double the value of the estate to be administered.

In most of the States, if so provided by the will, no bond is required of an executor, except that in some States an executor is required to give a bond to cover the probable amount of the debts of the estate, and in practically all the States, in the discretion of the Court, for cause shown, an executor may be required to give a bond.

2. Claims of Creditors.—The procedure in the several States in presenting creditors' claims against the estate varies very considerably. In the majority of the States the executor or administrator is required promptly to give public notice to creditors to present their claims to him, and the creditors are required so to present their claims supported by an affidavit that the same are justly due and owing from the estate, above any offsets or counter claims, within a period limited generally to six months or a year. The law of each State should be consulted for more specific details. Most of the States direct a final closing of the estate by the executor or administrator within a year or eighteen months after his appointment, though the time limit may be extended by the Probate Court if conditions require it.

3. The following table contains an analysis of the laws of the several States, covering:

(1) The inheritance or succession tax upon property received either by intestate laws, last will, or by gift or transfer, designed to take effect at death, excepting legacies for religious, charitable or educational purposes, which are tax exempt in most of the States. In the great majority of the States no distinction as to tax is made between real estate and personal property.

(2) The various classes of estate obligations given priority over other claims in case of the insolvency of the estate.

NOTE—*Tax* when used below means Inheritance Tax, and *Obligations* means Preferred Obligations.

ALABAMA—*Tax*—None. *Obligations*—1, Funeral expenses; 2, administration expenses; 3, expenses of last sickness; 4, taxes; 5, wages of servants or employees.

ALASKA—*Tax*—Primary rates: On amounts up to $15,000; to wife or lineal issue, 1%; to husband or lineal ancestor, 1½%; to brother or sister or descendant of such, wife or widow of son, or husband of daughter, 3%; brother or sister of father or mother, or descendant of such, 4%; other collaterals, or strangers, or body politic or corporate, 5%. On amounts $15,000 to $30,000, double primary rates; $30,000 to $50,000, 2½ times; $50,000 to $100,000, 3 times; over $100,000, 3½ times primary rates. Exemptions, to widow, husband, lineal issue (including adopted children), $10,000; to lineal ancestors, $3,000; to collaterals, $1,000; charitable transfers to hospitals, schools, etc., $2,500. *Obligations*—1, Funeral expenses; 2, administration expenses; 3, expenses of last sickness; 4, taxes; 5, wages of servants or employees.

ARIZONA—Husband and wife, lineal issue, lineal ancestor, adopted or acknowledged child; exempt, widow, $10,000; others, $2,000; tax on first $25,000, 1%; to $50,000, 2%; to $100,000, 3%; to $500,000, 4%; over $500,000, 5%. 2d Group—Brother, sister, descendants of, wife or widow of son, or husband of daughter, exempt, $500; rates: 2%, 4%, 6%, 8% and 10%. 3d—Brother or sister of father or mother or descendants of such—exempt, $250; rates: 3%, 6%, 9%, 12% and 15%. 4th—Brother or sister of grandfather or grandmother or descendants of such, exempt, $150; rates: 4%, 8%, 12%, 16% and 20%. 5th—Any other degree of consanguinity or stranger in blood, or a body politic or corporate, exempt $100; rates: 5%, 10%, 15%, 20% and 25%.

ARKANSAS—*Tax*—On amounts not exceeding $5,000 the rate is 1% to parents, husband or wife, child or adopted child, lineal descendant, son-in-law or daughter-in-law. Brother or sister including half-blood, 2%. To all others the rate on the same amount is 4%. $3,000 passing to widow or minor child and $1,000 passing to the other immediate relatives mentioned is exempt. The exemption to others more remote is $500. On amounts in excess of $5,000 the primary rates (1%, 2% and 4% respectively) are increased as follows: From $5,000 to $10,000, twice the primary rates; from $10,000 to $25,000, 3 times the primary rates; from $25,000 to $50,000, 4 times; $50,000 to $75,000, 5 times the primary rate; from $75,000 to $100,000, 6 times; $100,000 to $200,000, 7 times; $200,000 to $500,000, 8 times; $500,000 to $1,000,000, 9 times; over $1,000,000, 10 times. *Obligations*—1, Funeral expenses; 2, expenses of last sickness; 3, wages of servants; 4, judgments which are liens on land of deceased; 5, all debts due by estate, including taxes, cost of administration, etc.; 6, Federal estate tax.

CALIFORNIA—*Tax*—To husband, wife, descendants, ancestors, adopted children or issue thereof, 1% up to $25,000; 2% from $25,000 to $50,000; 4% from $50,000 to $100,000; 7%, $100,000 to $200,000; 10%, $200,000 to $500,000; 12% above $500,000. $24,000 is exempt to widow or minor child; to others in this paragraph $10,000 is exempt. Property received by any one belonging in this classification from a member of this class who died within five years and having paid a tax thereon is exempt. To brothers, sisters, or their descendants, or to a son-in-law or daughter-in-law, 3% up to $25,000; upon the increasing amounts in the preceding paragraph the rates are 6%, 9%, 12%, 15% and 18%. $2,000 exempt from tax. To uncles, aunts, or their descendants, 4% up to $25,000; the rates increase, as above, up to $200,000 as follows: 8%, 10% and 15%; above $200,000, the rate is 20%. $1,000 exemption. To others more remote in blood, 5% up to $25,000; the rates increase as above up to $100,000 as follows: 10% and 15%; above $100,000 the rate is 20%. $500 exemption. *Obligations*—1, Funeral expenses; 2, expenses of last sickness; 3, wages due within 60 days; 4, debts preferred by U. S. laws; 5, judgments, mortgages and other liens.

All of the community property going to the husband and one-half of the community property going to the wife is exempt from taxation.

COLORADO—*Tax*—Direct heirs—Father, mother, husband, wife, child, adopted child or descendants, in excess of exemption ($20,000 for widow, others $10,000) up to $50,000, 2%; to $100,000, 3%; to $150,000, 4%, to $250,000, 5%; to $500,000, 6%; over $500,000, 7%. Wife or widow of son, husband or widower of daughter, grandfather or grandmother, brother, sister, in excess of exemption ($2,000) up to $10,000, 3%; to $25,000, 4%; to $50,000, 5%; to $100,000, 6%; to $250,000, 7%; to $500,000, 8%; over $500,000, 10%. Uncle, aunt, nephew or niece or descendant, in excess of $500, up to $5,000, 4%; to $10,000, 5%; to $25,000, 6%; to $100,000, 8%; to $250,000, 10%; to $500,000. 12%; over $500,000, 14%. Strangers, all others, in excess of $500, up to $5,000, 7%; to $10,000, 8%; to $25,000, 9%; to $100,000, 10%; to $250,000, 12%; to $500,000, 14%; over $500,000, 16%. *Obligations*—1, Moneys held in a fiduciary capacity; 2, reasonable administration expenses; 3, expenses for funeral and last sickness; 4, allowances to widow and orphans.

CONNECTICUT—*Tax*—The net estate of any resident of this State passing to any parent, grandparent, husband, wife, lineal descendant, adopted child, adoptive parent and lineal descendant of any adopted child, in excess of $10,000 in value to and including $25,000 in value, shall be liable to a tax of 1% thereof; the tax on the amount passing to relatives of this class in excess of $25,000 to and including $100,000 shall be 2% thereof; on the amount in excess of $100,000 to and including $200,000, 3% thereof; and on the amount in excess of $200,000, 4%. *Deductions*. The net estate for taxation purposes of a resident decedent shall be ascertained by adding to the appraised value of the inventoried estate all gains made in reducing choses in action to possession,

except income accruing after death, and deducting therefrom the amount of claims paid, all funeral expenses and expenses of administration, allowance made for the support of widow and family of the decedent during the settlement of the estate, the amount at death of all unpaid mortgages not deducted in the appraisal of property mortgaged, and losses incurred during the settlement of the estate in the reduction of choses in action to possession, provided no such deduction shall be made for allowance for support of widow and family beyond the date upon which the tax hereby imposed becomes payable. The net estate in this State of a non-resident decedent, for taxation purposes, shall be ascertained by adding to the appraised value of the estate all gains made in reducing choses in action to possession, except income accruing after death, and deducting therefrom funeral expenses if the decedent is buried within the State, expenses of administration within the State, the amount at death of all unpaid mortgages not deducted in the appraisal of mortgaged property within the State, and losses incurred during the settlement of the estate in reducing choses in action to possession. No deduction shall be made for ante mortem claims, in whole or in part, unless the estate in the State having original jurisdiction shall be insolvent, in which case the difference between the amount of claims and the amount of estate within the State having original jurisdiction shall be deducted from the estate in this State. *Obligations*—1. Funeral and administration expenses; 2, expenses of last sickness; 3, taxes; 4, wages within three months; 5, other preferred claims by State laws. Expenses of administration include Federal estate and foreign State inheritance taxes.

DELAWARE—*Tax*—To grandparents, parents, husband or wife, child or descendant, son- or daughter-in-law, or adopted child, $3,000 exempt. Rates on excess, 1% up to $30,000; 2%, $30,000 to $100,000; 3%, $100,000 to $200,000; 4%, above $200,000. To brother, sister, uncle, aunt, great-uncle, great-aunt or their descendants, $1,000 exempt. Rates on excess, 2% up to $25,000; 3%, $25,000 to $100,000; 4%, $100,000 to $200,000; 5% above $200,000. To others more remote, 5% up to $25,000; 6%, $25,000 to $100,000; 7%, $100,000 to $200,000; 8%, above $200,000. *Exemptions*—Any property or estate or interest therein passing to or for the use of, or in trust for, charitable, educational, historical or religious societies or institutions, or cities or towns for public improvement, or to school districts or library commission. *Obligations*—1, Funeral expenses; 2, expenses of last sickness; 3, wages to servants and laborers; 4, rent (not over one year); 5, judgments; 6, obligations of record; 7, obligations under seal; 8, contracts for payment of money or delivery of goods.

DISTRICT OF COLUMBIA—*Tax*—None (see also United States, end of table). *Obligations*—1, Judgments or decree of Court; 2, Funeral expenses; 3, other debts.

FLORIDA—*Tax*—None. *Obligations*—1, Administration expenses; 2, funeral expenses; 3, expenses of last sickness; 4, judgments and debts due to State; 5, mortgages, mechanics' liens, material men's, laborers', employees' and other liens; 6, all other debts without distinction or rank.

GEORGIA—*Tax*—Exemption of $5,000 to widow, widower, child, son-in-law, daughter-in-law or adopted child; of $2,000 to lineal descendants and lineal ancestors. All bequests to purely educational, literary, scientific, religious and charitable purposes are exempt. In excess of exemption up to $25,000, 1%; to brothers, sisters and step-children, 3% of first $25,000; to uncles, aunts, nephews and nieces, 5%; to all others, 7%. On second $25,000, 1½ times primary rate; over $50,000 and not over $100,000, 2 times primary rate; $100,000 to $500,000, 2½ times primary rate; in excess of $500,000, 3 times the primary rate. *Obligations*—1, Year's support of family; 2, expenses of funeral and last sickness; 3, administration expenses; 4, taxes; 5, fiduciary obligations; 6, judgments, mortgages and other liens; 7, rent; 8, liquidated demands; 9, open accounts.

IDAHO—*Tax*—Tax on estates less than $25,000 at following rates: To husband or wife, lineal issue or ancestor, adopted child or its issue, 1%; exempt to widow or minor child, $10,000; to others of this class, exempt $4,000. To brother or sister, or their descendants, or wife or widow of son, or husband of daughter, 1½%; exempt $2,000. To uncles, aunts or descendants, 3%; exempt, $1,500. To great-uncles, great-aunts or descendants, 4%; exempt, $1,000. To more distant relatives or strangers in blood, 5%; exempt, $500. On larger estates than $25,000 the above rates are multiplied as follows: $25,000 to $50,000, 1½ times above; $50,000 to $100,000, 2 times above; $100,000 to $500,000, 2½ times above; $500,000 and upward, 3 times above. *Obligations*—1, Funeral expenses; 2, expenses of last sickness; 3, debts preferred by U. S. laws; 4, judgments and mortgages.

ILLINOIS—*Tax*—Class A, father, mother, lineal ancestor, husband, wife, child, adopted or mutually acknowledged child, brother, sister, wife or widow of son, husband of daughter, lineal descendant—in excess of exemption—to $50,000, 2%; $50,000 to $150,000, 4%; to $250,000, 6%; to $500,000, 10%; over $500,000, 14%. Class B, uncle, aunt, niece, nephew or lineal descendant of same, in excess of exemption—to $20,000, 6%; to $70,000, 8%; to $170,000, 12%; over $170,000, 16%. Class C, all others except Class D, which consists of gifts for hospitals, religious, educational, Bible, missionary, tract, scientific, benevolent or charitable purposes within the State, and which are entirely exempt—in excess of exemption—to $20,000, 10%; to $50,000, 12%; $50,000 to $100,000, 16%; to $150,000, 20%; to $250,000, 24%; over $250,000, 30%. *Exemptions*—Class A, $20,000, except to brother and sister, $10,000; Class B, exemption is $500; Class C, $100. *Obligations*—1, Funeral and administration expenses; 2, allowance to widow and children; 3, expenses of last sickness, except doctor's bill and wages to servants; 4, debts to common school or township funds; 5, doctor's bill, last sickness; 6, money owed in fiduciary capacity.

INDIANA—*Tax* is on excess above exemption; five classes, first includes wife, husband, child of decedent under 18, other lineal issue, lineal ancestor, acknowledged or adopted child, lineal issue of same; second, brother, sister, descendant of same, son-in-law, daughter-in-law; third, uncle, aunt, descendant of same; fourth, great-uncle, great-aunt, descendant of same; fifth, all others. Amount of tax runs from 1% to 4% on first class, from 2% to 8% on second, from 3% to 12% on third, from 4% to 16% on fourth, and from 5% to 20% on fifth, up to $25,000; $25,000 to $50,000; $50,000 to $300,000 and on excess of $300,000. *Exemptions* are, in the first class: Wife, $15,000; child of decedent under 18, $5,000; others, $2,000; in second class exemption is $500; in third class, $250; in fourth class, $150; fifth class, $100. Order of payment of *obligations*—Costs of administration, widow's statutory allowance, attorney fees, expense of last sickness, burial expense, taxes, all claims due at death.

IOWA—*Tax*—Direct inheritance—Over exemption, graduated tax; 1% on any amount in excess of $15,000 and up to $30,000; $30,000 to $45,000, 1½%; $45,000 to $60,000, 2%; $60,000 to $90,000, 2½%; $90,000 to $120,000, 3%; $120,000 to $180,000, 4%; $180,000 to $240,000, 5%; $240,000 to $300,000, 6%; on all sums in excess of $300,000, 7%. *Exemptions*—Husband or wife, one-third of net estate plus $15,000; each direct heir, $15,000. Collateral Inheritance—5% up to $100,000; 6% to $200,000; 7% in excess of $200,000. *Obligations*—1, Debts preferred by U. S. laws; 2, public rates and taxes; 3, wages within 90 days of death; 4, claims filed within six months after notice. There is no exemption to collateral heirs of a decedent.

KANSAS—*Tax*—To husband, wife, lineal ancestor, lineal descendant, wife or widow of same: On first $25,000, 1%; on second $25,000, 2%; on next $50,000, 3%; on next $400,000, 4%; on all over $500,000, 5% (except in case of wife of decedent one-half of above rates). To brothers and sisters, on first $25,000, 3%; on second $25,000, 5%; on next $50,000, 7½%; on next $400,000, 10%; on all over $500,000, 12½%. To relatives of all degrees other than as above, and to strangers, on first $25,000, 5%; on second $25,000, 7½%; on next $50,000, 10%; on next $400,000, 12½%; on all over $500,000, 15%. *Obligations*—1, Funeral expenses; 2, expenses of the last sickness, wages of servants and demands for medicines and medical attendance during the last sickness of the deceased and the expenses of administration; 3, debts due to State; 4, judgments; 5, all demands presented within one year after letters of administration; 6, demands presented after one year and before two years. Exemptions to wife, $75,000; to others of Class A, $15,000; to each member of Class B, $5,000. Taxes are on excess over exemption.

KENTUCKY—*Tax*—Three classes: A—Husband, wife, lineal ancestor, lineal descendant, adopted child, mutually acknowledged child, step-child, daughter-in-law, son-in-law, or any lineal issue of such adopted or mutually acknowledged

child or step-child; B—Brother, sister, brother-in-law, sister-in-law, nephew, niece, or lineal descendant of the wife or widow of a nephew, or husband of a niece, or uncle and aunt; religious, charitable, educational and State institutions within U. S. but not within this State; C—Persons or corporations not included in A or B, and any person or corporation not exempted as bona-fide charitable, educational or religious. Amount of tax runs from 1% to 6% on Class A; from 2% to 12% on Class B; from 6% to 16% on Class C—Up to $25,000, excess of value over $25,000 to $50,000; to $100,000; to $250,000; to $500,000, over $500,000. *Exemptions*—Wife $20,000, all other persons in Class A $5,000, except persons under 21 years of age, $10,000; brothers, sisters, brothers-in-law and sisters-in-law, uncles and aunts, $2,000, all other persons or corporations, $500. *Obligations*—In calculating the value of the distributive shares the following deductions shall be allowed and no others—1, Debt of the decedent; 2, taxes accrued and unpaid; 3, death duties paid to foreign countries; 4, estate and inheritance taxes paid to other State; 5, Federal estate taxes; 6, drainage, street or other special assignments due and unpaid and constituting liens; 7, funeral and burial expenses (including monument up to $500); 8, commission of executors and administrators actually allowed and paid; 9, cost of administration including reasonable attorney's fees; 10, certain transfers made within two years prior to death on which transfer tax was paid.

LOUISIANA—*Tax*—To direct descendant by blood or affinity, ascendant or surviving spouse in excess of $5,000, $5,000 to $20,000, 2%; over $20,000, 3%. To a collateral relation (including brothers or sisters by affinity), in excess of $1,000, on amount in excess of $1,000, $1,000 to $20,000, 5%; in excess of $20,000, 7%. To a stranger, in excess of $500, on amount in excess of $500, up to $5,000, 5%; in excess of $5,000, 10%. *Exemptions*—To direct descendant, ascendant or surviving spouse, $5,000; to collateral relations, $1,000; to a stranger, $500. All legacies and donations to charitable, religious or educational institutions located in State entirely exempt. *Obligations*—1, Funeral expenses; 2, legal expenses; 3, expenses of last sickness; 4, servants' wages within one year; 5, salaries, clerks.

MAINE—*Tax*—To ancestors, parents, husband, wife, descendants, adopted child, adoptive parent, wife of son, husband of daughter, the rates are as follows: Up to $50,000, 1%; $50,000 to $100,000, 1½%; above $100,000, 2%; $10,000 exempt to parents, husband, wife, child, adopted child, or adoptive parent. To brother, sister, uncle, aunt, nephew, niece or cousin, the rates on the above amounts are 4%, 4½% and 5%; $500 exempt. To others, rates on the same amounts are 5%, 6% and 7%; same exemption. *Obligations*—1, Funeral and administration expenses; 2, allowance to husband, widow or children; 3, expenses of last sickness; 4, debts preferred under U. S. laws; 5, taxes.

MARYLAND—*Tax*—Exempt to parents, husband or wife, children, or lineal descendants; to others, 5% above $500. *Obligations*—1, Taxes; 2, funeral expenses; 3, arrears of rent; 4, judgments or decrees of court.

MASSACHUSETTS—*Tax*—To husband, or wife, parent, child, grandchild, adopted child, or adoptive parent, 1% up to $25,000; 2%, $25,000 to $50,000; 4%, $50,000 to $250,000; 5%, $250,000 to $500,000; 5½%, $500,000 to $750,000; 6%, $750,000 to $1,000,000; 7% above $1,000,000. To ancestor, or descendant, except those included in the previous class, or son- or daughter-in-law, descendant of adopted child, or ancestor of adoptive parent, wife or widow of son, husband of a daughter, 1% up to $10,000; 2%, $10,000 to $25,000; 4%, $25,000 to $50,000; 5%, $50,000 to $250,000; 6%, $250,000 to $500,000; 7%, $500,000 to $750,000; 8%, $750,000 to $1,000,000; 9% on excess of $1,000,000. To brother, sister, stepchild, step-parent, half-brother, half-sister, nephew or niece, the rates on the amounts given in above class are 3%, 5%, 7%, 8%, 9%, 10%, 11% and 12%. To others more remote, the rates on the same amounts are 5%, 6%, 7%, 8%, 9%, 10%, 11% and 12%. Husband, wife, parent, child, adopted child or adoptive parent pay no tax unless legacy or distributive share is more than $10,000; others, unless legacy or distributive share is more than $1,000. *Obligations*—1, Funeral bills; 2, expenses of last sickness; 3, charges of administration—these 3 preferred and not affected by insolvency; 4, debts preferred by U. S. laws; 5, public rates and taxes; 6, wages, not over $100; 7, debts for necessaries furnished within six months not exceeding $100; 8, all other creditors.

MICHIGAN—*Four rates*—1, Beneficiaries, grandfather, grandmother, father, mother, husband, wife, child, brother, sister, wife or widow of son or husband of daughter, adopted and mutually acknowledged child, exempt up to $3,000; wife up to $10,000. 2, Inheritance tax is on totals including exemptions up to $50,000, 1%; up to $250,000, 2%; up to $500,000, 4%; up to $750,000, 6%; in excess of $750,000, 8%. 3, In other cases except as in 4,—up to $50,000, 5%; over $50,000, up to $500,000, 10%; in excess of $500,000, 15%. 4, To collateral relations or strangers in blood (including aliens not residing in U. S., or corporations not chartered by U. S., or any State), tax of 25% shall be levied and collected.

MINNESOTA—*Tax*—In estates of persons who died prior to April 20, 1905, there was no tax; in estates of persons dying on or after April 20, 1905, and before July 1, 1911, rates and exemptions are fixed by Chap. 288, Laws of 1905; in estates of persons dying on or after July 1, 1911, to and including April 23, 1919, rates and exemptions are fixed by Section 2a, 2b and 2c as set forth in Section 2273, General Statutes of 1913; in estates of persons dying on or after July 24, 1919.—Seven classes of beneficiaries: 1, wife or lineal issue; 2, husband, adopted or mutually acknowledged child and issue; 3, lineal ancestor (father, mother, grandfather, etc.); 4, brother or sister, half-brother or half-sister, nephews, nieces, daughters-in-law, sons-in-law; 5, uncles, aunts, cousins, second cousins, etc.; 6, State of Minnesota or any political division for public purposes, religious, charitable, scientific, educational bodies, etc.—all within the State, totally exempt. 7, Kindred other than those mentioned, strangers to blood of decedent. Exemptions of $10,000 in Classes 1, 2 and 3 on excess up to $100,000, 1% to 4½%; over $100,000, 4% to 6%; 4, exemptions of $1,000; on excess up to $100,000, 3% to 9%; over $100,000, 12%; 5, exemptions of $250 up to $100,000, 4% to 12%; over $100,000, 16%. 6, All exempt. 7, Exemption of $100; up to $100,000, 5% to 15%; over $100,000, 20%. *Obligations*—1, Administration expenses; 2, funeral expenses; 3, expenses of last sickness; 4, debts preferred by U. S. laws; 5, taxes.

MISSISSIPPI—*Tax*—Upon entire net income of every resident, individual, corporation, association, trust or estate in excess of credits—on first $1,000 of taxable income or any part thereof, 1%; on second $1,000, 1½%; on next $3,000, 2%; on next $5,000, 3%; on next $15,000, 4%; on all taxable income in excess of $25,000, 5%. Same tax on net income of non-residents on property owned and business carried on in State. In computing net income deductions allowed: Ordinary and necessary expenses paid or incurred in carrying on business; necessary expenses incurred by those forced to leave home to do business; interest on indebtedness except for purchase of tax free bonds or stock in national bank or bank organized under State laws; losses not compensated for by insurance, including those from fires, storms, shipwrecks, theft; debts ascertained to be worthless and charged off. *Exemptions*—Single individual, $1,000 and $200 for each dependent; head of family or married individual living with husband or wife, $2,000; $200 for dependents under 18 years of age or incapable of self-support, or a student in school or college, corporation or associates, $1,000. *Exempt organizations*—Labor, agricultural, horticultural, mutual savings banks, fraternal orders, cemetery companies, religious, charitable or scientific associations, business leagues, chambers of commerce, social clubs, farmers, fruit growers, Federal land banks, farm loan associations, domestic mutual building and loan associations organized under laws of State of Mississippi. *Obligations*—1, Funeral expenses; 2, expenses of administration; 3, support of widow as fixed by Chancery Court; 4, all debts.

MISSOURI—*Tax*—To husband, wife, lineal descendant, adopted child or descendant, illegitimate child, up to $20,000, 1%; to $40,000, 2%; to $80,000, 3%; to $200,000, 4%; to $400,000, 5%; in excess of $400,000, 6%. To brother, sister or descendants, son-in-law, daughter-in-law, aunt, uncle or descendants, 3%, 6%, etc., over $400,000, 18%. To brother or sister of grandparents or

descendants, 4%, 8%, etc., over $400,000, 24%. To all others, including foreign, charitable and religious bequests, 5%, 10%, etc., over $400,000, 30%. Exemptions, husband or wife, $20,000; insane or blind lineal descendants, $15,000; lineal ancestor, lineal descendant, adopted child or its descendant or illegitimate child, $5,000; brother, sister or descendants, son-in-law, daughter-in-law, $500; aunt, uncle or their descendants, $250; brother or sister of grandparents or their descendants, $100; others of less than $100 not taxed. *Obligations*—1, Funeral expenses; 2, expenses of last sickness, wages of servants, tombstone; 3, taxes and public debts; 4, judgments; 5, all demands presented within six months after letters; 6, all demands exhibited after six months and before one year.

MONTANA—*Tax*—Widow, exemption $17,500, rate on 1st $25,000, less exemptions, 1%; on next $25,000, 2%; on next $50,000, 3%; on balance, 4%. Husband, exemption, $5,000; lineal ancestor or descendant, adopted child or lineal issue of adopted child—exemption, $2,000—rates over exemption same as for widow. Brother or sister or descendant, son's wife or daughter's husband, exempt, $500—rates, 2%, 4%, 6% and 8%. Uncle, aunt or first cousin, no exemption; rates, 3%, 6%, 9% and 12%. Any other degree of consanguinity or a stranger in blood or a body politic or corporate, no exemption; rates, 4%, 8%, 12% and 16%. *Deductions*—debts owing at death, funeral expenses and last illness, State, county and municipal taxes, which are liens, expenses of administration, including fees and commissions and Federal estate taxes—for non-resident in proportion to his interest in Montana.

NEBRASKA—*Inheritance tax*—Father, mother, husband, wife, child, brother, sister, wife or widow of the son, or husband of the daughter, 1% over exemption of $10,000 each; uncle, aunt, niece, nephew or other lineal descendants of same, 4% over exemption of $2,000; in all other cases a graduated tax up to $5,000, from 4%; on all the excess over $5,000 to $10,000, 6%; on all the excess over $10,000 and not exceeding $20,000, 8%; on all excess over $20,000 and not exceeding $50,000, 10%; on all excess over $50,000, 12%. Widow or widower entitled besides to same exemptions as applies to intestate estates.

NEVADA—*Tax*—On amounts not exceeding $25,000 the primary rates are: To husband or wife, ancestors, descendants or adopted child, 1%; $20,000 exempt to widow or minor child; to others just named $10,000 exempt. To brother, sister, or their descendants, son-in-law or daughter-in-law, 2%; $10,000 exempt. To uncles, aunts or their descendants, 3%; $5,000 exempt. To great-uncles, great-aunts or their descendants 4%. To all others, 5%. On larger amounts the primary rates are multiplied as follows: $25,000 to $50,000, twice primary rates; $50,000 to $100,000, 3 times; $100,000 to $500,000, 4 times; above $500,000, 5 times. Exemption amounts are not individual but apply to all in one group. *Obligations*—1, Funeral expenses; 2, expenses of last sickness; 3, wages, within ninety days; 4, debts preferred by U. S. laws; 5, judgments and mortgages.

NEW HAMPSHIRE—*Tax*—On class A (beneficiary) consisting of educational, religious, cemetery or other institutions of public charity in N. H., or for or upon trust for any charitable purpose in N. H., for care of cemetery lots; or to a city or town in N. H., for public purposes, no tax is imposed. To husband or wife no tax on $10,000, or less; on excess over exemption 2%. To father, mother, lineal descendant, adopted child, wife or widow of son, husband of a daughter, if under 21, exemption of $10,000, 2%; 21 or over, 2%. Brother, sister, nephew, niece, 6%. All others, 10%. The foregoing is tax law of 1923 on estates of all persons, residents of States, dying after May 2, 1923; by a law of 1921, still in force, there is a non-resident transfer tax of 2% upon transfer of all property within the jurisdiction of the State. *Obligations*—1, Administration expenses; 2, funeral expenses; 3, allowance to widow; 4, taxes and expenses of last sickness. Note—The inheritance tax is included as an administration expense.

NEW JERSEY—*Tax*—Effective on and after March 11, 1922. To husband, wife, child, lineal descendant, adopted child and issue, on amount over exemptions $5,000) to $50,000, 1%; $50,000 to $150,000, 1½%, to $250,000, 2%; over $250,000, 3%. To father, mother, brother, sister, wife or widow of son, husband of daughter, churches, hospitals, orphan asylums, public libraries, Bible and tract societies, religious, benevolent and charitable institutions, if less than $500, exempt; if over $500, no exemptions, 5%. All others except class D, 8%. If less than $500, exempt; if over, no exemption. Class D, State of New Jersey, municipal corporations within State or other political division thereof, entirely exempt. *Obligations*—1, Administration expenses; 2, judgments; 3, funeral expenses; 4, medical expenses of last sickness; 5, inheritance tax. All the debts and expenses are first deducted from estate before calculation of tax, so the tax would be payable out of the balance of the estate after payment of 1, 2, 3 and 4.

NEW MEXICO—*Tax*—To father, mother, husband, wife, lineal descendant, adopted child, on amount over exemption, 1%, and an additional tax of 1½% on grantee or donee in conveyance taking effect upon death. To wife or widow of son, husband of daughter, lineal descendant of adopted child, brother or sister, on amount over exemption, 5%, and an additional 3% on grantee or donee in conveyance taking effect upon death. To other collateral kindred, strangers to the blood, corporations, voluntary associations or societies, in amount over exemption, 5%, and an additional tax on grantee or donee in conveyance taking effect upon death, 3%. Exemptions are on entire estate, $10,000, as to first two classes as above; $500, as to collaterals, strangers, etc. All gifts of paintings, books, etc., for free exhibitions within State, are entirely exempt. *Obligations*—1, Inheritance tax; 2, judgments; 3, funeral expenses; 4, medical expenses of last sickness.

NEW YORK—*Tax*—To parents, husband or wife, child, adopted child ($5,000 exempt), and to descendants ($500 exempt), 1% up to $25,000; 2% on the next $75,000; 3% on the next $100,000; 4% upon all additional sums. To brother, sister, son-in-law, or daughter-in-law, 2% up to $25,000; 3% on the next $75,000; 4% on the next $100,000; 5% thereafter; unless estate amounts to at least $500, there is no tax. To others more remote, 5% up to $25,000; 6% on the next $75,000; 7% on the next $100,000; 8% thereafter; unless estate amounts to at least $500, there is no tax. *Obligations*—1, Funeral and administration expenses; 2, debts preferred under U. S. laws; 3, taxes; 4, judgments and decrees.

NORTH CAROLINA—*Tax*—To husband or wife, heirs at law, son or daughter-at-law, stepchild, adopted child. Exempt, $10,000 to widow, $5,000 to minor child, $2,000 to others of this class. Rates on excess, 1% up to $25,000; 2%, $25,000 to $100,000; 3%, $100,000 to $250,000; 4%, $250,000 to $500,000; 5% above $500,000. To brother, sister, or their descendants, no exemption. Rates on the amounts given above are: 3%, 4%, 5%, 6% and 7%. To others more remote, the rates on the same amounts are: 5%, 6%, 7%, 8% and 9%. *Obligations*—1, Debts secured by liens on property of deceased; 2, funeral expenses; 3, taxes; 4, debts due U. S. or State; 5, judgments; 6, wages within one year, medical attendance within one year.

NORTH DAKOTA—*Tax*—To husband, wife, lineal issue, lineal ancestor of decedent, adopted child, on not to exceed $15,000, over amount of exemption, 1%. To brother or sister, descendants of same, wife or widow of son, or husband of daughter, on $15,000, 1½%. To brother or sister of father or mother, or descendant of same, on $15,000, 3%. To brother or sister of grandfather or grandmother, or descendant, on $15,000, 4%. To any other collateral degree, or stranger, or body politic or corporate, on $15,000, 5%. Above are termed primary rates. In excess of $15,000, up to $30,000, 1½ times primary rates. On $30,000 to $50,000, 2 times; $50,000 to $100,000, 2½ times; $100,000 to $300,000, 3 times; $300,000 to $500,000, 3½ times; in excess of $500,000 4 times primary rate. Exemptions to husband or wife, $10,000; to each minor child, $5,000; to other lineal issue and lineal ancestor, $2,000; to brother or sister, descendants of same, wife or widow of son, or husband of daughter, $500; to uncles, aunts, cousins and descendants, $250; devises or bequests to municipal corporations for county, town or municipal purposes, or to corporations of this State, organized for religious, charitable or educational purposes, entirely exempt. *Obligations*—1, Administration expenses; 2, funeral and last sickness expenses; 3, allowance to family; 4, debts preferred by U. S. laws; 5, debts secured by liens on property of deceased.

OHIO—*Tax*—To wife or minor child, father, mother, husband, adult child, or adopted child, or lineal descendants thereof, on $25,000 or part thereof, over exemptions, 1%; on next $75,000, 2%; on next $100,000, 3%; on balance, 4%. To brother, sister, niece, nephew, wife or widow of a son, husband of a daughter, or child treated as son or daughter for ten years though not formally adopted, on $25,000 or part thereof, over exemptions, 5%; on next $75,000, 6%; on next $100,000, 7%; on balance, 8%. To other persons, institutions or corporations, on $25,000 or part thereof, 7%; on next $75,000, 8%; on next $100,000, 9%; on balance, 10%. Exemptions, to wife or child, $5,000; to father, mother, husband, adult child, or adopted child, or lineal descendants, $3,500; to brother, sister, nephew, niece, wife or widow of son, husband of daughter, "or any child to whom the decedent, for not less than ten years prior to the succession stood in the mutual acknowledged relation of parent," $500. *Preferred obligations*—1, Administration, funeral and last sickness expenses; 2, allowance to widow and children for twelve months; 3, debts; 4, taxes.

OKLAHOMA—*Tax*—To parents, husband or wife, child, brother, sister, son-in-law, daughter-in-law, adopted child, or lineal descendant, 1% up to $25,000; 2%, $25,000 to $50,000; except to brother, sister, wife or widow of son, or husband of daughter, 3%; 3% $50,000 to $100,000, except brother, sister, wife or widow of son or husband of daughter, 4%; 4% in excess of $100,000, except to brother, sister, wife or widow of son, or husband of daughter, 5%. To other persons and corporations, on from $500 to $25,000, 6%; $25,000 to $50,000, 7%; $50,000 to $100,000, 8%; over $100,000, 10%. Exemptions, to wife, $15,000; to each child, $10,000; to other relatives as above, $5,000, except brother, sister, wife or widow of son, or husband of daughter, $1,000. *Obligations*—1, Funeral expenses; 2, expenses of last sickness; 3, support of family for ninety days; 4, taxes to U. S. or State; 5, debts preferred by U. S. or State laws; 6, judgments or mortgages; 7, other claims presented within six months.

OREGON—*Tax*—To grandfather, grandmother, father, mother, husband, wife, child or any lineal descendant (exemption $10,000), $10,000 to $25,000, 1%; $25,000 to $50,000, 1½%; $50,000 to $100,000, 2%; $100,000 to $300,000, 3%; $300,000 to $500,000, 5%; $500,000 to $1,000,000, 7%; over $1,000,000, 10%. To brother, sister, uncle, aunt, niece, nephew, or lineal descendant (exemption $1,000), additional tax, $1,000 to $3,000, 1%; $3,000 to $5,000, 2%; $5,000 to $10,000, 4%; $10,000 to $30,000, 7%; $30,000 to $50,000, 10%; over $50,000, 15%. Additional tax in all other cases (no exemption) up to $500, 2%; $500 to $1,000, 4%; $1,000 to $2,000, 6%; $2,000 to $4,000, 8%; $4,000 to $10,000, 10%; $10,000 to $25,000, 15%; $25,000 to $50,000, 20%; over $50,000, 25%. Effective on and after May 29, 1919. *Deductions*—Expenses of administration, funeral expenses, U. S. taxes, expenses of last sickness, State and local taxes, debts preferred by U. S. laws, debts secured by liens and property set apart to the widow, husband or surviving children.

PENNSYLVANIA — *Tax* — Transfer Inheritance Tax, Act of 1919, imposing a tax on value of estate passing to direct and collateral heirs. To father, mother, husband, wife, children, lineal descendants, legally adopted children, step-children or the wife or widow of a deceased son, or from the mother of an illegitimate child, 2%; to all others, 10%; the only exemption allowed is the widow's exemption of $500, under a separate act. *Obligations*—1, Funeral and last sickness expenses, wages due household servants within one year; 2, rent, within one year.

RHODE ISLAND—*Tax*—Estates under $5,000 tax exempt (above said sum a general tax of ½% is imposed in addition to the rates specified below). To grandparents, parents, husband or wife, child, or descendant, adopted child, brother, sister, nephew, niece, son-in-law, or daughter-in-law, $25,000 is exempt. Rates on excess are: ½% below $50,000; 1%, $50,000 to $250,000; 1½%, $250,000 to $500,000; 2%, $500,000 to $750,000; 2½%, $750,000 to $1,000,000; 3% above $1,000,000. To others more remote, $1,000 is exempt, and rates on excess are: 5% up to $50,000; 6%, $50,000 to $250,000; 7%, $250,000 to $1,000,000; 8% above $1,000,000. *Obligations*—1, Funeral expenses; 2, expenses of last sickness; 3, debts due U. S.; 4, State and town taxes; 5, wages up to $100; 6, other claims presented within six months; 7, all other debts. If property insufficient to pay all debts of any class, creditors of that class shall be paid ratably, and no payment shall be made to creditors of any class until all of preceding class or classes have been paid in full.

SOUTH CAROLINA—*Tax*—To husband, wife, minor child, minor grandchild, adult child, adult grandchildren, father or mother, on amount in excess of exemption; up to $20,000, 1%; $20,000 to $40,000, 2%; $40,000 to $80,000, 3%; $80,000 to $150,000, 4%; $150,000 to $300,000, 5%; in excess of $300,000, 6%. To lineal ancestor, lineal descendant (other than above), brother, sister, uncle, aunt, niece, nephew, wife or widow of son, or husband of daughter, on amount in excess of exemption, up to $20,000, 2%; to $40,000, 3%; to $80,000, 4%; to $150,000, 5%; to $300,000, 6%; over $300,000, 7%. To any other beneficiary, double above rates, viz., 4%, 6%, 8%, 10%, 12% and 14%. *Exemptions*—Husband or wife, $10,000; minor child, $7,500; adult child, father or mother, $5,000; lineal ancestor or descendant, brother, sister, uncle, aunt, etc., $500; any other beneficiary, $200. Devises or bequests for educational, religious, or public charities in this State, or for city or town for public purposes, entirely exempt. Act of Feb. 23, 1922. *Obligations*—1, Funeral, last sickness, probate and administration expenses; 2, debts due to public; 3, judgments, mortgages and executions; 4, rent; 5, bonds, contract debts.

SOUTH DAKOTA—*Tax*—Primary rates: To wife or lineal issue, up to $15,000 on excess after deducting exemptions from $15,000, 1%; to husband, lineal ancestor of decedent or any child legally adopted, or mutually acknowledged for not less than ten years or lineal issue of such, 2%; to brother or sister, or descendant a wife or widow of a son or husband of a daughter, 3%. To brother or sister of father or mother, or a descendant of a brother or sister of the father or mother of decedent, 4%; to any person or persons in any other degree than as above, or strangers, or a body politic or corporate, 5%. Over $15,000 and up to $50,000, two times the primary rate; $50,000 to $100,000, 3 times; in excess of $100,000, 4 times the primary rate. *Exemptions*—All property transferred to public corporations within the State for strictly county, township, school or municipal purposes, property of clear value of $10,000 transferred to widow or husband of deeedent, each lineal issue, or adopted or mutually acknowledged children and issue of such, lineal ancestors of decedent, exemption, $3,000; $500 exemption to brother or sister of decedent, or descendants of such, wife or widow of son or husband of daughter; $200 exemption to brother or sister of father or mother or descendants of such; $100 exemption to others. Entire exemption to hospitals, colleges, churches, etc., and charitable institutions, deductions to be made of amounts received from outside the State. *Obligations*—1, Funeral expenses; 2, expenses of last sickness; 3, administration expenses; 4, wages for 60 days; 5, debts preferred by U. S. laws; 6, all other claims against the estate except that debts secured by liens have preference, according to priority, on any specific property.

TENNESSEE—*Tax*—To husband, wife or direct descendants, child adopted in conformity with laws of State, or ascendants of person making transfer, from $10,000 to $25,000, 1%; on next $25,000, or any part thereof, 1½%; on next $50,000, 2%; on next $400,000, 3%; on $500,000 and all over that sum, 5%. To all others, from $1,000 to $50,000, 5%; on next $50,000, 6%; on next $50,000, 7%; on next $50,000, 8%; on next $50,000, 9%; 10% on $250,000 and all over that sum. *Exemptions*—Property of intestate, testator or grantor when clear market value is less than $1,000. Property of clear market value of less than $10,000, transferred to wife, direct descendants and ascendants, or either of them, of person from whom transfer is made, the estate to be treated as a whole. All property transferred to municipal corporations for strictly municipal purposes. Property devised or transferred to any church for purely religious purposes, to any school or college for purely educational purposes, to any hospital or bona-fide charitable institution. *Obligations*—1, Transfer and inheritance taxes are included as debts in settlement of estate.

TEXAS—*Tax*—On property to or for use of husband or wife, direct lineal descendants or ascendants of decedent, or to legally adopted child, or to husband of daughter, or wife of son; likewise to religious, educational or charitable organizations in State, bequest to be used within State, in

excess of $25,000 a graduated tax from 1% up to (for over $1,000,000) 6%. To brother or sister of decedent or lineal descendant of such, in excess of $10,000, a graduated tax from 3% up to (for over $1,000,000) 10%. To uncle or aunt of decedent or descendant of such, in excess of $1,000, a graduated tax from 4% to (for over $1,000,000) 15%. To any other person within or without this State, or to any religious, educational or charitable organization located without the State, or bequest to be used within the State, in excess of $500, a graduated tax of from 5% to (for over $1,000,000) 20%. *Obligations*—1, Funeral and last sickness expenses; 2, administration expenses; 3, debts secured by mortgage or other debts presented within twelve months, and debts presented after twelve months.

UTAH—*Tax*—$10,000 of each estate exempt; tax 3%, $10,000 to $25,000; 5% above $25,000. *Obligations*—1, Funeral expenses the only preferred obligations. The term "debts" shall include local or State taxes due at time of death, court costs, statutory fees of executors, administrators or trustees.

VERMONT—*Tax*—To husband, wife, child, father, mother or grandchild, wife or widow of a son or husband of a daughter, child adopted during minority, stepchild or other lineal descendant, no tax unless legacy or share exceeds $10,000; between $10,000 and $25,000, 1%; between $25,000 and $50,000, 2%; between $50,000 and $250,000, 4%; over $250,000, 5%. To all others, 5%. Exemptions, devises or bequests for charitable, religious or educational societies or institutions, cemetery purposes created or existing under laws of this State, to a Bishop in his ecclesiastical capacity for religious uses in this State. *Obligations*—1, Funeral expenses; 2, taxes; 3, debts due to State; 4, debts due to U. S. These claims are to be paid first without being allowed by commissioners. Expenses of last illness and wages due within 3 months, not over $150 per creditor, to be allowed if approved by commissioners. A headstone to cost not over $25 is permitted to an insolvent estate.

VIRGINIA—*Tax*—To husband, wife, lineal ancestor, lineal descendant, in excess of exemption and up to $50,000, 1%; in excess of $50,000 and up to $100,000, 2%; in excess of $100,000 and up to $500,000, 3%; in excess of $500,000 and up to $1,000,000, 4%; in excess of $1,000,000, 5%. To brother, sister, nephew or niece, in excess of exemption, amounts as above, 2%, 4%, 6%, 8% and 10%. All others, in excess of exemption, etc., 5%, 7%, 9%, 12% and 15%. Exemptions, husband, wife, ancestor, descendant, $10,000; brother, sister, nephew, niece, $4,000; others, $1,000. A tax of 2% is imposed upon the transfer at death of personal property of non-residents. *Obligations*—1, Funeral and administration expenses; 2, expenses of last sickness, doctor or druggist; 4, money owing as trustee or in fiduciary capacity.

WASHINGTON—*Tax*—To parents, husband or wife, lineal descendant, adopted child or its descendants, $10,000 exempt. Rates on excess are: 1% up to $50,000; 2%, $50,000 to $100,000; 3%, $100,000 to $150,000; $150,000 to $200,000 3%; $200,000 to $300,000, 6%; $300,000 to $500,000, 7%; above $500,000 10%. To brother, sister, uncle, aunt, nephew or niece, no exemption; the rates on the amounts stated are: 5%; 6%; 8%; 10%; 12%; 15% and 20%. To others more remote, the rates on the same amounts are: 10%; 12%; 15%; 20%; 25%; 30% and 40%. *Obligations*—1, Funeral expenses; 2, expenses of last sickness; 3, debts preferred by U. S. laws; 4, wages, within ninety days; 5, taxes; 6, judgments and mortgages which are liens on land.

WEST VIRGINIA—*Tax*—To wife, husband, child or children of deceased child, or father or mother of decedent, not exceeding $50,000, 2%. To brother or sister of decedent (not including those of half blood), 4%. To those further removed in relationship from decedent than brother or sister, 6%. To those of no blood relationship, strangers, institutions corporate or otherwise, except eleemosynary institutions hereinafter exempt, 10% of market value of such interest in such property. The foregoing are termed primary rates. In excess of $50,000 up to and not over $100,000, two times primary rate; over $100,000 up to $150,000, 2¼ times; over $150,000 up to $200,000, 2½ times; over $200,000 up to $300,000, 2¾ times; over $300,000 up to $400,000, 3 times; over $400,000 up to $500,000, 3¼ times. Upon all in excess of $500,000, 3½ times primary rates. This example applies to a single beneficial interest and not to the estate as a whole. *Exemptions*—Property transferred to person or corporation for educational, literary, scientific, religious or charitable purposes, or to State, county or municipal corporation for public purposes, used exclusively in this State. To widow, $15,000; to wife, husband, child, children of deceased child, father or mother of decedent, $10,000, except that exemption to children of child shall be per stirpes not per capita. *Obligations*—1, Funeral and administration expenses; 2, debts owing to U. S.; 3, taxes; 4, fiduciary obligations.

WISCONSIN—*Tax*—Tax of 2% to husband, wife, lineal descendants, lineal ancestors, adopted child, and lineal issue thereof. To brothers, sisters and their descendants, wife or widow of son, or husband of daughter, 4%. To uncles, aunts or their descendants, 6%. To all others, 8%. When the estate is above $25,000 the above rates are multiplied as follows: $25,000 to $50,000, 2 times on excess; $50,000 to $100,000, 3 times on excess; $100,000 to $500,000, 4 times on excess; above $500,000, 5 times on excess. *Exemptions*—$15,000 to widow, $2,000 to lineal descendants or ancestors and husband, and lesser amount to other relatives, down to $100 exemptions to strangers in blood. *Obligations*—1, Last sickness and funeral expenses; 2, debts.

WYOMING—*Tax*—Class A. Husband, wife, parent, child, grandchild, adopted child or adopted parent, brother or sister—exempt, $10,000; $10,000 to $25,000, 2½%; to $50 000, 3%; to $250,000, 5%; to $1.000.000, 6%; over $1,000,000, 8%. Class B. Lineal ancestor or descendant, except those in Class A, lineal descendant of adopted child, lineal ancestors of adopted parent, wife or widow of son, husband of daughter—exempt $1,000—then 2%, 3%, 4%, 6%, 7% and 10%. Class C. Half-sister, nephew, niece, stepchild or step-parent,—exempt $1,000—then 3%, 5%, 7%, 8%, 9% and 10%. Class D. All other persons except Class E—exempt $1,000—then 5%, 6%, 7%, 8%, 9% and 10%. Class E. Gifts for charitable, educational or religious purposes exempt by law from taxation; trusts for charitable purposes; for city, town or public purposes within the State—entirely exempt. Deductions from gross estate to get net expenses of administration, attorney's fees, notes and liens owed by estate at date of death, expense of last sickness and funeral, and Court costs in settlement of probate. *Obligations*—1, Funeral expenses; 2, expenses of last sickness; 3, debts due U. S.; 4. State and town taxes; 5, wages up to $100; 6, other claims presented within six months; 7, all other debts. If property insufficient to pay all debts of any class, creditors of that class shall be paid ratably, and no payment shall be made to creditors of any class until all of preceding class or classes have been paid in full.

UNITED STATES—(See the Federal Estate Tax Chart on page 328.)

DISTRIBUTION OF INTESTATE'S PERSONAL ESTATE.

In many of the States the widow and children are entitled to receive a small portion of the estate, generally varying from $100 to $500, before the claims of creditors are paid. Aside from such exempt portion of the estate, the property to be distributed to widow or relatives is that remaining after all creditors' claims have been satisfied.

In all States where the deceased leaves a child or children, or descendants of any deceased child and no widow, the children or descendants take the entire estate, to the exclusion of all other relatives. The children take equal shares, and in most States the descendants of a deceased child together take the share of their parent, except where the descendants are all in equal degree to the deceased (all grandchildren, no children surviving), when they share equally and do not take their proportionate share of their parents' interest.

In most if not all of the States, the widow of a man who died without having made a will inherits one-third of the realty and one-half of the personalty, in all those cases in which she is not the sole blood heir.

The statutes covering inheritance of intestate estates vary in almost every State as to the rights of the several heirs. The safest course for those seeking information is to communicate with the Surrogate's or Orphan's Probate Court in the county where the estate lies.

MOVING PICTURE LAW AND CENSORSHIP.

The Motion Picture Commission of the State of New York was created by the Legislature in 1921, and entered on its duties on Aug. 1, that year. An office was opened at No. 220 West 42d Street, New York City, where a large part of the reviewing of films is done. There is also a regular office at Albany.

In the calendar year 1923 fines imposed and paid totaled $800; 2,881 eliminations were made in 586 films; 2,257 films were approved without eliminations; 301 permits were granted without examination; 2,843 original licenses were issued; 31,259 licenses for duplicate prints were issued; 29 films were condemned in toto, and 8,850 reels were examined.

Eliminations named in the above paragraph covered 2,260 scenes and 621 titles.

REASONS FOR ELIMINATIONS.

Reasons for eliminations applied to the following number of films: Indecent. 105; inhuman, 238; tending to incite to crime, 382; immoral or tending to corrupt morals, 126; sacrilegious, 29; obscene 26.

Of the films from which eliminations were made 282 were dramas; 159 , comedies; 62, comedy dramas; 72, serials; 8, news; 2, educational, and 1, cartoon.

Decisions of the commission can be appealed to the courts.

Receipts were—From licenses, $159,887; from permits, $1,253.50; from seals, $1,784.50; from re-screenings, $25; total, $162,950.

Expenditures totaled $80,717.43, of which $56,822.57 represented salaries and wages.

"The commission," says that body in its report to the Governor in 1923, "was directed by the statute to issue permits, without examination, for all films which had been exhibited prior to Aug. 1, 1921.

SERIAL NUMBERS FOR PERMITS.

"Each permit is given a serial number and a leader is delivered to the owner at the time the permit is issued to the applicant. If complaints are made concerning films for which permits have been issued, the commission may require the films to be produced and to be reviewed by the commission. In many instances this has been done.

"Permits are often issued for pictures which are scientific, religious or educational in their character, without examination.

"Licenses are only issued where an application has been made, the fee paid and the picture examined and approved. At the time a picture is approved a license is issued and a seal is delivered to the applicant which he is required to exhibit on the screen following the main title, which contains the following words:

" 'Licensed by the Motion Picture Commission of the State of New York.

" 'No. ——.'

"It is unlawful to exhibit to the public for an admission fee any film within the State, unless there is shown with it the identification matter referred to herein.

ADVERTISING CENSORED.

"At the time the application is made the applicants are also required to present to the commission for examination the advertising matter to be used in connection with the display of the film.

"This does not refer, of course, to the advertising matter which appears in publications, but to billboards and posters. The commission passes upon this advertising matter and approves or disapproves the same. The same standards are applied to advertising matter as to films.

"The statute directs the commission to issue licenses for pictures whenever an application is made, unless the film, or some part thereof, is *obscene, indecent, immoral, inhuman, sacrilegious* or is *of such a character that its exhibition would tend to corrupt morals or incite to crime.*

"The commission in applying the standards laid down by the statute has been very liberal in its judgment, feeling that owing to the large investments of producers and the short period during which the commission has been functioning in this State, it was only fair to the industry to give the producers the benefit of the doubt where there was any question as to whether the film, or any part of it, came within the inhibitions laid down in the statute."

1,000,000 A DAY AT MOVIES.

The commission estimates that 1,000,000 persons a day see moving pictures in New York State and 15,000,000 a day in the United States.

A demand for a regulation of the industry for the purpose of suppressing objectionable films has been set up in general that practically every civilized country, except some portions of South America, has some form of censorship for the regulation of the motion picture.

England, including its dependencies, such as Canada, Australia and India, has a much more strict censorship law than exists in any part of our country.

Italy, Germany, Poland, Czecho-Slovakia, the Philippine Islands, France, Spain, Russia and other European countries have some form of regulation.

The States of Kansas, Ohio, Virginia, Maryland, Pennsylvania and Florida also have statutes for regulating the motion picture.

Japan and Russia also have a form of censorship.

CENSORSHIP GROWING EVERYWHERE.

Nearly every city of any size in the United States has methods of regulation or censorship of the motion picture where there is no general State law, and in some instances where there are State laws.

The commission warns that bad or misleading films are made in the United States and sent abroad; and that propaganda films hostile to the American form of government are made abroad and sent here, and also are made here for use here.

THE SINGLE TAX.

(From a statement by the late Henry George, sr.)

Since in all our States we now levy some tax on the value of land, the single tax can be instituted by the simple and easy way of abolishing, one after another, all other taxes now levied and commensurately increasing the tax on land values until we draw upon that one source for all expenses of government, the revenue being divided between local government, State government, and the general government as the revenue from direct taxes is now divided between the local and State governments, or by a direct assessment being made by the general government upon the States and paid by them from revenues collected in this manner. The single tax we propose is not a tax on land, and therefore would not fall on the use of land and become a tax on labor.

In assessments under the single tax all values created by individual use or improvement would be excluded, and the only value taken into consideration would be the value attaching to the bare land by reason of neighborhood, etc., to be determined by impartial periodical assessments. Thus the farmer would have no more taxes to pay than the speculator who held a similar piece of land idle, and the man who on a city lot erected a valuable building would be taxed no more than the man who held a similar lot vacant. The single tax in short would call upon men to contribute to the public revenues not in proportion to what they produce or accumulate, but in proportion to the value of the natural opportunities they hold. It would compel them to pay just as much for holding land idle as for putting it to its fullest use. The single tax, therefore, would—

1st. Take the weight of taxation off the agricultural districts.

2d. Dispense with a multiplicity of taxes and a horde of tax-gatherers, simplify government, and greatly reduce its cost.

3d. Do away with the fraud, corruption and gross inequality inseparable from our present methods of taxation.

4th. Give us with all the world as perfect freedom of trade as now exists between the States of the Union, thus enabling our people to share through free exchanges in all the advantages which nature has given to other countries, or which the peculiar skill of other peoples has enabled them to attain. It would destroy the trusts, monopolies, and corruptions which are the outgrowths of the tariff.

5th. It would, on the other hand, by taking for public use that value which attaches to land by reason of the growth and improvement of the community, make the holding of land unprofitable to the mere owner and profitable only to the user. It would thus make it impossible for speculators and monopolists to hold natural opportunities unused or only half used, and would throw open to labor the illimitable field of employment which the earth offers to man.

WILLS.

A WILL OR TESTAMENT is a final disposition of a person's property, to take effect after his death. A codicil is an addition or alteration in such disposition. All persons are competent to make a will except idiots, persons of unsound mind, and infants. In many States a will of an unmarried woman is deemed revoked by her subsequent marriage. A nuncupative or unwritten will is one made *orally* by a soldier in active service, or by a mariner while at sea.

In most of the States a will must be in writing, signed by the testator, or by some person in his presence, and by his direction, and attested by witnesses, who must subscribe their names thereto in the *presence* of the testator. The form of wording a will is immaterial as long as its intent is clear.

Age at which persons may make wills is in most of the States 21 years. Males and females are competent to make wills at 18 years in the following States: California, Connecticut, Idaho, Montana, Nevada, North Dakota, Oklahoma, South Dakota, Utah and the Hawaiian Islands; and in the following States only females at 18 years: Colorado, District of Columbia, Illinois, Maryland, Missouri, Washington, Wisconsin.

In the following States persons of 18 years may dispose of personal property only: Alabama, Arkansas, Missouri, Oregon, Rhode Island, Virginia, West Virginia; in Georgia any one over 14 years and in Louisiana any one over 16 years, is competent to make a will. In Colorado, persons of 17 years, and in New York males of 18 and females of 16 years may dispose of personalty. Witnesses—Most of the States require two witnesses, except in Connecticut (3), Maine (3), Massachusetts (3), New Hampshire (3), South Carolina (3), Vermont (3).

LAW OF CONTRACTS.

(General Provisions of the Statutes.)

A Contract is an agreement of two or more parties by which reciprocal rights and obligations are created. One party acquires a right, enforceable at law, to some act or forbearance from the other, who is under a corresponding obligation to thus act or forbear.

Generally speaking, all contracts which are made between two competent parties, for a proper consideration, without fraud and for a lawful purpose, are enforceable at law.

To the creation of a valid contract there must be:

1. Precise agreement. The offer of one party must be met by an acceptance by the other, according to the terms offered.

2. There must be a consideration. Something of value must either be received by one party or given up by the other.

3. The parties must have capacity to contract. The contracts of insane persons are not binding upon them. Married women are now generally permitted to contract as though single, and bind their separate property. The contracts of an infant are generally not binding upon him unless ratified after attaining his majority. The contracts of an infant for "necessaries" may be enforced against him to the extent of the reasonable value of the goods furnished. It is incumbent upon one seeking to hold an infant to show that the goods furnished were in fact necessary.

4. The party's consent must not be the result of fraud or imposition, or it may be avoided by the party imposed upon.

5. The purpose of the parties must be lawful. Agreements to defraud others, to violate statutes, or whose aim is against public policy, such as to create monopolies or for the corrupt procurement of legislative or official action, are void, and cannot be enforced by any party thereto.

Contracts in general are equally valid whether made orally or in writing, with the exception of certain classes of contracts, which in most of the States are required to be attested by a note or memorandum in writing, signed by the party or his agent sought to be held liable. Some of the provisions which are adopted from the old **English Statute of Frauds** vary in some States, but the following contracts very generally are required to be attested by some writing:

Contracts by their terms not to be performed within a year from the making thereof.

A promise to answer for the debt, default, or miscarriage of another person.

Contracts made in consideration of marriage, except mutual promises to marry.

Promise of an executor or administrator to pay debts of deceased out of his own property.

Contracts for the creation of any interest or estate in land, with the exception of leases for a short term, generally one year.

Contracts for the sale of goods above a certain value, unless a portion of the price is paid or part of the goods delivered. The required value of the goods sold varies in different States from $30 to $200. In a number of the States no such provision exists.

In many of the States, declarations or conveyances of trust estates.

In many States, representations as to the character, credit, or responsibility of another person.

Partial performance of the contract is generally held to dispense with the necessity for a writing.

If the damages liable to result from the breaking of a contract are uncertain the parties may agree upon a sum to which either may be entitled as compensation for a breach, which will be upheld by the courts, but if the sum so fixed is not designed as a fair compensation to the party injured, but as a penalty to be inflicted, it will be disregarded.

A party is generally excused for the failure to perform what he has agreed only by the act of God or the public enemy, except in cases involving a personal element in the work to be performed, such as the rendition of services, when the death or sickness of the party contracting to perform them is a valid excuse

PROMISSORY NOTES AND CHECKS.

Negotiable instruments, the common forms of which are promissory notes, checks, or other bills of exchange, while having the same general requisites as other contracts, have certain distinct features. The purpose of the law is to facilitate as much as possible their free passing from hand to hand like currency. The assignment of an ordinary contract leaves the assignee in no different position for enforcing his rights than that of his assignor, but one who takes a negotiable instrument from a prior holder, without knowledge of any defences to it, before its maturity, and gives value for it, holds it free of any defences which might have been set up against his predecessors, except those defects that were inherent in the instrument itself.

To be negotiable an instrument must be in writing and signed by the maker (of a note) or drawer (of a bill or check).

It must contain an unconditional promise or order to pay a certain sum in money.

Must be payable on demand, or at a fixed future time.

Must be payable to order or to bearer.

An instrument is negotiated, that is completely transferred, so as to vest title in the purchaser, if payable to bearer, or indorsed simply with the name of the last holder, by mere delivery, if payable to order by the indorsement of the party to whom it is payable and delivery.

One who transfers an instrument by indorsement warrants to every subsequent holder that the instrument is genuine, that he has title to it, and that if not paid by the party primarily liable at maturity, he will pay it upon receiving due notice of non-payment.

To hold an indorser liable the holder upon its non-payment at maturity must give prompt notice of such non-payment to the indorser and that the holder looks to the indorser for payment. Such notice should be sent within twenty-four hours.

When an indorser is thus compelled to pay he may hold prior parties through whom he received the instrument liable to him by sending them prompt notice of non-payment upon receiving such notice from the holder.

The maker of a note is liable to pay it if unpaid at maturity without any notice from the holder or indorser.

Notice to one of several partners is sufficient notice to all.

When a check is certified by a bank the bank becomes primarily liable to pay it without notice of its non-payment, and when the holder of a check thus obtains its certification by the bank, the drawer of the check and previous indorsers are released from liability, and the holder looks to the bank for payment.

The drawer of a check that has been certified can stop payment on it at the bank after it has been certified.

A bona fide holder of a negotiable instrument, that is, a party who takes an instrument regular on its face, before its maturity, pays value for it and has no knowledge of any defences to it, is entitled to hold the party primarily liable responsible for its payment, despite any defences he may have against the party to whom he gave it, except such as rendered the instrument void in its conception. Thus, if the maker of a note received no value for it or was induced to issue it through fraud or imposition, they do not defeat the right of a bona fide holder to compel its payment from him.

ACKNOWLEDGMENT OF DEEDS.

AN ACKNOWLEDGMENT is the act of declaring the execution of an instrument before an officer authorized to certify to such declaration. The officer certifies to the fact of such declaration, and to his knowledge of the person so declaring. Conveyances or deeds of land to be entitled to be recorded must first be acknowledged before a proper officer. Most of the States nave forms of acknowledgments, which should be followed.

Acknowledgments may be taken in general by Notaries Public, Justices of the Peace, Judges or Clerks of Courts of the higher grades, Registers, Masters in Chancery, Court Commissioners, Town Clerks, Mayors and Clerks of incorporated cities, within their respective jurisdictions.

REQUISITES TO VALID DEED.

The requisites to a valid deed are the same in general as other contracts, but the appointment of an attorney to execute a deed for anotner person must in general be executed with the same formalities requisite to the deed itself.

SEALS or their equivalent (or whatever is intended as such) are necessary in Alaska, Connecticut, Delaware, District of Columbia, Florida, Idaho, Illinois Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New York, North Carolina, Oregon, Pennsylvania, South Carolina, Vermont, Virginia, West Virginia, Wisconsin, Wyoming. In almost all the States deeds by corporations must be under seal. FORMS are prescribed or indicated by the statutes of most of the States except Connecticut, Florida, Louisiana. SEPARATE ACKNOWLEDGMENT by wife is required in Alaska, Arkansas, Delaware, District of Columbia, Florida, Georgia, Idaho, Kentucky, Louisiana, Montana, Nevada, North Carolina, Oregon, Pennsylvania, South Carolina, Tennessee, Texas. ONE WITNESS to the execution of deeds is required in District of Columbia, Maine (customary), Maryland, Nebraska, New Jersey (usual), Oklahoma, Utah, Wyoming. TWO WITNESSES to the execution of deeds are required in Arkansas, Connecticut, Florida, Georgia, Louisiana, Michigan, Minnesota, New Hampshire, Ohio, Oregon, South Carolina, Texas, Vermont, Wisconsin.

THE BANKRUPTCY LAW.

(Extracts from the United States Bankruptcy Act of July 1, 1898, as amended by subsequent acts.)

SEC. 4. WHO MAY BECOME BANKRUPTS.—(*a*) Any person, except a municipal, railroad, insurance or banking corporation, shall be entitled to the benefits of this act as a voluntary bankrupt.

(*b*) Any natural person, except a wage-earner or a person engaged chiefly in farming or the tillage of the soil, any unincorporated company, and any moneyed, business, or commercial corporation, except a municipal, railroad, insurance, or banking corporation, owing debts to the amount of one thousand dollars or over, may be adjudged an involuntary bankrupt upon default or an impartial trial, and shall be subject to the provisions and entitled to the benefits of this act. The bankruptcy of a corporation shall not release its officers, directors, or stockholders, as such, from any liability under the laws of a State or Territory or of the United States. (30 Stat. 547. 32 Stat. 797. 36 Stat. 839.)

DUTIES OF BANKRUPTS.

SEC. 7. DUTIES OF BANKRUPTS.—(*a*) The bankrupt shall (1) attend the first meeting of his creditors, if directed by the court or a Judge thereof to do so, and the hearing upon his application for a discharge, if filed; (2) comply with all lawful orders of the court; (3) examine the correctness of all proofs of claims filed against his estate; (4) execute and deliver such papers as shall be ordered by the court; (5) execute to his trustee transfers of all his property in foreign countries; (6) immediately inform his trustee of any attempt, by his creditors or other persons, to evade the provisions of this act, coming to his knowledge; (7) in case of any person having to his knowledge proved a false claim against his estate, disclose that fact immediately to his trustee; (8) prepare, make oath to, and file in court within ten days, unless further time is granted, after the adjudication if an involuntary bankrupt, and with the petition if a voluntary bankrupt, a schedule of his property, showing the amount and kind of property, the location thereof, its money value, in detail, and a list of his creditors, showing their residences, if known (if unknown that fact to be stated), the amount due each of them, the consideration thereof, the security held by them, if any, and a claim for such exemptions as he may be entitled to, all in triplicate, one copy of each for the clerk, one for the referee, and one for the trustee; and (9) when present at the first meeting of his creditors, and at such other times as the court shall order, submit to an examination concerning the conducting of his business, the cause of his bankruptcy, his dealings with his creditors and other persons, the amount, kind, and whereabouts of his property, and, in addition, all matters which may affect the administration and settlement of his estate; but no testimony given by him shall be offered in evidence against him in any criminal proceedings, Provided, however, that he shall not be required to attend a meeting of his creditors, or at or for an examination at a place more than one hundred and fifty miles distant from his home or principal place of business, or to examine claims except when presented to him, unless ordered by the court, or a Judge thereof, for cause shown, and the bankrupt shall be paid his actual expenses from the estate when examined or required to attend at any place other than the city, town, or village of his residence.

ALLOWABLE DEBTS.

SEC. 63. DEBTS WHICH MAY BE PROVED.—(*a*) Debts of the bankrupt may be proved and allowed against his estate which are (1) a fixed liability as evidenced by a judgment or an instrument in writing, absolutely owing at the time of the filing of the petition against him, whether then payable or not, with any interest thereon which would have been recoverable at that date, or with a rebate of interest upon such as were not then payable and did not bear interest; (2) due as costs taxable against an involuntary bankrupt who was at the time of the filing of the petition against him plaintiff in a cause of action which would pass to the trustee and which the trustee declines to prosecute after notice; (3) founded upon a claim for taxable costs incurred in good faith by a creditor before the filing of the petition in an action to recover a provable debt; (4) founded upon an open account, or upon a contract express or implied; and (5) founded upon provable debts reduced to judgments after the filing of the petition and before the consideration of the bankrupt's application for a discharge, less costs incurred and interest accrued after the filing of the petition and up to the time of the entry of such judgments.

(*b*) Unliquidated claims against the bankrupt may, pursuant to applications to the court, be liquidated in such manner as it shall direct, and may thereafter be proved and allowed against his estate.

DEBTS NOT AFFECTED.

(SEC. 17. DEBTS NOT AFFECTED BY DISCHARGE.—a discharge in bankruptcy shall release a bankrupt from all of his provable debts, except such as (first) are due as a tax levied by the United States, the State, county, district, or municipality in which he resides; (second) are liabilities for obtaining property by false pretenses or false representation, or for wilful and malicious injuries to the person or property of another, or for alimony due or to become due, or for maintenance or support of wife or child, or for seduction of an unmarried female, or for breach of promise of marriage accompanied by seduction, or for criminal conversation; (third) have not been duly scheduled in time for proof and allowance, with the name of the creditor, if known to the bankrupt, unless such creditor had notice or actual knowledge of the proceedings in bankruptcy; or (fourth) were created by his fraud, embezzlement, misappropriation, or defalcation while acting as an officer or in any fiduciary capacity; or (fifth) are for wages due to workmen, clerks, travelling or city salesmen, or servants, which have been earned within three months before the date of commencement of the proceedings in bankruptcy; or (sixth) are due for moneys of an employee received or retained by his employer to secure the faithful performance by such employee of the terms of a contract of employment. (As amended by Act of January 7, 1922).

* Under seal, 10 years. † Unless a different rate is expressly stipulated. ‡ Under seal, 20 years. †† New York has legalized any rate of interest on call loans of $5,000 or upward on collateral security. § Six years from last item on either side. (*a*) Judgments, 6 per cent. (*b*) Justice Court judgments, 6 years. (*c*) Witnessed, 20 years. (*d*) Thirty-five years in Courts of Record, eighteen years in inferior courts. (*e*) Pawnbrokers, 4 per cent. per month. (*f*) Ceases to be a lien after the period unless revived. (*h*) Subject to renewal. (*j*) Not of record, 6 years. (*k*) No limit. (*l*) No statute. (*m*) Except witnessed promissory note, 14 years.

In New York a judgment ceases after 10 years to be a lien on real estate.

PENALTIES FOR USURY.

Penalties for usury differ in various States. California, first offense fine of $25 to $300, or prison, not over 6 months or both; subsequent offenses fine $100 to $500, or prison 6 months to year. Colorado, fine not over $300, and prison not over 6 months. Maine, Massachusetts (except on loans of less than $1,000), have no provisions on the subject. Loss of *principal and interest* is the penalty in Arkansas and New York. Loss of principal in Delaware and in Oregon entire debt.

Loss of interest in Alabama, Arizona, District of Columbia, Florida, Idaho, Illinois, Iowa, Louisiana, Michigan, Mississippi, Nebraska, New Jersey, North Carolina (double amount if paid), North Dakota (double amount if paid), Porto Rico, South Carolina, Virginia, Washington (double amount if paid), Wisconsin, and Wyoming. In Alaska, Montana, Oklahoma, Texas, Vermont, double the amount of interest collected. In Minnesota usurious contract is void. Borrower may lose both principal and interest. In South Dakota taking over 10% on real estate loan punishable by fine of not over $500.

Loss of excess of interest in Connecticut, Georgia, Indiana, Kansas, Kentucky, Maryland, Missouri, Nevada, Ohio, Pennsylvania, Tennessee, Vermont and West Virginia. Loss of principal and interest in Rhode Island, not over 30% of amount exceeding $50 or more than 5% per month for first six months of amount less than $50. In New Mexico, fine and forfeiture of double amount collected.

PAWNBROKING RATES ALLOWED BY LAW.

New York: 3 per cent. per month for six months, less than $100; 2 per cent. per month thereafter; 2 per cent. per month first six months, over $100, or 1 per cent. per month thereafter. All interest must be paid in full at the expiration of twelve months or new ticket issued, starting the transaction over again.

Massachusetts: On loans of $1 or less, 5 per cent. for the first week and 2 per cent. for each week thereafter; on loans of from $1 to $3, 4 per cent. for the first week, 2½ per cent. for each week thereafter; on loans of $3 to $10, 3 per cent. for the first week and 2 per cent. for each week thereafter; on loans of over $10 to $25, 1 per cent. a week; on loans over $25 to $100, 3 per cent. a month and each fraction thereof; on loans of over $100, 2 per cent. a month and each fraction thereof.

New Hampshire (Concord): On loans of $1 or less, 5 cents for the first week, 2 cents for each week thereafter; over $1 to $3, 4 per cent. for the first week and 2½ per cent. each week thereafter; over $3 to $10, 3 per cent. for the first week and 2 per cent. each week thereafter; over $10 to $25, 2½ per cent. for the first week, 2 per cent. each week thereafter; over $25 to $50, 2 per cent. for the first week and 1 per cent. each week, thereafter; over $50 to $100, 1½ per cent. for the first week, 1 per cent. each week thereafter; over $100, 1 per cent. per week.

Virginia: 10 per cent. per month on loans of $25 or less; 5 per cent. per month on loans of over $25 and not more than $100; 3 per cent. per month on loans over $100.

Rhode Island: 5 per cent. per month on loans of $50 or less first six months; 2½ per cent. per month on loans of $50 thereafter; 2½ per cent. per month on loans of more than $50.

Connecticut: 5 per cent. per month on loans up to $15; 3 per cent. per month on loans up to $50; 2 per cent. per month on loans over $50.

Vermont: 5 per cent. per month up to $50; 3 per cent. per month over $50. Law also allows a storage charge, agreement to be made by both parties.

New Mexico: 10 per cent. per month.

Ohio (Cincinnati): 10 per cent. per month on small loans. This State, in an act, section 6339-3, passed in the General Assembly May 14, 1921, and approved June 7, 1921, filed in the office of the Secretary of State, June 8, 1921, provides: "No licensee shall charge, receive, or demand in excess of 5 per cent. per month interest on any loans, or discount on any conditional purchase, up to and including the sum of $25, or in excess of 3 per cent. per month on loans or discounts above $25."

Texas (El Paso): 10 per cent. per month.

Indiana: 3½ per cent. per month.

Maine: 3½ per cent. per month.

Arizona: 4 per cent. per month.

Colorado: 3 per cent. per month.

Illinois: 3 per cent. per month.

Montana: 3 per cent. per month.

Oregon: 3 per cent. per month, with no charge less than $1.

Michigan: 3 per cent. per month, with no charge less than 50 cents.

Delaware: 8 per cent. per month and 3 per cent. per month extra, storage.

Pennsylvania: 5 per cent. per month storage, one-half per cent. interest per month.

Maryland: 2½ per cent. per month.

Georgia: 5 per cent. per month, and 25 cents for storage.

Wisconsin (Racine): General practice is to charge 10 per cent. per month. No law as to what shall be charged.

THE MONROE DOCTRINE.

The Secretary of State of the United States, Charles E. Hughes, in an address delivered before the American Bar Association at Minneapolis, Minn., Aug. 30, 1923, restated the genesis and scope of the Monroe Doctrine as it stands to-day, one hundred years after its promulgation. The Secretary's main points were:

The Monroe Doctrine had its dramatic setting as a striking and carefully formulated announcement, but it was in no sense a departure or something novel or strange engrafted upon American policy. The people of the United States had watched with deep sympathy the long struggle of our Southern neighbors for independence. The Republic of Colombia was recognized in 1822, the Government of Buenos Ayres and the States of Mexico and Chili, early in 1823. Deeply interested as we were in the development of republican institutions, the United States did not hesitate because of the political form of government and was the first to recognize the independent Empire of Brazil in May, 1824, and this was followed by the recognition of the Federation of Central American States in August of the same year.

Meanwhile, the Holy Alliance formed by the sovereigns of Austria, Russia, and Prussia had sought to enforce the divine right of kings against the progress of liberal principles. Joined by France, they undertook "to put an end to the system of representative government" and after France had proceeded accordingly to restore the rule of Ferdinand VII. in Spain, it was proposed to direct their efforts to the overthrowing of the new governments erected out of the old colonies of Spain in the Western Hemisphere. This was the situation 100 years ago—in August, 1823—when George Canning, British Foreign Secretary, wrote his celebrated letter to Richard Rush, American Minister in London, suggesting a joint declaration, in substance, that the recovery of the colonies by Spain was hopeless; that neither Great Britain nor the United States was aiming at the possession of any portion of these colonies; and that they could not see with indifference any portion of them transferred to any other power. Great Britain, however, had not at that time recognized the new States in Spanish America, and this made a point of distinction. Correspondence followed between Presidents Monroe and Jefferson and Madison, whose advice he sought. It was after mature deliberation by the President and his Cabinet, which contained not only John Quincy Adams, Secretary of State, but John C. Calhoun and William Wirt, that the American position was formally stated. It was deemed advisable to make a separate declaration of policy and this was formulated in President Monroe's message of December 2, 1823.

The doctrine is set forth in two paragraphs of this message. The first of these had a genesis distinct from the situation of the former colonies of Spain. It grew out of the question of Russian claims on the northwest coast of North America. The Russian Emperor had issued a ukase in 1821 prohibiting citizens of other nations from navigating and fishing within 100 Italian miles of the northwest coast of North America from Bering Straits to the fifty-first parallel of north latitude. Protests had followed. In July, 1823, Secretary Adams informed the Russian Minister that the United States "should contest the right of Russia to any territorial establishment on this continent, and that we should assume distinctly the principle that the American continents are no longer subjects for any new European colonial establishments." It was in connection with this pretension of Russia that President Monroe, after adverting to the proposal of arranging the respective rights and interests on the northwest coast by amicable negotiations, declared in his message:

"In the discussions to which this interest has given rise, and in the arrangements by which they may terminate, the occasion has been judged proper for asserting as a principle, in which the rights and interests of the United States are involved, that the American continents, by the free and independent condition which they have assumed and maintained are henceforth not to be considered as subjects for future colonization by any European powers."

The other paragraph of President Monroe's message bore upon the situation of our neighbors to the south, as follows:

"In the wars of the European powers in matters relating to themselves we have never taken any part, nor does it comport with our policy so to do. It is only when our rights are involved or seriously menaced that we resent injuries or make preparation for our defense. With the movements in this hemisphere we are, of necessity, more intimately connected, and by causes which must be obvious to all enlightened and impartial observers. The political system of the allied powers is essentially different in this respect from that of America. * * *

"We owe it, therefore, to candor and to the amicable relations existing between the United States and those powers to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety. With the existing colonies or dependencies of any European power we have not interfered and shall not interfere. But with the governments who have declared their independence and have maintained it and whose independence we have, on great consideration and on just principles, acknowledged, we could not view any interposition for the purpose of oppressing them or controlling in any other manner their destiny, by any European power, in any other light than as the manifestation of an unfriendly disposition toward the United States."

Properly understood, it is opposed (1) to any non-American action encroaching upon the political independence of American States under any guise and (2) to the acquisition in any manner of the control of additional territory in this hemisphere by any non-American power.

The Monroe Doctrine is not a legislative pronouncement; it has been approved by action of Congress, but it does not rest upon any Congressional sanction. It has had the implied indorsement of the treaty-making power in the reservations to the two Hague conventions of 1899 and 1907, but it is not defined by treaty and does not draw its force from any international agreement. It is not like a constitutional provision deriving its authority from the fact that it is a part of the organic law transcending and limiting executive and legislative power. It is not a part of international law, maintained by the consent of the civilized powers and alterable only at their will. It is a policy declared by the Executive of the United States and repeated in one form or another by Presidents and Secretaries of State in the conduct of our foreign relations. Its significance lies in the fact that in its essentials, as set forth by President Monroe and as forcibly and repeatedly, asserted by our responsible statesmen, it has been for 100 years, and continues to be, an integral part of our national thought and purpose, expressing a profound conviction which even the upheaval caused by the Great War, and our participation in that struggle upon European soil, has not uprooted or fundamentally changed.

The Monroe Doctrine is not a policy of aggression; it is a policy of self-defense. It was asserted at a time when the danger of foreign aggression in this hemisphere was very real, when the new American States had not yet established a firm basis of independent national life, and we were menaced by threats of old world powers directed against republican institutions. It still remains an assertion of the principle of national security.

As the policy embodied in the Monroe Doctrine is distinctively the policy of the United States, the Government of the United States reserves to itself its definition, interpretation and application. This Government has welcomed the recognition by other Governments of the fact and soundness of this policy and of the appropriateness of its application from time to time.

But the United States has not been disposed to enter into engagements which would have the effect of submitting to any other power or to any concert of powers the determination either of the occasions upon which the principles of the Monroe Doctrine shall be invoked or of the measures that shall be taken in giving it effect. As President Wilson observed: "The Monroe Doctrine was proclaimed by the United States on her own authority. It always has been maintained and always will be maintained upon her own responsibility."

This implies neither suspicion nor estrangement. It simply means that the United States is asserting a separate national right of self-defense, and that in the exercise of this right it must have an unhampered discretion.

The policy of the Monroe Doctrine does not infringe upon the independence and sovereignty of other American States. Misconception upon this point is the only disturbing influence in our relations with Latin American States. The declaration of our purpose to oppose what is inimical to our safety does not imply an attempt to establish a protectorate any more than a similar assertion by any one of the great southern republics of opposition to conduct on the part of any of the others endangering its security would aim at the establishment of a protectorate.

We utterly disclaim as unwarranted the observations which occasionally have been made implying a claim on our part to superintend the affairs of our sister republics, to assert an overlordship, to consider the spread of our authority beyond our own domain as the aim of our policy and to make our power the test of right in this hemisphere.

Such assertions do not express our national pur-

pose; they belie our sincere friendship; they are false to the fundamental principles of our institutions and of our foreign policy which has sought to reflect with rare exceptions, the ideals of liberty; they menace us by stimulating a distrust which has no real foundation. They find no sanction whatever in the Monroe Doctrine. There is room in this hemisphere, without danger of collision, for the complete recognition of that doctrine and the independent sovereignty of the Latin-American republics.

We have grown rich and powerful, but we have not outgrown the necessity, in justice to ourselves and without injustice to others, of safeguarding our future peace and security. By building the Panama Canal we have not only established a new and convenient highway of commerce but we have created exigencies and new conditions of strategy and defense. It is for us to protect that highway.

It may also be necessary for us at some time to build another canal between the Atlantic and the Pacific Oceans and to protect that. I believe that the sentiment of the American people is practically unanimous that in the interest of our national safety we could not yield to any foreign power the control of the Panama Canal or the approaches to it, or the obtaining of any position which would interfere with our right of protection or would menace the freedom of our communications.

So far as the region of the Caribbean Sea is concerned it may be said that if we had no Monroe Doctrine we should have to create one. * * * The United States has rights and obligations which that doctrine does not define. And in the unsettled condition of certain countries in the region of the Caribbean it has been necessary to assert these rights and obligations as well as the limited principles of the Monroe Doctrine. * * *

The disturbed conditions and revolutionary tendencies in some of the Central American republics have given great solicitude to the Government of the United States, and its efforts have been directed to the promotion of tranquillity and stability. This is in the interest of the maintenance of the unimpaired integrity and sovereignty of these republics.

It is apparent that the Monroe Doctrine does not stand in the way of Pan-American co-operation; rather it affords the necessary foundation for that co-operation in the independence and security of American States. * * *

With the passing of 100 years it remains a cherished policy, inimical to no just interest and deemed to be vitally related to our own safety and to the peaceful progress of the peoples of this hemisphere.

NOTES ON THE ABOVE TABLE.

The oldest signer when the signatures were affixed was Benjamin Franklin; the next oldest was Stephen Hopkins.

The first of the signers to die was John Morton; the second was Button G. Winnett.

The earliest known attempt in the American colonies of a declaration of independence was at a town meeting at Mendon, Worcester County, Mass., in 1773.

There was also the Mecklenburg, N. C., declaration for independence, May 31, 1775.

Declaration of Independence.

(Unanimously adopted, July 4, 1776; signed by 54 delegates, Aug. 2, 1776.)

WHEN, in the Course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth, the separate and equal station to which the Laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness. That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed, That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly all experience hath shewn, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same Object evinces a design to reduce them under absolute Despotism, it is their right, it is their duty, to throw off such Government, and to provide new Guards for their future security. Such has been the patient sufferance of these Colonies; and such is now the necessity which constrains them to alter their former Systems of Government. The history of the pre ent King of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute Tyranny over these States. To prove this, let Facts be submitted to a candid world.

He has refused his Assent to Laws, the most wholesome and necessary for the public good.

He has forbidden his Governors to pass Laws of immediate and pressing importance, unless suspended in their operation till his Assent should be obtained, and when so suspended, he has utterly neglected to attend to them.

He has refused to pass other Laws for the accommodation of large districts of people, unless those people would relinquish the right of Representation in the Legislature, a right inestimable to them and formidable to tyrants only.

He has called together legislative bodies at places unusual, uncomfortable, and distant from the depository of their public Records, for the sole purpose of fatiguing them into compliance with his measures.

He has dissolved Representative Houses repeatedly, for opposing with manly firmness his invasions on the rights of the people.

He has refused for a long time, after such dissolutions, to cause others to be elected; whereby the Legislative powers, incapable of Annihilation, have returned to the People at large for their exercise; the State remaining in the meantime exposed to all the dangers of invasion from without, and convulsions within.

He has endeavoured to prevent the population of these States; for that purpose obstructing the Laws for Naturalization of Foreigners; refusing to pass others to encourage their migration hither, and raising the conditions of new Appropriations of Lands.

He has obstructed the Administration of Justice, by refusing his Assent to Laws for establishing Judiciary powers.

He has made Judges dependent on his Will alone, for the tenure of their offices, and the amount and payment of their salaries.

He has erected a multitude of New Offices, and sent hither swarms of Officers to harass our people, and eat out their substance.

He has kept among us, in times of peace, Standing Armies, without the Consent of our legislature.

He has affected to render the Military independent of and superior to the Civil power.

He has combined with others to subject us to a jurisdiction foreign to our constitution and unacknowledged by our laws; giving his Assent to their Acts of pretended Legislation: For quartering large bodies of armed troops among us: For protecting them by a mock Trial from punishment for any Murders which they should commit on the Inhabitants of these States: For cutting off our Trade with all parts of the world: For imposing Taxes on us without our Consent: For depriving us in many cases of the benefits of Trial by Jury: For transporting us beyond Seas to be tried for pretended offences: For abolishing the free System of English Laws in a neighbouring Province, establishing therein an Arbitrary government, and enlarging its Boundaries so as to render it at once an example and fit instrument for introducing the same absolute rule into these Colonies: For taking away our Charters, abolishing our most valuable Laws and altering fundamentally the Forms of our Governments: For suspending our own Legislatures, and declaring themselves invested with power to legislate for us in all cases whatsoever.

He has abdicated Government here by declaring us out of his Protection and waging War against us.

He has plundered our seas, ravaged our Coasts, burnt our towns, and destroyed the lives of our people.

He is at this time transporting large Armies of foreign Mercenaries to complete the works of death, desolation and tyranny, already begun with circumstances of Cruelty & perfidy scarcely paralleled in the most barbarous ages, and totally unworthy the Head of a civilized nation.

He has constrained our fellow Citizens taken Captive on the high Seas to bear Arms against their Country, to become the executioners of their friends and Brethren, or to fall themselves by their Hands.

He has excited domestic insurrections amongst us, and has endeavoured to bring on the inhabitants of our frontiers, the merciless Indian Savages, whose known rule of warfare is an undistinguished destruction of all ages, sexes and conditions. In every stage of these Oppressions We have Petitioned for Redress in the most humble terms. Our repeated Petitions have been answered by repeated injury. A Prince, whose character is thus marked by every act which may define a Tyrant, is unfit to be the ruler of a free people. Nor have We been wanting in attentions to our British brethren. We have warned them from time to time of attempts by their legislature to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them by the ties of our common kindred to disavow these usurpations, which would inevitably interrupt our connections and correspondence. They too have been deaf to the voice of justice and of consanguinity. We must, therefore, acquiesce in the necessity, which denounces our Separation, and hold them, as we hold the rest of mankind, Enemies in War, in Peace Friends.

WE THEREFORE, the REPRESENTATIVES of the UNITED STATES OF AMERICA, IN GENERAL CONGRESS, Assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, do, in the Name, and by authority of the good People of these Colonies, solemnly PUBLISH and DECLARE, That these United Colonies are, and of Right ought to be FREE AND INDEPENDENT STATES; that they are Absolved from all Allegiance to the British Crown, and that all political connection between them and the State of Great Britain is and ought to be totally dissolved; and that as FREE AND INDEPENDENT STATES, they have full Power to levy War, conclude Peace, contract Alliances, establish Commerce, and to do all other Acts and Things which INDEPENDENT STATES may of right do. And for the support of this Declaration, with a firm reliance on the protection of Divine Providence, we mutually pledge to each other our Lives, our Fortunes, and our sacred Honor.

Constitution of the United States.

The Constitution originally consisted of a Preamble and seven Articles, and in that form was ratified by a convention of the States, Sept. 17, 1787. The Government under the Constitution was declared in effect on the first Wednesday in March, 1789. The signers of the original Constitution, by virtue of their membership in Congress, were:

GEO. WASHINGTON, *President and deputy from Virginia.* NEW HAMPSHIRE — John Langdon, Nicholas Gilman. MASSACHUSETTS—Nathaniel Gorham, Rufus King. CONNECTICUT—Wm. Saml. Johnson, Roger Sherman. NEW YORK—Alexander Hamilton. NEW JERSEY—Wil. Livingston, David Brearley, Wm. Patterson, Jona. Dayton. PENNSYLVANIA—B. Franklin, Robt. Morris, Thos. Fitzsimons, James Wilson, Thomas Mifflin, Geo. Clymer, Jared Ingersoll, Gouv. Morris. DELAWARE—Geo. Read, John Dickinson, Jaco. Broom, Gunning Bedford jun, Richard Basset. MARYLAND—James McHenry, Danl. Carroll, Dan. of St. Thos. Jenifer. VIRGINIA—John Blair, James Madison, Jr. NORTH CAROLINA—Wm. Blount, Hu. Williamson, Richd. Dobbs Spaight. SOUTH CAROLINA—J. Rutledge, Charles Pinckney, Charles Cotesworth Pinckney, Pierce Butler. GEORGIA—William Few, Abr. Baldwin. Attest: WILLIAM JACKSON, *Secretary.*

The Constitution was ratified by the thirteen original States in the following order:

Delaware, December 7, 1787 (yeas, 30), unanimous.

Pennsylvania, December 12, 1787, vote 43 to 23.

New Jersey, December 18, 1787 (yeas, 38), unanimous.

Georgia, January 2, 1788 (yeas, 26), unanimous.

Connecticut, January 9, 1788, vote 128 to 40.

Massachusetts, February 6, 1788, vote 187 to 168.

Maryland, April 28, 1788, vote 63 to 11.

South Carolina, May 23, 1788, vote 149 to 73.

New Hampshire, June 21, 1788, vote 57 to 46.

Virginia, June 26, 1788, vote 89 to 79.

New York, July 26, 1788, vote 30 to 27.

North Carolina, November 21, 1789, vote 194 to 77.

Rhode Island, May 29, 1790, vote 34 to 32.

(Vermont, by convention, ratified Jan. 10, 1791; and Congress, Feb. 18, 1791, admitted that State into the Union.)

THE CONSTITUTION.

PREAMBLE.

We, the people of the United States, in order to form a more perfect Union, establish justice, insure domestic tranquillity, provide for the common defence, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity, do ordain and establish this CONSTITUTION for the United States of America.

ARTICLE I.

Section 1—(Legislative powers; in whom vested:)

All legislative powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.

Section 2—(House of Representatives, how and by whom chosen. Qualifications of a Representative. Representatives and direct taxes, how apportioned. Enumeration. Vacancies to be filled. Power of choosing officers, and of impeachment.)

1. The House of Representatives shall be composed of members chosen every second year by the people of the several States, and the electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State Legislature.

2. No person shall be a Representative who shall not have attained to the age of twenty-five years and been seven years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State in which he shall be chosen.

3. Representatives and direct taxes shall be apportioned among the several States which may be included within this Union according to their respective numbers, which shall be determined by adding to the whole number of free persons, including those bound to service for a term of years, and excluding Indians not taxed, three-fifths of all other persons. The actual enumeration shall be made within three years after the first meeting of the Congress of the United States, and within every subsequent term of ten years, in such manner as they shall by law direct. The number of Representatives shall not exceed one for every thirty thousand, but each State shall have at least one Representative; and until such enumeration shall be made, the State of New Hampshire shall be entitled to choose 3; Massachusetts, 8; Rhode Island and Providence Plantations, 1; Connecticut, 5; New York, 6; New Jersey, 4; Pennsylvania, 8; Delaware, 1; Maryland, 6; Virginia, 10; North Carolina, 5; South Carolina, 5, and Georgia, 3.*

4. When vacancies happen in the representation from any State, the Executive Authority thereof shall issue writs of election to fill such vacancies.

5. The House of Representatives shall choose their Speaker and other officers, and shall have the sole power of impeachment.

Section 3—(Senators, how and by whom chosen. How classified. State Executive, when to make temporary appointments, in case, etc. Qualifications of a Senator. President of the Senate, his right to vote. President pro tem., and other officers of the Senate, how chosen. Power to try impeachments. When President is tried, Chief Justice to preside. Sentence.)

1. The Senate of the United States shall be composed of two Senators from each State, chosen by the Legislature thereof, for six years; and each Senator shall have one vote.

2. Immediately after they shall be assembled in consequence of the first election, they shall be divided as equally as may be into three classes. The seats of the Senators of the first class shall be vacated at the expiration of the second year, of the second class at the expiration of the fourth year, and of the third class at the expiration of the sixth year, so that one-third may be chosen every second year; and if vacancies happen by resignation, or otherwise, during the recess of the Legislature of any State, the Executive thereof may make temporary appointment until the next meeting of the Legislature, which shall then fill such vacancies.

3. No person shall be a Senator who shall not have attained to the age of thirty years, and been nine years a citizen of the United States, and who s all not, when elected, be an inhabitant of that State for which he shall be chosen.

4. The Vice President of the United States shall be President of the Senate, but shall have no vote unless they be equally divided.

5. The Senate shall choose their other officers, and also a President pro tempore, in the absence of the Vice President, or when he shall exercise the office of President of the United States.

6. The Senate shall have the sole power to try all impeachments. When sitting for that purpose, they shall be on oath or affirmation. When the President of the United States is tried, the Chief Justice shall preside; and no person shall be convicted without the concurrence of two-thirds of the members present.

7. Judgment of cases of impeachment shall not extend further than to removal from office, and disqualification to hold and enjoy any office of honor, trust, or profit under the United States; but the party convicted shall nevertheless be liable and subject to indictment, trial, judgment, and punishment, according to law.

Section 4—(Times, etc., of holding elections, how prescribed. One session in each year.)

1. The times, places, and manner of holding elections for Senators and Representatives shall be prescribed in each State by the Legislature thereof; but the Congress may at any time by law make or alter such regulations, except as to places of choosing Senators.

2. The Congress shall assemble at least once in every year, and such meeting shall be on the first Monday in December, unless they shall by law appoint a different day.

Section 5—(Membership, Quorum, Adjournments. Rules. Power to punish or expel. Journal. Time of adjournments, how limited, etc.)

1. Each House shall be the judge of the elections, returns, and qualifications of its own members, and a majority of each shall constitute a quorum to do business; but a smaller number may adjourn from day to day, and may be authorized to compel the attendance of absent members in such manner and under such penalties as each House may provide.

2. Each House may determine the rules of its proceedings, punish its members for disorderly behavior, and with the concurrence of two-thirds expel a member.

3. Each House shall keep a journal of its proceedings, and from time to time publish the same, excepting such parts as may in their judgment require secrecy; and the yeas and nays of the members of

* See Article XIV., Amendments.

either House on any question shall, at the desire of one-fifth of those present, be entered on the journal.

4. Neither House, during the session of Congress shall, without the consent of the other, adjourn for more than three days, nor to any other place than that in which the two Houses shall be sitting.

Section 6—(Compensation. Privileges. Disqualification in certain cases.)

1. The Senators and Representatives shall receive a compensation for their services, to be ascertained by law, and paid out of the Treasury of the United States. They shall in all cases, except treason, felony, and breach of the peace, be privileged from arrest during their attendance at the session of their respective Houses, and in going to and returning from the same; and for any speech or debate in either House they shall not be questioned in any other place

2. No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States which shall have been created, or the emoluments whereof shall have been increased during such time; and no person holding any office under the United States shall be a member of either House during his continuance in office.

Section 7—(House to originate all revenue bills. Veto. Bill may be passed by two-thirds of each House, notwithstanding, etc. Bill, not returned in ten days, to become a law. Provisions as to orders, concurrent resolutions, etc.)

1. All bills for raising revenue shall originate in the House of Representatives, but the Senate may propose or concur with amendments, as on other bills.

2. Every bill which shall have passed the House of Representatives and the Senate shall, before it becomes a law, be presented to the President of the United States; if he approve, he shall sign it, but if not, he shall return it, with his objections, to that House in which it shall have originated, who shall enter the objections at large on their journal, and proceed to reconsider it. If after such reconsideration two-thirds of that House shall agree to pass the bill, it shall be sent, together with the objections, to the other House, by which it shall likewise be reconsidered; and if approved by two-thirds of that House it shall become a law. But in all such cases the votes of both Houses shall be determined by yeas and nays, and the names of the persons voting for and against the bill shall be entered on the journal of each House respectively. If any bill shall not be returned by the President within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law in like manner as if he had signed it, unless the Congress by their adjournment prevent its return; in which case it shall not be a law.

3. Every order, resolution, or vote to which the concurrence of the Senate and House of Representatives may be necessary (except on a question of adjournment) shall be presented to the President of the United States; and before the same shall take effect shall be approved by him, or being disapproved by him, shall be repassed by two-thirds of the Senate and the House of Representatives, according to the rules and limitations prescribed in the case of a bill.

Section 8—(Powers of Congress.)

1. The Congress shall have power:

To lay and collect taxes, duties, imposts, and excises, to pay the debts and provide for the common defence and general welfare of the United States; but all duties, imposts, and excises shall be uniform throughout the United States.

2. To borrow money on the credit of the United States.

3. To regulate commerce with foreign nations, and among the several States, and with the Indian tribes.

4. To establish an uniform rule of naturalization and uniform laws on the subject of bankruptcies throughout the United States.

5. To coin money, regulate the value thereof, and of foreign coin, and fix the standard of weights and measures.

6. To provide for the punishment of counterfeiting the securities and current coin of the United States.

7. To establish post-offices and post-roads.

8. To promote the progress of science and useful arts by securing for limited times to authors and inventors the exclusive rights to their respective writings and discoveries.

9. To constitute tribunals inferior to the Supreme Court.

10. To define and punish piracies and felonies committed on the high seas, and offences against the law of nations.

11. To declare war, grant letters of marque and reprisal, and make rules concerning captures on land and water.

12. To raise and support armies, but no appropriation of money to that use shall be for a longer term than two years.

13. To provide and maintain a navy.

14. To make rules for the government and regulation of the land and naval forces.

15. To provide for calling forth the militia to execute the laws of the Union, suppress insurrections, and repel invasions.

16. To provide for organizing, arming, and disciplining the militia, and for governing such part of them as may be employed in the service of the United States, reserving to the States respectively the appointment of the officers, and the authority of training the militia according to the discipline prescribed by Congress.

17. To exercise exclusive legislation in all cases whatsoever over such district (not exceeding ten miles square) as may, by cession of particular States and the acceptance of Congress, become the seat of Government of the United States, and to exercise like authority over all places purchased by the consent of the Legislature of the State in which the same shall be, for the erection of forts, magazines, arsenals, dry-docks, and other needful buildings.

18. To make all laws which shall be necessary and proper for carrying into execution the foregoing powers and all other powers vested by this Constitution in the Government of the United States, or in any department or officer thereof.

Section 9—(Provision as to migration or importation of certain persons. Habeas Corpus. Bills of attainder, etc. Taxes, how apportioned. No export duty. No commercial preference. Money, how drawn from Treasury, etc. No titular nobility. Officers not to receive presents, etc.)

1. The migration or importation of such persons as any of the States now existing shall think proper to admit shall not be prohibited by the Congress prior to the year one thousand eight hundred and eight, but a tax or duty may be imposed on such importation, not exceeding ten dollars for each person.

2. The privilege of the writ of habeas corpus shall not be suspended, unless when in cases of rebellion or invasion the public safety may require it.

3. No bill of attainder or ex post facto law shall be passed.

4. No capitation or other direct tax shall be laid, unless in proportion to the census or enumeration hereinbefore directed to be taken.

5. No tax or duty shall be laid on articles exported from any State.

6. No preference shall be given by any regulation of commerce or revenue to the ports of one State over those of another, nor shall vessels bound to or from one State be obliged to enter, clear, or pay duties in another.

7. No money shall be drawn from the Treasury but in consequence of appropriations made by law; and a regular statement and account of the receipts and expenditures of all public money shall be published from time to time.

8. No title of nobility shall be granted by the United States. And no person holding any office of profit or trust under them shall, without the consent of the Congress, accept of any present, emolument, office, or title of any kind whatever from any king, prince, or foreign state.

Section 10—(States prohibited from the exercise of certain powers.)

1. No State shall enter into any treaty, alliance, or confederation, grant letters of marque and reprisal, coin money, emit bills of credit, make anything but gold and silver coin a tender in payment of debts, pass any bill of attainder, ex post facto law, or law impairing the obligation of contracts, or grant any title of nobility.

2. No State shall, without the consent of the Congress, lay any impost or duties on imports or exports, except what may be absolutely necessary for executing its inspection laws, and the net produce of all duties and imposts, laid by any State on imports or exports, shall be for the use of the Treasury of the United States; and all such laws shall be subject to the revision and control of the Congress.

3. No State shall, without the consent of Congress, lay any duty of tonnage, keep troops or ships of war in time of peace, enter into agreement or compact with another State, or with a foreign power, or engage in war, unless actually invaded, or in such imminent danger as will not admit of delay.

ARTICLE II.

Section 1—(President; his term of office. Electors of President; number and how appointed. Electors to vote on same day. Qualification of President. On whom his duties devolve in case of his removal, death, etc. President's compensation. His oath of office.)

1. The Executive power shall be vested in a President of the United States of America. He shall hold his office during the term of four years, and, together with the Vice-President, chosen for the same term, be elected as follows:

2. Each State shall appoint, in such manner as the Legislature thereof may direct, a number of electors

equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative or person holding an office of trust or profit under the United States shall be appointed an elector.

3. The electors shall meet in their respective States and vote by ballot for two persons, of whom one at least shall not be an inhabitant of the same State with themselves. And they shall make a list of all the persons voted for, and of the number of votes for each, which list they shall sign and certify and transmit, sealed, to the seat of the Government of the United States, directed to the President of the Senate. The President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates, and the votes shall then be counted. The person having the greatest number of votes shall be the President, if such number be a majority of the whole number of electors appointed, and if there be more than one who have such a majority, and have an equal number of votes, then the House of Representatives shall immediately choose by ballot one of them for President; and if no person have a majority, then from the five highest on the list the said House shall in like manner choose the President. But in choosing the President, the vote shall be taken by States, the representation from each State having one vote. A quorum, for this purpose, shall consist of a member or members from two-thirds of the States, and a majority of all the States shall be necessary to a choice. In every case, after the choice of the President, the person having the greatest number of votes of the electors shall be the Vice President. But if there should remain two or more who have equal votes, the Senate shall choose from them by ballot the Vice President.*

4. The Congress may determine the time of choosing the electors and the day on which they shall give their votes, which day shall be the same throughout the United States.

5. No person except a natural born citizen, or a citizen of the United States at the time of the adoption of this Constitution, shall be eligible to the office of President; neither shall any person be eligible to that office who shall not have attained to the age of thirty-five years and been fourteen years a resident within the United States.

6. In case of the removal of the President from office, or of his death, resignation, or inability to discharge the powers and duties of the said office, the same shall devolve on the Vice President, and the Congress may by law provide for the case of removal, death, resignation, or inability, both of the President and Vice President, declaring what officer shall then act as President, and such officer shall act accordingly until the disability be removed or a President shall be elected.

7. The President shall, at stated times, receive for his services a compensation which shall neither be increased nor diminished during the period for which he shall have been elected, and he shall not receive within that period any other emolument from the United States, or any of them.

8. Before he enter on the execution of his office he shall take the following oath or affirmation:

"I do solemnly swear (or affirm) that I will faithfully execute the office of President of the United States, and will, to the best of my ability, preserve, protect, and defend the Constitution of the United States."

Section 2—(President to be Commander-in-Chief. He may require opinions of Cabinet Officers, etc., may pardon. Treaty-making power. Nomination of certain officers. When President may fill vacancies.)

1. The President shall be Commander-in-Chief of the Army and Navy of the United States, and of the militia of the several States when called into the actual service of the United States; he may require the opinion, in writing, of the principal officer in each of the executive departments upon any subject relating to the duties of their respective offices, and he shall have power to grant reprieves and pardons for offences against the United States except in cases of impeachment.

2. He shall have power, by and with the advice and consent of the Senate to make treaties, provided two-thirds of the Senators present concur; and he shall nominate and by and with the advice and consent of the Senate shall appoint ambassadors, other public ministers and consuls, judges of the Supreme Court, and all other officers of the United States whose appointments are not herein otherwise provided for, and which shall be established by law: but the Congress may by law vest the appointment of such inferior officers as they think proper in the President alone, in the courts of law, or in the heads of departments.

3. The President shall have power to fill up all vacancies they may happen during the recess of the Senate by granting commissions, which shall expire at the end of their next session.

Section 3—(President shall communicate to Congress. He may convene and adjourn Congress, in case of disagreement, etc. Shall receive Ambassadors, execute laws, and commission officers.)

He shall from time to time give to the Congress information of the state of the Union, and recommend to their consideration such measures as he shall judge necessary and expedient; he may, on extraordinary occasions, convene both Houses, or either of them, and in case of disagreement between them with respect to the time of adjournment, he may adjourn them to such time as he shall think proper; he shall receive ambassadors and other public ministers; he shall take care that the laws be faithfully executed, and shall commission all the officers of the United States.

Section 4—(All civil offices forfeited for certain crimes.)

The President, Vice President, and all civil officers of the United States shall be removed from office on impeachment for and conviction of treason, bribery or other high crimes and misdemeanors.

ARTICLE III.

Section 1—(Judicial powers. Tenure. Compensation.)

The judicial power of the United States shall be vested in one Supreme Court, and in such inferior courts as the Congress may from time to time ordain and establish. The judges, both of the Supreme and inferior courts, shall hold their offices during good behavior, and shall at stated times receive for their services a compensation which shall not be diminished during their continuance in office.

Section 2—(Judicial power; to what cases it extends. Original jurisdiction of Supreme Court. Appellate. Trial by jury, etc. Trial, where.)

1. The judicial power shall extend to all cases in law and equity arising under this Constitution, the laws of the United States, and treaties made, or which shall be made, under their authority; to all cases affecting ambassadors, other public ministers and consuls; to all cases of admiralty and maritime jurisdiction; to controversies to which the United States shall be a party; to controversies between two or more States, between a State and citizens of another State, between citizens of different States, between citizens of the same State claiming lands under grants of different States, and between a State, or the citizens thereof, and foreign states, citizens, or subjects.

2. In all cases affecting ambassadors, other public ministers, and consuls, and those in which a State shall be party, the Supreme Court shall have original jurisdiction. In all the other cases before mentioned the Supreme Court shall have appellate jurisdiction both as to law and fact, with such exceptions and under such regulations as the Congress shall make.

3. The trial of all crimes, except in cases of impeachment, shall be by jury, and such trial shall be held in the State where the said crimes shall have been committed; but when not committed within any State the trial shall be at such place or places as the Congress may by law have directed.

Section 3—(Treason defined. Proof of. Punishment of.)

1. Treason against the United States shall consist only in levying war against them, or in adhering to their enemies, giving them aid and comfort. No person shall be convicted of treason unless on the testimony of two witnesses to the same overt act, or on confession in open court.

2. The Congress shall have power to declare the punishment of treason, but no attainder of treason shall work corruption of blood or forfeiture except during the life of the person attained.

ARTICLE IV.

Section 1—(Each State to give credit to the public acts, etc., of every other State.)

Full faith and credit shall be given in each State to the public acts, records, and judicial proceedings of every other State. And the Congress may by general laws prescribe the manner in which such acts, records, and proceedings shall be proved, and the effect thereof.

Section 2—(Privileges of citizens of each State. Fugitives from justice to be delivered up. Persons held to service having escaped, to be delivered up.)

1. The citizens of each State shall be entitled to all privileges and immunities of citizens in the several States.

2. A person charged in any State with treason, felony, or other crime, who shall flee from justice, and be found in another State, shall, on demand of the

* This clause is superseded by Article XII., Amendments.

Executive authority of the State from which he fled, be delivered up, to be removed to the State having jurisdiction of the crime.

3. No person held to service or labor in one State, under the laws thereof, escaping into another shall in consequence of any law or regulation therein, be discharged from such service or labor, but shall be delivered up on claim of the party to whom such service or labor may be due.

Section 3—(Admission of new States. Power of Congress over territory and other property.)

1. New States may be admitted by the Congress into this Union; but no new State shall be formed or erected within the jurisdiction of any other State, nor any State be formed by the junction of two or more States, or parts of States, without the consent of the Legislatures of the States concerned, as well as of the Congress.

2. The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States; and nothing in this Constitution shall be so construed as to prejudice any claims of the United States, or of any particular State.

Section 4—(Republican form of government guaranteed. Each State to be protected.)

The United States shall guarantee to every State in this Union a Republican form of government, and shall protect each of them against invasion, and, on application of the Legislature, or of the Executive (when the Legislature cannot be convened), against domestic violence.

ARTICLE V.

(Constitution; how amended. Proviso.)

The Congress, whenever two-thirds of both Houses shall deem it necessary, shall propose amendments to this Constitution, or, on the application of the Legislatures of two-thirds of the several States, shall call a convention for proposing amendments, which, in either case, shall be valid to all intents and purposes, as part of this Constitution, when ratified by the Legislatures of three-fourths of the several States, or by conventions in three-fourths thereof, as the one or the other mode of ratification may be proposed by the Congress; provided that no amendment which may be made prior to the year one thousand eight hundred and eight shall in any manner affect the first and fourth clauses in the Ninth Section of the First Article; and that no State, without its consent shall be deprived of its equal suffrage in the Senate.

ARTICLE VI.

(Certain debts, etc., declared valid. Supremacy of Constitution, treaties, and laws of the United States. Oath to support Constitution, by whom taken. No religious test.)

1. All debts contracted and engagements entered into before the adoption of this Constitution shall be as valid against the United States under this Constitution as under the Confederation.

2. This Constitution and the laws of the United States which shall be made in pursuance thereof and all treaties made, or which shall be made, under the authority of the United States, shall be the supreme law of the land, and the judges in every State shall be bound thereby, anything in the Constitution or laws of any State to the contrary notwithstanding.

3. The Senators and Representatives before mentioned, and the members of the several State Legislatures, and all executive and judicial officers, both of the United States and of the several States, shall be bound by oath or affirmation to support this Constitution; but no religious test shall ever be required as a qualification to any office or public trust under the United States.

ARTICLE VII.

(What ratification shall establish Constitution.)

The ratification of the Conventions of nine States shall be sufficient for the establishment of this Constitution between the States so ratifying the same.

AMENDMENTS TO THE CONSTITUTION OF THE UNITED STATES.

Opposition in and out of Congress to the Constitution, in that it was not sufficiently explicit as to individual and State rights, led to an agreement to submit to the people immediately after the adoption of the Constitution a number of safeguarding amendments.

And so it was that the First Congress, at its first session, at the City of New York, Sept. 25, 1789, adopted and submitted to the States twelve proposed amendments—A Bill of Rights, as it was then and ever since has been popularly called. Ten of these amendments (now commonly known as one to ten inclusive, but in reality three to twelve inclusive) were ratified by the States as follows—New Jersey, Nov. 20, 1789; Maryland, Dec. 19, 1789; North Carolina, Dec. 22, 1789; South Carolina, Jan. 19, 1790; New Hampshire, Jan. 25, 1790; Delaware, Jan. 28, 1790; Pennsylvania, March 10, 1790; New York, March 27, 1790; Rhode Island, June 15, 1790; Vermont, Nov. 3, 1791; Virginia, Dec. 15, 1791. No ratification by Connecticut, Georgia or Massachusetts is on record. These original ten ratified amendments appear in order below as Articles I. to X. inclusive.

The two of the original proposed amendments which were not ratified by the necessary number of States related, the first to apportionment of Representatives; the second, to compensation of members of Congress.

TITLES OF NOBILITY.

Congress, May 1, 1810, proposed to the States the following Amendment to the Constitution:

"If any citizen of the United States shall accept, claim, receive, or retain any title of nobility or honor, or shall, without the consent of Congress, accept and retain any present, pension, office, or emolument of any kind whatever, from any emperor, king, prince or foreign power, such person shall cease to be a citizen of the United States and shall be incapable of holding any office of trust or profit under them or either of them."

It was ratified by Maryland, Dec. 25, 1810; Kentucky, Jan. 31, 1811; Ohio, Jan. 31, 1811; Delaware, Feb. 2, 1811; Pennsylvania, Feb. 6, 1811; New Jersey, Feb. 13, 1811; Vermont, Oct. 24, 1811; Tennessee, Nov. 21, 1811; Georgia, Dec. 13, 1811; North Carolina, Dec. 23, 1811; Massachusetts, Feb. 27, 1812; New Hampshire, Dec. 10, 1812.

Rejected by New York (Senate), March 12, 1811; Connecticut, May session, 1813; South Carolina, approved by Senate Nov. 28, 1811, reported unfavorably in House and not further considered Dec. 7, 1813; Rhode Island, Sept. 15, 1814.

The amendment failed, not having sufficient ratifications.

AMENDMENT TO PROHIBIT THE CONSTITUTION FROM ABOLISHING OR INTERFERING WITH SLAVERY.

(The Corwin Amendment.)

Congress, March 2, 1861, proposed to the States the following Amendment to the Constitution:

"No amendment shall be made to the Constitution which will authorize or give to Congress the power to abolish or interfere, within any State, with the domestic institutions thereof, including that of persons held to labor or service by the laws of said State."

Ratified by Ohio, March 13, 1861; Maryland, Jan. 10, 1862; Illinois (convention), Feb. 14, 1862. The amendment failed, for lack of a sufficient number of ratifications.

THE TEN ORIGINAL AMENDMENTS.

(They were declared in force December 15, 1791.)

ARTICLE I.

Religious Establishment Prohibited. Freedom of Speech, of the Press, and Right to Petition.

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech or of the press; or the right of the people peaceably to assemble and to petition the Government for a redress of grievances.

ARTICLE II.

Right to Keep and Bear Arms.

A well-regulated militia being necessary to the security of a free State, the right of the people to keep and bear arms shall not be infringed.

ARTICLE III.

No Soldier to Be Quartered in Any House, Unless, Etc.

No soldier shall, in time of peace, be quartered in any house without the consent of the owner, nor in time of war but in a manner to be prescribed by law.

ARTICLE IV.

Right of Search and Seizure Regulated.

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no warrants shall issue but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

ARTICLE V.
Provisions Concerning Prosecution, Trial and Punishment.—Private Property Not to Be Taken for Public Use, Without Compensation.

No person shall be held to answer for a capital or other infamous crime unless on a presentment or indictment of a Grand Jury, except in cases arising in the land or naval forces, or in the militia, when in actual service, in time of war or public danger; nor shall any person be subject for the same offense to be twice put in jeopardy of life or limb; nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use without just compensation.

ARTICLE VI.
Right to Speedy Trial, Witnesses, Etc.

In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed, which districts shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the assistance of counsel for his defense.

ARTICLE VII.
Right of Trial by Jury.

In suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by a jury shall be otherwise re-examined in any court of the United States than according to the rules of the common law.

ARTICLE VIII.
Excessive Bail or Fines and Cruel Punishment Prohibited.

Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted.

ARTICLE IX.
Rule of Construction of Constitution.

The enumeration in the Constitution of certain rights shall not be construed to deny or disparage others retained by the people.

ARTICLE X.
Rights of States Under Constitution.

The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.

ARTICLE XI.
Judicial Powers Construed.

The following amendment was proposed to the Legislatures of the several States by the Third Congress on the 5th of March, 1794, and was declared to have been ratified in a message from the President to Congress, dated Jan. 8, 1798.

The judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States, by citizens of another State, or by citizens or subjects of any foreign state.

ARTICLE XII.
Manner of Choosing President and Vice-President.

The following amendment was proposed to the Legislatures of the several States by the Eighth Congress on the 12th of December, 1803, and was declared to have been ratified in a proclamation by the Secretary of State, dated September 25, 1804. It was ratified by all the States except Connecticut, Delaware, Massachusetts, and New Hampshire.
